Achieving the Best through Excellent Services, Reaching Across the Archipelago

A Bank with the Best Growth in Micro, Small, and Medium Enterprise Business in Indonesia

Bank BRI's consistency in advancing Indonesia's economy through providing quality banking, financial and other services, as well as its unwavering focus on micro, small, and medium enterprise segments, whilst growing other business segments, supported by an extensive operational network covering the entire country, yielded excellent achievements.

Bank BRI is able to deliver the best MSME loan growth, increasing its total assets to Rp626,18 trillion and total loans rose to Rp448.35 trillion, while maintaining non performing loan at 1.63%. These results contributed to the increase in net profit, which grew by 14.3% to Rp 21.35 trillion.

Bank BRI is committed to optimize synergy in all its lines of business, to generate quality and maintain sustainable growth.

Consistently Growing the Business with the Support of Professional Human Resources

To support business developments in the Micro, Small, and Medium Enterprises segment, BRI carried out substantial human resources recruitment, the objective being to enlarge BRI's loan disbursement capacity.

MSME business development efforts are combined with competency enhancements of employees and superior banking service educational programs, which have successfully increased the volume of micro

customers, outstanding loans, migration of micro KUR borrowers to micro commercial loans, while robustly maintaining micro loans quality.

Balancing the Growth of Other Business Segments

Throughout 2013, BRI successfully carried out loan expansion through its other segments, as well as growing other financial services, harmoniously and in line with loan expansion in the MSME segment.

Consumer segment, corporate loan for SOEs and non-SOEs as well as other financial services (such as e-banking, trade finance, remittances and capital market services) continued to grow alongside Indonesia's banking industry.

Expanding Operating Network across the Nation

In 2013, BRI added 756 operating units, consisting of Branch Offices, Sub-Branch Offices, Cash Offices, BRI Units, and Teras BRI. BRI also broadened its e-channel network with an addition of 45,329 network.

BRI has grown into the largest commercial bank, with a vast presence in

Indonesia. It is supported by 9,808 operating units and 104,570 extensive e-channel networks, integrated and able to provide services from any location, in real-time online. An advanced information technology system allows well-managed direct interaction with customers. With enhanced accuracy, BRI

is able to maintain the trust and satisfaction of its customers, currently totaling 48 million accounts.

Such wide-range facilities enable BRI to offer banking products and services, as needed, for all customers, from any segment, anytime and anywhere.

Loan Expansion Supported by Quality Funding and Strong Capital Structure

Backed by its vast customer base, amounting to 48 million accounts, BRI has been able to generate substantial third-party funds to support its loan expansion. Loan to Deposit Ratio was at a level of 88.54%, while low-cost funds occupied around 60% of composition, with a stable interest expense.

Aside from third-party funds, investors' trust, arising from proven good implementation of corporate governance, has also enabled BRI to secure long-term financing through the issuance of Global Bonds in a nominal sum of US\$500 million, with 5 year tenor and 2.95% coupon.

BRI is also equipped with a strong capital structure. By the end of 2013, its Capital Adequacy Ratio was recorded at 16.99%, comprising 95% of Tier I capital, or 16.13% of Tier I CAR.

Maintaining Quality Growth of Assets by Improving the Quality of GCG Implementation

BRI has succeeded in putting in place sound Corporate Governance implementation, reliable Information Technology infrastructure, and enhanced competency and integrity of human resources, all as a solid foundation for sustainable growth.

The fundamental principles of GCG are applied consistently in loan channeling processes at BRI, assuring transparent, planned, responsible, accountable, and focused efforts to maximize competitive advantages.

As a result, BRI has been able to grow total assets through quality loan expansion, reflected by improvement in total NPL.

“ Strengthening Customer Base ”

Market penetration with TerasBRI and TerasBRI Mobile has extended BRI's outreach throughout the country, aiming to strengthen customer base by providing banking education and information.

Management Reports

Foreword from the President Commissioner

“BRI has delivered outstanding performance across indicators, including the quality growth of assets, net income increase, and the Bank’s success in supporting the progress of micro, small, and medium enterprises throughout the nation.”

Bunasor Sanim
President Commissioner/
Independent Commissioner

Assalamualaikum Wr. Wb.

First let us express our gratitude to the Almighty Allah SWT for we have been graced by abundant blessings that allowed the Bank to journey through 2013 and deliver excellent results.

As we know full well, the macro-economic condition remained volatile in 2013, influenced by a number of internal and external factors. These included an economic slowdown of Indonesia's strategic trading partners, with China, Japan, and the United States stalling out; prices of global commodities dropped, and the progress of the United States' economic recovery was not entirely favorable. On the other hand, internally we witnessed trade balance and balance of payments showing a deficit, the Rupiah sliding downwards, looming inflation and sluggish credit growth. Meanwhile, competition for funding became ever more intense.

Despite the above condition, the dedication and hard work of BRI's management and all employees became a solid foothold for the Bank, which performance in 2013 was more than satisfying. Bank BRI performance in 2013 showed a strong increase compared to the previous year, as evidenced by the growth of consolidated key financial ratios in 2013 such as total assets grew 13.58% against the December 2012 position, loans with 23.8% growth, third party funds up by 12.0%, net interest income rose by 20.9%, income after tax amounting to Rp21.35 trillion, and at 1.63% the non performing loans improved from 1.83% in 2012.

Such achievements were made possible by skilled human resources, a reliable information technology system, as well as the extensive reach of the Bank's office network. The Bank added 756 operating units, consisting of 7 Branch Offices, 20 Sub-Branch Offices, 144 BRI Units, 36 Cash Offices, 549 TerasBRI, and 1 Audit Office, while mobile banking services grew by 45,329 units. Bank BRI continually strives to improve its customer services to become "The Biggest Payment Bank in Indonesia", ready to serve customers at all levels, spread from Sabang to Merauke.

The Board of Commissioners conveys its highest appreciation for these remarkable achievements. We thank all of the Bank's management, staff and stakeholders for their hard work and support throughout the year that enabled the Bank to deliver an even better performance from the preceding year.

Challenges may still be expected in 2014, where an election will take place. The Bank views 2014 as the year of productivity and funding, by way of Optimizing Capabilities to Sustain the Growth. Given this, the Management has formulated the following strategies:

1. BRI as a Bank with a productive and efficient network and human resources,
2. Low-risk credit expansion by utilizing trickle-down business,
3. Maintaining the Bank's sound ratio.

The hard work and dedication of the management and all staff, as well as the invaluable support from stakeholders, has enabled BRI to achieve and to continue growing strongly toward its goal to become **"The Biggest Payment Bank in Indonesia"**.

Foreword from the President Commissioner

These strategic initiatives need to be implemented robustly by related Operating Units, especially considering the intense competition in MSME segment. All of the Bank's activities need to be in concert with strategies in terms of assets, funding, capital, non-organic growth, fee-based income, and other formulated supporting strategies. In addition, all employees of the Bank are expected to adhere to its code of conducts and working culture in their day-to-day activities.

The Bank's destination statement for 2014, which is set as a "Bank with Productive and Efficient Operating Network and Human Resources" and the commitment made by the Board of Directors and Board of Commissioners to make BRI as "The Most Valuable Bank" by 2017. Given this purpose, and in recognition of the dynamic and competitive industry, the Board of Commissioners expects strong commitment from management and all staff of the

Bank which located throughout Indonesia, to carry out their duties to the best of their abilities and to work harmoniously toward the destination statement.

As regards to the performance of its responsibilities, the Board of Commissioners continuously improves the quality of its oversight function of the Bank' operation and works closely with the Board of Directors, in accordance with the Bank's Articles of Association and with prevailing laws and regulations.

We pray that Allah SWT the Almighty shall always bestow upon everyone in BRI with guidance and strength in our endeavors to journey through the ever more complex competition and challenges.

Amin

Wassalamualaikum Wr. Wb.

President Commissioner/
Independent Commissioner

Report on the Supervisory Duties of the Board of Commissioners in 2013

The Board of Commissioners of PT Bank Rakyat Indonesia (Persero) Tbk fulfills its supervisory and advisory duties over the Board of Directors in good faith, responsibly, prudently, and for the best interests of the Bank. The Board of Commissioners performs its duties and responsibilities independently, guided by stipulations contained in the Articles of Association and existing laws and regulations as well as principles of good corporate governance.

The Board of Commissioners supervises the Bank's management policies and operations, provides advice to the Board of Directors, and ensures that the Board of Directors adheres to the provisions in the Bank's Articles of Association as well as following applicable laws and regulations.

The Board of Commissioners' supervisory and advisory functions are exercised for a number of purposes, namely to uphold the best interests of the Bank and to ensure that the Board of Directors' duty implementation is in line with the Bank's goals and objectives. The functions also ensure that the management of the Bank carried out by the Board of Directors is aligned with the interests of shareholders and stakeholders at large. To optimize the performance of its duties, the Board of Commissioners has supporting units consisting of the Audit Committee, the Risk Management Supervisory Committee, and the Nomination and Remuneration Committee.

As a council, the Board of Commissioners has the required core competence. To maintain objectivity and independency, the Board of Commissioners is not involved in any decision-making pertaining to the Bank's operations, except in the matter of fund provision to related parties and other matters as prescribed in the Bank's Articles of Association and prevailing regulations.

The Board of Directors has been able to show significant improvement of performance in many quantitative aspects, including growth of net income, quality of assets, growth of Third Party Funds as well as quality of management as indicated by GCG score index and the trust of the Capital Market.

Performance and Supervisory Evaluation in 2013

The Board of Commissioners is thankful that the Bank was able to deliver successful results in 2013, particularly considering the general economic slowdown starting mid-2013, prompted by an unstable global economy. Decelerating growth in key trading countries, the slump in global commodity prices, and the issue of tapering off in the United States were combined with widening balance of payment deficits, a fluctuated exchange rate and high inflation. As a result, the banking industry experienced tight liquidity, accompanied by a rising cost of funds.

In 2013, the Board of Directors delivered a significant increase in performance. After consolidation, net income soared above Rp20 trillion, marking Rp21.35 trillion, while total assets reached Rp626.18 trillion. Accompanying these achievements were growth in other key indicators, such as lending, which recorded 23.85% growth YOY, and fee based income, which recorded Rp4.86 trillion for the Bank alone, contributing a 7.2% to total income. Key ratios also showed improvements compared with competitors; return on equity reached 34.11%, return on assets was posted at 5.03%, and ratio of operating expense to operating income (BOPO) was recorded at 60.58%. While carrying out business expansion, the Board of Directors was able to maintain asset quality and improved gross NPL to 1.55% and net NPL to 0.31%. Liquidity was also well controlled with Statutory Reserves in Rupiah and Foreign Exchange accounted for around 8% and LDR reached 88.54%.

Report on the Supervisory Duties of the Board of Commissioners in 2013

To ensure sustainable growth, the Board of Commissioners strives to provide robust oversight on micro and macro financial parameters.

Recognizing Human Resources as a pivotal element of the Bank, the Board of Commissioners consistently focuses on the management of the Bank's HR.

While achieving targets related to business growth is indeed important, sustainable growth is fundamental. The Board of Commissioners therefore carried out robust supervision over micro and macro financial parameters to ensure that an early warning system is in place.

1. Risk Profile

The growing complexity of BRI's business, as well as its extensive and widespread network, call for rigorous risk management that able to identify risk potentials today and in the future. Risk management is applied on 4 (four) interrelated and integrated aspects, namely, governance, a risk management framework, a risk management process, sufficiency of resources and risk management information system, and sufficiency of the risk control system.

In 2013, BRI was able to mitigate inherent risks associated with the Bank's business through sound risk management implementation. This was evident from the low level of risk for market and compliance, to the moderate level of risk for credit, liquidity, operations, legal, strategic, and reputational risks. The composite risk level of the Bank was adjudged to be in a "low to moderate" category (score 2).

2. Good Corporate Governance (GCG)

The implementation of corporate governance is founded on five basic principles, namely (transparency, accountability, responsibility, independency, and fairness).

The principles of corporate governance are exhibited through the following:

- a. Transparency, promoting openness in the decision-making process and willingness to disclose material and relevant information regarding the Bank. This principle is evidenced by, among others, quarterly Financial Statements and share ownership of the Board of Commissioners and Directors – disclosed in the Bank's annual report.
- b. Accountability, promoting clarity of functions and responsibility of the Bank's management to ensure efficient and reasonable operations of the Bank as evidenced by clear responsibilities assigned to each organizational structure, a fair and objective recruitment system, and a performance-based remuneration system for management and staff.
- c. Responsibility, highlighting the alignment between the Bank's management practices with prevailing laws and regulations as well as principles of healthy corporation. The Bank's reporting to regulators and other authorized agencies as regulated attest to the implementation of this principle.
- d. Independency, whereby the Bank is professionally managed, free from conflict of interests and influence/pressure from any parties that is inconsistent with prevailing regulations and sound corporate principles. The independency principle is manifested through a commitment from all staff of the Bank to work professionally without conflict of interests or under pressure from any party.
- e. Fairness, to ensure fair and equal treatment in fulfilling the rights of stakeholders arising from agreements and applicable regulations. Fairness is practiced among others by providing rewards for achievements, penalizing violations with sanctions objectively and constructively, and extends fair treatment to the customers.

Report on the Supervisory Duties of the Board of Commissioners in 2013

The Board of Commissioners views that overall the Bank has applied the principles of Good Corporate Governance in its activities.

3. Profitability

In the view of the Board of Commissioners, the Board of Directors demonstrated sound strategy implementation throughout 2013 as shown by the Bank's net income that amounted to Rp21.16 trillion, or grew by 14.2% from the net income of the preceding year (bank only).

Such achievement was backed by the success to maintain NIM at above 8%. At 8.55%, the NIM was higher than the previous figure of 8.42%.

Also contributing to the achievement of net income was a stable cost of funds, despite the rigorous competition in funding. In 2013, the Cost of Funds (COF) only rose by 3 bps from 3.68% in 2012, to 3.71% in 2013 (bank only).

The Board of Directors was also able to show improved results across key financial ratios compared to competitors, the Bank posted a 34.11% in return on equity (ROE) and 5.03% of return on assets (ROA). However, compared with the previous year, ROE and ROA decreased slightly from 38.66% and 5.15%, respectively.

Efficiency level was indicated by Operating Expense to Operating Income (BOPO) and CER ratio, each at 60.58% and 42.13%, compared with the preceding year of 59.93% and 43.11%, respectively. Increase in BOPO was principally the result of increased human resources expenses incurred from conversion of outsourced employees to contract employees, and promotion from contract staff to permanent employees.

4. Capital

Overall, the Board of Commissioners views that the Board of Directors has performed sound capital management suitable with business scale characteristics as well as business complexity. This was evident from the Board of Directors' ability to keep capital adequacy ratio (CAR) at a level of 16.99%, which was well above the minimum requirement from Bank Indonesia.

Assessment of Committees under the Board of Commissioners

As part of good corporate governance implementation, the Board of Commissioners continuously conducts performance assessment of its supporting units, with the purpose of upgrading and enhancing the performance quality. Assessment is done based on recommendations

and implementation of tasks assigned by the Board of Commissioners.

Based on the evaluation, the Board of Commissioners views that all committees, comprising the Audit Committee, Nomination and Remuneration Committee, and Risk Management Supervisory Committee, have soundly implemented their duties and responsibilities. Each committee was able to provide quality input and recommendations, accompanied by a background rationale and relevant arguments for each matter. The quality of input would certainly help the Board of Directors in implementing, or considering recommendations from the Board of Commissioners.

The Board of Commissioners would like to encourage all members of the Committees under the Board of Commissioners to improve their competence and to consistently conduct their duties with dedication and high integrity, especially considering the business challenges and BRI's mission to support the growth of national economy.

Supervision and Recommendations Activities

The activities of the Board of Commissioners in performing its oversight function were:

1. Conducting regular meetings of the Board of Commissioners, at least 1 time every week.
2. Holding a joint meeting of the Board of Commissioners with the Board of Directors, at least 1 time every month.
3. Scheduled working visit to all of BRI operating regions.
4. Meeting between the Board of Commissioners and relevant divisions.
5. Discussion and collective decision-making on urgent matters, involving the Board of Directors and relevant operating units.

Based on the Working Visits and Meetings held throughout the year, the Board of Commissioners has issued the following recommendations:

1. Lending

The Board of Commissioners consistently recommended the application of the principles of prudence in exercising lending activities, the improvement of internal control quality, and the strict implementation of sufficient credit risk management.

To maintain the Bank's position as "The Leading Bank in Micro, Small, and Medium Enterprises Business", the Board of Commissioners also safeguards the

Report on the Supervisory Duties of the Board of Commissioners in 2013

focus on MSME, by maintaining minimum lending to businesses at a certain level.

The Board of Commissioners also supported the Board of Directors' decision to enlarge credit expansion through a "trickle-down" business strategy. The Board of Commissioners took an active role in the credit consultation forum attended by the Board of Commissioners and Directors, conducted to discuss lending provisions at a certain amount to debtors.

2. Funding

The Board of Commissioners recommended and suggested for the Bank to increase the composition of low-cost funds, in order to be able to offer competitive interest rates to customers. The target of third party funds increase in 2014 also needs to be continued sustainably every year, in support of the Bank's loan expansion target realization as well as liquidity.

3. Income and Expenses

The Board of Commissioners recommended the Bank to increase other income through trade finance, remittances cash management, and transactional accounts by optimizing BRI's operational network spread across Indonesia. Relating to expenses, the Board of Commissioners recommended continuous efforts to achieve efficiency.

4. Capital

The recommendation from the Board of Commissioners in terms of capital was to maintain and optimize capital growth by increasing retained earnings. Meanwhile, thorough and in-depth analysis as well as a formulation of terms and conditions that best suited the Bank's interests need to precede strategies to augment capital through the issuance of securities, MTN, and other bonds. Issuance of securities also needs to adhere to the prevailing laws and regulations.

5. Human Resources

Recognizing human resources (HR) as a pivotal element of the Bank, the Board of Commissioners consistently focuses on the management of the Bank's HR. In 2013, recommendations from the Board of Commissioners to the Management covered among others the importance of manpower planning that was integrated with corporate plan, the Bank's Business Plan, Work and Budget Plans, and the Bank's business development direction.

HR requirements need to be fulfilled by taking into account competency and leadership quality enhancements. The quality of trainings, courses, mentoring, and coaching by senior staff needs to

be continually improved as with internalization and implementation of company culture. All these efforts need to be in harmony with goals of the Bank's business growth.

The Board of Commissioners appreciates efforts taken to determine the ideal composition between business and supporting staff. Indeed, the role of Information Technology needs to be amplified to support employees in conducting the Bank's operations. In 2014, HR strategy focuses on fulfilling HR needs especially in fund marketing and employee policy refinement, which will work in concert towards realizing the Bank's productive and efficient HR and operational network.

6. Information Technology

Information technology is an important aspect to improve efficiency as well as expanding services to customers. According to the Board of Commissioners' recommendation, development of Information Technology needs to be focused on improving network reliability in order to provide excellent services to customers. The Board of Commissioners has proposed more optimal use of Information Technology to the Board of Directors, to support better accuracy, efficiency, and the Bank's operational quality.

7. Risk Management

With an expanded office network, manpower, and banking products, business risks become greater. Risk management infrastructure and the internal control system needs to be enhanced to anticipate future risks associated with these developments.

8. Internal Control

In terms of internal control, the Board of Commissioners has made a number of recommendations, among others:

- a. To increase control inherent in all operational processes.
- b. To optimize the role and function of Risk Management in all operating units.
- c. To improve the quality of internal control through Risk-Based Audit performed on operational processes and to improve the quality of internal auditor.
- d. To enhance monitoring by head of operating units on follow-up actions on findings of both internal and external audits.

9. Capital Investment

Capital investment in Subsidiaries is to be made following extensive and comprehensive study, prudently, and in accordance with prevailing laws

Report on the Supervisory Duties of the Board of Commissioners in 2013

and regulations. Capital investment also needs to take into account the business strategy of Subsidiaries as well as other aspects such as synergy and mutual benefit, and is to be performed by maintaining control of Subsidiaries' business strategy implementation.

10. Capital Expenditure

Capital expenditure needs to be aligned with project plan, business development, and HR readiness. Use of capital expenditures also needs to be optimized in order to enhance customer services.

11. Office Network

Expansion of the office network needs to be followed by the following strategic steps:

- a. Improved coordination between operating units to ensure work synergy toward established goals. The coordination includes:
 - HR, in manning analysis, formation, and fulfillment of formations through active coordination with relevant operating units.
 - Information Technology, in terms of e-channel development involving Information Technology System Division, Fixed Assets Management Division, Goods and Services Procurement Division, Micro Business Operational Network Division, Retail Business Operational Network Division, and users units.
 - Supporting Logistics, relating to land, buildings, and office facilities conducted by Fixed Assets Management Division, Goods and Services Procurement Division, and users units.
- b. The Board of Directors needs to evaluate new office planning and ensure alignment with branchless banking policy. Cooperation with third parties who will act as agents needs to be initiated.
- c. Optimization of ATM and e-channel use by stepping up socialization and education to customers, in order to increase fee-based income.

12. Good Corporate Governance (GCG)

The Board of Commissioners has reminded all staff of the Bank to consistently apply Good Corporate Governance practices, embedded as part of the Bank's culture.

13. Partnership and Community Development Program (PKBL)

PKBL fund channeling needs to prioritize community development purposes and not be limited to group channeling, but also individual. Records and accounting of the use and channeling of funds need to follow applicable accounting standards.

The Report of the Supervisory Duties of the Board of Commissioners in 2013 is hereby concluded.

President Director's Report

“

Business expansion carried out prudently in 2013 delivered outstanding results; lending growth in MSME (Micro, Small, and Medium Enterprises) segment was the highest in Indonesia, MSME market share rose to around 29.50%, and net income grew by 14.27% to Rp21.35 trillion.

Improved loan quality across all business segments that influenced growth of interest income and fee-based income contribution, was instrumental in the achievement of BRI's net income in 2013.

”

Sofyan Basir
President Director

Assalamualaikum Wr. Wb.

Valued Shareholders,

We express our utmost gratitude to Allah SWT for the blessings that have made it possible for BRI to journey through the challenging 2013 and deliver even better results than the previous year. On behalf of the BRI's Board of Directors, we would like to present key achievements of BRI in 2013 to our shareholders and stakeholders at large.

The Economy and Banking Conditions in Indonesia in 2013

Along with global economy uncertainty, a drop in demand for primary commodities from Indonesia, and fuel subsidy hike that has led to energy price adjustments (fuel and electricity), Indonesia's economy grew slower in 2013 at just 5.7% from 6.23% in the previous year. Supporting GDP growth was domestic consumption, investments, and export activity. However, low commodity demand and a surge in fuel consumption negatively affected the current account, which eventually led to rising inflation and a weak Rupiah exchange rate during the second half of 2013.

Two approaches were taken to control inflation and to boost exchange rate; first, a price adjustment to alleviate a fuel subsidy and second, a gradual increase by Bank Indonesia (BI) in its benchmark rate throughout the second semester of 2013, rising from 5.75% to 7.5%. These steps were effective in curbing inflation, which at the end of 2013 was recorded at 8.38%, lower than the projected 9%. The Rupiah exchange rate had also stabilized at Rp12,000/USD by the year-end.

In view of this situation, financial system stability and the banking intermediary function remained solid in 2013. As of December 2013, the banking industry exhibited strong performance as indicated by 18.13% capital adequacy ratio (CAR), far exceeded the minimum requirement of 8%. NPL (gross) at 1.77% reflected good credit quality, as it stood well below the allowed maximum NPL level of 5%. Nationally, lending grew at 21.6%, declining slightly from 23.97% growth in 2012. Lending was still dominated by growth of commercial loans, reflecting Indonesia's overall condition and source of economic growth.

On the other hand, high inflation due to the fuel price adjustment, volatile food prices, and sluggish economic activity prompted tight competition for third party funds deposit raising in the banking sector.

In 2013, more challenging economic and banking condition had been projected. Taking the situation into account, BRI's management aimed for quality business growth through prudent business expansion supported by strategies of market penetration, market development, and product development. The strategies were aligned with the target of making BRI as a Bank with the largest MSME lending. Combined with optimization of banking services, access expansion, and service quality improvement to fully capture fee-based income opportunities, BRI was moving toward the realization of financial inclusion in Indonesia.

GDP Composition by Usage

Domestic consumption remained as the leading contributor of Indonesia's economy in 2013, particularly household consumption, contributes **55.3%** of the GDP.

President Director's Report

BRI was able to overcome challenging economic condition and recorded loan growth of **23.66%**, or higher than the industry's loan growth. This was accompanied by improving loan quality as reflected in lower NPL (bank only) to **1.55%** in 2013 from **1.78%** in the previous year.

Exceeding Performance Targets of 2013

Highest Growth in the Micro, Small, and Medium Enterprises Segment Coupled with Improved Credit Quality

In 2013, by implementing its business strategies BRI recorded excellent results across its business segments. Growth of lending volume in micro business was posted at Rp25.33 trillion (bank only), or rose by 23.72% to Rp132.13 trillion. With this, BRI became the bank with the highest growth in micro segment in Indonesia; at the same time reinforce BRI's position as the largest Bank in the micro segment with market share at 45% (bank only).

Overall, BRI successfully maintained its position as the biggest bank in the Micro, Small, and Medium Enterprises (MSME) segment. This result also emphasized the success of BRI's consistent strategy implementation and continued focus on the segment. In 2013, BRI's MSME outstanding loans amounted to Rp179.60 trillion (bank only), or up 21.48% compared with 2012. MSME loans portfolio remained at around 41.7%, while micro loan dominated the total lending composition at 30.7%. BRI's MSME loan outstanding also highlighted BRI's position as the bank that recorded the highest growth in MSME segment in Indonesia, serving 29.5% of the total MSME market of the national banking industry.

Growth in the micro segment continued to exemplify the success of revitalization program pioneered

in 2011, which success was began to be evident in 2012. Revitalization efforts, which consisted of the capacity enhancements of loan officers, product development, network expansion, and enlargement of customer base, were continuing as expected. Capacity of loan officers in 2013 showed improvements, as reflected by higher ratio of micro officers per BRI Unit that reached 3.7 compared with 3.1 in 2012.

In terms of network, in 2013, BRI added 144 BRI Units, 434 TerasBRI, and 115 TerasBRI Mobile in 2013. The overall, BRI's micro unit comprised of 7,281 operating units, increasing from 7,128 in 2012.

Further, considering the performance and business potential, BRI scaled up a number of its operating units throughout 2013; 10 Sub-Branch Offices were upgraded into Branch Offices, 3 Cash Offices became Sub-Branch Offices, and 43 TerasBRI were converted into BRI Units.

Other than establishment of new operating units, the operational network expansion was also accompanied by an increase of productivity, particularly on TerasBRI. The loan outstanding of TerasBRI stood at Rp3.73 billion per unit while third party funds were recorded at Rp1.91 billion per unit, increased from the 2012 position of Rp2.49 billion outstanding loans per unit and Rp1.06 billion per unit.

The customer base target was also met, as evident from the increase in BRI's micro customers both in lending and deposit. In total, BRI managed 6.5 million Micro Loan Accounts up from 5.5 million in 2012. In People Business

President Director's Report

Through its network expansion, BRI today is supported by **9,808 conventional operating working units** and **104,570 e-channels** including **18,292 ATMs** located across the country.

Loan (KUR), BRI was able to increase the number of borrower migration from KUR-Micro Loan to Micro-Commercial Loan, which amounted to 842 thousand borrower migration and contributed positively to the increase of micro loan customers.

In terms of Micro deposits, from 24 million savings accounts in 2012 BRI managed to secure some 28 million accounts in 2013. BRI's extensive Micro loan and saving portfolio reflected the success of BRI's Micro business in reaching out to customers located across the country. This also showed that BRI's business model has contributed to the financial inclusion in Indonesia, which would be positive in promoting efficient economic activity and eventually improving Indonesia's competitiveness in the global landscape.

Moreover, BRI's revitalization program was followed by a growth integration strategy between business segments, focusing on generating a trickle down business across segments from corporate to micro, retail, and medium. The strategy contributed to growth of the business segments; Rp3.36 trillion of retail and medium loan outstanding in 2013 were generated through this trickle down strategy, reflecting a 158.5% leap from Rp1.30 trillion in 2012.

Revitalization, products cross selling between segments, and trickle down approach from the corporate to MSME segment resulted in other strategic achievement, such as credit quality in all business segments. Non Performing Loan (NPL) improved from 1.78% at the end of 2012 to 1.55% (bank only) at the end of 2013, well below BI's NPL limit of 5%. BRI's lending growth of 23.66% in 2013,

which was higher than the national lending growth coupled with improved NPL exhibited BRI's success in developing and managing a robust lending portfolio.

Third Party Funds

To increase third party funds, the Bank implemented a strategy that focused on service accessibility and quality, aiming to maintain the composition of low-cost funds as BRI's source of third party funds. The success of this strategy was proven through excellent result of low-cost funds composition in third party funds portfolio at around 60%.

Savings, as the primary source of low-cost funds, showed a stable growth, higher than other Third Party Fund products. After growing at 19.79%, or to Rp182.64 trillion in 2012, in 2013 savings rose by 14.98% to Rp210.0 trillion. Meanwhile, time deposits grew by 13.53% to Rp198.34 trillion from Rp174.7 trillion in 2012, although demand deposits decreased slightly by 0.93% to Rp78.02 trillion in 2013. Overall, third party funds of BRI in 2013 comprised 59.22% of low-cost funds and 40.78% time deposits. Savings composition and structure demonstrated BRI's successful outcome in maintaining stable low-cost funds to support growth of lending and other businesses sustainably.

President Director's Report

Network and IT-based product feature developments were able to increase BRI's fee-based income from e-banking activities by **78.51% to Rp673.58 billion.**

Improving Access and Service Quality Whilst Cultivating Fee-Based Income Potential

Another target to be achieved through accessibility and service quality improvements was fee-based income and BRI's long-term goal to become The Biggest National Payment Gateway in Indonesia's financial system. One of the strategies that have been diligently applied was e-banking development.

In achieving this plan, BRI strengthened its e-channel network with an addition of 4,000 ATM units in 2013. Totalling to 18,292 ATMs by the end of the year, BRI now has the largest ATM network in Indonesia, spread across the country. Aside from ATMs, BRI also enlarged other e-channels, consisting of 41,221 EDC (Electronic Data Capture) machines, 100 CDM (Cash Deposit Machine), and 8 e-Buzz units. As of December 2013, with the new additions, BRI had a total of 104,570 e-channels that consisted of 18,292 ATMs, 85,936 EDCs, 100 kiokks, 192 CDMs, and 50 e-Buzz. To enhance mobility and expand access to remote areas with poor infrastructure, BRI is studying the feasibility of developing a TerasBRI Boat.

BRI also developed IT-based product features to improve service quality, increase transaction frequency, as well as to develop the potential of fee-based income. This, combined with network expansion, resulted in fee-based income from e-banking transactions have the highest growth. Stable growth was also evident in the number of debit cardholders, one of the sources that enable e-banking transactions and fee-based income increase. In 2013, BRI recorded Rp4.86 trillion of fee-based income, up 23.71% from Rp3.93 trillion in the previous year.

Conventional and e-channel network expansions, along with IT-based feature developments, were BRI's initiatives to enhance service quality and access to BRI's customers located around Indonesia as well as to nurture the MSME segment as the core business of BRI.

Increasing Profit and Strengthening Capital

With the business achievements, BRI recorded net income after tax of Rp21.16 trillion (bank only), rose by 14.2% from Rp18.52 trillion in 2012. The net income reflected BRI's accomplishment in increasing NIM to 8.55% from 8.42% in 2012. In addition, whilst expanding network and employees, BRI was able to maintain BOPO at 60.58% and CER at 42.13%.

In terms of capital, BRI is committed to meet all regulatory requirements and at the same time fostering the capital structure that would be adequate in anticipating all key risks inherent in a bank's management be it market, credit, or operational risks. As of the end of 2013, BRI's total CAR reached 16.99%, slightly increased from 16.95% in 2012.

Challenges and The Way Forward

In general, BRI's performances in 2013 was achieved in the face of a number of challenges, including changes in the domestic economic situation following the government's policy to raise the fuel price, coupled with an unstable global economy.

Increasing inflation along with deficit in the current account as a result of low commodity demands and a weak

President Director's Report

Rupiah led BI to raise the benchmark rate. This adversely affected lending and investments activities. At the same time, buying power shrunk with inflation, which led to lower savings and at the end reduced the total third party funds acquired by the banking sector.

In light of the above challenges, BRI remained consistent in developing MSME segment, continued innovations to improve its IT role, and increased market penetration through the expansion of outlets. Meanwhile, in terms of recruiting qualified HR, recruitment activities were also carried out at a regional level and training programs were further aligned with BRI's business needs. BRI has opened a new learning center in Medan, North Sumatera and in total today has 8 education centers across Indonesia.

BRI recorded **14.27%** growth in net income in 2013, amounting to **Rp21.35 trillion**.

Corporate Governance – Realizing GCG Excellence

Performing its commitment to GCG excellence, BRI carried out all-round GCG implementation quality improvement, which included formulation, evaluation, and monitoring, to ensure implementation of best practices, where all regulations and policies relating to corporate governance are known, understood, and applied by all staff in the organization. BRI continuously reviews, formulates and implements GCG principles with due observance to prevailing laws and regulations, the Indonesian Corporate Governance Code, and the GCG Charter, as well as recent standards, including ASEAN Corporate Governance Scorecard to gain feedback regarding the quality of BRI's GCG implementation.

To ensure the best practices of GCG at all levels of the organization, BRI consistently conducts an internal socialization program to raise GCG awareness, developing GCG tools including a whistleblowing system, a customer complaint system, e-procurement, Integrity Pact, and OPRA system. To ensure that GCG awareness is embedded in the entire organization, BRI develops and regularly updates its Integrity Pact. As a monitoring tool, BRI has developed a Compliance Dashboard that functions as an early warning system to BRI's GCG implementation.

Further, in ensuring continuous GCG implementation improvements, BRI holds GCG assessments, using a self-assessment method in line with regulatory requirements and third-party assessment methods, evaluating business performance based on certain predetermined indicators as well as policies and systems. The monitoring result is provided by an independent assessor, as feedback to improve BRI GCG implementation.

Throughout 2013, to improve the quality of its GCG practices, BRI has held a number of activities, including: Work Culture Revitalization Kick-Off,

President Director's Report

BRI implements an integrated risk management system based on **three lines of defense principle** and has established a dedicated risk management unit, independent from business and audit functions.

Externalization of BRI Corporate Governance Implementation to BRI Stakeholders, BRI Core Values Brainstorming, Training for Change Agents to ensure that change and work culture internalization take place, self assessment of GCG implementation quality according to Bank Indonesia method, CGPI assessment, and others.

These various activities demonstrated the strong commitment of the Management and all staff of BRI in implementing GCG. For BRI, HR competence enhancement in operations and business development efforts would be more meaningful and optimum for stakeholders when accompanied by efforts to nurture integrity and carrying out the day-to-day tasks. With consistent implementation of GCG best practices, integrity will be achieved.

Risk Management – Turning Challenges Into Opportunities

BRI established its Risk Management function as a unit independent from business and other unit functions, its purpose being to secure appropriate risk management and to safeguard objectivity and accurate risk measurement. BRI's risk management implementation is realized through a number of risk mitigation steps, in line with regulatory requirements and the Bank's own needs in ensuring its readiness to address all business risks.

BRI applies Basel I and Basel II accords in its risk management implementation, reflected in the

three lines of defense applied to maintain independency in decision-making. The first line of defense is manifested by business/operational units responsible to carry out internal control and to ensure that output quality and business process have complied with prevailing policies and procedures. The second line of defense comprises a risk management unit that monitors the alignment of BRI's risk management with risk tolerance. The third line of defense comprises an internal audit unit that independently monitors and evaluates first and second lines of defense, and reports the results to the President Director and to the Board of Commissioners.

To ensure the success of risk mitigation in all operational aspects throughout the nation, BRI implements integrated enterprise-wide risk management founded on four pillars of active supervision from the Board of Commissioners and Directors, adequate policies, procedures and limits establishment that are continuously evaluated and updated parallel with BRI's operational and business developments, risk management process enhancements and risk management information system, and internal control system. Integrated risk management that includes risk mitigation will enable BRI to turn challenges into opportunities.

President Director's Report

HR Development – Building Competency and Integrity

To prepare new candidates to ensure business continuity, BRI has prepared future leaders through officer development program (PPS), where each management trainee participant will attend an intensive training period of around 13 (thirteen) months. To support the program, BRI develops comprehensive training material aims to build not only technical and managerial skills of the participants, but also ethics and moral integrity.

The framework of Human Resources development is BRI's HR Architecture consists of planning, recruiting, developing, retaining, performance monitoring, and terminating. At each phase, BRI upholds equal rights and opportunities for all employees including evaluation, career path, and remuneration. BRI has developed performance evaluation using a balanced scorecard method and sets individual and team key performance indicator (KPI) as a basis for performance assessment. All these methods are supported by an integrated information technology system.

To fulfill HR needs related to business expansion, in 2013 BRI recruited 7,139 candidates through PPS program, non-staff recruitment and professional hiring channels. In total, BRI managed 81,238 work forces in 2013. BRI's HR development programs were also supported by 8 (eight) learning centers located across Indonesia, offering sustainable education to enhance both soft and hard skills.

Corporate Social Responsibility – Achieving Quality Synergy for Collective Growth

As one of the leading commercial banks, with the largest operational network, most extensive market reach in Indonesia, and focus on the MSME segment, BRI is deeply committed to accelerate and stimulate people's economy. In accomplishing its partnership and community development program (PKBL), BRI carried out a Partnership Program that offers soft loan and mentoring for program beneficiaries, or partners. The mentoring program is a well-planned effort that involves competent third parties. Within a certain period, the program is expected to nurture the partners and foster their substantial growth, enabling them to become loyal BRI commercial customers. To ensure the efficiency and effectiveness, BRI sets up business clusters to channel the funding for the Partnership Program.

In terms of Community Development, BRI's focus is on health, education, and nature conservation. The priorities are selected with consideration of existing fund channeling synergy with the Partnership Program. BRI disburses funds through BRI Peduli and BUMN Peduli programs.

In 2013, BRI has disbursed Rp131.32 billion of funding for its Partnership Program and Rp146.12 billion for the Community Development program.

2014 Business Outlook

As discussed above, Indonesia's economy in 2013 experienced a slowdown in terms of growth, while inflation rose and the exchange rate weakened. The situation was the result of two key issues, both of which may persist in 2014: first, a global economy that is recovering at an uncertain pace, and second, the unstable commodity prices. Despite the growth of a national economy driven by domestic consumption, uncertain global economic conditions could contribute to pressure on the current account, which could in turn adversely affect the exchange rate. Taking the projection into account, the Government and Bank Indonesia have established a prudent macro economy policy to control inflation, maintain the Rupiah exchange rate, and improve the current account. To strengthen the national economy and product competitiveness, various policies have been issued by the Government and Bank Indonesia to encourage financial inclusiveness and promote the growth of MSME sector, realizing synergy and thereby stimulating competitiveness.

The government also strives to improve the business environment. Business certainty is ensured by revising a list of negative investments, initiating a tripartite dialogue to improve labor relationships, and

President Director's Report

BRI channelled **Rp131.32 billion** for Partnership Program and **Rp146.12 billion** for Community Development Program, focusing on the formation of community business clusters to increase fund disbursement efficiency and effectiveness in improving health, education, and nature conservation.

accelerating basic infrastructure projects that have been one of the weak links in Indonesia.

Considering the challenges and preparedness of all related parties, Bank Indonesia projects that the economy in 2014 will still be in a consolidation phase. However, economic growth is estimated to be at an encouraging rate of 5.8-6.2% and inflation held at 4.5 +/- 1%. Lending is projected to grow at 15-17%, supported by growth of third party funds in a similar range.

Strategic Plan

In view of the current economic situation and competition in the banking sector both in lending and funding, and considering the Bank's competitive advantage, BRI has formulated a growth strategy for 2014 and several years ahead. The Bank shall continue its focus and consistency on the MSME segment by applying selective growth strategy through market penetration, market development, and product development in order to raise fee-based income and to generate the best growth in the MSME segment. The Bank's strategies detail are as follow:

1. Market penetration, business expansions through optimization of BRI's extensive network that is connected real time and online throughout Indonesia as well as the Bank's large customer base. Increasing cross-selling and integrated marketing activities in offering the Bank's products and services.
2. Market development, serving customers at all levels, in all areas across Indonesia by selectively approaching markets previously untapped by BRI.
3. Product Development, enhancing existing products with new features and creating new products.
4. BRI will also cultivate the potential of fee-based income and increase interest income by:
 - Focusing credit expansion on the MSME segment, penetrating commercial and corporate segments that would generate trickle down effect on activities in the MSME sector.
 - Maintaining composition of low-cost funds (demand deposit and savings) at around 60% of total Third Party Funds.
 - Consistently realizing network expansion program to improve the quality of banking services as well as increasing fee-based income.
5. BRI shall strengthen its capital structure by optimizing lending portfolio, taking into account the efficiency of capital allocation and improvement of asset quality.
6. Support the financial inclusion by expanding financial access enabled by the operational network, in line with business potential.

President Director's Report

7. Opening of new operating units selectively and conscientiously.
8. Carrying out HR recruitment and competence enhancement programs across all lines, empowering them as point of sales that would support BRI's business growth.

Closing

On behalf of the Bank's Board of Directors, we would like to express our gratitude and deepest appreciation to the shareholders for their trust and support, to the Board of Commissioners for the direction and guidance, and to the customers and partners of the Bank for their cooperation.

We also would like to particularly thank all our staff and their families. It was their hard work, dedication, and contributions that enabled the Bank to deliver outstanding results in 2013. We are confident that the teamwork shown by all employees will only improve going forward, so that BRI will always be able to demonstrate the best achievements to the shareholders and stakeholders, to overcome all challenges, and capture growth opportunities.

BRI at a Glance

PT Bank Rakyat Indonesia (Persero) Tbk. (“BRI”, “Bank”, or “Company”) was established on 16 December 1895, in Purwokerto, Central Java. As the oldest commercial bank, BRI has been consistent in its focus to provide banking services for micro, small, and medium enterprises (MSME) and able to maintain its commitment amid the competition of Indonesia’s banking industry. The majority shareholder of BRI is the Government of the Republic of Indonesia, with 56.75% ownership, while the public holds 43.25%.

Years of experience and expertise in providing banking services, particularly to the MSME sector, have brought BRI to its 9th year of achievement as a bank with the largest profit, and second place in terms of assets within the national banking industry. BRI’s achievement is a testament to the dedication

of all workforces of BRI, the ones who ceaselessly build competence, innovate, and develop banking products and services for all business segments.

Reputable as a micro-banking service provider deeply rooted in Indonesian communities, BRI continually develops its services in line with the needs of Indonesian citizens. The business development efforts of BRI are constantly adjusted to align with demographic trends of urbanization, as evidenced by the emergence of new economic centers all around Indonesia.

While maintaining its focus on the MSME segment, BRI also develops various consumer banking products and institutional services for customers in urban areas. To support these endeavors, BRI steadily builds its network. Today, BRI is

acknowledged as the largest bank in terms of network connectivity, running 9,808 outlets, including 3 units abroad, all of which are connected real time online. With an enormous customer base of over 48 million accounts, BRI develops e-banking services that are accessible through the internet, cell phones, Short Message Service (SMS), and other e-channel services, such as Automatic Teller Machines (ATM), Cash Deposit Machines (CDM), Electronic Data Capture (EDC), and Kiosks. In total, the e-channel network numbers 104,750 units.

BRI is also committed to provide banking services for micro-business owners in traditional markets through Teras BRI, launched at the end of 2009. Teras BRI is a means to reach entrepreneurs in traditional

“

BRI continues to bolster Indonesia's economic growth through **9.808 conventional outlets** and e-channel network with **18.292 ATMs** located across Indonesia.

”

markets, as such individuals have not enjoyed optimum banking services.

On 28 March 2013, BRI issued global bonds for a 5 (five) year tenor. The nominal value is USD 500,000,000, with a maturity date on 28 March 2018 and fixed interest rate of 2.95% per annum in Singapore Exchange Securities Trading Limited (SGX-ST). BRI coupons and global bond yield were among the lowest of all bonds issued in US Dollars by any Indonesian company in international bond markets. Oversubscription occurred 5.3 times during the offering period. The BRI global bond obtained a 'Baa3' from Fitch's Rating and 'BBB-' from Moody's. The success of this global bond issuance reflects the trust of the international community in BRI's business fundamentals.

Serving banking needs of the fourth-largest population in the world, BRI shall remain consistent in its path to becoming the key partner for Indonesians in their pursuit of economic prosperity. Backed by strong financial performance, BRI is confident it will be able to enhance capacity in furthering sustainable economic growth, a development that goes hand-in-hand with a thriving life for Indonesians.

Bank BRI Milestones

On 16 December 1895, Raden Aria Wiriarmaja founded De Poerwokertosche Hulp en Spaarbank der Inlandsche Hoofden in Purwokerto as a mosque-fund manager whose function was to manage and disburse funds through a simple scheme.

The organization experienced several name changes, from Hulp-en Spaarbank der Inlandsche Bestuurs Ambtenareen (1895), De Poerwokertosche Hulp Spaar-en Landbouw Credietbank or Volksbank, to Centrale Kas Voor Volkscredietwezen Algemene (1912). In 1934 the name was again changed, to Algemene Volkscredietbank (AVB). During the period of Japanese occupation, AVB was known as Syomin Ginko (1942-1945).

1895

1946

On 22 February 1946, the Government of Indonesia, by virtue of Government Regulation No. 1 of 1946, changed Syomin Ginko into Bank Rakyat Indonesia (BRI), a government-owned bank with the front-line role of supporting national economic development.

The Government changed BRI into Bank Koperasi Tani Nelayan (BKTN).

1968

1960

Pursuant to Law No. 21 of 1968, the Government reestablished the name Bank Rakyat Indonesia, with the status of a commercial bank.

According to Banking Law No. 7 of 1992, BRI changed its legal status to PT Bank Rakyat Indonesia (Persero).

1992

Vision, Mission, and Corporate Values

Vision

To become a Leading Commercial Bank that always prioritizes Customer Satisfaction

Mission

- “To conduct the best banking practices with a priority to serve micro, small, and medium enterprises (MSMEs) in order to support the economy of the people.”
- “To provide customers with excellent services, delivered through a vast network and supported by professional human resources and a reliable information technology system, while adhering to effective risk management and sound practices of Good Corporate Governance.”
- “To create optimal values and benefits for stakeholders.”

Note: The Bank’s vision and mission was stated through a Decision Letter of the BRI Board of Directors Nokep: 81-DIR/REN/02/2013 dated 13 February 2013.

Corporate Values

Integrity

Devoted, dedicated, honest, upholding honour and reputation, and abiding by a Banking Code of Conduct as well as existing Regulations.

Professionalism

Responsible, effective, efficient, disciplined, and forward-looking in anticipating developments, challenges, and opportunities.

Leadership

Consistently fair, resolute, and high-minded, yet would not tolerate actions that are not exemplary.

Customer Satisfaction

Fulfill customers' needs and expectations by providing the best services with due observance to Company interests, supported by human resources which are skilled, friendly, service-oriented and coupled with superior technology.

Respect for Individuals

Recruit, develop, and retain qualified human resources, and manage human capital based upon trust, openness, fairness, and mutual respect toward employees, as an integral part of the Company, by building cooperation and partnerships. Appreciate individual and team performance, to create synergy for the benefit of the Company.

Note: Statements of Corporate Values were stated through Decision Letter of the Board of Directors No: S-16-DIR/SSS/SDM/04/99 dated 26 April 1999.

BRI exercised Initial Public Offering of 2,047,060,000 of Registered Ordinary Shares Series B, which were divestment shares of the Republic of Indonesia, and 1,764,705,000 new Registered Ordinary Shares Series B issued from the Portfolio on 31 October 2003, in accordance with effective Registration Statement issued by Bapepam (Letter from the Chairman of Bapepam No. S-2646/PM/2003) dated 31 October 2003. The shares were offered at a nominal value of Rp500.00 per share. The share were traded on 10 November 2003 and registered on Jakarta Stock Exchange.

Management Stock Option Plan (MSOP)

Pursuant to the resolutions of Extraordinary GMS held on 3 October 2003, BRI administered a Management Stock Option Plan (MSOP). The total shares issued during MSOP were 588,235,250 shares and was carried out in 3 (three) stages. Stock option was offered to the Board of Directors and employees of certain positions and levels that have met a set of requirements.

The total shares issued throughout the first to the third stage of stock option amounted to maximum 5% of BRI's paid-in capital of 3 (three) years period, without offering pre-emptive rights to existing shareholders. The implementation of MSOP Stage I and Stage II were in accordance with earlier Bapepam-LK regulation, while MSOP Phase III was pursuant to Bapepam-LK Regulation No. IX.D.4 and IDX Regulation No. 1-A Attachment to the Decision of the JSX Board of Directors No. Kep.305/BEJ/07-2004 on Share Listings. Each MSOP stage had vesting period of 1 (one) year. The MSOP shares exercised until the end of all MSOP stages were 569,876,000 shares.

Information for Investor

a. MSOP Stage I

MSOP Stage I commenced on 10 November 2003, the date when BRI listed its shares in Jakarta Stock Exchange and Surabaya Stock Exchange (now merged into Indonesia Stock Exchange) and ended 9 November 2008. Total shares issued in MSOP Stage I was 235,294,100, with total 230,999,000 of exercised shares and outstanding of 4,295,100 unexercised shares. The fair value of MSOP Phase I was Rp117.39 (full Rupiah).

The exercise price of MSOP Stage I was Rp962.5 (full Rupiah) per share or 110% of the offering price per share.

b. MSOP Stage II

As effectuation of BRI's Annual GMS held on 31 May 2004, MSOP Stage II commenced on 10 November 2004 and ended 9 November 2009. The shares issued in MSOP Stage II totalled to 235,294,100 shares, with total exercised shares amounting to 230,999,047,000 shares and unexercised shares amounting to 5,247,100 shares. The fair value of MSOP Stage II was Rp351.62 (full Rupiah).

The exercise price of MSOP Stage II was Rp1,750 (full Rupiah) per share.

c. MSOP Stage III

Carried out according to BRI's Annual GMS held on 20 May 2005, MSOP Stage III commenced on 10 November 2005 and ended 9 November 2010. As with earlier stages of MSOP, the option was valid for 5 (five) years with 1 (one) year of vesting period. MSOP shares totalled to 117,647,050 shares, with a total of 108,830,000 exercised shares, and 8,817,050 unexercised shares. The exercise price per share followed Bapepam-LK and Indonesia Stock Exchange Regulations.

MSOP Stage	Total MSOP Shares (Number)	MSOP Stage Starting Date	MSOP Stage End Date	Exercised Shares	Exercise Price (Rp)
Phase I	235,294,100	10-Nov-03	9-Nov-08	230,999,000	962.5
Phase II	235,294,100	10-Nov-04	9-Nov-09	230,047,000	1,750.0
Phase III	117,647,050	10-Nov-05	9-Nov-10	108,830,000	According to Bapepam-LK and IDX's regulations
Total	588,235,250			569,876,000	

The end of MSOP Stage III marked the completion of BRI MSOP program Stage I to Stage III, which was initiated on the same date of BRI IPO on 10 November 2003. The total share option allocated for MSOP Stage I to Stage III amounting to 588,235,250 shares. Until the end of the implementation period, exercised shares amounted to 569,876,000 shares. Exercise of the stock option generated additional equity of Rp1,366,089,110,750.00, as detailed in below table.

After the completion of MSOP program, until the reporting year of 2013 BRI has not carried out MSOP program.

	Phase I	Phase II	Phase III	Total
Paid Up Capital	115,500	115,024	54,415	284,938
Premium	106,837	287,559	474,490	686,886

Capital Market Condition and BRI Stock Performance

Global economic slowdown in 2013 affected the condition of Indonesian capital market. This was evidenced by the drop in Jakarta Composite Index (JCI) in Indonesia Stock Exchange, which closed at 4,274.18 on closing day 30 December 2013, or decreased by 0.98% from the JCI closing position in December 2012 at 4,316.69.

Information for Investor

However, 31 new listed issuers were able to boost the value of market capitalization by 2.32% from Rp3,835 trillion as of the end of December 2012 to Rp3,924 trillion on 30 December 2013. The average value of daily share transaction for the period of January to December 2013 amounting to Rp6.25 trillion, or increased by 37.68% from Rp4.54 trillion during the same period in 2012.

Further, the average frequency of daily transaction for January to December 2013 period also grew by 26.51% to 153,975 transactions compared to the average transaction frequency in 2012 of 121,712 transactions.

Meanwhile, average volume of daily transaction from January to December 2013 rose by 28.51% and reached 5.50 billion shares, while the same period in 2012 reached only 4.28 billion shares.

BRI Stock Performance

BRI stock, ticker code BBRI, were listed and traded in IDX (formerly JSX) starting 10 November 2003. At present, in addition to traded on the main board, BBRI shares are also registered as blue chips LQ 45 (45 most liquid shares in IDX), IDX 30 Index, Business-27 Index, Kompas 100 Index, and Sri Kehati Index.

As with the stock exchange condition, BBRI stock price in 2013 fluctuated following economic developments and global capital market sentiment. BBRI stock price in 2013 ranged from the lowest price of Rp6,350 to the highest price of Rp9,650, while the volume of transactions increased from a total of 7,909.9 million shares throughout 2012 to 8,507.7 million shares.

As one of the leading stock, BBRI stock with market capitalization value of Rp178.85 trillion by end of December 2013 were inevitably

affected by market sentiment, where investors tend to be more wary toward stock performance from financial sector. Indonesian capital market enjoyed significant growth during the first half of 2013, yet issue of stimulus reduction in the United States in line with the country's economic recovery created a setback, as investors opted to withdraw their capital from emerging markets.

As shown by stock price chart and table on page 75, BBRI stock price declined during the second semester of 2013 although it peaked to Rp9,650 in the period. The main trigger of drop in stock price throughout second half of 2013 was the issue of tapering the stimulus by the Fed while at the same time Indonesia's macro economy was unfavourable, as marked by rising inflation and deficit in Indonesia's current account.

Information for Investor

Nevertheless, despite the negative influence both globally and nationally, until end of December 2013 BBRI share price still grew from Rp6,950 in 2012 to Rp7,250. The growth reflected investors' confidence on the fundamental condition of BRI, evidenced by increasing trading volume. As known, the focus of BRI business is the MSME sector whose products are largely channeled to domestic market. BRI performance improvement, indicated by improved NPL, prudent increment of loans, and quite strong growth of net income was regularly informed to business players. Such development received positive response from the investors, resulting in 4.32% growth of BBRI stock price at year's end compared to the closing position in 2012.

Dividend and Dividend Policy

In accordance with the resolutions of Annual General Meeting of Shareholders (AGMS) held on 28 February 2013, BRI has distributed final dividends for 2012 fiscal year, set at 30% of the net income of Rp5,556,285. The ratio of dividend pay out was higher than the ratio in 2011 that was decided by 2012 AGMS of 20%. Dividend value per share paid on 15 April 2013 was Rp225.2320, or increased by 84.2% from dividend value per share in 2011 of Rp122.28.

BRI Dividend Payment					
Dividend Year	Payment Date	Total Dividend	Amount of Dividend (Rp Billion)	Dividend per Shares* (Rp)	Dividend Payout Ratio
2003	2 June 2004	23 July 2004	990	84.19	75.01%
2004	19 May 2005	5 July 2005	1,816	152.88	50.00%
2005	1 June 2005	10 July 2006	1,904	156.18	50.00%
2006	24 May 2007	2 July 2007	2,129	173.04	50.00%
2007	28 May 2008	7 July 2008	2,419	196.34	50.00%
2008	22 May 2009	3 July 2009	2,085	168.82	35.00%
2009	24 May 2010	15 July 2010	2,192	132.08	30.00%
2010	2 May 2011	15 June 2011	2,294	70.04	20.00%
2011	30 March 2012	15 May 2012	3,017	122.28	20.00%
2012	4 March 2013	15 April 2013	5,556	225.23	30.00%

* Dividend per share is dividend after stock split with ratio of 1:2 on 11 January 2011

In 2009 and 2010, BRI distributed interim dividends of Rp45.74 per share and Rp45.93 per share, respectively. The distributions were pursuant to Limited Liability Company Law No. 40 of 2007. The amounts of interim dividends are included in the annual dividend calculations detailed above.

Dividend Year	Date of Payment	Dividend per Share (Rp)
2009	16 December 2009	45.74
2010	30 December 2010	45.93

BRI dividend distribution policy is prescribed in the IPO Prospectus, under "Dividend Distribution" section, which states that BRI dividend distribution shall take into account financial condition and business development plan. Dividend payout ratio and/or the amount of dividend for each fiscal year is determined through AGMS.

Information for Investor

Subordinated Bonds

On December 2009, BRI issued Subordinated Bonds II in Rupiah with 5-year tenor and interest rate of 10.95%, listed on the stock exchange on 22 December 2009. Fitch granted A+ rating to the Subordinated Bonds and BRI was able to generate Rp2 trillion proceeds from the Bonds issuance.

All proceeds from Subordinated Bond Public Offering, after deducted with expenses, were used in accordance with Bank Indonesia provisions as supplementary capital, utilized to support loan expansion carried out with prudent principle.

Senior Bonds in USD

In 2013, BRI issued senior bonds in USD for 5-year tenor and 2.95% coupon. The bonds were listed on the Singapore Exchange on 28 March 2013 and earned BBB- rating by Fitch and BAAA by Moody's. BRI raised USD500 million funds from the issuance of global bonds.

All proceeds from Bonds issuance, after deducted with expenses, were used to finance loan expansion carried out prudently, funding mix diversification, and BRI foreign currencies maturity profile management.

Business Prospects and Strategy Outline

Business Prospect

In 2013, the Indonesian economy was able to withstand the generally feeble state of the global economy, as evident from its relatively 5.78% growth, a figure that exceeded economic growth in other countries such as India, Malaysia, Singapore, and Thailand. Domestic demand continued to be the main driver of growth.

In other parts of the world, and particularly in Europe and Asia, a lingering economic slowdown persisted throughout 2013, crippling commodity demand for Indonesia. In the United States, the efficacy of its economic stimulus program began to become evident, starting in the third quarter, which prompted the US government to consider tapering off

the stimulus, beginning in 2014. This in turn presented a new challenge to the economy globally, where the US Dollar strengthened over other currencies, including Rupiah.

In Indonesia, low commodity demand especially for plantation and mining commodities, resulted in a higher deficit of Indonesia's trade balance. To control this deficit and manage expenses, the government adjusted fuel prices upward, consequently instigating inflation.

In the meantime, responding to the US Government's plan for stimulus reduction, the Indonesian Government applied a "soft-landing" approach by increasing the BI rate from 5.75% in 2012 to 7.50% at the

end of 2013, as well as issuing a new economic policy package to stimulate direct investment. At the end of the year, inflation was successfully maintained at 8.38%, below the projected 9.0%, foreign exchange reserves as of December 2013 stood at US\$99.39 billion, and the Rupiah exchange rate was at Rp12,171/US\$ - dropped by 19.5% from Rp9,793/US\$.

For 2014 and several years beyond, Indonesia is predicted to face greater challenges. Aside from the exchange rate issue, there are also a number of other fundamental challenges to be resolved, namely, the trade balance and investments that need to be improved. Categorized as a middle-income country, with per capita income at around US\$4,154 in 2012

“ Backed by high domestic demands, the **5.78%** growth of Indonesian economy surpassed several Asian countries. “

(Human Development Index 2012, World Population Data Sheet, Data Worldbank.org). In short, Indonesia needs to bolster its national production capacity.

With domestic consumption as one of the main growth pillars, boosting production capacity to meet domestic needs is a prerequisite. Toward that end, it is imperative for Indonesia to provide primary infrastructure for transportation, electricity, and telecommunications, supported by clear policies that may counteract with investment barriers. Infrastructure availability would also ensure efficient economic activity.

In view of this situation, the World Bank and economic observers both estimate that the Indonesian

economy will grow at a similar pace as it experienced in 2013, continuing in 2014 as well as in subsequent years to be driven by domestic demand, thus maintaining a window of opportunity for the growth of the banking industry.

World Bank data shows that from 250 million people in Indonesia, and considerable per capita income, only 20% of the population 15 years of age and above is registered as account holders in formal financial institutions (data from Global Financial Inclusion index – World Bank, 2011). This number is well below Thailand (77%), Malaysia (66%), the Philippines (26%), and Vietnam (21%). Meanwhile, Indonesia's middle class population, defined as people with range of total expenses between Rp20,000 –

Rp200,000 has reached 100 million people in 2010.

The Association of Indonesia Internet Service Providers estimates 82 million Internet users in Indonesia as of the end of 2013, and would increase to 139 million by 2015, or two fold compared to 63 million Internet users in 2012. Moreover, penetration of cellular customers has reached 270 people. These data illustrate the ample potential of e-banking business, supported by the constantly increasing number of BRI debit card users that has reached 19.4 million people or 50% of total savings accounts.

Within the domestic economic landscape, entrepreneurs from the Micro, Small, and Medium Enterprises

Business Prospects and Strategy Outline

BRI is determined to optimize growth opportunity by focusing on the MSME segment; applying a selective growth strategy through business expansion founded on market penetration, market development, and product development strategies; increase fee-based income, and eventually deliver the best growth in the MSME segment.

sector are predominant. Accounting for 56.5 million business owners with 55.9 million are from the Micro segment. From the total potential of the Micro sector, only 30% of the business owners have access to banking facilities (see also MDNA, Business Review – Micro Segment.)

In view of the sizeable market potential based on the presented data, the banking sector has ample opportunity to market conventional banking products and services, such as Savings, Time Deposits, and Demand Deposits, Investment Loans, Working Capital Loans, and other banking services, as well as e-banking transactions services. With its long-standing experience, particularly in the micro segment, BRI that has grown into a bank with the largest infrastructure network and well spread across the country is determined to make the best use of these growth opportunities.

Strategy Outline

BRI develops its Banking Business Plan in a view of the encouraging and stable economic projection over the short, medium, and long term, by taking into account the importance of sustainable growth as well as maintaining its focus on the MSME segment. Nevertheless, considering the forecast of external conditions for the next three years, BRI will prioritize a selective growth strategy in the work plan of each business line.

To create strong synergy, BRI is committed to summon and orchestrate all resources toward the destination statement established in 2013, “the Bank with the Best Micro, Small, and Medium Enterprise Business Growth in Indonesia.”

Within the next three years, BRI’s core business will be focusing on not only on lending, but also funding as well as promoting banking services in order to increase fee-based income in addition to interest income.

BRI’s lending growth shall remain focused on the financing for the Micro, Small, and Medium Enterprises segment. At the same time, BRI will also optimize the opportunities in the Corporate segment, anticipated to generate trickle-down business to the MSM segment.

In terms of Third Party Funds, BRI aims to grow low-cost funds (Demand Deposit and Savings) and maintain the composition of low-cost funds around 60% of the total deposits.

Meanwhile, BRI will continue optimization of its real-time online connected network throughout Indonesia by developing banking services to comprehensively support customers’ financial activities not only in financial management, but also in transacting with other parties. The purpose of this strategy is to create a community-based closed financial system. Optimization of all products

Business Prospects and Strategy Outline

and services derived from the system will enhance fee-based income for the Bank.

To maintain and expand market share, BRI continuously enlarges the scope of its banking services especially through electronic outlets such as BRI mobile service and other types of outlets.

Further, business expansion efforts are done through market penetration, market development, and product development strategies:

- a. Market penetration - leverage BRI's network that is connected real-time online nationally with the largest customer base, by:
 - Intensifying cross-selling activities and integrated marketing in selling the Bank's products and services.
 - Utilizing operating networks optimally to reinforce BRI's competitive edge in the MSME segment.
 - Improve the quality of products and services to maintain and increase customer loyalty.
 - Increase and enhance the quantity and quality of BRI's e-banking services
- b. Market Development – serve all customers in Indonesia by focusing on markets previously untapped by BRI, by:
 - Optimizing customer base and operating network to capture new customers/potential of new markets
 - Develop network to potential areas abroad
- c. Product Development – enhances existing products with new features and creates new products, especially bundling products with insurance (bancassurance) and investments, to strengthen BRI's competitiveness in the financial industry. The steps include:
 - Cooperation with non-bank financial institutions for product bundling
 - Development of loan and savings products with scheme or feature adjusted to customers' needs.

Human Resources Management

For BRI, Human Resources (HR) is the key to achieve meaningful growth and business sustainability. Therefore, in managing and nurturing HR potential, BRI aims to ensure that employees can develop as catalysts of growth and advancement of others, hence collectively working to create value for all stakeholders.

The HR aspiration can be realized through individual and team competence development initiatives at all levels of the organization, emphasizing the importance of layered and structured training. Key purpose of the training is to equip BRI HR with the capability to seek and identify character of potential

customers, extending services to customers, whilst abiding by moral integrity.

BRI's consistency in realizing HR development programs through socialization of corporate culture founded on GCG principles is prerequisite for all management of the Bank.

BRI HR Architecture

BRI HR development and competence enhancement strategy is formulated into a roadmap of the HR management work plan. The roadmap is established every 5 (five) years and is regularly reviewed to ensure its alignment with the Bank's needs. The HR management work plan in 2013 are:

- a. Optimization of recruitment and selection intensity
- b. Refine policies in performance management and career development
- c. Enhance reward system
- d. Review policies pertaining to rules and discipline
- e. Revitalize Work Culture

These lines of initiatives are part of the BRI HR Architecture that has been developed in a comprehensive, systematic, measureable manner and includes all aspects of planning, acquiring (recruitment, selection, and assignment), HR development, retaining and maintaining, performance management, and termination.

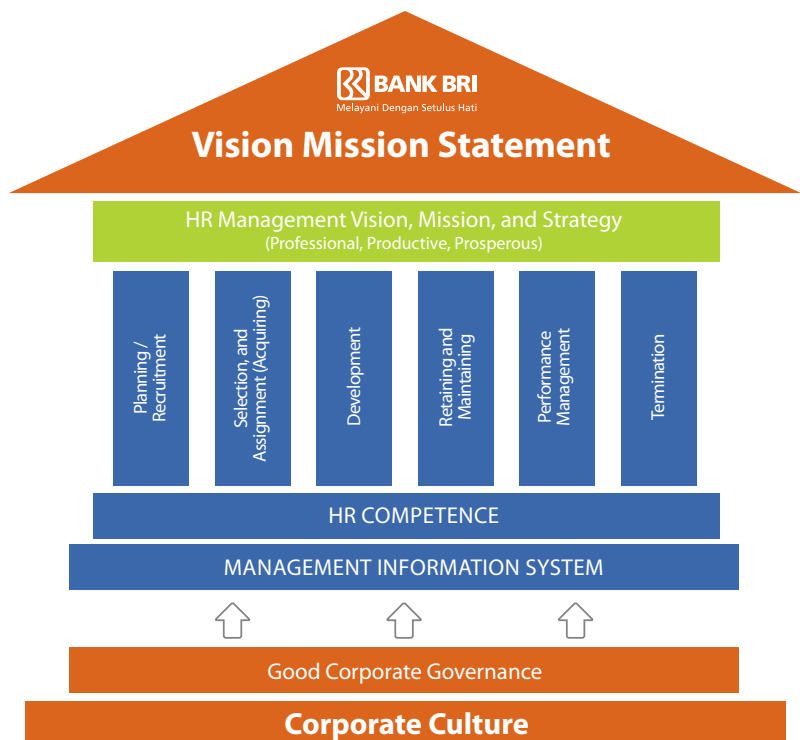

“

BRI consistently develops Human Resources with all-round managerial and operational competence, good conduct, and the highest moral integrity, through embedding a corporate culture that adheres to the main principles of GCG. BRI aims to nurture human resources that are professional, productive, and attracting prosperity.

”

The HR Architecture is formalized through an HR management policy that emphasizes competence and supported by valid and accurate HR MIS, with the strong based on GCC implementation and Corporate Culture as the compass of employee's way of conduct to materialize the HR management mission (professional, productive, prosperous).

Human Resources Management

Competency and Professionalism Development

The goal of BRI's manpower planning is to accurately integrate HR needs with the Bank's plan and strategy. Manpower planning refers to the Bank's long term business plan, formulated in a BRI Corporate plan, as well as a medium term business plan stated in the Bank's Business Plan (RBB), and short term business plan as stated in the Company Work and Budgetary Plan (RKAP).

Industrial Relationship

To ensure a harmonious relationship between the Bank and its employees, BRI always observes the following:

- **Respect to Employees' Rights**
BRI menjamin hak pekerja BRI assures the right of employees to unite, assemble, and express opinions. This assurance is manifested in BRI's support to workers' union, SP-BRI that was established on June 1999. SP-BRI is registered in the Labor and Transmigration Office of South Jakarta; under the registration number 357/I/P/V/2005 dated 17 May 2005.

As for the establishment of a workers' union, BRI has been regularly conducting bargaining sessions with the Union to discuss a Collective Bargaining Agreement (CBA), which would be valid for 2 years with a maximum extension of 1 year. CBA assures the rights and obligations of Workers, Employer, and Union. Currently, the existing and valid CBA extends for the period of 2013-2015.

Aside from its formal support, BRI also consistently communicates the plan of policies implementation to employees. BRI engages the Workers' Union in a socialization program, particularly regarding the enactment of rights and obligations of the Employee as well as other industrial relationship issues.

To maintain a harmonious relationship between the Union and the Bank, BRI establishes a Bipartite Cooperation Forum, through which the Bank and the Union may align both parties' interests and resolve any complaints arising from employee.

- **Equality among employees**
In managing its HR, BRI provides equal opportunity and equal rights to all employees irrespective of ethnicity, religion, race, group, gender, and physical condition. This HR equity is applied throughout the chain of HR management, from recruitment, competence and skill building, career path development, and remuneration.

Human Resources Strategy in 2013

Along with the rapid development of the business and operational network, BRI implemented a number of strategies to fulfill HR needs appropriately, accurately, and quickly, with consistently put emphasize on quality and basic competence of the candidates. The strategies included:

1. Recruitment authority delegation, whereby each Region may conduct its own recruitment according to its business requirements.
2. Active cooperation with several leading universities in Indonesia, including collaborating with consultants in the Career Development Centre in the universities.
3. E-recruitment, IT-based recruitment and selection process.
4. Resident Staff Development Program (PPRS), as a means to nurture banking professionals as well as BRI's future leaders in certain regions. PPRS offers opportunities for this nation's best talents to join and develop with BRI.

Through the above strategies, in 2013 BRI recruited 7,319 as permanent employees.

- **Recruitment/Acquiring**
As an essential phase of manpower management process, BRI implements 3 programs of recruitment:
 1. Staff Development Program (PPS)
Program to acquire future permanent employees, to be nurtured as future leaders of BRI. As an employment program, PPS focuses on Candidates that have the potential to advance and attain the highest career level; the candidates are the Bank's future leaders and are acquired from BRI's internal

Human Resources Management

- employees, fresh graduates from public/private universities in Indonesia, or overseas graduates, all meeting predetermined qualifications. .
2. **Non-Staff Program**
Non-Staff Program Employment program for Candidates who will occupy non-managerial roles. The program seeks technical and marketing aptitude and focuses to acquire employees as "Mantri", Account Officer (AO), Funding Officer (FO), etc. Opportunities of career development are also provided for employees from Non-Staff Recruitment Program, introducing them to career paths distinct from the Staff Development Program.
 3. **Professional Hiring**
Professional Hiring program recruits talents outside of BRI with certain qualifications and skills. The program focuses on filling new positions as part of BRI's development. Employees from a professional hiring program are expected to transfer their knowledge to other employees when conducting the Bank's business activities.

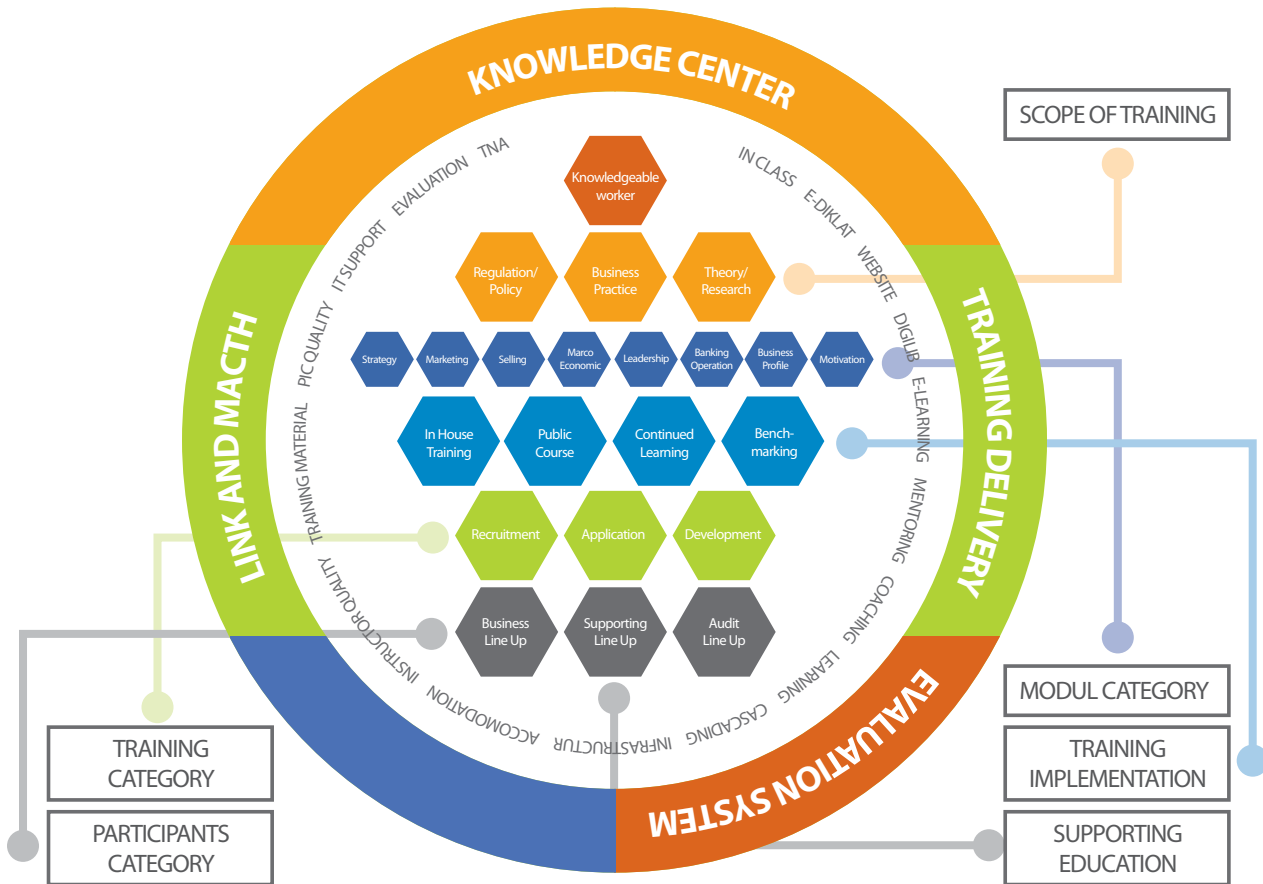

- **Learning and Developing**
To its employees, BRI emphasizes the willingness of perpetual learning, to change, innovate, and provide a creative boost for the advancements of the Bank. Continuously, BRI builds the competence of its manpower to ensure that all employees are equipped with suitable skills and capabilities to address business challenges at present time and in the future.

Training programs, education, and development are part of a sustainable and cohesive plan, as illustrated by the following diagram.

.....

The recruitment process is conducted objectively, openly, fairly, and equally, without discrimination, to capture talented and dedicated talents.

Human Resources Management

Note:

1. **Introductory Education**
Education program for BRI employee candidates or existing employees who are to be assigned to a certain position. The program equips participants with the competencies required to perform the specific task.
2. **Application Education**
Education program for BRI employees to improve competencies relating to their current respective positions. The programs are held internally, or by third parties (external).
3. **Developmental Education**
Education program for BRI employees, aiming to enhance participants' competencies in preparation to assume a higher position.

In 2013, BRI extended training programs to 393,198 employees, as follows:

No	Type of Education Program	Participants
1	Introduction Education	24,565
2	Development Education	4
3	Formal Education	29
4	Application Education	129,250
5	Socialization	143,128
6	Public Course	3,246
7	Performance Enhancement Forum and Group Discussion Forum	91,476
8	Certification and Education Support	1,500
Total		393,198

Human Resources Management

In addition to the comprehensive training, BRI supports the employee career development through well-planned and specific trainings, including job enrichment and job enlargement.

BRI develops its excellent talents to be ready as the future leader candidates and to hold strategic positions in the company through the talent pool system. This talent pool system is continuously enhanced, by involving IT supports as part of the Talent Management System development. The enhancement of talented employee aims for further promotion of future leaders will involve all training programs, applications, technical and analytics method.

HR Performance Management

BRI implements a modern performance management system that measures performance based on two aspects, achievement of Key Performance Indicator (KPI) and achievement of competence. The purpose of this system is to evaluate the performance of employees from both sides, which are employees' objectives (KPI) and the aptitude required to meet the objectives (competence).

BRI also designs systematic phases of its performance management system, which includes planning, mentoring, and evaluation. During planning phase, subordinates and their superiors agree on targets; superiors would provide feedback during mentoring phase, and would later evaluate their subordinates' performance based on the achievement of the targets determined earlier.

HR performance management is managed and supported by an integrated, online system, the Online Performance Management System (PMS).

The result of performance evaluation is important in determining employees' remuneration. BRI applies merit-based remuneration increases, therefore ensuring that high-performing employees would also earn a significant remuneration increment. Conversely, low-performing employees would not be eligible for remuneration increase.

In addition, to motivate performance excellence, BRI has compensation variables rewarded to employees who meet and exceed their targets. The compensation program aims to show appreciation for optimum performance, whilst encouraging the better future achievements.

Employee Welfare Remuneration

To attract potential candidates, retain competent employees, and accelerate work motivation, BRI offers fair and competitive remuneration, observing the Bank's business strategy and growth.

BRI's remuneration structure is designed to assure that employees earn rewards in correlation to their competence and position, enticing employees to maintain their performance and improve their contribution to the Bank. Aside from fixed remuneration, BRI also provides variable-based compensation, calculated based on target achievement and work performance.

BRI applies structured-training programs, designed to equip HR with all-round competencies in line with their respective tasks while promoting the highest standard of moral conduct and integrity

Human Resources Management

To ensure work security, BRI provides employee benefits, such as health coverage, Life Insurance & Personal Accident protection, housing and vehicle ownership facilities, and other facilities commonly provided by similar companies in the banking industry.

BRI also considers the different levels of living costs of operating units which spread throughout Indonesia. BRI avoids gender bias in its remuneration system; therefore men and women employees receive equal and fair remuneration. In addition, BRI ensures that the Bank offers a standard of minimum wage that is above the minimum wage requirement of each of the Bank's operating region.

Pension Program

Aside from ensuring employees' convenience and job security during their employment, BRI also provides post-employment benefits in order to assure income continuity for employees in their retirement period. Several pension programs in BRI include: Defined Benefit Pension Program (PPMP), Defined Contribution Pension Program (PPIP), Retirement Benefit Program (THT), Retirement Security Program (JHT), social security of Jamsostek, and Pension Health Coverage (Prospens).

Financial Impact of HR Management

- **Allocation for HR Competence Development**

In 2013, BRI carried out 557 training and development programs, both general and specific programs, attended by 393,198 participants. In total, the investment cost expended to improve competencies and professionalism amounted to Rp544,7 billion, increased by 12.3% from 2012.

- **Total Expense for HR Management**

Operating expenses for new recruits, status conversions from outsourced front line staff to contract employees, as well as performance of the Bank's obligations to fulfil employees' rights during 2013 increased. In 2013, employee expense amounted to Rp11.75 trillion, up by 27.5% from the total expense of Rp9.21 trillion in 2012. The investments were accountable, which benefit could be measured based on employee competence improvement, among others by calculating the ratio of employee productivity to training cost.

- In 2013, the ratio of employee productivity (net profit by total employees) was Rp261.22 million per employee, rose from Rp255.02 million per employee in 2012. This showed the higher productivity of employees and their contributions to the Bank's target achievements.

BRI HR Profile

The roster of BRI employees in 2013 totalled 81,238, including contractual employee. This number grew by 9.35% compared to 72,625 people in 2012. The increase was in line with BRI's business and operational expansion, among others the addition of new BRI operating units. In accordance with Bank Indonesia Regulation No. 13/25/PBI/2011 dated 9 December 2011 regarding Prudential Principles for Outsourcing at Commercial Banks, BRI has ensured that the employment status of BRI's front line staff, particularly Tellers and Customer Service, consists of contract and permanent employees of BRI.

Human Resources Management

Total Employees by Status			
Status	2011	2012	2013

Human Resources Management

BRI Corporate Value revitalization to increase integrity and improve quality of GCG practices.

Turnover

In 2013, BRI recorded 779 employees as having resigned from BRI. The turnover rate was 1.86%, which was considered very low and reflected BRI's success in creating a favourable workplace, a sound, safe, and convenient environment conducive to professional commitment and dedication for innovation across the organization.

Information Technology-Based HR Management

With extensive operational areas and sizeable manpower, BRI developed an integrated HR management system, utilizing reliable information technology infrastructure. This approach enabled BRI to manage all HR matters efficiently and accurately.

By having an integrated HR Management Information System (MIS), BRI is able to maintain HR database, fulfil employees' rights, disseminate information concerning relevant HR policies, and build communication channel between employees and the management. HR MIS is the core of Office Automation development and Employee Self Service (ESS) feature, which aims to achieve efficiency in all aspects of HR management.

Human Resources Management

Corporate Culture Internalization

BRI's corporate culture is formulated by identifying values that all employees perceived as values of excellence, which are able to support the efforts in delivering the best performance for the Bank. The values are consists of integrity, professionalism, customer satisfaction, leadership, and appreciation to employees. Currently, the Corporate Values have been able to support the Bank's vision and mission. BRI regularly evaluates the implementation of Corporate Values to ensure that the Bank's core values are relevant to address future challenges.

In 2013, BRI carried out BRI Corporate Values Revitalization with the aim to bolstering the role of all BRI's employees in facing challenges going forward without undermining BRI's Corporate Values.

The following are some of the activities implemented and will be continuously applied relating to BRI Corporate Values Revitalization:

1. Selection of change agents throughout all of BRI's Operating Units
2. Redevelopment of the concept of BRI Corporate Values
3. Redesigning BRI's Corporate Values programs
4. Creation of a Corporate Values measurement tool that is integrated and tiered supported by the system.
5. Continuous socialization by optimizing various means of communication.

All efforts and activities as described above are conducted in recognition of the critical role of Corporate Values in the process of realizing the Bank's vision and mission.

Marketing

Marketing Strategy

BRI's performance targets encompass loan disbursement, third party funds gathering, fee based-income, and market share within the banking industry – all eventually leading to ensure sustainable financial performance. To achieve these targets, BRI defines general and specific marketing strategies. A general strategy is applied comprehensively and in an integrated manner throughout all operating units, and primarily covers several programs, including: enhance awareness of BRI's banking products and services, improve of service access, product feature development, improvement of service quality, and increase in market share.

The above programs essentially aim to enable both new and existing customers to be aware of BRI's banking products and new features, as well as to provide access and

convenience when performing banking activities. These initiatives, detailed in the subsequent section, thus cultivate the loyalty of existing customers and secure the interest of new customers to engage in an on-going partnership with BRI. Meanwhile, a specific marketing strategy is specifically defined for each operating segment – as presented in the respective business segment under the chapter of "Business Review."

Awareness Enhancement

To introduce and promote products and services intended for the micro, small, and medium enterprises to the grass root society living throughout Indonesia, during 2013 BRI continued various acquisition and retention programs. The marketing programs were entitled Pesta Untung Beliung, Pesta Rakyat Simpedes, BRI Peduli Pasar Rakyat, Panen Bulanan Simpedes, and Grebeg Pasar. All

programs aimed to promote micro commercial loan Kupedes, and People Business Loan (KUR), savings products: BritAma, Simpedes, and e-banking products. Aside from these programs, BRI also carried out other marketing programs that targeted a certain potential customers.

It was through activities that directly engaged with the micro, small, and medium enterprises as well as individual business players that BRI built and raised awareness of BRI's products and services, available for both new and existing customers. In addition to the marketing programs, BRI sought to enhance brand awareness by participating in national and international exhibitions, inviting its customers as exhibitors. BRI also held programs such as Nge-Buzz Bareng BRI, a homecoming program for its customers and international seminar on microfinance.

“

MARKETING ASPECTS

Planning and realization of an integrated marketing program that includes BRI's products and banking services features promotion, convenience services, and improved service quality, and thereby ensures an increase in customer base and heightened loyalty.

”

Service Access Improvement

Network development, in both conventional and e-channel, was one of BRI's marketing strategies to ensure accessibility and to improve services for customers. Infrastructure development was carried out with two approaches, extensification and intensification. Under its extensification strategy, BRI opened new operating units in new regions, while intensification aimed to maximize business potential in existing regions. Improvement of customer accessibility through e-channel was focused on expanding ATM and mobile banking network. This strategy is not only enabled greater reach of the Bank to its customers, but also increased the accountability of financial reporting and drove operational efficiency.

BRI also utilized recent information technology developments as the vehicle of its marketing strategy, as demonstrated by the launch of mobile banking and internet banking. These products, optimizing information technology as the backbone, were designed to be user friendly and ensure customer convenience when performing various banking activities, such as account information monitoring, financial transactions, and BRI online payments.

Product Features Development

Product features development by modifying the use or by introducing new features was among BRI marketing strategies for both new and existing customers. These customers might access the new features, developed in line with the needs and characters of customers in each segment. BRI thus expects to meet the various needs of customers, resulting in improved customer satisfaction.

HR Competence and Marketing Role Empowerment

In terms of human resources, BRI expanded the number of marketing staff whilst enhancing product and service knowledge through training. Marketing officers were nurtured in order to be capable in performing comprehensive products and services marketing as well as offering

Marketing

BRI has the largest MSME loan portfolio in Indonesia, with market share reaching 29.50% in 2013.

solutions to customers' needs. With the improvement in the quality of competence, BRI's marketing officers could be empowered as professional business advisors for customers.

To ensure continuous betterment of service quality, aside from improving HR competence and understanding of banking products and services, BRI also defined minimum service standard that all employee needs to meet when interfacing with customers, whether internal (employee from other units) or external (depositors and borrowers).

The minimum service standard, or Service Level Agreement (SLA) is part of the employee's individual and team evaluation. All development programs relating to marketing strategy implementation were carried out to ensure SLA fulfillment for customers.

Market Share Expansion

One of the goals of the foregoing marketing programs was to improve the customer base and expand BRI's market share across all business segments. To expand the market share, BRI actively offers its products to the other SOE, conducts cross selling, and captures Trickle Down Business from corporate and SOE customers.

Trickle Down Business from SOE and corporate segments has been able to drive the performance of other segments, such as retail and medium segments. Sales strategies were intensified by utilizing database of customers, third parties (dealers/ developers), walk-in customers as well as applying implant banking such as through Home Ownership Program (HOP) and Car Ownership Program (COP) with several major companies.

BRI also engaged in a partnership with SOEs, providing products and services that were suitable for the partners' requirements. Meanwhile, coordination among BRI's directorates was intensified to exercise cross-selling strategy that created closed-system financing for new and existing customers, eventually increasing the new customer base in 2013.

Position and Market Share

At the end of 2013, BRI's asset amounted to Rp606.37 trillion (bank only), putting BRI as the second largest bank in terms of asset in the Indonesian banking industry. This account was reflected BRI's 2013 market share at 12.24% in terms of asset.

BRI's lending is focused on the MSME segment. This specific market positioning has led BRI to become the largest Indonesian bank for the MSME sector with MSME outstanding loans at year-end amounted to Rp179.61 trillion. Considering the national MSME loan outstanding balance at Rp608.82 trillion, BRI's market share in 2013 reached 29.50%. This represented an increase of BRI's MSME loan market share from 28.08% the preceding year.

Marketing

Marketing Communication

The mission of Marketing Communication activities is to create a strong brand for all BRI's products and services, which would aid marketing activities and forward the growth of BRI's products and services. Through optimum marketing communication, BRI seeks to create brand awareness as well as unique, appropriate, and relevant positioning of products and services across all segments to ensure the success of business expansion.

To achieve this mission, BRI designs a marketing communication strategy that applied continuously and aligned with the banking industry condition as well as business objectives. In 2013, marketing communication activities were also conducted to maintain and enhance the brand image of BRI's products and services, focusing on the activation program of BRI's banking solutions.

A marketing communication program for retail funding remained a key priority, considering its strategic role in safeguarding funding stability and price competitiveness. A special focus of the marketing communication program was also directed at micro, small, and medium businesses, as BRI's business pillars, to ensure continual awareness of the BRI brand.

In 2013, marketing communication programs reinforced awareness of BRI's business-to-business (B2B) services, applying an apt communication strategy with the business nature of the target market. BRI's e-banking activities were also included as one of its marketing communication priorities, in order to drive the increase of fee-based income composition.

Aside from awareness, the programs were also expected to generate new acquisitions from BRI's banking services. To ensure that the programs

were suitable for different market characters, BRI's 18 Regional Offices conducted product and service promotions regionally. These programs were implemented in concert and cohesively to support BRI as the Biggest National Payment Gateway in coming years.

Activities

Marketing communication activities carried out during 2013 included the following product introduction and reinforcement programs:

1. Brand

- Marketing communication campaign for brands with a significant level of awareness was focused on activation
- Themed campaign conducted for newly launched products and products that required awareness enhancement

2. Products

- BRI launched new products and features: e-pay BRI, e-tax, Private Label credit card, and
- prioritized products and services.

3. Channel

- Strengthened BRI's channel presence in potential regions, both for conventional and e-channel
- Optimized all BRI's channels as medium of education for both internal and external marketing initiatives, for products that generate fee-based income.

All of the programs were designed based on BRI brand architecture, brand life cycle, and the journey of BRI brand.

Marketing Communication Awards

The various marketing communication activities and their proven efficacy in improving service quality has received recognitions from third parties for several BRI brands, as follows:

- Savings BRI Britama Junio – 1st Rank in Junior Savings Category of Top Brand Index 2013 from Marketing Magazine
- Savings BRI Britama – 2nd Rank in Savings Category of Top Brand Index 2013 from Marketing Magazine
- BRI Time Deposit – 2nd Rank in Time Deposit Category of Top Brand Index 2013 from Marketing Magazine
- BUMN Marketing Award 2013 – Silver Winner BUMN Marketing Awards 2013 from BUMN Track Magazine.
- Products & Business Awards - Best Microfinance Business from The Asian Banker
- Top Brand Award 2013 - Call Centre category from Marketing Magazine & Frontier Consulting Group.
- Top Brand Award 2013 - Deposit Account category from Marketing Magazine & Frontier Consulting Group.
- Top Brand Award 2013 –ATM Card category from Marketing Magazine & Frontier Consulting Group.
- Indonesia Brand Champion Award 2013 – Bronze Brand Champion of Brand Equity for Conventional Banking category (Asset>IDR 75 Trillion) from MarkPlus
- Indonesia Brand Champion 2013 - Gold Brand Champion of Most Popular Brand for Conventional Banking category from Mark Plus Inc.
- 3rd Best Phone Banking Machine ranked by Infobank Magazine, in "Banking Service Excellence Award" held by MRI
- The Best Contact Center Indonesia 2013, Best Agent Inbound (Bronze) from ICCA

Marketing

Network Development

To bolster its presence in potential market and stay closer to target markets, BRI strived to expand, develop, and improve the quality of its operational network across the country. The execution of these endeavors was centered around customer satisfaction, as seen in, among others, enhancement of conventional and mobile banking networks as well as e-channels (ATM, EDC, CDM, Kiosk, and E-Buzz) and realized more operational efficiency and effectiveness.

Network Expansion in 2013

Network expansion of retail business in 2013 encompassed 7 new Branch Offices, 20 Sub-Branch Offices, and 36 Cash Offices. In 2013 the micro business welcomed 144 new BRI Unit offices. As of December 2013, BRI managed a total of 5,144 BRI Units.

Aside from BRI Unit, BRI has been fostering new network, Teras BRI and Teras BRI Mobile since 2009. At the onset of its development, Teras BRI was established in the heart of traditional markets and business centers, bringing the services closer to shop owners and traders in the market. Customers may save, apply for loans, or perform other banking transactions without leaving their businesses. BRI has added 434 Teras BRI and 115 Teras BRI Mobile in 2013. In total, there are currently 2,212 Teras BRI and 465 Teras BRI Mobile.

The additions of outlets were not only coming from newly opened units, but also from improving status of several operating units. To reach potential customers who are located in remote areas, with poor inland infrastructure yet reachable via water, BRI will embark on the development of a Teras BRI on navigable vessels in 2014.

Growth of BRI's Conventional Network

Marketing

Growth of BRI ATM and EDC Network

During 2013, BRI has added 4,000 ATMs, 41,221 EDC units, 100 CDMs, and 8 e-Buzz. As of the end of December 2013, BRI had 18,292 ATMs, 85,936 EDC units, 192 CDMs, and 100 Kiosks. To enhance mobility of access, BRI also has 50 mobile outlets, called e-Buzz.

With these new units, BRI's service network as of the end of 2013 comprised 9,808 operating units (including regional offices and head office) and 104,228 ATM network and BRI EDC (see also table "BRI Profile – Operational Network" and discussion under "Business Review – Consumer Business").

Aside from the physical network expansion, BRI also conducted various other programs in 2013 to optimize the function and quality of operating units:

- Enhanced customer convenience during transacting in conventional unit or e-channel
- Increased training frequency for employees of BRI Unit and Teras BRI, to ensure the provision of services effectiveness to micro customers.
- Opened Priority Lounge, Pension and Employee Loan Service Office, and Priority Service Center.
- Added e-channel: ATM, EDC, and SSPP (Self Service Passbook Printer) to achieve optimization, efficiency, and effectiveness of BRI e-channel network.
- Develop technology application to expedite loan process in BRI Unit, Teras BRI, and Teras BRI Mobile.

Quality Improvement

As part of the marketing strategy implementation that aims to improve customer satisfaction and loyalty, BRI continuously strives to improve service quality for customers in order to drive business growth over the long term. This is in line with BRI's vision to provide quick, accurate, secure, friendly, and convenient services to all customers, and to make BRI's services as the benchmark in the banking sector.

Strategic steps taken by BRI to enhance the quality of its services include, among others are defining service level agreement (SLA) and service rating for all BRI conventional networks. BRI also conducted Service Quality Campaign 1-96 program, targeting to be among the top 5 banks with the best services.

Denoting the success of service improvement initiatives, BRI Priority banking attained a Diamond rating in Service Quality Award from Caree – CCSL.

Marketing

Efforts to Enhance Customer Satisfaction

Aside from the foregoing strategic steps, BRI also carried out the following initiatives to develop service quality:

- One-gate system for customers' complaints and monitoring of complaint resolutions.
- Complaints can be easily lodged through "Call Center BRI" and measures will be taken to resolve the issues.
- Standardize services and conduct refreshing course on products and policies to improve customer satisfaction.
- Enhance service skill and service leadership by providing trainings for relevant employees in all Branch Offices in Indonesia.
- Select Center of Excellence in terms of Service Quality in each Regional Office
- Increase the role of response center, based on Service Level Agreement (SLA).
- Build skills and knowledge of help-desk operators by providing Service Quality training at minimum one time every year.

Service Quality Advancement

BRI consistently advances its service quality by defining service improvement targets and quality development strategy that covered aspects of HR, Processes, Premises, and Promotions.

Marketing

Service Quality Award

Various intensive efforts initiated to improve service quality have received an appreciation and were acknowledged by independent parties. Based on Marketing Research Indonesia survey on 21 Banks in 2012/2013, BRI exhibited an improvement and score increase by 4.03 points, rising from 81.91 to 85.94, and its rank in 2012/2013 moved from RANK 5 to RANK 4.

In addition to MRI survey, BRI was also the recipient of the following service quality awards in 2013:

1.	The Best Agent Inbound (Bronze)	ICCA
2.	The Best Contact Center Indonesia 2013	ICCA
3.	3 rd Best Phone Banking Machine	MRI

Customer Satisfaction Survey

To gain feedback on its service quality improvement, BRI regularly conducts customer perception surveys on the level of BRI's service quality, carried out by BRI's internal unit and by an independent third party. Internally, the survey is conducted at a minimum of two times every year by each conventional outlet in Indonesia, through which data collection is performed using an information technology system. Meanwhile, a survey conducted by an independent third party is conducted quarterly and presented with competitor comparison. The survey also differentiates from national and local level surveys, as well as distinguishing between Java and the outer islands. Both internal and independent surveys use sampling of respondents across all segments, with various educational, occupations, and age backgrounds.

The result of the independent and internal surveys shows that the level of BRI's customer satisfaction increases consistently in almost all indicators compared to several other banks. However, some notes of future improvements need to be taken, such as, in terms of service improvement and BRI's product features. The survey is used as a basis to enhance BRI's service quality, targeted to reflect the ideal customer satisfaction expectation toward banking services and to eventually secure BRI's customer loyalty.

Technology and Information System

Information Technology

BRI consistently develops and utilizes Technology and Information System (TIS) advancements to enhance the Bank's competitiveness and to provide trusted banking services as expected by customers. BRI is determined to use information technology support to ensure a consistent competitiveness, and efficiency in its banking solutions, as well as pose low operational risk.

The programs relating to information technology utilized to support BRI's operational activities are:

1. Implementation of Business Continuity and Disaster Recovery Plan to assure operational continuity, improve customers' trust, and mitigate operational risk arising from information technology failure.
2. Continuous monitoring of security system through Enterprise Monitoring System.
3. Regular implementation of Security Awareness Programme for all employees, to raise awareness on the secured utilization of BRI's information technology system.
4. Broaden the coverage of information technology security best practices in accordance with ISO27001:2005 and prevailing regulations from Bank Indonesia and the Government.

To further BRI's endeavors in becoming the leading commercial bank in Indonesia, BRI has formulated and started the gradual implementation of TIS since 2008. The program, Information Technology Strategic Plan (ITSP) BRI for the period 2008-2013, comprises several development phases:

“ BRI determines to utilize the latest information technology to improve service quality to be more competitive productive and efficient. Thus BRI have the ability to reduce operational risk and give substantial fee based income.

”

1. Wide availability of access channels with varied and integrated features.
2. Adoption of IT (Information Technology) leading-edge
3. Availability of real time and online data access.
4. Implementation of (near) zero downtime.
5. Use of multimedia and paperless technology.

The various IT development programs carried out in 2013 consistently adhered to ITIP roadmap as briefly described below.

Feature Development

The development of e-channel application features is one of BRI’s strategies to optimize the availability of infrastructure and act as a way to increase fee-based income. Throughout 2013, BRI added 137 new e-channel features, with the following details.

No.	Channel	e-channel features				
		2009	2010	2011	2012	2013
1	ATM	110	124	159	191	230
2	EDC	80	136	160	227	230
3	Mobile Banking	28	38	49	79	114

Information and Technology System

No.	Channel	e-channel features				
		2009	2010	2011	2012	2013
4	Cash Management	15	24	87	118	136
5	Phone Banking	33	33	33	3	3
6	Internet Banking	25	41	56	59	75
7	CDM	64	64	159	191	202
8	Kiosk	23	23	23	23	23
9	SSB (Self Service Banking)	0	0	0	25	31
10	BRILink	7	7	7	7	7
TOTAL		385	490	733	923	1,060

IT Governance

During each phase of IT development and implementation carried out to support quality banking operations, BRI always abides by Bank Indonesia regulations concerning risk management in information technology utilization for Commercial Banks. To that end, the Bank has built BRI IT Architecture that forms an integral part of the 2008-2013 TISP.

IT Policy and Procedure

BRI has a set of policies and procedures to support corporate governance process, among others are:

1. Information Technology Strategic Plan (ITSP) 2008-2013
2. BRI Information Technology Architecture
3. Information System General Policy
4. BRI Information Technology System Security General Policy (KUTSI)
5. Implementation of Risk Management in the Utilization of Information Technology.
6. BRI Business Continuity Management (BCM)
7. Information Technology Equipment Standardization

IT-Based Management System Development

To support consistent and sound GCG implementation, BRI has developed a number of IT applications to assist the management in conducting monitoring activities as well as in decision-making. IT applications developed by the Bank among others are:

1. MIS-Risk Management System

Information system application for risk management system covers, among others, applications to manage operational risk, credit risk, and market risk. Risk measurement tool and methodology are discussed under "Risk Management" chapter.

2. Compliance Dashboard

Compliance Dashboard is developed to monitor BRI's compliance to regulations. The Dashboard also provides alerts for the Bank's executives during decision-making and policy formulation. Compliance Dashboard monitors, among others, Third Party Funds, Derivative, SID and LBU fine, NPL, CAR, Corporate Loan,

Medium Loan, Retail Loan, Micro Loans, and so forth. Applications are continuously enhanced by development of new features.

3. MIS-HR

BRI has also developed IT system for HR management. HR internal reporting and the overall HR management are now supported by adequate IT system (including IT security system) and competent staffs. Timely, accurate, comprehensive, and reliable information enables effective decision-making in the Bank.

4. Star Web System

BRI's STAR Web System is utilized to perform online monitoring of the quality of service and operations. The System ensures easy data input of monitoring results, enabling accurate documentation of data, and allows operating units to quickly improve service and operational qualities.

Information and Technology System

5. Audit Management Information System

BRI builds an Audit Management Information System with the purpose to improve quality and efficiency of Risk-Based Audit. The information technology infrastructure developed by Internal Audit unit among others are:

- a. Audit Management Information System that integrates all audit processes from annual audit planning, individual audit planning, individual audit execution, reporting, and documentation.
- b. BRIdex application as an analysis tool to identify increase of risk indicators.
- c. Sustainable development of Electronic Data Center (PDE) for auditors. PDE handles centralized data processing used for audit activities. Results of data processing generated by PDE are available for all auditors in their respective audit region.
- d. Supporting System
The system in this category handles various fields that do not directly related to audit process, such as: CSS (Customer Satisfaction Survey) to process survey results of auditee satisfaction after each audit process; and AER (Internal Audit Electronic Register) that handles inventory of IT infrastructures (hardware) available in each audit office.

6. e-Procurement

E-Procurement application is an electronic/online procurement of goods and services, aiming to ensure transparent procurement processes. BRI's e-procurement application consists of 10 (ten) modules that includes:

- a. Budget Management
- b. User Management
- c. Vendor Management
- d. Request Management
- e. Procurement Management
- f. Bid Auction
- g. Bidding Winner Selection
- h. Contract Management
- i. Vendor Performance management
- j. Report

IT Development Plan 2014

The goal of IT development plan is to create an integrated one stop service, utilizing extensive channels and various products, by providing real time and online data access as well as reliable technology security.

HR Development in IT

Aside from developing programs, adding application features, and upgrading IT equipment, BRI also builds the competence of HR in IT. HR competence enhancement is carried out through various relevant trainings including in application, certification program, IT risk management, and programming courses to develop application features.

Center of Operations

Seamless operational banking transactions in 9,808 of BRI's outlets and over 100,000 e-channel that are connected real time online, requires the support of reliable and efficient operations center. To meet this particular need, BRI has an Operations Center that is capable to handle a multitude of different transactions and process millions of transactions per day with high complexity and massive customer database.

BRI's Center of Operations is responsible to process and monitor operational banking transactions through conventional and e-banking networks. To ensure the achievement of targets of having operation centers in accordance with international best practices in the banking sector, BRI has built and developed a fully centralized, fast, and low-risk operations system. The operations system also has an integrated monitoring and control system suitable to BRI's needs.

Business Process Improvement and Operations Efficiency

BRI undertakes business process improvement efforts to optimize the speed and accuracy of services that would ensure customer satisfaction. The program includes enhancement of internal business processes for all back office transactions and implementation of enterprise reconciliation.

Operations efficiency that has been intently pursued by BRI aims for cost reduction without overlooking inherent risks. The result of operational efficiency contributes to efforts to control BRI's operating expenses, in line with the spirit of green banking.

“ Business process enhancement is conducted with the purpose to optimize service time and accuracy and ensure customer satisfaction – resulting in increased transaction volume, transaction value, and fee-based income from banking transactions.

”

Outcome of the Enhancement Program

Implementation of business process enhancement has generated real results, as evident from increased transaction volume through various features of BRI.

Development of BRI's e-Banking Transactions

In 2013, the total e-banking transaction volume was 1,258.7 million transactions (an average of 3.5 million transactions per day), reflecting significant increase by 48.0% from the transaction volume in 2012. The increase of volume was consistent with increase of circulated cards that amounted to 19.4 million of active ATM/Debit cards in 2013. The largest volume of e-banking transactions came from Debit Card usage, amounting to 1,150.7 million transactions that were equal to Rp757.8 trillion by end of 2013, and grew by 45.8% from the volume in 2012.

Development of RTGS and Clearing Transactions

In 2013, BRI's incoming RTGS transactions reached transaction value of Rp6,076 trillion and transaction volume of 1.21 million transactions. The value of outgoing RTGS reached Rp6,099 trillion, from 1.35 million transactions.

Incoming Clearing Transactions (Incoming Debits) also experienced increase to Rp23.5 trillion from 704.1 thousand transactions, while the value of Outgoing Clearing Transactions (Outgoing Debit) reached Rp5.23 trillion. For Clearing Credit, total inward transactions amounted to Rp47.7 trillion, rose by 75.0% from 2012, with a total of 4.8 million transactions in 2013 while outward transactions reached Rp30.9 trillion and 24.7 million transactions.

Center of Operations

Development of Remittance Transaction

The total volume of incoming Remittance in 2013 reached 2.60 million transactions and total value of USD21.87 billion. Meanwhile, outgoing remittance transaction in 2013 reached 45.8 thousand transactions with total value of USD16.73 billion.

ISO 9001:2008 Certification (Quality Management System)

Activities of BRI's Center of Operations that support sound corporate governance have attained recognition of ISO 9001:2008 certification from LQRA (Lloyd's Quality Registration Assurance) certification agency, accredited by International Accreditation Body - UKAS (United Kingdom Accreditation Service) and the National Accreditation Committee, with the following scope:

- Provision of Payment System by RTGS, Clearing, and Remittance
- Provision of Card Centre Production and Complaint Handling Card Production, and
- Complaint-Handling processes

Center of Operations

2014 Strategic Objectives

Entering 2014, BRI has prepared strategic plan relating to operational process to improve performance and services to customers through a number of programs, including:

- Apply ISO 9001:2008 certification for ATM Reconciliation Center and Center of Operations Reconciliation.
- Centralize Debit Draft
- Improve customers' sense of security when transacting with BRI by replacing some BRI Debit Cards with new cards equipped with chips.
- Improve competence, skill, and knowledge of employees.
- Build Automation System for all remittance transactions.

Fixed Asset Management and Procurement of Goods and Services

BRI aims to address challenges arising from business developments and network expansion by managing its assets efficiently whilst ensuring that the needs of all operating units are well met through optimum goods and services procurement.

The management of fixed assets and procurement of goods and services, including property, in BRI, abides to Good Corporate Governance (GCG) principles, which also supported by adequate information technology applications. With efficient, effective, and flexible management and procurement process, the Bank shall consistently meet its business growth momentum.

Meanwhile, to meet fixed assets and logistics needs optimally, the operating unit that carries out the management of said needs, as well as property procurement, continuously coordinates with operating unit that handles logistics needs order. Their coordination is supported by adequate information technology facility.

FAM and Goods and Services Procurement System Development

To optimize the function of fixed asset management and procurement of goods and services, in 2013 the Bank developed a system to ensure that goods and services procurement is conducted optimally, transparently, and efficiently.

The existing application can also assure that BRI's FAM as well as procurement of goods and services are accountable and accurate throughout the chain of the process from distribution, asset recognition, insurance, taxation, until release of asset.

“Promoting transparency and efficiency, BRI develops Fixed Asset Management (FAM) and Procurement of Goods and Services System backed by information technology infrastructure.”

The application systems are, among others:

1. MIS-FAM
MIS-FAM manages BRI's fixed asset database in centralized manner.
2. PDCA System
The system has Service Level Agreement (SLA) monitoring function, which defines standard process duration for procurement process in operation.
3. Archive Management System
The system supports computerized procurement document archiving and management, and can be conveniently used to review past documents.
4. E-Auction System
This system is used to automate best price proposal selection during procurement process, whether in direct appointment or bidding process.

Strategic Plan for FAM and Procurement of Goods and Services

To support FAM and procurement of goods and services for seamless operational activities, a strategic plan has been established for 2014, which includes:

1. Asset optimization
2. Acceleration of goods and services procurement processes
3. Standardization of goods and services
4. Development of goods and services procurement system to improve accuracy.
5. Improvement in goods and services quality.
6. Optimization of organization and business process as well as alignment of logistics policies.

Risk Management

Throughout the year of 2013, and to keep in the forefront in its field, BRI has developed its business through innovative products and services in a sustainable manner, as well as the expansion of outlet and e-channel. While BRI has also been exposed to dynamic business risks, the implementation of enterprise-wide risk management is more focused on value creation that align with the level of risk appetite.

Risk Management process is applied consistently in every business process and BRI daily operation activities as a key factor in achieving the predetermined performance targets; to be a sound, growing, and sustainable Bank.

Risk Management has an important role in improving the quality of internal bank management in two aspects: capital protection and

optimization of risk and return relationship. With a vast scale of operations and business activities that continue to increase, BRI implemented an integrated risk management program to identify, measure, observe and control risk exposure throughout their business lines.

BRI's Risk Management is an independent function to the business and the audit functions. These three functions play active roles in implementing risk management with different authorities as the first line, second line and third line of defense. The applications of these concepts are consistently implemented to maintain independence in the decision-making process, to be impartial to all operational units.

Legal Basis for Risk Management

The implementation of BRI's risk management refers to Bank Indonesia's regulations, namely:

1. Bank Indonesia Regulation (PBI) No.5/8/PBI 2003 regarding the Implementation of Risk Management for Commercial Banks, with amendments in PBI No 11/25/PBI/2009
2. Bank Indonesia Circular Letter No. 5/21/DPNP regarding Implementation of Risk Management for Commercial Banks, with amendments in SE BI No 13/23/DPNP

Internally, BRI has released the BRI General Risk Management Policy that is stipulated in the Decision Letter No S.248-DIR/DMR/04/2009, along with sub-policies that regulate the application of Risk Management in BRI's Operating Units.

“ BRI implemented an integrated risk management program to identify, measure, observe and control risk exposure throughout the business lines.

The Enterprise-wide risk management is applied with the three lines of defense concept and supported with the General Risk Management Policy (KUMR) and periodic evaluation to improve the risk management efficacy.

”

Risk Management Organization Structure

BRI implemented an integrated enterprise-wide risk management framework to control the 8 risks that face the bank's business activities. The framework included implementation of the four pillars of risk management as stipulated in the PBI No.11/25/PBI/2009 regarding the application of risk management for commercial banks, including (1) active supervision by the Board of Commissioners and Board of Directors, (2) adequate policies, procedures, and limits, (3) risk management processes and risk management information systems, and (4) internal control systems. Application of the four pillars above are addressed as follows :

1. Active Supervision by the Board of Commissioners and Board of Directors

The Board of commissioners and directors are responsible for effective risk management at BRI. The Boards have to understand the risks faced by BRI and play an important role in supporting and overseeing the successful of implementation of risk management for all operating units.

The Board of Commissioners evaluate the risk management policy and implementation conducted by the Board of Directors. This evaluation is necessary to ensure that the Board of Directors' manage BRI's activities and risks are done effectively. In conducting their active supervision of BRI's risk management, the Board of

Commissioners was assisted by the Risk Management Supervisory Committee (KPMR).

The Board of Directors determines the direction of the policy and a comprehensive risk management strategy along with its implementation. The Board of Directors also ensures that all material risks and its impacts have been managed, and that the remedial measures for any problems or irregularities in BRI's operations are implemented. The Board of Directors must also maintain the culture of risk management including risk awareness at all levels of the organization.

The Risk Management Committee (RMC) as the highest committee assisted BRI's Board of Directors in BRI's risk management system. The RMC is a non-structural entity

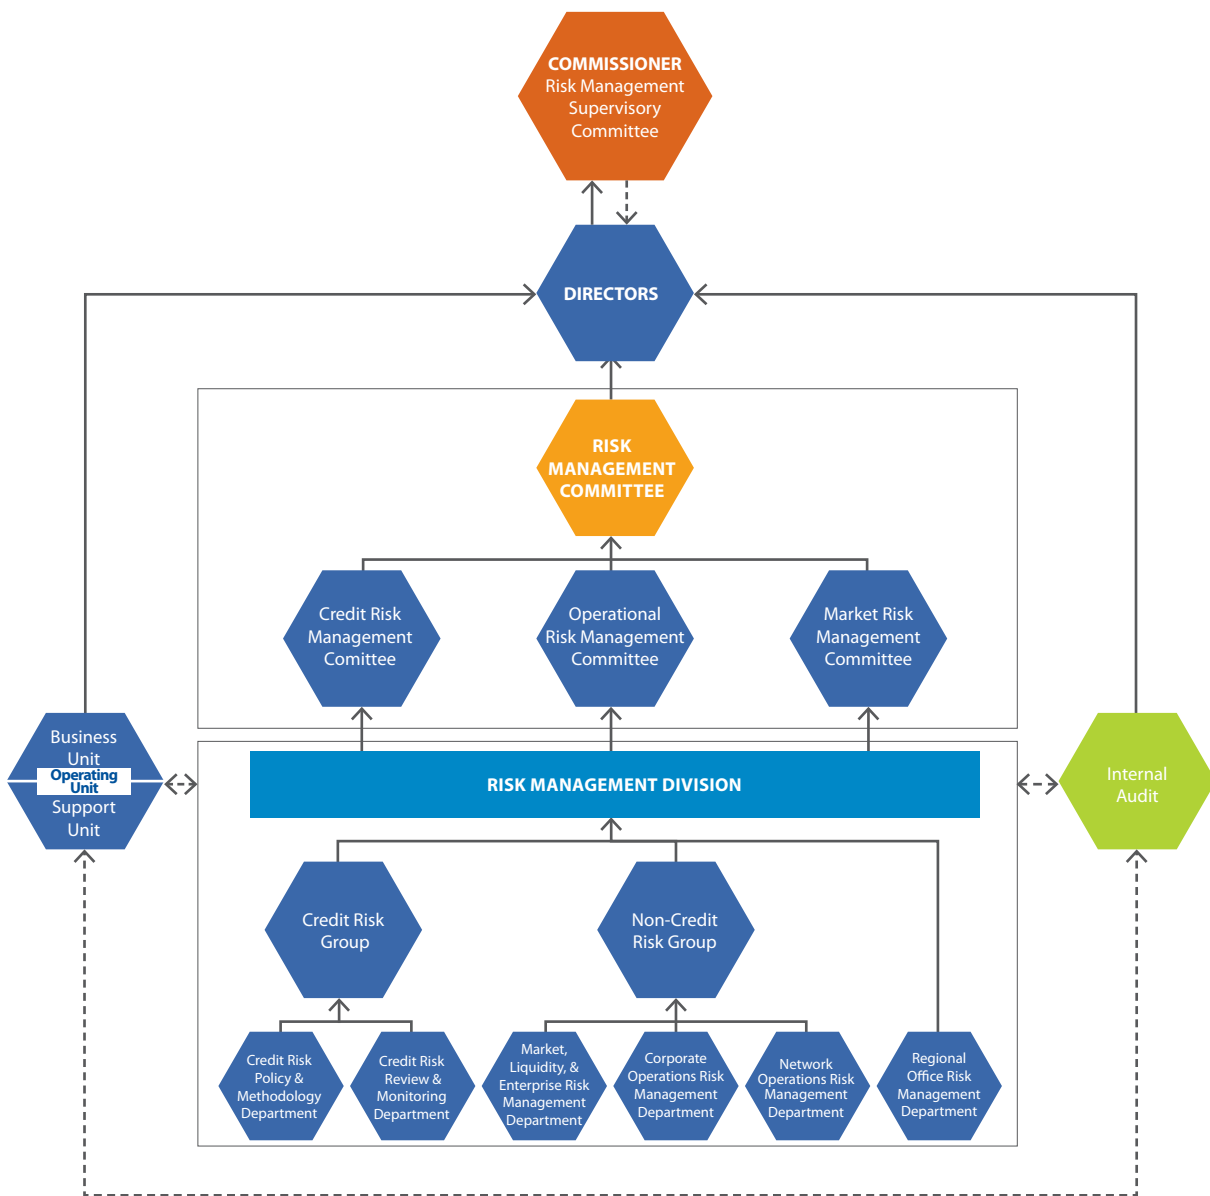

Risk Management

and independent of operating units in charge of providing recommendations to the President Director for policy formulation, improving the implementation of policies, evaluating the progress and condition of risk profiles, and providing suggestions and remedial measures. RMC is conducted periodically, at least once every three months.

To address issues that were specific to certain types of risk and required immediate decisions, the RMC also conducted restricted RMC meetings, also known as the sub-RMC meetings. There are 3 (three) types

of sub-RMCs: the CRMC (Credit Risk Management Committee), the MRMC (Market Risk Management Committee) and the ORMC (Operational Risk Management Committee), which were set up to discuss issues related to credit risk, market risk, operational and other risks.

Under the supervision of Board of Directors, the BRI risk management structure consists of Operating Unit, Risk Management, and Internal Audit. The BRI Risk Management Organization Chart is as follows:

Description :
 → Responsibility and Authority managerial line
 - - - - -> Communication Line

Risk Management

2. Adequacy of Policies, Procedures and Limits

The General Risk Management Policy (KUMR) outlines the fundamentals of BRI's risk management policies and is the highest policy in managing the BRI's risk management activities. The General Risk Management Policy acts as a guide for establishing and implementing risk management policies according to the prevailing regulations.

The General Risk Management Policy is explained in detail in the Risk Management Implementation Code (P3MR). The Code outlines the phases of the risk management process, including risk identification, risk measurement, risk monitoring and risk control. The Risk Management Implementation Code (P3MR) consists of The Credit Risk Management Implementation Code (P3MRK), The Operational Risk Management Implementation Code (P3MRO), The Market Risk Management Implementation Code (P3MRP), and The Enterprise Risk Management Implementation Code (P3ERM).

Procedures and determination of risk limits for each type of risk were managed for all products and BRI business activities, according to the level of risk that was undertaken (risk appetite), considering the experience of managing the risk in question. The aforementioned limits were reviewed at regular intervals to adjust with changing conditions.

BRI's Board of Directors has been authorized to establish risk limits and risk tolerances for each type of risk exposure with respect to experience, capital adequacy, the capabilities of the systems and the risk management program, as well as any other provisions that may apply.

3. The Process of Risk Management And The Risk Management Information System

The process of risk management consists of:

a. Identification

Identification is achieved by analyzing all the types and characteristics of the risks inherent in each BRI business activity, including products and other services. The process of risk identification determines the scope and scale of measurement stages, monitoring and risk control. Risk identification is a proactive measure and this covers all business activities carried out at BRI, in order to analyze the sources and potential impacts of risk.

Identification of risk issues is undertaken at the level of the Head Office, Regional Offices, and Branch Offices across Indonesia by using Risk Management tools. Risk issues' development and updating are carried out at this stage.

b. Measurement

The risk measurement system is used to measure BRI's risk exposure as a reference for control. Risk measurement is performed regularly for products and portfolios, as well as for all BRI business activities. The approach and methodology of measurement procedures can be quantitative, qualitative or a combination of the two.

The measurement of risk is reflected in the quarterly Consolidated Risk Profile Statement, the monthly Dashboard of Risk Profile, the monthly report of Regional Office Risk Profile, the quarterly report of consolidated RCSA, the quarterly report of stress-testing analysis, the weekly report of potential loss, the monthly report of cash ratio monitoring, and the quarterly Top 50 Risks Issue.

c. Monitoring

Risk monitoring activities are conducted by evaluating risk exposure inherent in the entire portfolio of products and BRI business activities, as well as the effectiveness of risk management processes. Examples include evaluating limits, Key Risk Indicators, and the realization of the action plan created by Operating Units.

Risk Management

d. Control

Risk control is carried out by providing follow up on moderate and high risk which exceeds the limits, increasing control (tight supervision), adding capital to absorb potential losses and doing periodic internal audits. In addition, BRI also perform Products and New Activities Analysis.

Risk Management Information System

The Risk Management Information System is part of BRI Management Information System (BRI MIS) and is important in supporting the implementation and processes of identification, measurement, monitoring and risk control. Some of the risk management information systems implemented are the Operational Risk Assessor (OPRA), the Loan Approval System (LAS), and the Treasury and Market Risk System (GUAVA).

4. Risk Management Internal Control System

The overall organization's internal control is implemented through:

- a. Determination of an organizational structure with a clear separation of functions between operating units (business units) and units that conduct risk control functions (risk management units).
- b. Determination of an independent risk management unit that makes policies and methodologies for measuring risk, setting risk limits and making data/model validation.

- c. Implementing the 'three lines of defense' concept.
- d. All transactions of functional activities that have exposure to risk must be reviewed and monitored accordingly by each business unit.
- e. Data validation is conducted by officers and the independent units of the operating units, at least once a month for all risks.
- f. Regular audits are conducted by internal auditors to assess the implementation of risk management processes and the system of risk management for any functional activities with exposure to risk.
- g. Implementation of the segregation of duties using the concepts of Maker, Checker, Signer (MCS) is adhered to all BRI operational activities.

Implementation of Risk Management Structure and System

The implementation of the aforementioned four foundations are, among others, conducted through these below functions:

1. Determining the Organization Structure and Functions of:
 - a. Risk Management Steering Committee (KPMR) is a committee in the Board of Commissioners level, which duties are to provide assistance to the Commissioner in the monitoring function of policy and implementation of Risk Management conducted by the Board of Directors.
 - b. The Risk Management Committee (RMC) is a committee that provides assistance to the Board of Directors in implementing Risk Management. Its

members are all the members of the Board of Directors and appointed executives who hold positions one level below BRI's Board of Directors. RMC's duty is to discuss BRI's overall risk profile and risk strategy. RMC is conducted periodically, at least once in three months.

- c. Risk Management Unit is a unit with the authority and responsibility to run the risk management process and is an independent unit outside of Operating Unit and Internal Audit Unit.
 - d. Risk Management function is a function/role that is run by appointed officials in each Operating Unit and is responsible for the implementation of the risk management process in the functional activity of each operating unit.
2. The formulation and implementation of the General Risk Management Policy as the highest regulation in risk management and the formulation of the The Risk Management Implementation Code (P3MR) in Credit, Operational, Market, and Integrated.
 3. Implementation of risk limits and stress testing.
 4. Determination of the tools and methodology for risk measurement, which consists of:
 - (1). Tools: Risk and Control Self-Assessment, Key Risk Indicator, Incident Management, Risk Management Forum, and Maturity Level Assessment.

Risk Management

- (2). Methodology: Basic Indicator Approach (BIA) and gradually into Standardized Approach (SA), and later into Advanced Measurement Approach (AMA).
- b. Credit risk
 - (1). Tools: Credit Risk Rating (CRR) and Credit Risk Scoring (CRS).
 - (2). Methodology: Standardized Approach (SA) and gradually into Internal Rating Based Approach (IRBA).
- c. Market risk
 - (1). Tools: VaR, Sensitivity Analysis, Maturity Gap, Maximum Cash Outflow.
 - (2). Methodology: Standardized Approach (SA) and ready to implement the Internal Model.
- 5. Development of risk management information systems including, Operational Risk Assesor (OPRA) for Operational Risks, Loan Approval System (LAS) for Credit Risks, and Treasury and Market Risk System (GUAVA) for Market Risk.
- 6. Increasing the effectiveness of the implementation of good corporate governance (GCG) and the Risk Management framework, through the implementation of the Risk Management Forum in each Operating Unit and the Risk Management Function attached to the designated officers in the Operating Unit. Additionally, there is a Regional Office Risk Management Group (MRK) in each regional office to provide guidance, monitoring, and verification to the implementation of the risk management process at the Regional Office.

Risk Management Program

Below is a list of BRI's work program and implementation of risk management throughout 2013:

1. Implementation of Credit Risk measurement with the automatic Standardized Approach (SA) and credit risk measurement simulation with Internal Rating Based Approach (IRBA) method.
2. Conducted policy and methodology review of Credit Risk Rating-Credit Risk Scoring (CRR-CRS), Credit Risk Modeling (PD, LGD and EAD) based on credit characteristics, MIS requirements and BRI's CRM system, as well as the simulation of risk-based pricing/risk premium with the CRR and CRS data for all business segments.
3. Performed credit risk stress test simulations to evaluate the impact of loss by reference to external conditions and macroeconomic conditions in 2013, among others: the devaluation of Rupiah and rising interest rates. Stress tests were conducted with a variety of scenarios, both historical and hypothetical, with attention to crises that have occurred.
4. Implement back testing to test the calculation model used, whether it is still valid and can describe the actual risk.
5. Conducted a review of quantitative requirements for the improvement of market risk (VaR) generated by the Treasury and Market Risk (GUAVA) application system, and the qualitative requirements review, in this case by placing competent staffs dedicated to Middle Office functions.
6. Applied transaction limits and market risk limits associated with internal models.
7. Monitored and controlled operational risks through information coming from Risk Management Forum and the OPRA. This device facilitates the implementation of an integrated MRO processes in preparation for the calculation of operational risk capital charge using the Advanced Measurement Approach (AMA)
8. Conducted risk management adequacy test for the proposal of new products or activities (PAB). Any new products or activities proposed by the initiating operating unit should be reviewed to ensure risk management on the new products or activities are adequate.
9. Applied anti-fraud strategy as part of the implementation of Risk Management in anticipation of fraud in BRI
10. Coordinated the implementation of Business Continuity Management (BCM) with relevant operating units such as trial on Switch Over DC-DRC, call tree and evacuation drill at high-risk BRI operating units.
11. Data and MIS fulfillment to support the implementation of Basel III
12. Information dissemination to increase awareness regarding the implementation of risk management to all operating unit as part of risk awareness culture.

Risk Management

Risks Identification

Risk management processes are consistently implemented to all bank business activities and day-to-day operations. A consistent risk management implementation is an important factor influencing BRI's success in achieving predetermined optimal performance targets for maintaining a sound bank with sustainable growth.

Risk factors that influence BRI's business strategy both directly and indirectly, as well as efforts to manage risks, are classified into the following eight categories:

Credit Risk

The implementation of credit risk management is done through BRI organizational structure that describes the involvement of all parties related to credit risk management (Board of Commissioners, Board of Directors, Risk Management Division, Operating Units and Internal Audit Unit). The Operating Unit comprises of Core Risk Taking Unit and Supporting Risk Taking Unit. BRI has a Credit Risk Management Committee (CRMC), which is the Sub-Risk Management Committee (RMC) that discusses issues related to credit risk exposures and the implementation of credit risk.

In order to manage credit risk, BRI has set some prudential banking principles that are reflected in its credit policy, credit quality assessment procedures, administration and credit approval process such as the separation of the functions of loan officers into the following categories: RM (Relationship Management) and CRM (Credit Risk Management), implementation of the "Four Eyes principles", implementation of a Risk Rating/Scoring System (CRR and CRS), the separation of non-performing loans, as well as the establishment of a healthy credit procedure through Segmentation and Targeting (PS), Criteria of Acceptable Risk (KRD) and Annual Marketing Plan (RPT).

Separation of the functions of RM and CRM is reflected in the separation of responsibility in managing current (performing) loan and the non-performing loans. For those reasons, BRI have separated divisions to handle those loans, so that the risk management in lending activity can be focused without disrupting business processes which oriented towards sound business growth. In addition, BRI implemented a compliance test process done by Compliance Directorate to ensure that precautionary principles were applied to the approval on loans above a certain size.

BRI has a policy related to concentrated credit risk management through the establishment of guidelines for credit risk limits. The guidelines are used to determine overall credit risk limitations in portfolio level or bank level for all BRI's products and activities with

potential credit risks, with regard to the capital adequacy to absorb the risk arise or losses, and the volatility in loan exposure. Determination of risk limit is aimed to reduce the credit risk exposed by the concentration of loan disbursement.

BRI manage its credit risk by monitoring credit concentration and actual credit risk exposure in the portfolio, business segments and economic sectors related to credit risk limit and the target.

The measurement and control of credit risk has been implemented through borrower risk assessment using Internal Risk Ratings (Credit Risk Rating/Credit Risk Scoring) since 2001. The current internal Credit Risk Rating/Scoring used at BRI is based on empirical/historical data from the existing BRI borrowers by statistical methodology.

This internal rating is done periodically in order to review the accuracy of the models and assumptions used to project failure, and assumption adjustments will be done should there be any changes in external (regulator) or internal regulations. To overcome the disadvantages that may arise over the use of internal rating models, an independent unit has carried out validation on the unit applying the model. The validation process of the credit risk measurement models is conducted with the back testing method.

Currently, the CRR and CRS calculations are automated and integrated with business processes

Risk Management

through the application of the Loan Approval System (LAS). The LAS is designed to support the approval process and to ensure compliance to the authority delegation regulations.

Internal Rating (CRR) in BRI can be used to determine the interest rate charged for borrowers (Risk Based Pricing). This risk based pricing approach does allow price discrimination according to risk level (high risk-high return).

BRI also conducts periodic stress testing analysis using macroeconomic data and BRI internal data in various scenarios. The Credit Risk Management is done through a variety of risk control that is built-in the loan disbursement procedures since the beginning or loan initiation, supervising and monitoring, restructuring, until the settlement of non-performing loans.

The measurement of the minimum capital requirement to cover risk is performed according to BRI policy referring to the Standardized Approach of Basel II as required by Central Bank since January 2012. The calculation of credit risk is reflected in the Risk Weight Assets (RWA) which calculated on monthly basis which

consist of the risk of borrower failure, the risk of counterparty failure and the risk of settlement failure. Parallel with this is the preparation and development of the methodology of Internal Based Rating Approach (IRBA).

Accounts Past Due Or With Decreased Value/Impaired

BRI sets its own definition for accounts that are past due and accounts experiencing decreased value. Accounts that are past due are all accounts that are more than 90 (ninety) days overdue, either for the payment of principle or interest.

All accounts may experience decreased value/impaired if they are in a condition where there is an objective evidence of loss as a result of one or more events that occurred after the initial acknowledgement of the loan, and the adverse events can impact future cash flows, financial assets or a group of financial assets which can be accurately estimated.

Objective evidence is any result of observation of the events that is a concern to BRI which will affect the borrowers' ability to pay in the future, so that it would adversely impair BRI's loan. If the decline in value is such that the credit value after impairment

is less than the carrying value from the outset, a reserve for impairment losses (Allowance for Impairment) must be prepared to cover losses. Reserve of allowance for impairment loss is calculated from the amount of impairment loss on financial assets, whether evaluated individually or collectively.

The following table discloses BRI receivables based on portfolio category which was divided into region, the remaining term of the contract and the economic sector, for the bank individually and consolidated with its subsidiaries.

BRI has implemented prudential principles by segregating the credit officer functions, applying the Four Eyes Principle, implementing Risk Rating, separating non-performing loan management, determining Target Market and Acceptable Risk Criteria and Annual Marketing Planning in the credit risk management.

Risk Management

Approach Used to Determine Allowance for Impairment Losses (CKPN)

The approaches that BRI used to determine the type of Credit Risk assessment on Loan, whether individually or collectively, are explained below:

1. Individual Impairment
 - Loans that individually has a significant value, with objective evidence of impairment
 - Restructured loans that individually has significant value
2. Collective Impairment
 - Loans that individually has a significant value, without objective evidence of impairment
 - Loans that individually has no significant value
 - Restructured loans that individually has no significant value

Impairment Losses (CKPN) Calculation Methodology

BRI's Methodology of Impairment Losses (CKPN) Calculation are as follows :

1. Individual Impairment:
 - Discounted Cash Flow
Conducted by estimating the recoverable amount based on the identification of future cash flows and the estimated present value of those cash flows. Impairment loss is calculated by comparing the carrying amount of financial assets with cash flows discounted by a factor based on the effective interest rate of the financial assets.
 - Fair Value of Collateral
The measurement of impaired financial assets reflecting the fair value of the collateral. The collateral is not recognized as a separate asset from the impaired financial asset.
2. Collective Impairment
Determination of the historical loss rate is calculated using statistical methods based on internal loan grades by considering the following factors :
 - Probability of Default (PD)
The probability that debtors will fail to fulfill their obligations, as measured by the traditional Roll Rate Method (using age data for delinquent financial assets), Migration Analysis (using an internal rating system and calculated by analyzing the migration of the level of outstanding financial assets from the highest grade to the lowest grade)
 - Loss Given Default (LGD)
The level of loss caused by debtors' failure in fulfilling their obligations.

The following tables disclose billing and provisioning by regions and economic sectors for the Bank, individually and consolidated with subsidiaries.

Counterparty Credit Risk

The counterparty credit risk lies in treasury and international activities conducted by BRI, specifically for Credit Line products. Net Receivables for the exposure that caused credit risk as a result of the counterparty failure comprises of over-the-counter (OTC) derivatives exposure, repo transaction exposure from the Credit Risk from the issuance of Marketable securities that become underlying repo transactions and reverse repo transactions. Credit Risk Mitigation for BRI of counterparty credit risk is achieved through implementing the guarantee technique through securities or credit that meet regulatory requirements.

Risk Management

Credit Risk Mitigation (CRM)

BRI takes into account the existence of collateral, warranty, guarantees and credit insurances as Credit Risk Mitigation (CRM) techniques. The Bank has procedures to identify, measure, monitor and control risks arising from the use of the CRM techniques, such as legal risks, operational risks, liquidity risks and market risks, including procedures to ensure that the execution of collateral, warranties, guarantees, and credit insurance are conducted in a reasonable manner.

Type of recognized financial collaterals are:

- a. Cash
- b. Demand Deposit, Savings, or Time Deposit
- c. Gold
- d. Government Securities (SUN) issued by the Government of Republic of Indonesia, which covers Government Bonds and Treasury Bills (SPN)
- e. Government Sharia Securities (SBSN)
- f. Certificates of Bank Indonesia (SBI) and Bank Indonesia Sharia Certificates (SBIS)
- g. Securities that have been rated by Rating Agencies that are approved by Bank Indonesia with the minimum rating of:
 - (1). Equal with BBB- if issued by parties under Governments of Other Country's Receivables
 - (2). Equal with BBB- if issued by parties under Public Sector Entity Receivables
 - (3). Equal with BBB- if issued by parties under Multilateral Development Bank Receivables
 - (4). Equal with BBB- if issued by parties under Bank Receivables
 - (5). Equal with A- if issued by parties under Corporate Receivables
 - (6). Equal with A-2 for short-term bonds

As long as the collateral is recognized, the underlying instruments or the collateral from reverse repo transaction can be considered as risk mitigation on reverse repo transaction.

BRI takes into account the existence of collateral, warranty, guarantees and credit insurances as **Credit Risk Mitigation** (CRM) techniques. The Bank has procedures to identify, measure, monitor and control risks arising from the use of the CRM techniques.

Risk Management

In determining the value of the collateral, BRI uses the lowest value between the binding value of collateral, the fair value, or the market value. The revaluation of the fair value, or market value of the collateral is done periodically.

Recognized insurers are:

1. Parties included under portfolio category of the Government of Indonesia Receivables.
2. Parties included under portfolio category of Multilateral Development Bank and International Institutional Receivables, that has:
 - a. Lower risk weight than the insured receivables'; and
 - b. Rated at least BBB- or equivalent;
3. Commercial Bank incorporated in Indonesia, Foreign Bank Branch Offices in Indonesia, and the Indonesian Export Financing Institution with lower risk weight than the insured receivables';
4. Incorporated foreign banks classified as prime banks as stipulated in Bank Indonesia provisions concerning the legal lending limit;
5. Financial institutions engaged in underwriting or insurance coverage that is included in the portfolio category of Public Sector Entity Receivables and Corporate Receivables.

The credit underwriter/insurer can be a State-Owned Enterprises (SOE) or non-SOE. BRI has set specific requirements for each type of loan guarantee/insurance institution. The underwriting/credit insurance that is already in place are issued by both SOE and non-SOE institution. One example is the loan guarantee in the People's Business Loan (KUR) with a loan guarantee/insurance of at least 70% of the loan outstanding, with a term of loan guarantee/insurance at least equal to the credit period.

The following table discloses the weighted risks for receivables after considering the impact of credit risk mitigation and disclosure of receivables using the credit risk mitigation techniques for BRI, individually and consolidated with its subsidiaries, as of December 31, 2013.

Risk Management

Standardized Approach

The policy for calculating the Credit Risk for RWA was determined according to the Standardized Approach referring to Bank Indonesia Circular Letter No. 13/6/DPNP dated February 18, 2011. In the Standardized Approach, calculations are made by multiplying net receivables against predetermined risk weights based on the current rating of the debtor or counterparty in accordance with the appropriate Portfolio Category or a fixed percentage for each type of receivable.

The receivables in BRI's portfolio that weighted based on rating include Government Receivables, Receivables for Multilateral Development Banks and International Institutions, and Corporate Receivables. Meanwhile, other receivables are calculated without rating. The rating agency used by BRI is the state agency recognized by the regulator (Bank Indonesia), Pefindo. Recognized international agencies include, among others: S&P, Moody's and Fitch.

Risk Management

RWA Credit Risk Calculations

Calculation of the minimum capital requirements needed to cover credit risks was calculated in reference to BI regulations using the Basel II Standardized Approach since January 2013.

In the standardized approach, the calculations are made by multiplying the receivables against a predetermined risk weighted based on the current rating of the borrower or counterparty as per the appropriate portfolio category or by a fixed percentage for the specific type of receivable. The bank's portfolios that weighted based on rating were Bank Receivables and Corporate Receivables. Other receivables are calculated without rating.

The Risk-Weighted Assets for the credit risk as of December 31, 2013 were Rp 331.16 trillion, while the consolidated RWA credit risk for the bank and its subsidiaries amounted to Rp 346.92 trillion.

The following table illustrates the calculation of RWA for credit risk using the standard approach for BRI individually and consolidated with its subsidiaries as of December 31, 2013 in million Rupiah. BRI and its subsidiaries have no exposure from credit risk due to settlement risk and no exposure due to securitization.

Market Risk

Market risk is the risk due to changes in overall market conditions, including changes of option price against BRI's balance sheet and off-balance sheet positions, including derivative transactions..

BRI's market risk management comprises of front-office operational units (Treasury Division), back office units (Operations Center Division) and middle office units (Risk Management Division), each with their own respective authority. Front-office units are authorized to conduct transactions involving financial instruments. Mid-office units establish and monitor market risk limits and periodically verify the market data (market prices) that are used to mark to market (MTM). Back-office units settle treasury transactions and establish the daily market prices (MTM) at the end of each day.

BRI has implemented a treasury and market risk application system (GUAVA), an integrated system used by front, middle and back office units. Through this application, it is possible to measure the market risk by using an internal model approach (Value-at-Risk) which is integrated with the daily process transaction. Beside monitoring instrument risk exposure, it also monitors market risk limits and transaction limits, including dealer transaction nominal limits, cut-loss limits and stop-loss limits. Monitoring is conducted daily to accelerate the availability of updated information to support timely decision, especially for instruments classified into trading.

Financial assets and/or derivatives transactions for trading purposes can only be owned for a certain amount of time. Meanwhile, financial assets and/or derivatives classified as banking book portfolio can not be transfer to trading book position.

The banking book portfolio cannot be trade for short-term profit taking. This portfolio is intended for liquidity purposes or held to maturity.

Valuation of the trading book portfolio and the banking book portfolio is done using the quoted market prices of actively traded instruments (mark to market). The market price reflects actual and routine transactions conducted normally. Valuation results are based on market value (mark to market) and are periodically validated to ensure that consistent and fair market prices are used. If market prices are not available because the instruments are not actively traded, the determination of fair value is done based on the best-estimate approach (mark to model).

BRI measures market risk for the purpose of periodically monitor the market risk and also for capital adequacy calculations. The application of capital calculations currently accommodates the 1988 and 1996 Capital Accords that included credit risk and market risk on the Bank Capital Adequacy Calculation. In accordance with the 1996 Capital Accord and Basel II, market risk can be calculated using two (2) preferred methods: the standard method and the internal model.

Given the complexity of the methodologies used to calculate market risk, application of this method requires the readiness of banks to apply market risk calculations for capital requirements. Therefore, BRI has implemented the methodology in stages, starting with the standard method.

In accordance with Bank Indonesia (BI) regulations, market risk calculation by the standard method must take into account the bank only (without subsidiaries), including Interest Rate Risk and Foreign Exchange Risk. Calculations

Risk Management

of Interest Rate Risk by the standard method were made considering all BRI financial instruments classified as Trading Book that were exposed to Interest Rate Risk. The calculation of Exchange Rate Risk by the standard method was made for BRI's Trading Book and Banking Book positions that were exposed to Exchange Rate Risk.

The risk factors that were considered when calculating the Interest Rate Risk using the standard method are:

- a. Specific Risk from each securities or financial instrument, regardless of long or short position. An offset position was not possible unless the positions were identical.
- b. General Market Risk of the total portfolio, in which long or short positions for different securities or instruments can be offset.

The market value of securities used to calculate Specific Risk and General Risk is a 'dirty price', determined by adding the market value of securities (clean price) to the present value of the interest income to be received (accrued interest). During the coupon payment, when the present value of accrued interest does not have material difference, then the calculation of present value of the accrued interest can be ignored. Foreign Exchange Risk Calculations were performed on all positions in BRI's Trading Book and Banking Book portfolios using foreign currencies, including gold, with reference to the calculation of the Net Open Position (NOP). Position of financial instrument that was denominated in foreign currency will not only expose BRI to Foreign Exchange Risk but also Interest Rate Risk (e.g., in cross-currency swaps). In this case, the Interest Rate Risk exposure was also taken into account.

Capital charge for Foreign Exchange Risk from foreign currency positions amounted to 8 percent of BRI's NOPs as a whole at end of business day. NOP is the absolute value of the differences between assets and liabilities denominated in each foreign currency, plus the net difference between receivables and payables, which are either commitments or contingencies for the administrative account for each foreign currency, which are expressed in Indonesian Rupiah.

Portfolio coverage accounted for in the Capital Adequacy Ratio (CAR) is as follows:

1. Positions held for resale in the short term.
2. Positions held for the purpose of short-term profit from price movement, actual or potential.
3. Positions held for the purpose of retaining the advantages of arbitration (locking in arbitrage profit).
4. Derivative instruments associated with securities or other interest such as Forward Bond, Bond Options, Interest Rate Swaps, Cross-Currency Swaps, Forward Foreign Exchange, Interest Rate Options and Forward Rate Agreements/FRAs.
5. Entire debt securities with fixed or floating interest rates and all financial instruments that have similar characteristics, including certificates of deposit that can be traded (Negotiable Certificates of Deposits) and securities sold by BRI on condition of repurchase (Repo/Securities Lending).
6. BRI's foreign exchange position in the trading book and the banking book exposed to exchange rate risk.

The following table explains capital charges and RWA for market risk by using standard method.

.BRI has implemented a treasury and market risk application system (GUAVA), an integrated system used by front, middle and back office units. Through this application, it is possible to measure the market risk using an internal model approach which is integrated with daily process transactions.

To anticipate market risk arising from treasury activities, BRI exercised measurement, monitoring, and control steps, among others:

1. Measurement steps:
 - a. Sensitivity testing of interest rate; an analysis on interest sensitivity used as an indicator to project interest rate risk potential and as basis to formulate strategic policies for trading in treasury activities.
 - b. Volatility of foreign exchange and interest rate; a measurement of volatility level of foreign exchange and interest rate based on certain confidence level. The measurement can be used to quantify foreign exchange and interest rate risks potential for treasury trading portfolio.
 - c. Stress testing and back testing;
 - Stress testing uses certain scenarios as simulation to examine the Bank's capital and liquidity adequacy under specific situation, such as certain interest rate, foreign exchange, or liquidity condition.
 - Back testing analysis examines methodology accuracy and serves as a tool to measure market risk by comparing market risk projection with actual loss.
 - d. Revaluation of treasury position and BRI's position as a whole, including calculations of treasury products with hypothetical prices.
2. Monitoring measure of Profit and Loss Assistance that monitors profit and loss data calculation from treasury activities on daily basis, including keeping track of treasury performance compare to the target.
3. Control measures, among others:
 - Limit and excess controls (front end); overseeing treasury transactions limit activities to ensure that treasury transactions are within the determined limits, particularly for cut-loss limit.

Risk Management

- New Product and/or Activity Review on treasury transactions; analyzing characteristics of products and/or new activities in trading activities, including information related to profit-loss potential, risk potential, settlement procedure, revaluation process, and risk mitigation

Operational Risk

The implementation of operational risk management is intended to control operational risks arising from internal or external circumstances that disrupt business and operational activities. The hindrances include inadequacy of HR and internal process, information technology system failure, natural disaster, crime committed against the Bank, and other occurrences that potentially lead to the Bank's financial and non-financial losses.

Operational risk management in BRI also includes legal, reputation, compliance, and strategic risks associated with business processes and operational activities.

The implementation of operational risk management at BRI in 2013 was done through a number of risk management and monitoring tools, namely Operational Risk Assessor (OPRA) that includes Risk and Control Self Assessment (RCSA) module, Key Risk Indicator (KRI), Incident Management, RM Forum, Maturity Assessment, and Business Continuity Management implementation. Efforts to enhance risk management understanding are focused on reinforcing risk culture, fraud awareness, and holding risk management disseminations/trainings continually for all BRI's employees, and improving risk control quality in all of BRI's operating activities.

Operational Risk Management Organization

The Board of Commissioners and Board of Directors are responsible for the effectiveness of risk management implementation in BRI. The Boards possess in-depth understanding of risks faced by BRI and hold critical role in supporting and monitoring the successful implementation of risk management in all Operating Units. The governance of BRI's Operational Risk Management is based on three lines of defense, Risk Taking Units (Operating Units), Risk Control Units (Risk Management Division), and Internal Audit Function (Internal Audit).

All operational working units in BRI serve as the first line of defense that are responsible for risk management implementation in their respective operating and business activities. To raise comprehensive risk culture, BRI Board of Directors has put in place Risk Management Function (RM Function) in all of Operating Units across all levels, from Head Office (Division/Desk), Regional Offices, Special Branch Office, Branch Offices that supervise operational functions, marketing, and micro business; and Sub-Branch Offices. The tasks of RM Function among others are: 1) Promote risk awareness in its working unit; 2) Support risk management process implementation (risk identification, measurement, monitoring, and control); and 3) Report the result of risk management and monitoring. Thus, all employees in BRI are expected to understand and be capable of implementing risk management in each business activity.

Operational Risk Management Unit (RMU) is the second line of defense and is responsible to formulate operational risk management implementation guidelines, develop and implement policy/procedure and methodology, oversee, review, and

BRI Operational Risk Management governance is based on three lines of defense, namely Risk Taking Units (operating units), Risk Control Units (Risk Management Division), and Internal Audit Function (Internal Audit).

Risk Management

monitor the process of operational risk management implementation. In addition, Operational RMU is also involved in the formulation and monitoring of BRI operational risk profile, examine the adequacy of operational risk management of a product and/or new activities, and support Operating Unit/risk owner in developing risk culture, anti fraud strategy implementation, and compliance to the principles of operational risk management. To discuss the management and improvement of operational risk management and control, Operational RMU coordinates Operational Risk Management Committee (ORMC) quarterly, together with Division/Desks and related Operating Unit.

Internal Audit Unit (SKAI) is the third line of defense and comprises Internal Audit at the Head Office and BRI's Regional Audit Offices throughout Indonesia. SKAI oversees and validates adequacy of internal control (assurance function) in operational and business activities of Operating Units as well as the consistency of operational risk management in BRI, bank-wide.

BRI's operational risk management governance structure illustrates the relation between operational risk management function at the corporate level, Operating Unit, and involvement of Internal Audit serving assurance function. Operational risk management implementation in BRI is founded upon organizational structure design that incorporates the involvement of all parties related to operational risk management (Board of Commissioners, Board of Directors, Risk Management Committee, Risk Management Division, Operating Unit, Operational Risk Management Function, and Internal Audit).

Operational Risk Identification, Measurement, and Mitigation

a. Risk and Control Self Assessment (RCSA)

RCSA is a qualitative and forecasting tool in risk management used to identify and measure risks based on impact and likelihood of occurrence.

Related to working units as the first line of defense, RCSA helps them to identify and measure operational risks in each operational and business activity, including monitoring and determining steps of improvements/follow-up plan.

In BRI, RCSA has been implemented in Division/Desk at BRI Head Office, Regional Offices, Special Branch Office, Branch Offices, and BRI Priority Service Centers. In 2014, the Bank plans to implement RCSA to Sub-Branch Office level, thus expanding RCSA process from Branch Offices directly to Sub-Branch Offices, while to mitigate risks in micro business and operational of BRI Unit, the Bank has assigned MBM and AMBM to undertake the RM function in micro business.

Consolidated RCSA is prepared with the purpose to generate comprehensive operational risk profile and to answer control or mitigation needs. Consolidated RCSA is reported quarterly to the Bank's Board of Directors and Risk Management Committee (RMC).

Operational risk is frequently changing; therefore risk issue in RCSA needs to be constantly updated. RCSA risk issue update is done by taking into account BRI's business developments that include new products and/or activities, new market segments, and business competition; changes in internal/external regulations; and other changes that affect BRI's risk exposure. In addition, the update also considers result of operational risk identification from other tools, such as Incident Management (IM) data, Loss Event Database (LED), Key Risk Indicator (KRI), and Audit Report (AR).

b. Key Risk Indicator (KRI)

KRI is a tool to detect increase or decrease of risk ahead of risk occurrence and historical occurrences. Risk trend forecast is identified to determine follow up plan related to operational risks ahead of financial or non-financial losses.

BRI has identified key risks for all risk types and has set risk limit that reflects the acceptable condition and risk level (risk appetite). Identification of key risk indicator and determination of KRI threshold is performed using best judgement and involved Internal Audit, Risk Owner, and other relevant parties. BRI's Key Risk Indicator is stated in, among others, Bank-Wide Risk Profile Report and Regional Offices Risk Profiles that are monitored regularly and reported to the management on monthly basis. Starting 2013,

Risk Management

KRI was also implemented in OPRA application specifically to monitor compliance risk whilst being continually enhanced to be able to monitor other risks. The following presents key risk indicators monitored through OPRA application:

No.	Risk Issue	Indicator
1.	Tax transfer violation	Frequency (total)
		Penalty Nominal (in Rupiah)
2.	Bank's Monthly Report Violation	Frequency (total)
		Penalty Nominal (in Rupiah)
3.	SID report violation	Frequency (total)
		Penalty Nominal (in Rupiah)
4.	Executive Officers report violation	Frequency (total)
		Penalty Nominal (in Rupiah)
5.	Other regulatory requirements report violation	Frequency (total)
		Penalty Nominal (in Rupiah)

For easy access of risk monitoring purpose, reports are available to be downloaded at anytime from OPRA application. KRI report presents frequency of SID breach and the nominal, thus enabling monitoring over particular risk movement. Therefore, BRI may perform control adjustments to prevent SID breach reoccurrence in the future.

c. Incident Management (IM)/Loss Event Database (LED) and Measurement of Operational Risk Capital Expense

In BRI, Incident Management (IM) is Loss Event Database (LED) that covers the process of loss event data documentation for both financial and non-financial losses, which include actual loss, potential loss, and near misses from the time of the event until the time of its settlement as well as corrective actions and mitigation steps taken.

BRI's operational loss data was documented started in 2007 which consistently and systematically recorded in a form of loss database matrix and classified based on eight lines of business, seven types of event/event categories, with event frequency, and event severity/loss dimension.

Based on data loss in IM system, the Bank may analyse loss event based on cause, functional activity, and event category in which divided into BRI's 8 lines of business. The information system also serves as basis to determine control improvement steps and development of preventive measures to control risks based on records of event handling/settlement.

To calculate capital expense and Operational RWA, BRI currently uses Basic Indicator Approach (BIA) model, which was initially applied in 2010 in accordance with regulatory requirement. Further, BRI has commenced on preparation phase to apply The Standardized Approach (TSA) and Advanced Measurement Approach (AMA).

BRI has also performed simulation to calculate operational risk capital expense using Advanced Measurement Approach (AMA). AMA method uses 2 approaches, namely Extreme Value Theory (EVT) and Loss Distribution Approach (LDA). In this calculation process, BRI has developed implementation gap analysis.

The following table presents capital expense and RWA of operational risk calculated using Basic Indicator Approach in accordance with regulation from Bank Indonesia (BI).

Risk Management

d. RM Forum and Maturity Assessment

Risk Management Forum (RM Forum) is the forum where Head of Working Units and the executive one level below, staff, and also employees meet to discuss the risks inherent to business and operational activities which potentially become the barriers in achieving pre-determined business performance or targets. Risk Management Forum held in the respective working units in BRI and has become one of the important elements that support and promote risk awareness culture in the Bank.

Risk Management

Maturity assessment is a self-assessment process on the maturity level of risk management implementation exercised by BRI's working units. The assessment is conducted annually at the end of the year by head of working unit based on certain parameters. The result of maturity assessment is expected to be able to motivate working units to evaluate their risk management implementation and nurture continuous improvements

e. Anti-Fraud Strategy Implementation

The implementation of fraud control system has complied with BRI's internal policies and procedures; it highlights BRI's zero fraud tolerance that is consistently applied to resolve fraud cases. Implementation and application of Anti-Fraud Strategy is part of Risk Management, while the prevention and management of fraud incidents in BRI consists of 4 (four) pillars, namely 1) prevention, 2) detection, 3) investigation, reporting, and sanctioning, and 4) evaluation, monitoring, and followup. Anti-Fraud commitment signed by Directors and Commissioners, the management, and all BRI employees as a form of anti-fraud awareness and fraud preventive action.

f. Adequacy Assessment on Risk Management over New Products and Activities (PAB)

The issuance process of new products and/or activities (PAB) in BRI includes risk management phase that covers risk assessment performed by product owner on all risks potentially arising from the issuance of PAB. This includes control and oversight with the purpose to mitigate PAB-associated risks. Risk Management Unit (RMU) is responsible to exercise adequacy assessment on PAB risk management and makes recommendation based on assessment result to the Director of Risk Management in BRI.

g. Business Continuity Management (BCM) Implementation

Potentials of disruption, whether driven by nature, human errors, or technological failures, pose a threat to BRI's business continuity, particularly considering BRI's well spread network throughout Indonesia. BRI Board of Directors recognizes the importance of developing and implementing Business Continuity Management (BCM) policy, as follows:

- Disaster Mitigation Plan that protects the security and safety of employees, safety of customers as well as other stakeholders located around BRI's Operating Unit.
- Business Continuity Plan, which would maintain the continuity of key business/operational activities, safeguard BRI's assets, and capable to provide sufficient respond under events of disruption/disaster.

BCM implementation in 2013 involved all BRI's working units, among others, are done through formation/upgrade of Crisis Management Team, formulation/update of Call Tree, and alternate sites determination.

BRI's working units have also conducted Threat and Disaster Risk Assessment (PRAB), creating a mapping of working units who are exposed to disaster threats and registering resources required to be prepared against threats/disasters in each working unit.

The preparedness of BRI's organization to implement business continuity procedure has been proven over time following events of disasters that took place in a number of BRI's unit locations. Among the events were disasters in 2013; earthquakes in Aceh and floods in Ambon, Jakarta, and Kendari as well as volcanic eruptions in North Sulawesi and North Sumatera. BRI's operational units were able to make use of E-Buzz and Teras BRI Mobile vehicles, which were available across all BRI's operational areas, as alternate sites during disaster period, thus enabling operating units to immediately resume operations post-disaster. Moreover, Risk Management Division coordinated BCM implementation continuously with related working units, such as by conducting testing of DC-DRC Switch Over in 2013 and simulation of disaster evacuation in several BRI buildings, including BRI Head Office and IT Building in Raganan.

Risk Management

Liquidity Risk Control conducted by Treasury and Risk Management Divisions is part of the follow-up actions on monitoring results of performance and compliance of operating units to the liquidity threshold.

Liquidity Risk

Liquidity risk arises from BRI's inability to fulfill its matured obligations from cash flow funding sources and/or highly liquid assets that can be collateralized without disrupting the Bank's activities and financial condition.

Liquidity risk control is performed by Treasury and Risk Management Divisions, as part of follow-up actions on monitoring results of performance and compliance of Operating Units to the liquidity threshold.

Treasury division will use early warning indicators to monitor the liquidity position as part of liquidity management as well as to identify the possibility of increasing risk. Several internal and external factors that are part of early warning system are:

1. Internal indicators
 - a. Deteriorating asset quality;
 - b. Increasing concentration on specific assets and financial resources;
 - c. Increasing currency mismatch;
 - d. Repeated exceedance of limit;
 - e. Increasing cost of funds of BRI as a whole;
 - f. Deteriorating cash flow due to large maturity mismatch, especially in short term.

2. External indicators
 - a. Negative public perception toward BRI;
 - b. Decrease of BRI's ratings by rating agency;
 - c. Continuous drop of BRI's share price
 - d. Decrease of credit line facilities provided by correspondent banks;
 - e. Increase withdrawal of time deposits ahead of maturity;
 - f. Limited access to medium and long-term funding;
 - g. Tight market liquidity;
 - h. Changes in regulatory policies with significant impacts on banking sector.

To identify BRI's actual liquidity condition, the results of measurement by using liquidity ratios are thoroughly analyzed then linked with latest qualitative information to generate reasonable and comprehensive conclusions. Liquidity risk measurement tools used in BRI are: cash flow projection, maturity profile, liquidity ratios, and liquidity risk stress test.

The following table presents information on assets and obligations mapping reflected in the balance sheet as well as receivables and payables in administrative account within a specific time scale based on the remaining period until maturity as of 31 December 2013.

At corporate level, the implementation of Liquidity Risk Management is coordinated by Treasury Division and Risk Management Division. Treasury Division is responsible to manage nation-wide liquidity that includes interday, daily, short term, medium term, and long term, in rupiah and foreign currencies, according to prevailing regulations. Risk Management Division is responsible to formulate and review liquidity risk management policies.

The results of liquidity position and risk monitoring are administered in the periodic reports to the Board of Directors and Commissioners. Related to the monitoring result in which showing an increase liquidity risk potential, Treasury Division will also provide recommendations on risk exposure mitigation and/or adjustments in timely manner to be included in liquidity management strategy. The recommendations are provided in ALCO Meeting or Contingency Liquidity Crisis Team meeting, which the decision will be taken as follow up actions of prevention and/or effective settlement by adhering to prudential banking principles.

Risk Management

Legal Risk

Legal risk is the risk arises from legal claims and/or juridical weaknesses. As coordinator of Legal Risk Management, Legal Division coordinates with Risk Management Division to manage legal risk in BRI. To support Legal Risk Management process in all BRI working units, Legal Division also coordinates with Legal Officers (LO) assigned in all regional offices. In addition, a Risk Management Function (RMF) is developed at Branch Office level, which comprises of FMR for Operations, FMR for Marketing, and FMR for Micro. These functions help to monitor Legal Risk in their respective working units and scope of work, whilst continuously communicating with Legal Officers (LO) in the regional offices.

Numerous steps are done to control legal risk, including:

- a. Legal Division, as Legal Risk coordinator in BRI, reviews changes of laws and regulations; the Division ensures that BRI's internal policies are consistent with prevailing laws and regulations.
- b. Legal Division offers legal advice/opinion on agreements between BRI and third parties, aiming to protect BRI's legal interests before the signing of agreements by BRI's management.
- c. All banking transactions in BRI that include operations, loans, and manpower affairs have been conducted in accordance with prevailing laws and regulations, supported by adequate required legal documents.
- d. Legal Division coordinates with Legal Officers (LO) in Regional Offices to monitor legal risk across all BRI working units through reporting and legal case documentation mechanisms as well as socialization of criminal modus operandi and handling procedures to minimize legal risk.
- e. Legal Division compiles legal guidelines, such as agreement formulation guidelines and legal

booklets for operations and loan activities.

- f. Employee developments for staff in Operating Units in Regional Offices; build their competencies in controlling legal risk in their operating areas through promulgation, discussion on legal opinions, and so on.
- g. In the event of legal cases in Operating Units, Legal Officers (LO) in Regional Offices provide legal assistance according to their authorities and coordinate with Legal Division at Head Office
- h. Legal Division provides legal assistance according to their authorities if legal cases occur.
- i. If required, Operating Units can consult with Legal Division regarding legal issues.
- j. If the Bank faces legal claims that have significant loss potential and/or significant adverse impact to the Bank's reputation, as contingency plan and to mitigate legal risk the Bank may take necessary steps, such as acquiring legal assistance from attorney and report the case's progress to the Board of Directors.
- k. As part of legal risk monitoring, Legal Division coordinates with Risk Management Division relating to BRI legal risk profile regularly report to the Board of Directors on monthly basis in the form of Risk Profile Dashboard.

Aside from the above legal risk control strategies, to improve legal risk awareness, the Legal Division has published a compendium of Regulation Summary. The compendium contains summaries of regulations or guidelines from Legal Division, covering: Credit and Collateral Activities, Operational Activities, Legal Manual and Legal Booklet, etc. Operating Units may benefit from the compendium to ensure that operational activities are consistently in compliance with regulatory requirements to protect BRI from legal risk.

To mitigate strategic risk, BRI has implemented periodic monitoring tools on strategy implementation and the achievement of predetermined target.

Risk Management

BRI regularly evaluates and updates risk management system and procedure, periodically maintaining the compatibility of Risk Management System with BRI's internal condition and the latest banking regulations.

Strategic Risk

Strategic risk is the risk arises from inaccurate strategic decisions and/or implementation as well as failure in anticipating changes in business environment.

Strategic risk management primarily aims to minimize potential negative impacts from such inaccuracy and failure in anticipating the changes in business environment.

Formulation and monitoring of strategic implementation, including corporate and business plans, are managed by Strategic Planning and Business Development Division in accordance with prevailing regulations.

All product development or new activities plan, setting of new target markets as well as market that needs to be avoided and corporate actions such as merger and acquisition are thoroughly exercised by taking into account BRI resources. An appropriate strategic decision in respect of IT development and maintenance, HR management that covers recruitment, development, advancement, and exit policy; development of new products and/or activities, service development, network expansion, target market penetration, and marketing communication will prevent BRI from failures, ensure the Bank's leading position in banking industry, and maintain business continuity. Strategies may become ineffective without the fulfilment of supporting factors required to be succeed.

To mitigate strategic risk, BRI conducts regular monitoring process on strategy implementation and target achievements. Through parameters presented in Risk Profile, particularly with respect to strategic risk, strategic planning of initiatives for lines of business and their support are monitored in order to ensure target achievements for short and long term periods. Furthermore, BRI has reporting mechanisms to measure the Bank's performance

progress; including business planning realization, functional work plans, and budget plans which reported quarterly.

Compliance Risk

Compliance risk is the risk results from the Bank's failure to comply with prevailing laws and regulations. Operating in a highly regulated industry, such as banking industry, BRI constantly monitors its compliance to regulations from Bank Indonesia and other institutions. Sanctions imposed by regulators for breach of regulations varied from warning, sanction/fine/penalty, to permit revocation. Compliance management is implemented in all banking activities, credit and non-credit, in accordance with prevailing regulations.

Compliance Director, through Compliance Division and Risk Management Division, is the coordinator of Compliance Risk management in BRI. There are also other functions, such as Risk Management Group in Regional Offices, Special Working Unit, and support from head of working units in managing and promoting risk awareness culture across BRI's working units. To monitor compliance risk exposure, Risk Management Division develops Risk Profile Dashboard that is reported to the Board of Directors.

Compliance risk management implementation in 2013 included implementation of Anti Money Laundering (AML) and Combating Terrorism Financing (CTF) in accordance with prevailing regulations. To support the initiatives, the Bank has periodically socializing Enhanced Due Diligence (EDD), which has broader scope than Customer Due Diligence (CDD), in order to raise awareness and compliance of BRI's Operating Units to this procedure.

In addition, BRI also implemented Risk Based Approach methodology

Risk Management

outlined in the internal policy and Standard Operating Procedure (SOP) related to AML and CFT to protect BRI from being target of money laundering and terrorism. This is further supported by the implementation of AML system in suspicious transaction monitoring, which reported through CTR and STR.

BRI develops compliance risk management module with Incident Management (IM) device and IRU. Through IM and IRU, BRI is able to identify and monitor sanctions, fines, and penalties arising from violations of regulations so that steps to control compliance risk can be performed. The tools are monitored by Risk Management Division and Compliance Division to observe Compliance Risk in corporate-wide and by Risk Management Group in Regional Offices to monitor Compliance Risk in operating units.

Moreover, Risk Management Division in Head Office and Risk Management Group in Regional Offices monitor compliance level for critical matters or matters required by the regulators, such as planning, opening, and reporting of new working units.

Reputation Risk

Reputation Risk is the risk arises from diminishing stakeholders' trust due to negative perception towards the Bank. As BRI's public relations function, Corporate Secretary Division leads Reputation Risk control initiatives and periodically assess Reputation Risk parameters to be reported to the Board of Directors. The report, copied to Risk Management Division and incorporated in BRI's corporate risk profile report, is submitted to Bank Indonesia.

BRI's public relations' extensive experience in handling negative publications, both national and local scale, is an instrumental asset that helps the Bank in maintaining public trust and BRI's customers in particular.

Along with the current BRI's sound reputation, the management of negative publications with respect to all of BRI's operational aspects still need to be carried out according to the prevailing policies and procedures.

BRI immediately follows up and overcome all customers' complaints and legal claims, which may increase Reputation Risk exposure. In addition, mitigation of Reputation Risk events that may lead to Reputation Risk is performed by taking into account the significance of event and costs incurred in the process.

Reputation Risk management under crisis situation is outlined in the BRI's Business Continuity Management policy, which aim to minimize the impacts of Reputation Risk during disruption or disaster. BRI has Crisis Management Team (CMT) that undertakes critical role during disruption or disaster; the Team is responsible to carry out necessary actions, including Reputation Risk management. CMT structure is established in all BRI's operational units, namely CMT Head Office, CMT Regional Office, and CMT Branch Office. The strategic element that needs to be prioritized in managing Reputation Risk during crisis is customers', shareholders', and stakeholders' trust in BRI's reputation.

In order to have better control on Reputation Risk in the future, preventive and recovery actions that have been implemented with regards to Reputation Risk are consistently accompanied with control and procedure improvements, to address gaps that might lead to Reputation Risk.

BRI's actions regarding Reputation Risk management are consistent communication, maintaining information disclosure and transparency to all stakeholders, and build good relationship with the media in order to maintain BRI's

brand corporate-wise. These steps are taken to minimize and address complaints from stakeholders, which may result in negative publications of BRI.

Risk Management System Effectiveness Evaluation

Risk management procedure and system evaluation and update needs to be conducted periodically to maintain their compatibility with the existing Risk Management System, BRI's internal condition, and latest banking regulations. To perform evaluation and update, BRI uses Risk Management Implementation of Maturity Level Assessment.

Risk Management Implementation of Maturity Level Assessment is a self-assessment process conducted by Risk Management Function appointed by Head of Working Unit and validated by Head of Risk Management Group in Regional Office or Head of Operational Risk Management Group in the Head Office. Maturity level assessment on risk management implementation is performed at minimum 1 (one) time every year.

In general, the objectives of risk management maturity level assessment in each Working Units are:

1. Identify the level of risk management implementation in each Operating Units
2. Evaluate maturity level of risk management implementation in each Operating Units
3. Encourage all Working Units

Risk Management

to perform continuous improvement of risk management implementation

Maturity level assessment is expected to generate benefit and serves as indicator that reflects the effectiveness of risk management system and procedure implementation initiated by Risk Management Division.

BRI Risk Management Quality Improvement

In managing risks, BRI is supported by Risk Management Information System, which consists of:

- Operational Risk Assessor (OPRA), which assists the Operational Risk management. Currently, OPRA application is used only by working units in Head Office, Regional Offices, and Branch Offices of BRI. To address future needs, the system will be developed and implemented in all operating units in BRI.
- Loan Approval System (LAS), to manage Credit Risk. In 2013, LAS was applied for all loan processing and loan approval, creating an integrated loan system for BRI.
- Treasury and Market Risk System (GUAVA), to manage Market Risk. The system is applied for derivative product development and internal dealing.

Quality and validity of Risk Management Information System is continuously enhanced in order to provide accurate information as basis of management's decision-making process.

HR Development in the Area of Risk Management

To implement quality risk management, the Bank needs to fulfil the requirement of competent human resources in their respective fields by promoting risk culture and risk management implementation in daily operational activities. To acquire capable HR in risk management and to comply with regulatory requirements regarding risk management implementation for commercial banks, BRI holds risk management education programs, such as:

a. Risk Management Certification and Refreshment

Risk Management certification training is attended by Board of Commissioners, Board of Directors, and Echelon 1, 2, and 3 Executives. BRI also has refreshment program for those who have attained Risk Management certificates, ensuring their knowledge are updated with recent information concerning risk management. In 2013, there were 307 BRI employees who passed the certification.

b. e-learning

Risk management education is also conducted through e-learning interactive method. E-learning is an independent education tool provided for all BRI's employees to be more understand on risk management philosophy and implementation.

c. Dissemination

Risk Management unit regularly disseminates risk management information, especially risk management tools used in BRI, to all BRI employees across Indonesia.

d. Learning

Learning program for BRI employees through seminars and trainings held by external parties.

Risk Management

Risk Management Plan and Strategy 2014

BRI has planned a number of activities for 2014 that aim to strengthen and bolster the quality of risk management implementation, including:

1. Monitoring and analysis of credit risk limit, CRR/CRS performance, risk exposure, risk & return associated with lending activities, and recovery rate.
2. Review of policy and Credit Risk Rating-Credit Risk Scoring (CRR-CRS) methodology, Credit Risk Modelling (PD, LGD, and EAD) according to credit characteristics, MIS requirement, and BRI CRM system.
3. Credit Risk measurement using Internal Rating Based Approach (IRBA) Basel II.
4. Conduct simulation and review on back testing and stress testing validation methodologies applied in Market Risk and Credit Risk management.
5. Review of Enterprise-wide Risk Management (ERM) policy according to Basel III policy.
6. Development of Risk Management Information System, especially in terms of upgrading data quality and validity enhancement.
7. Coordination of Anti-Fraud strategy and Risk Management tools implementation.
8. Improve risk awareness culture and optimization of risk management implementation across BRI's working units accross Indonesia.
9. Formulate and deliver recommendations regarding risk control of all risk types.

Overview

Performance Review: BRI vs Banking Industry

Assets Growth*	
BRI	National Banking
BRI's assets in 2013 grew by 13.30% amounted to Rp606.37 trillion from Rp535.21 trillion in 2012. BRI achieved 12.24% of assets market share at the end of 2013.	Assets of national banking industry grew by 16.23% from Rp4,262.59 trillion in 2012 to Rp4,954.47 trillion in 2013.

* Bank only

“BRI successfully increase its MSM market share, improve loan quality, grow its fee-based income as well as net income, and thrive as a bank with largest MSM business on the back of quality growth.”

”

BRI*

Loan Growth*	
BRI	National Banking
BRI's loans up 23.66% to reach Rp Rp430.62 trillion from Rp348.23 trillion in 2012. This was higher than industry's loan growth, thus BRI's loan market share rose to 13.08% by the end of 2013, from 12.86% in 2012.	Indonesia's banking industry's loans increased by 21.60% from Rp2,707.86 trillion in December 2012 to Rp3,292.87 trillion by end of December 2013, achieving lower growth than 22.97% in 2012.

* Bank only

Overview

Third Party Funds

BRI

BRI's third party funds deposit grew by 11.52% from Rp436.10 trillion to Rp486.37 trillion by end of 2013. BRI's market share in terms of third party funds was stood at 13.27% by the end of 2013.

National Banking

The growth of third party funds of Indonesia's banking industry rose by 13.60% from Rp3,225.20 trillion at the end of December 2012 to Rp3,663.97 trillion at the end of December 2013.

Loan to Deposit Ratio (LDR)*

BRI

By successfully growing its third party funds, BRI was able to maintain its LDR at a strong 88.54% by end of 2013.

National Banking

Banking industry's LDR increased from 83.58% at the end of 2012 to 89.70% in December 2013, due to growth of national loans accompanied by a slowdown in third-party funds.

* Bank only

Overview

Capital Adequacy Ratio (CAR)*

BRI

National Banking

Substantial growth of net income boosted BRI's CAR from 16.95% at the end of 2012 to 16.99% in 2013, reflecting the Bank's capability to carry out lending expansion and address risks in the coming years.

The CAR of national banking grew from 17.43% in 2012 to 18.13% in December 2013.

Return on Assets (ROA)*

BRI

National Banking

With improved operational efficiency, loan yield, and fee-based income, BRI was able to deliver ROA at 5.03% in 2013 from 5.15% in 2012, higher than the national banking's ROA.

The national banking's ROA was stable, from 3.11% in 2012 to 3.08% at the end of December 2013.

* bank only

Overview

Banking Industry in 2013

Throughout 2013, Indonesia faced a challenging economic condition with the economic crisis in Europe and the US Government's tapering off plan that has caused the Rupiah to weaken. Nevertheless, the banking industry has been fairly stable and the intermediation function is well maintained. To address the situation, the Non Performing Loans ratio is also still in a manageable level, ranging at 1.77%, compared to 1.87% from the previous year. The domestic banking industry's resilience is also reflected on the CAR (Capital Adequacy Ratio), which were higher than the regulator's requirement of 18.13%

The banking industry was in a better shape than the economic condition that experienced a deceleration of growth from 6.23% in 2012, to 5.78% in 2013. This economic growth was driven by the domestic consumption levels that were mostly fulfilled by the micro, small and medium enterprises products. These conditions have significantly helped the national banking industry in preserving its assets' quality that has supported the SME sector.

According to BI's data, loan disbursement through commercial banking has slowed down in 2013, with 21.60% or Rp3,292.87 trillion. This growth is slower than 2012's loan growth of 23.66%, with the amount of loan reaching Rp2,707.86 trillion. In 2014, Bank Indonesia predicted a decrease in loan growth of around 15-17% to maintain the quality of loan disbursement.

Majority of loan disbursement or 48.15% was channelled to finance the working capital that increased from Rp1,316.69 trillion as of December 2012, to Rp1,585.66 trillion by the end of 2013. Moreover, a sum of 24.24% was used to finance the increased investment from Rp591.43 trillion per December 2012 to Rp798.16 trillion by the end of 2013. The other 27.61% was used to finance the increased consumption from Rp799.75 trillion to Rp909.06 trillion by the end of 2013.

Meanwhile, the growth of third-party funds has also been affected due to the less conducive economic condition, decreased by 15.8% at Rp3,225.20 trillion in 2012 to 13.60% at Rp3,663.97 trillion in December 2013. The composition of third party funds as of December 2013 consisted of 23.11% demand deposits, 43.79% time deposits and 33,10% savings.

This composition is relatively similar to 2012's, which consisted of 23.78% demand deposits, 42.83% time deposits and 33.39% savings. The higher loans growth compared to third party funds has rendered the industry's LDR (Loan to Deposit Ratio) to increase. By the end of

December 2013, the LDR of the banking industry was stood at 89.70%, an increase from 83.58% in 2012.

The positions of third-party funds and LDR indicate that the competition in acquiring the third-party funds will continue to increase. Yet with Indonesia's economic growth, the community welfare, and the level of the financial inclusivity of 20%, means there's still a high potential for third party funds rising.

The trend of increased interest rate in 2013 will affect the strategy to determining interest for deposit that will eventually increase the cost of funds. Therefore, the banking industry must be able to innovate new features and products, including more aggressive promotional activities for competition.

With the support of the operational unit network, EDC facility, and a wide range of products and innovative banking services, BRI presents a different condition compared to the national banking. With the implementation of the selective growth strategy and focusing on the development of MSM segments including the revitalization of micro businesses, BRI has showed a positive growth. A consistent consolidation process, particularly in small commercial and medium segments, resulted in improving loan quality, reflected from the decrease in NPL level of the loans segment.

The NPL (gross) of medium segment decreased from 5.09% in 2012, to 4.38% in 2013. For small commercial segment, the number also decreased from 3.75% in 2012 to 3.13% in 2013. Similarly with the NPL (gross) of consumer segment that improved from 1.60% in 2012, to 1.40% in 2103.

With these improvements in NPL (gross) of the loan segments, BRI's total NPL (gross) has decreased from 1.78% in 2012, to 1.55% in 2013 (bank only).

The improved NPL indicates BRI ability to establish a quality loan growth, not only high and aggressive. Overall, BRI has also been able to maintained LDR at 88.54% or below the BI requirement of 92%. An indication of ample room for BRI to venture on credit expansion in the future. The liquid condition is supported by a sound credit portfolio, strong capital, and infrastructure availability in supporting business growth, making 2014 as an era to continue a quality SME segment growth by applying prudential principle and increasing the role of fee-based income in increasing profitability through IT based product innovations.

Overview

Micro, Small, and Medium Enterprises Loans Growth

Indonesia's economic growth that has been highly dependent in domestic market was able to relatively preserve the economy from global financial turmoil in the last few years. When the developed countries were relying on the international trade and experienced negative contraction due to the crisis, Indonesia was able to book a positive growth. By considering its resilience towards external factors, the Government and the business community now more intensely support an industry structure that leans more towards the domestic market.

This condition will continue in the coming years, given the increasing purchasing power of Indonesian people, as reflected in higher income per capita, emergence of middle class, lower poverty levels and increased number of the productive forces. This has caused the business-oriented segments in the domestic market to be even more prospectful, including in loans distribution.

Under these conditions, growth of domestic-oriented Micro, Small and Medium business segments will sustain the focus of the national banking industry on disbursing the loans in this segment. The loans for Micro, Small and Medium Enterprises in the national credit portfolio in 2013 reached 18.48% of the total national loans.

The national Micro, Small and Medium business loans have indicated a moderate increase in the past few years. In 2012, the Micro, Small and Medium business loans grew 14.89% from Rp458.16 trillion by the end of 2011 to Rp526.39 trillion by the end of 2012. In 2013, when the national economic growth stagnated, the national MSME loans increased by 15.66% with a total outstanding of Rp 608.82 trillion.

As a bank with a strong relationship within the domestic economy and strong focus on MSME segment, BRI has an excellent position to seize the business opportunity. An extensive support network has maintained BRI's MSME loans portfolio in a high level, compared to the national MSME. In 2012, BRI MSME loans portfolio was stood at 28.08% of the total national MSME loans. In 2013, this portfolio grew to 29.50% of the total MSME loans, in line with the high MSME loans expansion of BRI.

Indonesia's domestic market will continue to evolve along with the improvement of Indonesia's living standards, providing sustainable growth opportunities for the MSME business segment. This creates opportunities for the banking industry including BRI to support the growth of MSME segment through loan disbursement and banking services that enable this segment's business operations to be more efficient and improve their sustainability in the global economic turmoil.

Market Share

Business Overview

Business Segment

Based on the amount of loans, BRI categorize its market into three main segments: the Micro Segment, Retail Segment and Corporate Segment. According to the nature of the business, BRI also elaborates these business segments into Program and Micro Business, Retail and Medium Business, SOEs (State Owned Enterprises) and Corporate Business, International Business, Treasury and Capital Market Services, as well as subsidiaries that focus on Sharia business, agribusiness, and remittance business.

Program and Micro	<ul style="list-style-type: none"> • Micro Loan • Programs Loan • Micro Deposits 	Micro Business is aimed at providing banking services, especially for individual customers and micro-entrepreneurs, while the Program Loan is more into the distribution of the Government's development programs for the community empowerment.
Retail and Medium	<ul style="list-style-type: none"> • Retail Loans • Medium Loans • Consumer Loans • Retail Deposits 	Retail and Medium Businesses are intended to serve individual customers and small and medium entrepreneurs (SMEs), to provide banking services, deposit products, and commercial or consumer loans.
SOE and Corporate	<ul style="list-style-type: none"> • SOE and Corporate Loans • SOE and Corporate Cash Management 	State Owned Enterprises (SOEs) and Corporate Business are intended to serve SOEs and non-SOEs companies, especially with the trickle-down business potential for the MSME segments.
International Business and Treasury	<ul style="list-style-type: none"> • Trade Finance, Remittance, Money Changer • Treasury Products • Capital Market & DPLK (Financial Institutions Pension Fund) Services 	The International and Treasury Business are intended to provide services in International banking services, such as Trade Finance, Money Changer and Remittance, Treasury products and Capital Markets and DPLK Services.
Subsidiaries	<ul style="list-style-type: none"> • Bank BRISyariah • Bank BRIAgro • BRI Remittance Co. Ltd 	Subsidiaries provide BRI business synergies by providing sharia banking services, agribusiness, and remittance.

“ BRI’s consistency in reinforcing the business development of micro, small and medium segment through the addition of IT network-based services and HR competencies support, have rendered satisfactory results and quality improvement.

”

In accordance with its vision and mission, BRI focuses its business on micro, small (retail) and medium sectors with the micro, small and medium enterprises loans proportion in 2013 of approximately 74.41% compared to BRI’s total loans. While the distribution of loans in the corporate segment and SOE are intended to capture potential, optimize the available liquid funds, and at the same time create opportunities for ‘trickle down bussiness’ for micro, small and medium enterprises through the corporate segment and SOEs supply chain.

The following discussion describes the development of BRI’s each business segment.

BRI Loans (In Rp trillion)

BRI Loans Composition

Business Overview

Program and Micro Business

“ The key strategies applied in the development of Micro Business and Program is the implementation of the community banking concept by promoting the community development to ensure sustainable business growth.

”

Business Overview

Summary:

1. Program and Micro Business were designed for individual customers and micro business development
2. Kupedes and KUR are the most competitive loan products in micro segment, while Simpedes is the most popular savings product.
3. The development of our micro business is supported by the growth of micro outlets. Therefore, the number of outlets expanded into 5,144 BRI units, 2,212 Teras BRIs and 465 Mobile Teras BRIs.
4. Micro loans outstanding increased 23.72% to Rp132.13 trillion and the NPL in Micro segment was maintained at 1.04%
5. Micro savings increased by 15.45% to Rp146.15 trillion, where around 88.24% of this micro savings have an average of Rp4.7 million per customer.
6. BRI is the main banking instrument in the distribution of commercial credit program to support the financial inclusion.

Program and Micro Business services includes micro loans extension and The People's Business Credit (KUR), communal funds raising, and other banking services through BRI's work units such as BRI Unit, Teras BRI, and Mobile Teras BRI.

Micro Business

BRI is determined to become the best microbanking financial institution that is both profitable and sustainable while prioritizing customers' satisfaction in order to establish an ingrained customer loyalty. With a solid customer base, both in loans and savings, BRI has been able to

maintain its domination in micro banking business.

BRI's prospect to increase the number of microbanking customers is vastly available. According to the Cooperatives and Small-Medium Enterprises Ministry, from around 56.53 million of existing small medium enterprises, 90% of them are in the micro business, and only 30% have been served by the banking industry. While the World Bank Survey in 2010 indicated that just 17% out of the entire Indonesian population have access to the banks loan services. From these two facts, it is clear that SMEs business development in Indonesia is very promising.

With such potential, BRI has set its SME sector as a focus in the business development. In the meantime, by focusing on the external conditions for the next three years, BRI emphasizes on selective growth strategy. The steps taken include the collaboration and optimization of all existing resources, be it infrastructure, products or human resources to be able to create synergies and provide direction in BRI's business development, particularly with its main target to be the Bank with the best Micro, Small and Medium Enterprises business growth.

BRI's main strategy to develop its micro segment is by implementing a quality community banking concept, which includes:

1. Expansion to all regions in Indonesia by providing simple and safe micro financial products and services that can be easily accessed by customers. Quality improvement in micro business products and services

and continuous partnership with customers to create a sustainable business growth.

2. The employment of human resources with qualifications in micro business, able to provide solution and be a partner to the micro business through guidance, mentoring, and consistent supervision.
3. Providing information on BRI's microbanking as a successful and sustainable financial institution in international level, at the same time as a BRI's ongoing global corporate social responsibility in microbanking development.

Kupedes and KUR Micro are the top loan products of Micro segment. Kupedes is a loan product with a ceiling of up to Rp100 million, which is available for both individual and institutional customers that meet the requirements and are served through BRI's Micro outlets.

KUR Micro is a financing facility for start-up businesses and it is insured by the government with a loan size up to Rp20 million. For BRI, the extension of KUR Micro is one way to build on a quality Kupedes customer base. The 70-80% coverage of credit insurance from total loss by the Government makes KUR Micro a credit scheme with a sufficient risk and return profile for BRI.

Other than the above Loans, the Micro network also serves consumer credit namely Briguna Karya for employees and Briguna Purna for pensioners. While for savings products, the micro customers' preferred product is the Simpedes that has comprehensive banking facilities designed for the micro customers' easy access.

Business Overview

All products and services of Micro segment are served through a real time online outlets, comprising conventional outlets, such as, BRI Unit, Teras BRI, and Mobile Teras BRI (sub outlet of BRI Unit), and e-channel networks, like ATM and SMS Banking.

The Development of Micro Business in 2013

Throughout 2013, BRI's main activities in developing its Micro Business can be categorized into 7 (seven) activities:

1. **Enhancing the Micro Business Division Reorganization**
There are two main programs conducted in the Micro Business Division reorganization with the main goal of increasing BRI's micro business development, namely:
 - Enhancing the performance of 3 (three) Micro Business Divisions resulted from 2012's development, namely the Policy and Development Division, Micro Business Development Division I and Micro Business Development Division II.
 - BRI set the target to accelerate the expansion of Micro Business based on the prudential banking principle, through the separation of two functions; namely a policy-making division and one that focuses on the implementation of the policies and strategy. The formation of two (2) divisions that served as the program executor reflects a high commitment in the development of BRI's Micro Business with attention to the prudential principles.
2. **Network Infrastructure Expansion**
BRI continued its infrastructure development program as part of the implementation of market penetration strategy through the extension and intensification program, namely the establishment of micro outlets in the new region by opening new BRI Units and by maximizing business potential in areas that have already been serviced, with Teras BRI and mobile Teras BRI. The expansion of network infrastructure also included the development of e-channel network, such as ATMs and SMS Banking.
3. **Quality Improvement of Network Infrastructure**
In addition to network expansion, BRI seeks to improve the quality of existing networks through the replacement of supporting equipments, which include IT and non-IT equipments that are over 5 years old, as well as renovation of exterior and interior building of the Micro outlets area.
4. **Development of Competent and Professional HR**
The program to improve the number of working units is also supported by
 - The addition of micro loan officers in BRI Unit, making the ratio of micro loan officer per BRI Unit to increase from 3.09 in 2012 to 3.67 in 2013. The increase in ratio indicates an increase in micro loan disbursement capacity for each BRI Unit, while maintaining prudence in credit management to maintain NPL ratio.
5. **Reinforcing Customer Base**
The improvements mentioned above are part of an effort to enhance BRI's customer base in order to increase outstanding loans and deposits. The increase in customer's numbers is intended to reinforce BRI's customer base, to adhere to the people's economic development in the area.
6. **Micro Business Marketing Program**
In 2013, as part of the effort to expand its customer base, to increase the loyalty of existing customers and to increase outstanding savings and loans, BRI has integrated several marketing programs, including:

Panen Hadiah Simpedes (PHS)
This is a marketing program, delivered as a lucky draw of 'Undian Simpedes' and 'Panen Bulanan Simpedes' (PBS) program, with the tagline "Gampang sekali, Banyak sekali dan Berkali-kali" (So Easy, So Many, So Many Times)

the availability of qualified human resources, including the availability of Mantri (officers). BRI will continue to improve the quality of human resources through regular and continuous education programs implemented through 8 (eight) learning centers throughout Indonesia, followed with the improvement of curriculum/training materials. BRI also seeks to enhance the quality of service through improved automation credit system on mobile service units.

The improvements mentioned above are part of an effort to enhance BRI's customer base in order to increase outstanding loans and deposits. The increase in customer's numbers is intended to reinforce BRI's customer base, to adhere to the people's economic development in the area.

In 2013, as part of the effort to expand its customer base, to increase the loyalty of existing customers and to increase outstanding savings and loans, BRI has integrated several marketing programs, including:

Panen Hadiah Simpedes (PHS)
This is a marketing program, delivered as a lucky draw of 'Undian Simpedes' and 'Panen Bulanan Simpedes' (PBS) program, with the tagline "Gampang sekali, Banyak sekali dan Berkali-kali" (So Easy, So Many, So Many Times)

Business Overview

Pesta Rakyat Simpedes (PRS)

Launched in 2008, PRS was designed as an event to promote Simpedes. The program is aimed to promote the Simpedes and other micro business products through awareness raising and stimulating purchase intention. For 2013, the PRS event was used as an integrated marketing activity for the loan products including Kupedes, KUR Micro, Simpedes and e-banking services that were conducted in more than 200 BRI Offices with the main theme of mobile banking and internet banking.

Partnership Program with Retailer Partners

BRI also developed a Micro Business in collaboration with potential retailer partners. In this joint program, BRI provides products and savings and loan services tailored to the needs of the Retailer Partners.

Simpedes Bikin Gampang

An educational program for e-banking features and facilities such as SMS Banking, mobile BRI, Mocash, Simpedes Card and e-channel (ATM and EDC) to increase the use of Simpedes and educate the customers about Simpedes' use for any transactions, anywhere.

Simpedes Ramadhan Market

A promotion program to raise awareness and Simpedes acquisition in Ramadhan markets throughout the moslem holy month of Ramadhan, supported by the mobile Teras BRI.

7. Microfinance International Cooperation

The MIC is one of BRI's global corporate social responsibility programs intended to develop microfinance business in the global level.

Through the MIC program, BRI has consistently held Microfinance Training and Study Visits (MTSV), business captures and technical assistance in the microfinance sector. BRI MIC also worked together with various global microfinance institutions such as Asia-Pacific Rural and Agricultural Credit Association (APRACA), Microfinance Network (MFN), Microcredit Summit Banking with the Poor (BWTP), Woman World Banking, APEC, and others.

BRI has successfully realized its development and commercial mission of micro businesses, with the United Nations (UN) setting BRI as the world's microfinance laboratory.

In 2013, as one of the major player in commercial microfinance and microbanking in the world, BRI was again involved in the Asia Pacific Economy Cooperation (APEC) series of activities held in Bali in October 2013. During the event BRI delivered presentations on microfinance services to the APEC delegates, customer service demos at BRI Unit and Teras BRI, and also organized delegates' visits to the BRI's Micro customers.

BRI has also previously held a variety of trainings on microfinance to the Middle East delegation in the international training program on microfinance programs for Palestine. In this series of activities, BRI also select microfinance practitioners from Palestine to intern and learn microfinance firsthand, in Indonesia. This joint activity with the Palestinians is a realization of the cooperation with the New Asian-African Strategic Partnership (NAASP).

Business Overview

Mantri – The Frontrunner for the Development of Microbusiness Segment

BRI's success in one of its leading business segments – Micro Business – is significantly contributed by Mantri (Micro Loan Officer) that today encompasses 21,542 employees throughout BRI's Micro Units in Indonesia, comprising 5,144 BRI units, 2,212 Teras BRI, and 465 Teras BRI Mobile. With the main responsibilities including marketing of loan products (Kupedes, KUR Mikro, Briguna) and savings products (Simpedes), expanding customer base both loans and savings, managing loan quality (NPL), and generating fee-based income, BRI continuously enhances the skills and competencies of Mantri through structured training program.

BRI's training programs aim to empower as "financial business advisor", which is also a basic competence that mantri candidate needs to possess. BRI also prioritizes training material on integrity, business code of conduct, and corporate culture.

Recruitment of Mantri is conducted openly; the majority of feeders come from Tellers and BRI Micro Business Customer Service Officers. To ensure optimum performance of Mantri, BRI implements a performance-based, measured remuneration mechanism. The indicator of success is Mantri's achievement of individual targets according to Key Performance Indicators (KPI). To reward Mantri's achievements, aside from fixed income, the Bank also offers bonus or incentives to appreciate their performances.

With structured management of Mantri, BRI has been able to move forward as the leading bank in Micro segment in Indonesia. BRI has also been recognized internationally as one of the key players in Micro loan. With outstanding achievements that have been obtained and the significant impact of Business Micro to the Bank's overall performance, BRI is determined to continue develop Micro Business, including the quality of Mantri through competence enhancement as well as measured and accountable remuneration system.

Business Program

BRI Business Program is developed by optimizing the existing infrastructure network, thus BRI can sustain its growth and develops as one of the major banking in the Government's credit extension program, as a part of the national economic development program that is both equitable and sustainable, while holding onto prudent and professional principles.

Leading products under Business Program are non-partnership Natural Energy and Plantation Revitalization (KPEN-RP), and Food and Energy Security Loans (KKPE).

By providing a non-partnership Natural Energy and Plantation Revitalization (KPEN-RP), Food and Energy Security Loans (KKPE), and Warehouse Receipt Subsidy Scheme (S-SRG), BRI emphasizes its support on the government food security program. The KKP-E scheme has helped many farmers and fishermen in increasing their produce.

The KKP-E scheme comprised KKP-E for sugar cane, local produce, horticultural produce, food procurement, livestock, fisheries and agriculture machineries.

The Sugarcane KKPE is a working capital loan provided to participating farmers for the purpose of sugarcane cultivation through farmer groups or cooperatives that partnered with Business Partners/Sugar Factories. Sugarcane KKPE scheme has presented tangible results through a substantial increase in the national sugarcane production due to the increased supply of sugar cane crops from the community's farms.

Business Overview

Aside from the food security loan (KKP) scheme, other competitive loan products comprised of Retail KUR, with loan ceiling in between Rp20 million to Rp500 million, which is insured by the government through the state-owned companies, Askrindo and Jamkrindo. The Retail KUR is aimed at small business owners with a feasible business, but not yet bankable.

Performance of Micro Business and Program

- 1. Development of infrastructure network**
 During 2013, BRI managed to add 144 BRI Units, 434 Teras BRI and 115 Mobile Teras BRI, boosting the number of BRI outlets to 5,144 BRI units, 2,212 Teras BRI and 465 Mobile Teras BRI. The expansion of BRI outlets started since 2009, which mostly located in the traditional markets, indicate BRI's commitment in supporting the micro economy and in increasing Kupedes and KUR Micro loans.
- 2. Development of Micro Customer Base**
 The expansion of the micro outlets and Micro workers indicated a solid result in the increase of micro-loan borrowers. In 2013, the total micro loan customers were increased significantly 1.03 million to become 6.5 million customers.
- 3. Micro Loans Outstanding Growth**
 The domestic economic sustainability, infrastructure development, new HR including the employment of competent Mantris, and implementation of various micro-business development programs have boosted BRI to optimize potential growth and recorded a 23.72% increase in micro loan to Rp132.13 trillion by the end of 2013.

The growth was supported by the increase in Micro KUR outstanding loans at 37.45% to Rp20.8 trillion, and in Kupedes by 21.46% to Rp 111.4 trillion.

Micro Loans Outstanding Growth
(In Rp trillion)

Total Micro Borrowers
(In Thousands)

- 4. Micro Loans Quality**
 The organization development, IT-based work system improvements, human resources competence development, and in-depth knowledge about micro segment behaviors have assisted BRI in maintaining its micro loans quality, which were shown by a low non-performing loans level at 1.04% in 2013. Within the past five years, the rate of micro non-performing loans has been maintained at a very low level of below 1.50%.

Business Overview

NPL of Micro Loans

(In %)

5. Development of Micro Savings

The increase in customers base has a positive correlation to an increase in the third party funds raised from micro customers. Throughout 2013, the total of funds took from micro customers increased by 15.45% to Rp146.15 trillion. This achievement was also contributed by The BRI micro business network, which is currently the largest in Indonesia.

Savings, which is a low cost source of funds, dominates third-party funds, and represents an 88.24% of the total third party funds, followed by time deposits with 10.83% and demand deposits with 0.93%. The funds composition has led micro business to be self-funded by having the adequate reserves to provide micro loans.

Total of Micro Savings

(In Rp Trillion)

Composition of Micro Savings

Description :

- Demand Deposit
- Savings
- Time Deposit

6. Business Program Achievement

The total of outstanding loans disbursed in 2013 reached Rp10.13 trillion. In 2013, in order to boost the farmer's yield, BRI has extended loans to more than 25,000 farmers through the KKP-E program. This resulted in the increase of the total KKP-E outstanding loans by 16.59%; from Rp2.46 trillion to Rp2.87 trillion.

Furthermore, by the end of 2013, BRI has distributed Retail KUR loans to more than 45,000 borrowers, which comprised of small businesses and cooperatives, and therefore has increased number of borrowers by 8,700 debtors compared to the previous year. This confirms BRI's commitment to support the government's program to expand financial access for small and medium enterprises in Indonesia. Throughout 2013, the total Retail KUR's outstanding loans increased by 27.12% from Rp5.4 trillion to Rp 6.9 trillion.

Business Overview

Micro Business and Program Segment Profitability

The loan disbursement of micro segment and programs throughout 2013 has generated a total net interest income and other operational incomes amounted to Rp23.96 trillion, and therefore contributed to Rp10.06 trillion in BRI's net profit.

Micro Business and Program Development Strategy for 2014

The micro business segment is a crucial factor for BRI's as one of the main entry point to the growth and development of its long-term customer relationship and loyalty, which is expected to grow into commercial or corporate customers, following the micro businesses' business growth. Therefore, BRI is determined to strengthen the growth of micro business base.

As an attempt to accelerate the growth in micro, BRI has intensified the establishment of potential micro industry clusters of all BRI's working unit across the archipelago. Head office will consistently support this Micro Business development by maintaining good relationship with institutions, agencies, or third parties in national level, to open up and streamline market penetration by regional work units. Various programs that will continuously be implemented in 2014 include:

1. Market Development
 - a. Acquisition of new customers through optimization of trickle down business from other segments.
 - b. Developing a strategic alliance for marketing or micro business development.
2. Market Penetration
 - a. Increase cross selling from existing customers.
 - b. Conduct marketing programs that suit the future of customer's profile, while maintaining existing customers.
 - c. Conduct optimum marketing communication related to micro products
 - d. Develop community banking as a concept of micro business development
3. Development of Micro Business product features suitable to Micro customers, both in terms of quantity and quality. The bank also continues to improve service quality by simplifying the procedure with regard to the prudence principle.
4. Development of Supporting Factors
 - a. Develop HR Micro, both in quality and quantity
 - b. Develop a reporting system to facilitate the monitoring of Micro Business performance
 - c. Increase the capacity and quality of IT in support of micro business operations
 - d. Improve the performance of e-channel to support the achievement of an increase in fee-based income (FBI) in Micro Business.
 - e. Conduct a comprehensive and tiered evaluation and monitoring, and continuous coaching to maintain the performance of micro businesses.
5. Action Plan

To ensure the success of the micro-business development strategy, BRI has prepared several plans of action, including:

 - a. Network expansion to strengthen its customer base by adding BRI Units, Teras BRI, Teras BRI Mobile and pioneered the development of Floating Teras BRI to reach areas with minor to no land transport infrastructure.
 - b. Development of micro's branchless banking concept.

Business Overview

Retail and Medium Business

“ The expansion of Retail and Medium Segment loans relies on the extension of Investment Loan (KI) and the Working Capital Loan (KMK), consumer loan with Briguna as the top product, as well as the housing loan (KPR), for Small and Medium segment.

”

Business Overview

Summary :

1. After the consolidation period in 2013, BRI has realized a number of programs to develop its Retail and Medium segment.
2. The expansion of the Retail and Medium segment loans relies on the extension of Investment Loan (KI), the Working Capital Loan (KMK), Consumer Loan with Briguna as the top product, as well as the Housing Loan (KPR), for Small and Medium segment.
3. The total amount of Retail and Medium loans increased 22.58% to Rp178.16 trillion.
4. The fund raising for retail conducted through Britama savings product grew 12.94% to Rp 79.41 trillion
5. The Retail Business is currently supported by BRI's biggest ATM network spread across Indonesia with more than 18,292 ATMs

In general, BRI Retail Business segment includes the extension of retail commercial and medium loans to finance small and medium enterprises (SMEs), consumer loans, individual third party funding and other consumer banking businesses.

Loans

The total outstanding for Retail and Medium Loans in 2013 reached Rp178.6 trillion or 41.37% from BRI's total loans.

Commercial and Medium Retail Loans

BRI distributes retail commercial and medium loans to meet the financial needs of the small and medium enterprises through Working Capital Loans or Investment Loans.

The loan extension is channeled through 453 BRI branch offices and 565 BRI sub branch offices under the management of 18 BRI regional offices.

The Development of Commercial and Medium Retail Loans in 2013

Throughout 2013, amidst the global and national economic uncertainty, BRI still managed to develop its Commercial and Medium Retail Loans by implementing the credit quality improvement program, which covers:

1. Monitoring and evaluation of the loans portfolio in a comprehensive manner, both onsite and offsite, supported with assistance to operational work units.
2. Providing solutions that include technical instructions regarding the completion of operational problems, the implementation of automatic monitoring, status of customer's installments, loan restructuring implementation criteria, and other problems faced by the working unit.
3. Improvement of knowledge on credit risk management to all levels of the Retail and Medium Business Division
4. Improvement of policy, systems, and procedures regarding the submission process, monitoring and resolution of special mention customers

In addition to the loan quality improvement program, throughout 2013 BRI also implemented a variety of programs to develop the Retail and Medium Business Segment that includes:

1. Evaluation and determination of Retail and Medium Loans sales targets and increasing the outstanding and Retail and Medium Business expansion by taking into account the potential of the region, and economic sectors.
2. Implementation of 'member get member' marketing program.
3. The 'trickle-down business' program, which is a marketing program, aimed towards suppliers and distributors of state-owned enterprises and blue chip corporations that have become BRI's clients.
4. The implementation of cross selling from other BRI products to existing customers to increase revenue.

Commercial and Medium Retail Loans Performance in 2013

1. Commercial Retail Loans in 2013, the working capital and investment portfolio between Rp100 million and Rp5 billion indicated significant growth. Although the domestic economic condition was affected by the uncertain global economy, BRI successfully overcame the challenges and managed to raise over 27 thousand new debtors, which resulted to a 24.60% increase in the total outstanding loans for Commercial Retail from Rp67.35 trillion to Rp 83.92 trillion.

Business Overview

2. Medium Loans
KI or KMK that were included into Medium Loans are those between Rp5 billion to Rp50 billion. In 2013, the outstanding for the medium segment's loan grew 22.90% from Rp16.52 trillion to Rp20.31 trillion.
3. Consistency in monitoring and prudent credit management resulted in improved credit quality. At the end of 2013, BRI has improved the NPL for Commercial and Retail segments, which stood at 3.13% and 4.38% respectively.

Development of Retail and Medium Segment Outstanding Loans

(In Rp trillion)

Consumer Loan

Until recently, BRI Consumer Loan is still dominated by Briguna (Credit for fixed-income, and Retired Employees) with the proportion of about 80%. However BRI also has Consumer Loan products such as the Mortgages (KPR), Apartment Ownership Loans (KPA), Auto Vehicle Loans (KKB) and Credit Cards.

The approval of consumer loans' requests were made based on the income of the potential customers that must be verified by their employers, or revenues of the consumers' companies (for business owners) supported with adequate assessments of the collateral. Therefore, the growth of consumer loans was strongly influenced by the society's income, purchasing power, and the global economic condition.

Retail Consumer Loan Products

Briguna

Briguna is BRI's leading consumer loan product designed for employees and retirees with fixed incomes, for example, civil servants, which may be used to secure both productive and consumptive purposes. BRI's network is the largest in Indonesia and is extended all across the archipelago, making it one of the bank's competitive advantages to help capture the segment.

Mortgages or Kredit Pemilikan Rumah (KPR)

KPR BRI is expected to continuously meet people's demands of house ownership. Currently, BRI has cooperated with more than 400 residential developers all over Indonesia. In addition, KPR BRI also offers a range of facilities, including a flexible loan installment period, competitive interest rates, guaranteed security of document ownership, and other conveniences that will provide added value to the prospective debtors.

Welfare Housing Loans or Kredit Pemilikan Rumah Sejahtera (KPRS)

KPRS is a government credit scheme created for low-income debtors and was established in collaboration with the government i.e. the Ministry of Public Housing (Kemenpera). The resources to support KPRS financing originated from merged funds between BRI and the government through the Ministry of Public y. The interest rate for the KPRS scheme is both low and fixed during the loan period.

Business Overview

Auto-vehicle Loans or Kredit Kendaraan Bermotor (KKB)

KKB BRI is established to meet customer's needs for cars or motorbikes. BRI has cooperated with various sole authorized agents (ATPM), dealers and multi-financing firms in the program, making the KKB BRI proficient to give the best services with a very affordable interest rate. KKB BRI also provides a no down payment feature, which is a bundling feature between KKB BRI and BRI saving products.

Development of Consumer Loan in 2013

As previously discussed, the global and Indonesia's economic condition during 2013 is less favorable due to the economic stagnance of most developed countries in past few years. As a result of these conditions, the Indonesia's economic growth initial prediction of 6.3% has been corrected to 5.78%. In addition, the government also increased the price of fuel (BBM) and base electricity tariff (TDL), which has influenced the people's purchasing power.

This economic condition has triggered inflation rates and the contraction of the exchange rate, which has made Bank Indonesia to raise its benchmark interest rate and credit purchase requirements for vehicle and housing consumption, which in turn affects the demand for credit, particularly for KPR and KPA.

To ensure the achievement of the Consumer Loan business segments, BRI applies the following general strategies in 2013:

1. Reinforcing the implementation of Monoline Business Process in the Credit Consumer Work Unit throughout Indonesia, which was first started in July 2012. With the implementation of this monoline, BRI has work units focusing on serving Consumer Credit, such as the

13 Consumer Credit Centres (SKK) and 45 Consumer Credit Branch Offices (KKK) as a primary delivery channel, supported with other delivery channels, the 391 Referral Branch Offices. The implementation process is suited to the potential of the business consumers located in each region.

2. Continued development on the innovation and features of BRIGuna.
3. Improved standards of service while maintaining prudent risk management. In this case, BRI conducted improvement of the technology to ensure satisfactory Service Level Agreement (SLA). This strategy is applied to the Briguna cooperation product, with online loan application and development of installment payment management services.
4. Application of the Consumer Loan Approval System (CLAS) for a fast credit process.
5. Marketing of BRI's Consumer Loan with a very competitive interest rate.
6. Directing the BRI Consumer Loan brand for service promptness in order to strengthen the growth of BRI's positioning in consumer. As part of the strategy for brand image and increased awareness of brand image, BRI conducted promotion in various media and actively participated in various national and international exhibitions.
7. Cooperation with Business Partners. BRI continues to create partnerships with a number of large developers to distribute KPR and KPA through Joint Marketing Program/Joint Promo, and embrace automobile/motorbike manufacturers to support KKB distribution. BRI also maintains partnerships with multifinance institutions through Joint KKB products.

Consumer Loan Performance in 2013

1. Overall, the outstanding Consumer Loan in 2013 increased 20.29% to Rp73.92 trillion from Rp61.46 trillion in 2012. Growth was driven by Briguna's growth of 17.46% to Rp57.55 trillion from Rp48.9 trillion in 2012.
2. Consumer Loan expansion was done prudently while maintaining credit quality. A prudent monitoring process and client selection makes NPL consumer loan is relatively low in 2013, which stood at 1.40%.

Credit Card

BRI Credit Card was launched in 2006 and offered to customers for their convenience in doing transactions. Today, BRI has several types of credit cards, including BRI Credit Card Standard, Gold, Platinum, Corporate, Business, and Co-Branding.

Credit Card Business Development in 2013

Throughout 2013, BRI implemented a number of strategies relating to the development and marketing of its credit cards, including:

1. Improved cooperation with MasterCard for Standard, Gold, Platinum, Business, and Corporate credit cards, as well as with Visa Worldwide for BRI Credit Card Touch.
2. Conducted integrated promotion
3. Increased cross selling with BRI products.
4. Increased marketing reach to second and third tier cities.
5. Development of product/features, by launching Co-Brand Credit Cards, refining some of its features such as Electronic Statement (e-statement), EDC Redemption BRI Point, and EDC installment feature.

Business Overview

6. Focusing the marketing strategies on BRI customer acquisition; namely marketing and education to the BRI branch offices in providing services of BRI Credit Card facilities.
7. Maintaining assets quality with the development of collection infrastructure, and creating billing and collection recovery teams at Work Unit Operations.
8. Development and automation of credit card application process to accelerate the decision process by applying the prudential principles.

These strategies are supported by the card holders trust on the Bank's reputation, reliable support such as the appropriate IT platform, easy source of funding, an extensive network covering all of Indonesia, a large customer base and and the support of a competent and high integrity human resources.

Credit Card Performance in 2013

The business performance of BRI credit card has continued to show improvements as reflected in growing number of new cards, volume of transactions and fee-based income. By the end of 2013, BRI card successfully issued 666,027 cards, or a 23.63% increase from 538.729 cards in 2012, while sales volume increased 25.50% to Rp2.99 trillion from Rp2.39 trillion. In addition, in 2013 BRI successfully increased the number of merchants to 55.206 EDCs, with a total volume of sales reaching Rp5.7 trillion.

Deposits

BRI provides a variety of deposit products that offer safety and premium service quality to the customers. BRI has integrated marketing activities to support and

promote these deposit products. There are also periodic promotional programs with attractive prizes for certain saving products. The following are BRI's main deposit products:

Deposit Products

BritAma

BritAma is the flagship savings account, dedicated to gain third-party funds in urban areas. BritAma is marketed for customers that looking for an easier and convenience in doing banking transactions, available in Rupiah and foreign currencies.

BRI also have other types of this saving product that has been customized to fulfill the customers' needs such as BritAma Valas, BritAma Bisnis dan BritAma Rencana.

The BritAma is supported with many interesting features, offering easy transaction through ATM and EDC machines that accessible from all over the world, and supported by 24-hour service of Internet Banking and Mobile Banking. Furthermore, these products are also supported by BRI's 9,808 work units, CDM BRI and BRI Kiosk throughout Indonesia.

To support the fund raising strategies and to increase the average savings amount, BRI regularly conducts "Untung Beliung BritAma" (UBB), a lucky dip program for BRI BritAma customer retention/loyalty and acquisition. The UBB program has been carried out as many as 6 (six) times since 2007 and has successfully raised public awareness on BRI BritAma product.

BRI Junio

BRI Junio is a savings account specially targeted at children of 17 years and younger. The aim of this product is to introduce young people

to banking services at an early age and to instill a sense of delight in saving. BRI Junio is designed to attract young customers using BRI Private Label Limited Edition Card depicting iconic cartoon characters, namely Superman, Tweety, and Tom and Jerry.

GiroBRI

GiroBRI is a demand deposits and is one of the BRI products available in various currencies; both in Rupiah and foreign currencies, and is equipped with BRIVA (BRI Virtual Account) facilities that offer additional convenience in depositing and verifying their business transactions.

DepoBRI

DepoBRI is a term deposit with a choice of time limits from 1, 2, 3, 6, 12 and 18 through 24 months offering competitive interest rates.

Haj Savings

Haj Savings is a product for Moslem customers that plan to undertake the Haj pilgrimage. This product helps customers to prepare their Haj Pilgrimage Implementation Fee (BPIH), whether a regular BPIH or a Special BPIH/Haj Plus. Deposits can be carried out online at all BRI work units and will be forwarded via host-to-host switching application to the Integrated Computerized Haj System (Siskohat) in Religious Affairs Ministry.

Tabunganku

The Tabunganku product is one of Bank Indonesia's programs in the Indonesia Savings Movement (Gerakan Indonesia Menabung). It is a savings product for individuals with simple and straightforward conditions, applied simultaneously with other Banks in Indonesia to encourage savings culture in the country while at the same time may help to improve people's welfare. Tabunganku's main advantages charge no administration fee, and offer an affordable initial deposit.

Business Overview

Deposits Performance in 2013

In 2013, retail deposit products successfully increased third party funds to Rp167.81 trillion. In addition to increasing the acquisition of third-party funds through deposit products services, BRI also received recognition from a number of external parties, namely the Top Brand Index Marketing Magazine for Junio BRI Savings, and based on the results of a survey of Mark Plus Insight, BRI was awarded the Indonesian Brand Champion 2013 (Gold) for Most Popular in Conventional Banking category. The bank also ranked first in the Indonesian Middle Class & Consumer Finance Survey 2013 for Savings and Deposits category.

E-Channel

To support the retail fund raising and to enhance the products and services' competitive edge, BRI has consistently developed an integrated network (e-channel) using the latest technology. The development of e-channel network infrastructure was well planned and carried out by placing attention to the information safety factor. (See also "Information Technology System Development").

As a commitment in providing access to its customers, BRI improves and adds the e-channel infrastructure annually, which consists of ATM, Kiosk, CDM, EDC and e-Buzz, as detailed in the below table:

E-Channel Development Table					
E-Channel	2009	2010	2011	2012	2013
ATM	3,778	6,085	7,292	14,292	18,292
EDC	6,398	12,719	31,590	44,715	85,936
CDM	22	39	89	92	192
Kiosk	60	96	100	100	100
E-Buzz	1	2	19	42	50
Total	10,259	18,941	39,090	59,241	104,570

To optimize its largest customer base in Indonesia, BRI will develop e-channel for ATM, EDC, Kiosk and CDM platform. There are three main focuses that will be achieved in the development of e-channels; increased access to customer service, increased fee-based income, and improved operational efficiency.

In 2013, BRI launched the BRI e-banking Hybrid Lounge, a self-service banking with hybrid machines that merge the ATM, CDM, EDC and Internet Banking functions, as the Bank's commitment for an improvement in its IT-based services to its loyal customers. This service covers a variety of convenience, including easy registration for new BritAma customers, simply by using their e-KTP number as a source of information, registration for demand deposits, time deposits, credit card application, and BRI Priority application.

BRI Priority

To raise awareness and customer loyalty, BRI uses intellectual, lifestyle and heritage as BRI Priority's brand association. BRI Priority provides priority-banking services offered exclusively to BRI's mass affluent customers and high net-worth individuals. The services include financial planning, investment consultations, insurance (bancassurance) and retirement planning.

In providing services for the Priority segment, BRI establishes priority lounges located in some major cities in Indonesia. Sentra Layanan Prioritas (SLP) or Priority Service Centre, are designed with a high service quality standards that emphasize customers' comfort, safety, and accuracy for transactions.

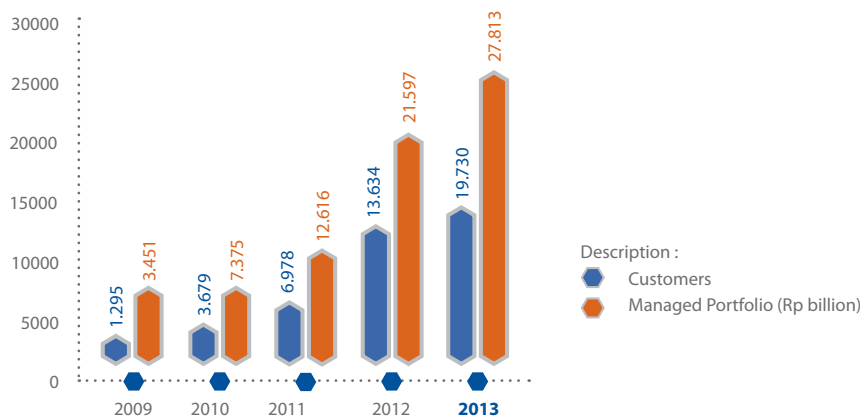

The SLP organization has been created with a tiered monitoring concept (built-in control) and is professionally managed by certified and proficient Priority Banking Assistant (PBA), Priority Banking Officer (PBO) and Priority Banking Manager (PBM), as required by the regulator. The certifications include WAPERD for Mutual Fund sales agents, Indonesia Life Insurance Association (AAJI) for Bancassurance (Unit Linked) sales, and Wealth Management Training.

Business Overview

BRI Priority offers various competitive privileges including personal service from the Priority Banking Officer, in the form of delivery and collection services for certain amount, private phone banking services, exclusive rooms for banking transactions, private mini-lounge facilities with internet and e-banking corner, free meeting room, designated parking bays, and a 24-hour Call Center.

BRI Priority Performance in 2013

BRI Priority managed to book an increase in customers and portfolio for the past few years, as illustrated in the following graphic:

Retail Segment's Profitability

The overall services in the retail segment successfully providing net income from interest and other operational income amounted to Rp20.76 trillion and net profit contribution of Rp8.64 trillion in 2013.

Retail and Medium Business Development Strategy 2014

Commercial and Medium Retail Loan

BRI has prepared a series of programs to accelerate target achievement for Retail and Medium Loans in 2014, which includes a variety of activities as follows:

1. Market Development
Conduct cooperation with the government institutions or state-owned enterprises (SOEs) or prominent private companies, through product promotion, business linkage, and network expansions.
2. Market Penetration (existing market and product)
A more active marketing activities to SOE partners by formulating a strategic alliance for Closed System Financing that would trigger Trickle-Down Business and to increase cross-selling.
3. Product Development
Innovation of Retail and Medium products scheme by conducting product benchmarking and mapping of potential market. Additionally, BRI will also develop an IT-based product feature.
4. Improving Loan Processes and Service Quality Improvement
Including business process improvement, promotion of policy and procedures in Regional Offices, Branches and sub-Branches, improvement of loan guidelines, evaluation of loan approval authorizations, review of Service Level Agreement (SLA) and loan service standard by benchmarking the service with other banks.

Business Overview

5. Human Resources Development
Development of competence through structured trainings, including for the Line Credit Officers (PKL) selling skills, service and credit analysis, supported with improvement of performance assessment method and performance based compensation, based on volume and quality of portfolio.
6. Development of Supporting Facilities
The utilization of information technology to support the marketing of new products, credit monitoring, and access to product information.

Consumer Loans

1. Improvement of organization structure and business processes, which has already been implemented in several major cities through the review of Monoline Business Process application in 13 SKK and 45 KKK for expansion opportunities in 14 major cities in Indonesia.
2. Improvement of Service Level Agreement (SLA) with the development of several Regional Processing Center (RPC) and the implementation of an integrated system.
3. Expansion of quality loans with the establishment of Regional Sales Center (RSC) and Collection Center. By applying a Collection strategy that includes optimization of collection function, continuous HR trainings, and improvement of Complaint Handling System to maintain quality of loans.
4. Continuous development of product features for KPR, KPRS or KKB.
5. Sales strategy by utilizing customer database, third party (dealer or developer), walk-in customers as well as implant banking through Home Ownership Program (HOP) and Car Ownership Program (COP) with several large companies in order to get trickle-down business.
6. Cooperation with partners, with the aim of upgrading the escrow account to increase the potential for cross selling of other BRI products.
7. Implement marketing strategies that are specific to each area.
8. Optimization of the payment system through e-channel BRI.
9. Increase Credit Card marketing activities
10. Increase Credit Card cooperation with BRI merchants
11. Innovation and product development for BRI Credit Card.

Savings

1. Focus on increasing market share of funds in urban areas.
2. Expand and increase the number of delivery channels, especially e-channel.
3. Innovation of savings products and e-banking and more creative marketing programs, including acquisition, retention and loyalty programs.

BRI Priority Service

1. Focus on the efforts of product development and improvement of quality of service.
2. Cooperating with other appropriate and leading brands
3. Implement a marketing program that includes the acquisition, retention, and loyalty
4. Addition of Priority Service Centers and Priority Lounge in major cities in Indonesia.

Business Overview

State Owned Enterprises (SOEs) and Corporate Businesses

“ The focus of SOEs and Corporate Business in sectors capable to produce cross-selling opportunities, trickle down business, and strengthen the domestic economic foundations, has increased substantial results by 158.46% in synergy-based MSME portfolio. ”

Business Overview

Summary:

1. The development of SOEs and Corporate loans are focused on businesses that offer opportunities for cross-selling to develop other business sectors and to increase fee-based income, particularly in the Micro, Small and Medium Enterprises (MSMEs) segment through trickle down business.
2. Total outstanding for Corporate loans reached Rp47.75 trillion in 2013 with an NPL ratio maintained at 0%, while total outstanding for SOEs segment reached Rp62.47 trillion with an NPL ratio of 0.00%.

Currently, the SOEs and Corporate business segments are supporting BRI's business expansions. This business development strategy is aimed to improve future competitive positioning, particularly for loans to companies that support the development of national economy with a broad trickle-down business potential in the MSME segments, which is BRI's main focus.

From these segments, BRI targets the cross selling to other business segments through the development of a range of other banking services appropriate to the needs of MSM Enterprises. As a result, the synergy will enable the increase of fee-based income.

To fully optimize this segment, BRI implements a development strategy that focuses on marketing targets, in which the Company becomes the national economy's backbone through the integrated marketing, product bundling and cross selling to establish a "one stop financial services", which provides an integrated banking solution for the corporate customers.

To achieve this strategy, BRI strives to improve and develop its banking services, service quality, product features and human resource competency. Banking services for the SOEs and corporate segments include special loans; cash management; loan facilities for vendors, subcontractors, suppliers, distributors and development partners; as well as consumer loans for employees who work in these companies. In addition, BRI has also developed other banking services, such as Host-to-Host, One-Gate Payments, Bill Payments and Briva (BRI Virtual Account).

SOEs Business

SOEs outstanding loans in 2013 amounted to Rp62.47 trillion with the largest composition coming from the agribusiness and infrastructure.

BRI's strategy succeeded in achieving loans extension in 2013 includes retention program for the existing SOEs customers, the acquisition of former customers that are currently with other Banks, the acquisition of new SOEs customers and new SOEs subsidiaries.

Corporate Business

BRI's Corporate Business is distributed according to the targeted business sectors and the potential for trickle-down business, which is divided into two main sectors, Agribusiness and General Business (Non-Agribusiness).

Agribusiness

The main product of this sector is the Agribusiness Loans facility. This facility is offered to individuals or companies that operate in the agricultural sector so as to support the financing within that sector for on-farm and off-farm, from upstream to downstream. On-farm financing covers agricultural cultivation on plantations, forests, farms, and fisheries. Off-farm financing covers agro-processing businesses or industries, and the means of agricultural productions such as seeding, agrochemicals, pesticides, agricultural machineries and animal feeds.

The main aim of agribusiness loans is to finance export commodities with a competitive advantage, and agribusiness that has a multiplier effect on MSMEs through the creation of one-stop services, closed system financing and risk-adjusting mechanisms, as well as quality improvement of account officers as professional business advisor.

Business Overview

General Business (Non-Agribusiness)

In the General Business sector, loan is the main product offered to the development of corporate sector outside the SOE and agribusiness sectors. The development of this business is conducted with regards to prudent principle using BRI's vast outlets in Indonesia, and through optimizing treasury products, as well as BRI's comprehensive international business products, in order to maximize the bank's interest revenue and BRI's fee-based income.

SOEs and Corporate Fund Management

Other than focusing on corporate loans, Corporate Business also prioritizes management service for clients' funds, as well as the development of banking services to increase fee-based income.

To capture potential corporate customers, BRI has established a special unit, the Institutional Relations Division, to provide continuous and specific services to non-individual customers consisting of the Government and private institutions that require nationwide banking services.

The targeted funds are funds from government institutions, educational institutions, pension funds, and private companies. Furthermore, in order to follow the rapid development of the business world that demands banking products and services relevant to the customers' needs, BRI continues to develop its range of products and services, as follows:

Cash Management

BRI provides a Cash Management Services (CMS) for business customers in need of a quick and accurate banking transaction services. The CMS is a solution that allows business customers to monitor account information, carry out financial transactions and manage their liquidity via integrated online facilities that are connected with the Bank.

To help achieving the vision of "Providing a Reliable and Competitive BRI Cash Management product", BRI has developed CMS through a series of system upgrade, including:

1. Installation, rejuvenation and upgrade of server/scalability server.
2. Improvement of Network bandwidth, security Firewall, and Internet communication equipments.
3. Development of general CMS application features.
4. Development of customized features for CMS applications, including the implementation of closed system strategy.
5. Refining the CMS interface applications to be more users friendly.

Treasury Single Account (TSA)

To manage national finances in a professional, transparent and responsible manner, the Government introduced a Treasury Single Account (TSA) at its State Treasury Service Office (KPPN) involving Bank Indonesia's Real Time Gross Settlement System (System BI-RTGS) and Bank Indonesia's National Clearing System (SKNBI).

Business Overview

State Revenue Module (MPN)

The Single Entry MPN application is an integrated application aimed at conducting deposit transactions for state revenues owed to the Directorate General of the Treasury via BRI. Single Entry MPN transactions cover almost all tax-related payments to the government.

Ministry Partnership Module

BRI has established cooperation agreements with several Ministries in order to support the government's programs. From these collaborations, BRI attained a number of benefits including the opening of accounts, settled funds and administrative fees. The partnership module includes the following:

1. Collaboration with the Public Housing Ministry for the Distribution of Governmental Aid Stimulus for Public Housing (BSPS).
2. Collaboration with the Education and Culture Ministry in disbursing allowances and Block Grant funds.
3. Collaboration with the Health Ministry to distribute funding for various health programs.
4. Collaboration with the Agriculture Ministry to promote the agricultural industry based on local resources by supporting fund disbursement to a number of Agriculture Ministry programs, such as post-harvest working capital assistance, venture capital for horticulture business and others.

Payment Services for Non-tax State Revenues (PNBP)

BRI has been assigned as the Bank to manage PNBP payments, cooperate with the National Police through Automatic Teller Machine (ATM), Electronic Data Capture (EDC), and BRI Teller.

The types of the National Police PNBP include Driving License (SIM), Vehicle License (STNK), Vehicle Ownership Book (BPKB), Vehicle Number License (TNKB), Vehicle Trial License (STCK), Driver's Clinic (Klipeng) and Firearm License.

Visa on Arrival (VoA)

VoA is a visa issued by immigration to foreign nationals visiting Indonesia. BRI provides the VoA counter payment services and manages the income raised to benefit the Republic of Indonesia's immigration office.

Payment Point

BRI has established partnership in financial management and billing payment administration to support the business of several government institutions and SOEs to provide convenience for the general public. The companies include the National Electricity Company (PLN), PT Telkom and the Regional Water Company (PDAM).

SOEs and Corporate Profitability

Throughout 2013, the SOEs and Corporation loans portfolio contributed for net interest income and other operational income amounted to Rp3.86 trillion, and also contributed to BRI's net profit amounted to Rp1.53 trillion.

Business Overview

SOEs and Corporate Performance

1. Loans Disbursement
Total loans outstanding in the corporate business segment increased to Rp110.20 trillion, with the increase in SOE loans to Rp12.65 trillion and Rp9.76 trillion for private companies.
2. Loans Quality
The use of prudential principles in loans approvals has sustained the loans quality of the Corporate Business with NPL maintained at 0.87% for private companies and 0.00% for SOEs.
3. Impact of trickle down business to the MSME Business
The synergy between corporate business and MSME business as a result of trickle down business has recorded significant results, thus the MSME outstanding loans from this synergy in 2013 experienced a drastic increase of 158.46% from Rp1.30 trillion in 2012 to Rp3.36 trillion.
4. Cash Management
The increase of customers applying the BRI CMS has increased the total of managed accounts from 24,017 accounts in 2012 to 33,019 accounts in 2013, and the transaction number went up from 1.50 million transactions in 2012 to 2.64 million.
5. Fee Based Income
The volume of institutional relationship activity and the management of corporate funds contributed to the fee-based income generated from corporate segment amounted to Rp107.61 billion.
6. Fund Raising
Total funds raised in the Corporate segment amounted to Rp172.40 trillion, which makes it one of the main sources of funding for the Corporate business expansion.

Business Overview

Loans Outstanding for SOE and Corporate Business

(In Rp Trillion)

SOEs and Corporate Business Development Strategy for 2013

BRI will continue to pursue business development in SOEs and Corporate business development, through the following strategies :

1. SOEs
 - Strengthening the SOEs credit market penetration by making it as an entry gate to the other BRI businesses.
2. Corporate (Agribusiness and General Business)
 - a. Financing on prospective and unsaturated business sectors
 - b. Improving the quality of human resources to act as financial advisors to the debtors
 - c. Optimization of IT to suit the business needs
3. SOEs and Corporate Fund Management
 - a. Optimizing cooperation with existing institutional clients through more cross selling
 - b. Improving the quality, function and role of executive relationship officers
 - c. Expansion to business in private national and multinational companies
 - d. Increasing the intensity of cooperation with government agencies, SOEs and corporations.

Business Overview

International Business

“ Several International Business development programs consistently been implemented has fostered BRI to book a productive increase in volume and value of transactions as well as fee-based remittance. ”

Business Overview

Summary:

1. BRI's International Business is supported by three overseas offices and 1,200 correspondent banks around the world.
2. Improvement of network, variety of services supported with new product features and the latest IT technology has significantly boosted the trade finance and remittance value.
3. An increase in trade finance volume and international banking services has also rapidly increased the transaction value in the past five years.
4. In 2013 the fee-based income generated from international business was Rp514.39 billion, a 37.47% increase from 2012.

To support BRI's efforts to become the leading commercial bank in Indonesia, BRI continues to develop its business services related to international trading. This is done by updating policies related to international business, building relationships with correspondent banks both at home and abroad, providing assistance for units across Indonesia engaging in international business development and marketing in order to provide contributions in the form of fee based income to BRI.

Trade finance and international banking services transaction also contribute to BRI's business activities, namely loans expansion, short term funding as a way to increase end-to-end service for BRI customers, by providing remittance and bank notes services.

International Business Product and Services

Other trade finance and international banking product and services provided by BRI, include:

1. Opening of Letter of Credit (LC) and SKBDN
2. LC Refinancing
3. Post-shipment Financing
4. Bill Purchase Financing
5. Standby LC, Guarantee, dan Counter Guarantee
6. Trust Receipt (TR)
7. Documentary and Clean Collection
8. Money Changer
9. Interbank Banknotes Transaction
10. Remittance

International Business Development Plans in 2013

Throughout 2013, BRI also implemented a marketing program through an annual Mudik Bareng BRIfast Remittance in August, as part of a strategy of new customer acquisition and retention of existing customers. BRI also worked together with migrant worker agencies, PPTKIS, to promote BRIfast Remittance and to acquire BritAma customers in the migrant worker market, as well as to develop incoming remittance feature with other banks (in collaboration with LINK, Prima, and ATM Bersama network).

To support these products, BRI currently has more than 1,200 Correspondent Bank and supported with nostro accounts in 14 foreign currencies. BRI also conducts direct marketing activities for Trade Refinancing LC and Non LC products, Risk Participation, and the issuance of

Guarantee with Counter Guarantee collateral from Correspondent Bank.

In addition to marketing products and international trade finance banking services, BRI also conducts offshore funding through the issuance of Bankers Acceptance (BA), Bilateral Loan and raising foreign currency deposits from retail and corporate customers.

International Business Performance in 2013 Trade Finance

Trade Finance has become one of the biggest contributors of BRI fee-based income with an average annual growth of 55.4% CAGR for the last five years, from the end of 2009 until the end of 2013. By 2013, despite the volatile global and national economics, BRI posted Rp514.39 billion of fee-based income from the trade finance transactions.

To support the increase in trade finance activity, BRI applied a number of revitalization efforts in human resources, product development and services, as well as support systems. The efforts to improve the quality of trade finance product and services were carried out by centralizing trade finance process with the establishment of Trade Processing Center (TPC) that is expected to fulfil BRI's need for a faster, more efficient and more accurate trade finance services. BRI also has a specialized sales force for Trade Finance at BRI regional offices that hold the potential for large trade finance transactions, as a market penetration measure and to improve the quality of service to customers.

Business Overview

Remittance

Currently, BRI has developed a remittance service in cooperation with other financial institutions, both banks and non-banks around the world: BRIfast Remittance.

To improve remittance services to customers, BRI expands its cooperation with correspondent banks and counterpart remittance, as well as develop a credit to account feature and cash pick-ups that give customers the option to either transfer money to their own account at BRI or by withdrawing cash in all BRI work units. The real time BRIfast Remittance Services provides convenience, security and speed of remittances to suit the customers' needs.

BRIfast Remittance accommodates remittance services in the form of Credit to Account and Cash Pick Up services. Through the cooperations with counterpart networks worldwide and the support of more than real-time online 9.808 BRI units, BRI is able to offer convenient, safe and fast money transfers that accommodate the customers' needs and expectations. So far, BRI has established cooperations with 37 counterparts in 13 countries. To strengthen its remittance business to Indonesian Migrant Workers, BRI has placed several Remittance Representatives abroad, including Malaysia, Abud Dhabi, and Saudi Arabia.

This has resulted in BRI's ever-increasing remittance transactions, from 846 thousand transactions in 2011, to more than 1.86 million in 2012, and increased even more to 2.65 million transactions in 2013.

Remittance Transactions

(in thousands)

BRI continues strengthening its remittance business and exchanging service quality by developing BRIfast Remittance as innovative remittance to meet customer's need.

Money Changer

Today, BRI has money changer business offering currency exchange services for USD, SGD, AUD, CAD, EUR, GBP, CHF, SAR, CNY, JPY, KRW, BND, NZD, PGK, THB, HKD and MYR, which is available in real-time online at all BRI branches.

BRI money changer service offers competitive exchange rates and always stays up-to-date with the global exchange rates. In marketing and developing its money changer business, BRI has banknotes dealers whose task is to determine exchange rates, exchange rate negotiation, inventory management, as well as conducting monitoring or assistance function to the BRI work units that run money changer business.

To meet the needs for cash liquidity in foreign currencies (bank notes) as well as inventory management related to BRI's needs and those of third parties, BRI is also active in the export and import of bank notes in cooperation with BRI Correspondent Banks in several countries.

Overseas Offices

To develop its trade finance services, BRI is currently supported by Overseas Units, including the BRI New York Agency (BRINYA), the BRI Cayman Island Branch (BRICIB) and the BRI Hong Kong Representative Office (BRI HKRO). The supports are available through the provision of trade loans, fundraising, commercial loans, risk participation, remittance, USD settlement, and several functions in extending BRI's reach overseas.

BRINYA actively participates in providing loans for global and Indonesian companies as an effort of portfolio expansion. In addition, BRINYA also participated in the financing Indonesian Government's projects through PLN scheme as a support for the development of Indonesia.

Business Overview

As a result, BRI New York Agency's continue to show substantial growth. Its assets grew to USD918.87 Million in 2013, with USD12.90 million in profit.

Another work unit, BRI Caymand Island Branch (BRICIB) actively conduct banking activities both in assets liabilities. BRI Caymand Island Branch's assets increased 40.07%, from USD199.9 million in 2012 to USD280.0 million in 2013, with total lending at USD267.4 million. Net income generated in 2013 was USD2.5 million.

BRI Hong Kong Representative Office is an extension of BRI's head office in Hong Kong, the Asia's financial hub. BRI Hong Kong Representative Office is in charge of collecting information on investment and business opportunities to develop bilateral trade relations and promote Indonesia's export and imports. BRI Hong Kong Representative Office is also responsible to build customer base for the remittance business as well as supervising the business activities of BRI's subsidiary in Hong Kong, namely the BRI Remittance Company (BRC).

International Business Profitability

International Business has been accountable for significant fee-based income for BRI, showing very rapid development in the last 5 years.

Fee Based

(In Rp Billion)

5. Development of remittance services
6. Development of remittance representative function to be representative office.
7. Expanding cooperation with banks, including the Regional Development Bank (BPD) and other domestic and overseas banks.
8. Create Money Changer cooperation plan with correspondent banks and domestic money changer institutions.

International Business Development Strategy in 2014

For a more competitive international business development, BRI has planned a series of activities including:

1. Product development
2. Implementation of TPC (Trade Processing Center) service for Jabodetabek area.
3. Development of the TPC in order to provide added value for customers, by developing service portal accessible directly by the customer.
4. Improving the quality of the marketers, advisors (TFO) and TF operational officers through certification for the development of professional and competent human resources.

Business Overview

Treasury Business and Capital Market Support Services

“ Amidst the dynamic in capital market, BRI was able to boost the value of issued securities, assets under custodian service, and DPLK assets, which increased fee-based income from Treasury Business and Capital Market Support Services by 30.37%.

”

Business Overview

Highlights:

- Liquidity and market risk management practices in line with regulatory requirements, with strong yield optimization despite a challenging year
- BRI is meeting the demands of capital market customers through its capital market services, comprising trusteeship, selling agents, custodian services, and DPLK.

Treasury Business

To provide optimum services in Treasury Business and Capital Market Support Services, BRI carried out the following strategy:

1. Managing liquidity, sources and utilization of funds, and market risk in a focused and professional manner.
2. Carrying out trading for arbitrage, market making, and proprietary based on prudential banking principle and robust trading limit.
3. Performing credit assessment to identify investment opportunities in financial instruments or capital.
4. Providing competitive financial market products and services for both BRI's internal units and customers.
5. Developing products and services for financial and capital markets, to generate fee-based income.

The decline in global and national economic in 2013 rendered a serious challenge to the capability of BRI's Treasury Business in managing asset and liability structure, to ensure

real contribution for the Bank's performance sustainability. Rupiah was weak throughout 2013, a test for Treasury to exercise apt strategy in order to protect BRI's Balance Sheet. As evident BRI's net open position did not exceeded Bank Indonesia's (BI) requirement or BRI's Treasury Policy, thus Treasury was successful in its role to minimize foreign exchange rate risk.

High inflation due to raised fuel price in June 2013 and Rupiah that continued to dip due to deficit, prompted BI to increase benchmark interest rate from 5.75% at the onset of the year to 7.50% by year's end. This strategy affected interest rate for customer deposits as well as cost of funds. Addressing adjustment in terms of interest rate and cost of funds, BRI undertook steps to maintain low-cost funds composition within target, whilst focusing on deposit products that were not affected by change of interest rate. In terms of assets, loans were prioritized for high yield segments and at the same time the Bank paid close attention to availability of liquid assets, which also experienced adjustments driven by interest rate movement in the market.

To serve customers' foreign exchange needs, BRI Treasury Business serves buy-sell services and hedging through forwards and swaps. To complement foreign exchange services, BRI also provides market update via e-mail and currency information by SMS Blast to customers.

In 2013, Treasury Division opened four service outlets in remote areas in Surabaya, Medan, Bandung, and Yogyakarta to expand services. In addition, BRI continued to disseminated information regarding Treasury products, to align understanding on Treasury products and services across all BRI's units.

Capital Market Support Services

With increasingly diversified investment channels in Indonesia, customers have more investment choices in money market and in capital market. BRI's Capital Market Support Services is present to help customers invest in capital market. Not only in terms of investment, Capital Market Support Services also serve corporate customers that seek financing by issuing securities in capital market. BRI's Capital Market Support Services consist of:

Trustee and Selling Agent

Trustee is the party that represents the interest of debt security holders, in and out of court. Going forward, BRI will continue its partnership with the Capital Market to develop Trustee service.

As selling agent, BRI markets investment products, among others mutual funds, government securities (ORI), and Sukuk Ritel. Cooperating with eight Investment Manager, BRI currently offers 29 Mutual Funds products, focusing on BRI Prioritas customers. In 2013, BRI was appointed by the Government as selling agent of ORI010 and Suku Ritel Series SR005.

Business Overview

BRI markets ORI and Sukuk Ritel through Branch Offices and Sub-Branch Offices located throughout Indonesia. BRI strives to always garner trust from the Government as selling agent/sub-selling agent for every ORI and Sukuk Ritel issuance, generating fee-based income from the sales of investment products.

Custodian Service

BRI has been serving as Custodian Bank since 1996 and offers various asset management services, including money market instruments such as time deposit or deposit on call, Bank Indonesia Certificate as well as fixed income instruments such as government bonds, corporate bonds, and equity in the form of shares. BRI has been appointed as Sub-Registry to Government Bonds transactions and executor of SBI Sciptless by Bank Indonesia. BRI's Custodian Service encompasses mutual funds management that covers wide-range of Mutual Funds and Financial Institution Pension Fund.

During 2013, BRI's Custodian Service extended various services to customers and continued to develop as the leading choice for security custody. Custodian services in 2013 were primarily categorized into core services and value added services.

Trust Services

BRI's Trust Services offer financial assets trusteeship for and on behalf of customers. BRI is the first bank in Indonesia to obtain operating permit from Bank Indonesia to carry out Trust Services in Indonesia by virtue of Bank Indonesia Letter No 15/19/DPB1/PB1-3 dated 12 February 2013 and confirmation letter from Bank Indonesia No 15/30/DPB1/PB1-3 dated 19 March 2013.

BRI's Trust Services as set forth in Bank Indonesia Regulation include:

1. Payment Agent
2. Security Agent.
3. Investment Agent

Currently, BRI provides Trust Services for financial transactions in oil and gas projects involving Contractors of Production Sharing Contracts (K3S) under Special Taskforce for Upstream Oil and Gas Business Activities (SKK Migas) as well as non-K3S projects.

BRI's trust services also support BRI's activities in infrastructure financing, energy and syndication financing, as well as acting as trustee services in managing trust fund.

Financial Institution Pension Fund (DPLK)

Established in 9 January 2006, BRI's Financial Institution Pension Fund (DPLK) acts as Trustee for Defined Contribution Pension Program (PPIP). BRI's DPLK product is known as "BRI Pension Investment Plan" is open for individual or group pension scheme, from formal or informal sector.

The "BRI Pension Investment Plan" is the primary product of DPLK BRI and offers four investment options: Money Market Investment, Fixed Income Investment, Equity Investment, and Mixed Investment. "BRI Pension Investment Plan" has number of leading features, among others:

1. Managed under up-to-date practices with daily Net Asset Value valuation as practiced in Mutual Funds management. The NAV is published daily on national newspaper.

2. Convenient registration and contribution deposit procedure.
3. Support of extensive service network through all BRI's branch offices and sub-branch offices.
4. Secured products with competitive return.
5. Performance transparency; BRI's DPLK's Financial Statements are audited by independent auditors and published on national newspaper.

As Pension Fund Trustee, DPLK BRI envisions its service to be the market leader in Pension Fund sector, prioritizing prudent long-term investments management whilst providing optimum return with professional and transparent management to ensure a better future for BRI DPLK investors.

Treasury Business and Capital Market Support Services Performance

1. Successfully maintained cost of funds amid rising BI rate and challenging domestic economy condition. BRI's Cost of Funds rose by 3bps from 3.68% at the end of 2012 to 3.71% at the end of 2013, while Bank Indonesia increased interest rate from 5.75% early in 2013 to 7.50% by year's end.
2. Issuance of 5-year tenor Global Bonds with nominal value of USD500 million in March 2013, offering low coupon rate at 2.95%. Low coupon rate reflected the trust of foreign investors to BRI; the Bank received a total of USD12.5 billion orderbook that was equal to oversubscription by 4.2x.

Business Overview

- In general, BRI was able to maintain liquidity ratio indicated by Statutory Reserves, Net Open Position, Loan to Deposit Ratio, and Cash Ratio in compliance with BI requirements as well as internal Treasury Policy.
- Fee-based income from capital market support services throughout 2013 reached Rp55.49 billion, up by 30.46% from 2012.
- Total security managed by BRI as Trustee until December 2013 amounted to Rp47.01 trillion or rose by 10.2% compared to the same period in 2012.
- Managed assets under BRI's Custodian service grew by 85.16% from a year earlier, amounted to Rp103.98 trillion at the end of 2013 and generated Rp25.8 billion of fee-based income.
- BRI DPLK managed assets in 2013 reached Rp2.98 trillion, reflecting a 15.06% growth from 2012.

Treasury Business and Capital Market Support Services Development Strategy

- Joint marketing with related divisions to market Trustee, ORI, Sukuk Ritel, and Mutual Funds products.
- Expand marketing channel for BRI's Pension Investment Plan through micro units.
- Develop Sharia Investment and insurance features to BRI's Pension Investment Plan.
- Mutual funds investment system upgrade.
- Act as Facility Agent in syndicated loan scheme.
- Support BRI's anorganic growth.

Financial Overview

BRI's financial performance analysis and discussion are consistent with the guidelines of Indonesian Financial Accounting Statements Standards (PSAK) and Accounting and Reporting Guidelines for Indonesian Banking Industry. At the end of this analysis, BRI also presents brief discussion of subsidiaries' performance that form an integral part of the Bank's financial performance.

The analysis presented in this chapter is based on BRI's Consolidated Financial Statements audited by Public Accountant Firm Purwantono, Suherman dan Surja (PSS-EY). According to Independent Auditor Report No. RPC- 4702/PSS/2014 dated 16 January 2014 BRI's consolidated financial statements have been presented fairly in all material respects. BRI's Audited Consolidated Financial Statements is attached to this Annual Report.

Financial Review

- ROE* stood at **34.11%** - one of the highest in Indonesian banking industry.
- CAR* at **16.99%** - Well above regulatory requirement, and would support future growth.
- NPL (gross) at **1.63%**, - Reflecting stable loans quality.
- LDR at **88.54%** - Showcased the Bank's ability to maintain trust and liquidity.

Profit and Loss Statements

BRI again delivered a strong financial performance in 2013. Improved loans quality was accompanied by increased in outstanding loans, balanced loans portfolio, and stable operational efficiency. These elements bolstered BRI's performance achievement.

BRI booked 14.27% increase of consolidated profit, growing from Rp18.69 trillion in 2012 to Rp21.35 trillion and strengthened BRI's position as the most profitable bank since 2005.

Interest Income

Prudent lending is the first step towards sound and sustainable business growth. To that end, in 2013 BRI's business strategy focused on improving loans quality and applying improved selectiveness in loans disbursements. BRI also prioritized to enhance loans quality by enhancing monitoring as well as administration process with the application of modern information technology.

On the back of the suitable strategy, BRI's loans growth in 2013 outperformed the industry and at the same time showcased improved loans quality.

In 2013, BRI's total loans and financing grew 23.85%, up by Rp86.34 trillion from Rp362.01 trillion in 2012 to Rp448.34 trillion. Continuous efforts made to improve loans quality and appraisal procedure were proven effective to increase BRI's NPL (gross), which stood at 1.63% as of December 2013, from 1.83% in the preceding year.

Stable loans quality and Micro Loans that was predominant in the Bank's lending portfolio boosted interest income (including profit sharing in sharia business) throughout 2013, which rose by 19.86% from Rp49.61 trillion in 2012 to Rp59.46 trillion in 2013. From the total interest income, Rp52.12 trillion or 87.65% was contributed interest on loans.

In 2013, BRI was consistent in offering competitive prime lending rate for the Bank's product. In the long-term, competitive prime-lending rate would greatly benefit BRI's business growth, as it would enlarge BRI's business volume, create entry barrier for competitors, and at the same time amplifying BRI's presence in the Banking Industry.

Competitive prime lending rate has been part of BRI's strategy to build customer base through conventional services and e-channel network expansion, supported by skilled and reliable staff.

BI rate increased by 175bps throughout 2013 has affected cost of funds. However, the impact will be mitigated by adjusting the Third Party Funds (TPF) composition, as the Bank strived to raise its CASA component in TPF portfolio.

* bank only

* Including sharia income

Interest income from earning assets other than loans was relatively stable, recorded at Rp5.60 trillion in 2013 and increased slightly by 0.10% from the earlier year, with the contribution decreased in 2013, from 11.60% in the preceding year to 9.71% of the total interest income. This was mainly due to higher loans growth than non-loans earning assets growth, while composition of loans with high yields increased.

Interest Expense

Total interest expense in 2013 rose to Rp15.35 trillion from Rp13.13 trillion in the previous year, in line with the growth of average TPF volume in 2013 that driven by growing volume of deposits in the form of savings. Increased interest expense was also due to increase of interest rate on deposits, reflected in higher cost of funds (bank only) that recorded 3.68% in 2012 increase to 3.71% in 2013, as Bank Indonesia raised BI rate through 2013.

Net Interest Income

BRI recorded Rp44.11 trillion of net interest income (NII) in 2013 compared to Rp36.48 trillion in 2012. The increase was mainly driven by growth of loan outstanding, improved NPL, and BRI's success in increasing low-cost funds composition. BRI's NIM in 2013 stood at 8.55%, compared to 8.42% in 2012.

Other Operating Income

Financial Review

By implementing a consistent non-performing loans settlement procedure, BRI was able to achieve **Rp1.95 trillion** of recovered loans in 2013.

Other operating income in 2013 drop slightly by 0.49% to Rp8.35 trillion, due to the declined in other income from Rp1.72 trillion in 2012 to Rp982.1 billion. One of the components in other operating income that recorded significant growth was fee-based income, which rose by 23.74% to Rp4.86 trillion from Rp3.93 trillion in 2012. In 2013, fee-based income was stood at 58.24% of total other operating income and 6.99% of total income.

Other Operating Income Composition (In %)

In 2013, with consistent asset quality improvement initiatives, BRI recovered Rp1.95 trillion written-off assets, which demonstrated successful non-performing loans settlement program. This was an excellent achievement, particularly considering the challenging domestic economy in 2013.

In addition, BRI also managed to generate gains from sales of securities and government recapitalization bonds of Rp78 billion.

Other operating income from reversal of pension preparation, fines, loans settlement in advance, clearing rejection, and others in 2013 amounted to Rp982 billion.

Financial Review

Other Operating Expense

Other operating expense, which consists of salaries and employee benefits, general and administrative expense, premium paid to government guarantee program, and others, rose by 14.83% to Rp22.38 trillion in 2013 from Rp19.49 trillion in 2012. The increase was mainly driven by several sub-accounts, as detailed in the following table:

Other Operating Expense						
Type of Operating Expense	2011		2012		2013	
	Million Rp	Composition	Million Rp	Composition	Million Rp	Composition
Employees' salaries and benefits	8,700,847	50.92%	9,605,547	49.28%	12,231,994	54.65%
General and administrative	5,678,786	33.24%	6,343,661	32.55%	7,518,886	33.60%
Government Guarantee Program Premium	624,057	3.65%	749,297	3.84%	911,957	4.07%
Others	2,081,937	12.19%	2,792,527	14.33%	1,717,941	7.68%
Total Other Operating Expenses	17,085,627		19,491,032		22,380,778	

The increase of personnel expense by 27.34% to Rp12.23 trillion was due to status conversion of outsourced employees to contract employees, or contract employees to permanent employees. Expansion of working units led to continued recruitment activity to fulfil units' manpower requirements contributed to the increase.

Composition of Other Operating Expenses

(In %)

Description :

- Employee salaries and benefits
- General and administrative
- Government guarantee premium
- Others

Moreover, BRI also applied performance-based incentive for marketing officers. The policy was adjusted in order to provide appropriate reward for high-performing employees.

General and administrative expense increased by 18.53% to Rp7.52 trillion. This was due to conventional network expansion as well as e-channel expansion, which led to increased repair and maintenance costs. (Refer to "Network Development" in Marketing chapter).

Financial Review

Provision for Impairment Losses on Financial Asset

BRI sets aside provision to anticipate future risks, especially credit risk that is Provision for Impairment Losses on Financial Asset. In 2013, Provision for impairment losses on financial asset and non-financial assets amounted to Rp3.95 trillion, or rose by Rp1.28 trillion from Rp2.67 trillion in 2012.

The increase of provision for impairment losses expense was influenced by Indonesia's challenging economic condition throughout 2013, which indirectly increased BRI's business risks and anticipation of declining loans quality in the future

Operating Income and Income Before Tax

As the result of well manage operation, in 2013 BRI profit grew 15,19% to Rp26.13 trillion from Rp22.68 trillion in 2012. BRI also generated net operating income amounted to Rp1.78 trillion in 2013. In total, income before tax amounted to Rp27.91 trillion, posted a 16.98% growth from Rp23.86 trillion in 2012.

Income Tax

Pursuant to Law No. 36 of 2008, Government Regulation No. 77 dated 21 November 2013 on "Income Tax Reduction Facility for Domestic Listed Companies" and Minister of Finance Regulation No.238/PMK.03/2008 dated 30 December 2008 on "Monitoring and Implementation Procedures on Tax Reduction Facility Granted to Listed Companies" stipulated that domestic public companies in Indonesia are eligible to apply for income tax reduction facility of up to 5% lower from the highest income tax rate.

To obtain the facility, a public company must have at least 40% of its paid-in shares listed for trading in the Indonesian Stock Exchange and put in collective custody under a custody and settlement institution. The shares must also be owned by at least 300 (three hundred) parties, where each party owns less than 5% of the total paid-in capital. Public Companies are required to meet the stipulation above at least 183 (one hundred and eighty three) calendar days within 1 (one) fiscal year.

Tax calculation as stipulated by Law No. 7 of 1983 on Tax Income was amended for the fourth time with Law No. 36 of 2008 dated 23 September 2008, wick stipulates single of 25% effective as of 2010 fiscal year.

Based on Letter No.DE/I/2014-0098 dated 6 January 2014 share register monthly report (Form No.X.H.I-2 dated 6 January 2014 issued by Securities Administration Bureau, Datindo Entrycom, regarding BRI share ownership in 2013), all criteria above for year ended 31 December 2013 has been met. Therefore, BRI applies single rate of 20% to calculate income tax for fiscal years 2010, 2011, 2012, and 2013.

Pursuant to the tax regulation, BRI's tax expense in 2013 was Rp6.56 trillion, or rose by 26.7% from Rp5.17 trillion in 2012.

Net Income

After tax income, BRI's net income in 2013 amounted to Rp21.35 trillion, up by 14.27% from 2012 net income of Rp18.69 trillion. Meanwhile, earnings per share amounted to Rp865.22.

Comprehensive Income

Presentation of Other Comprehensive Income After Tax was effective following the implementation of PSAK No. 1 (2009 revision) regarding Presentation of Financial Statements, enforced as of 1 January 2011. Other Comprehensive Income After Tax consists of:

1. Gains amounted to Rp37.17 billion due to foreign exchange difference from financial statements presentation in foreign currency.
2. A loss of Rp1.97 trillion from unrealized gains from securities and government recapitalization bonds available for sale-net with amounts transferred to profit and loss in respect of fair value changes of available for sale securities and recapitalization bonds.
3. Income tax related to other comprehensive income amounted to Rp491.62 billion.

Total Comprehensive Income

Calculating the comprehensive income above, BRI's total comprehensive income in 2013 stood at Rp19.92 trillion, grew by 6.73% from Rp18.66 trillion in 2012.

Total Asset	469,899,284	551,336,790	626,182,926	17.33%	13.58%

BRI's assets during reporting year rose by 13.58% to Rp626.18 trillion from Rp551.34 trillion in the preceding year. The main contributor of asset growth was increase of loan outstanding, which grew by 23.85% to Rp448.34 trillion from Rp362.01 trillion in 2012. Loan was the primary component in BRI's assets structure, accounting for 71.60% of the Bank's total assets by the end of 2013.

Assets Composition

Loans

As described above, BRI was successful in growing its loan outstanding. The outstanding included sharia financing, which was up by 24.72% to Rp14.03 trillion. As a bank that focuses on Micro, Small, and Medium (MSM) segment, BRI's loans portfolio is dominated by MSM loans, which accounted for 72.29% of the total portfolio. The remainder 24.58% was disbursed to corporate segment, which included SOEs and non-SOEs, while 3.13% was occupied by financing and sharia receivables through subsidiary (BRI Syariah).

Financial Review

Loan Quality/NPL

Consolidation program, loan quality monitoring, and prudent loan disbursement initiatives increased current loans by 24.32% from Rp335.51 trillion in 2012 to Rp417.11 trillion in 2013. Loans in Special Mention category also rose by 20.50% from Rp19.86 trillion in December 2012 to Rp23.93 trillion in December 2013.

However, as described, economic condition in 2013 was unfavourable, which increased the credit risk. To anticipate declining loans quality in the future, BRI will consistently improve quality of non-performing loans management, loan disbursement process as well as loan administration. The Bank shall also intensify monitoring process, which has been proven effective.

(In Rp Million)

NPL (Net)	0,42%	0,38%	0,36%

Loan Composition by Loan Quality

Loans Written-Off and Recovery

During reporting year, BRI's written-off loans amounted to Rp4.32 trillion, lower than 2012 position that stood at Rp4.45 trillion, and received Rp1.95 trillion of recovery. The decrease in written-off loan was result of consolidation program that was carried out intensively.

Cash and Current Accounts with Bank Indonesia

Cash position as of the end of 2013 rose by 37.97% from Rp13.90 trillion to Rp19.17 trillion, resulting from openings of new sub-branch offices, cash offices, BRI Units, KiosK BRI, TerasBRI, TerasBRI Mobile, and ATMs. Current accounts with Bank Indonesia declined 4.25% from Rp42.52 trillion in 2012 to Rp40.72 trillion in 2013. Despite the decline, BRI's current accounts balance with Bank Indonesia was still within the central bank's required limit of Statutory Reserves (GWM).

The balance of BRI's current accounts with Bank Indonesia represented Primary Statutory Reserves and Statutory Reserves in foreign currency with Bank Indonesia of 8.02% and 8.00%, respectively (bank only).

Financial Review

Current Accounts and Placements with Bank Indonesia and Other Banks

Current accounts and placements with Bank Indonesia and other banks declined 35.65% from Rp71.08 trillion at the end of 2012 to Rp45.74 trillion in 2013. The decrease was mainly due to decline in placements with Bank Indonesia by Rp36.02 trillion.

Securities

To optimize the Bank's excess funds and to manage liquidity, BRI treasury management placed these excess funds in financial instruments that would generate interest income. Funds placement increased by 16.63% to Rp66.04 trillion in 2013 from Rp56.62 trillion in the previous year.

Government Recapitalization Bonds

By the end of 2013, BRI's Government Recapitalization Bonds amounted to Rp4.51 trillion, rose by 4.54% from 2012 position of Rp4.32 trillion. The increase was due to the purchase of Government Recapitalization Bonds categorized as fair value through profit/loss statement that amounted to Rp199 billion.

(In Rp Million)

Government Recapitalization Bonds by Interest Rate			
Type of Interest Rate	2011	2012	2013
Fixed Rate	4,682.33	0.00	0.00
Variable Rate	4,313.73	4,315.62	4,511.42
Total	8,996.06	4,315.62	4,511.42

Investments

BRI's total investments in 2013 (net) stood at Rp222.85 billion, representing 13.27% growth from end of 2012 position of Rp196.74 billion. The growth was contributed by the increase of PT BTMU – BRI Finance value from Rp195.33 billion in 2012 to Rp220.91 billion in 2013, coming from the accumulation of PT BTMU – BRI Finance net income.

The following are details of investments as of 31 December 2013:

1. PT BTMU-BRI Finance (formerly PT UFJ BRI Finance): Rp220.91 billion
2. PT Kustodian Sentral Efek Indonesia: Rp900 million
3. PT Sarana Bersama Pembiayaan Indonesia: Rp536 million
4. PT Pemeringkat Efek Indonesia: Rp210 million
5. PT BPR Toeloengeredjo Dasa Nusantara: Rp77 million
6. PT BPR Tjoekir Dasa Nusantara: Rp77 million
7. PT BPR Toelangan Dasa Nusantara: Rp66 million
8. PT BPR Cinta Manis Agroloka: Rp35 million
9. PT BPR Bungamayang Agroloka: Rp23 million
10. PT Aplikanusa Lintasarta: Rp20 million

Fixed Assets

Aligned with BRI network expansion and technology-based operation system upgrade, the amount of fixed assets rose by 22.15% from Rp7.22 trillion to Rp8.82 trillion as of end 2013.

Other Assets

Other assets grew 0.59% to Rp12.88 trillion from Rp12.80 trillion in the preceding year. This account consists of derivative receivables, acceptance receivables, deferred tax, and other assets. The growth was driven by increase of Deferred Tax by Rp164 billion and other assets by Rp1.04 trillion.

Total Liabilities	420,078,955		486,455,011		546,855,504	

The 13.58% growth of BRI's assets was due to the rise in the liabilities accounts and the increase in equity component from retained earnings. The largest growth in liabilities was delivered by Third Party Funds (TPF), which recorded a 12.02% growth. As presented in the above table, TPF is a dominant component in BRI's liabilities and occupied 92.21% of the total liabilities in 2013.

Increase of TPF exhibited the efficacy of BRI's marketing strategy to generate TPF, particularly with the support of services and e-channel network. In addition, improved service quality has increased public trust to BRI.

Third Party Funds

Third Party Funds (TPF) consist of demand deposits, savings accounts, and time deposits including sharia products, such as Wadiah Demand Deposits, Mudharabah Savings, and Mudharabah Time Deposits.

In 2013, BRI was able to grow deposits by 12.02% and reached Rp504.28 trillion. In addition, BRI was also able to maintain composition of low-cost funds (Demand Deposits and Savings) at 58% and high-cost funds at 42%.

As of December 2013, savings stood at Rp213.00 trillion, reflecting a 15.31% growth from Rp184.72 trillion in 2012. Savings was accounted for 42.24% of the total TPF.

The increased in savings indicated the success of BRI promotion programs and the wide varieties of savings features. Thus in the end has increased public awareness and willingness to open savings accounts in BRI.

Liabilities Due Immediately

The account represents BRI's liabilities to external parties that should be paid immediately in accordance with the requirements in the agreement that have been previously determined. Some of the transactions categorized in this account are advance payment deposits, tax payment deposits, insurance deposits, credit card deposits, deposits for channeling loans, deposits for clearing, remittance deposits, bank drafts and BRI travellers' checks, and others.

By the end of 2013, BRI's liabilities due immediately stood at Rp5.07 trillion or grew 3.13% compared to December 2012 position of Rp4.91 trillion. Advance payment deposits recorded the highest growth and amounted to Rp1.39 trillion as of December 2013 compared to Rp897.63 billion as of December 2012.

Financial Review

Deposits from Other Banks and Other Institutions

Deposits from other banks and other institutions consist of demand deposits, savings, time deposits, interbank call money, and deposits on call. This account records interbank transactions for the purpose of operational and liquidity management. As of the end of 2013, deposits from other banks and other institutions amounted to Rp3.69 trillion, up from Rp2.78 trillion in the previous year.

Borrowings

Borrowings was used, among others, to finance BRI's general activities as well as trade finance needs. This account consists of borrowings from Bank Indonesia (liquidity borrowings and borrowings for fixed asset investments), from entities and Government Institutions, bilateral borrowings, and other borrowings.

The balance of borrowings as of the end of 2013 amounted to Rp9.08 trillion, decreased by 16.57% compared to Rp10.89 trillion on 31 December 2012. The decrease was mainly due to matured bilateral borrowings in foreign currency that amounted to Rp1.93 trillion.

Subordinated Loans

The total subordinated loans as of 31 December 2013 was Rp2.10 trillion. It consisted of Subordinated Bonds II of Rp2 trillion and two-step loans of Rp98.97 billion.

Subordinated Bonds II were issued by BRI on 22 December 2009 with nominal amount of Rp2 trillion and 5-year tenor, offering fixed interest rate at 10.95%. The bonds were listed on Indonesia Stock Exchange. In accordance with Bank Indonesia

regulation, Subordinated Bonds II were used as Tier II Capital and all proceeds have been utilized to support prudent loans expansion.

The principal of two-step loans decreased from Rp120.30 billion at the end of 2012 to Rp98.97 billion in 2013.

Other Liabilities

Other liabilities consist of derivatives payable, acceptances payable, marketable securities issued, taxes payable, estimated losses on commitments and contingencies, interest payable, estimated working fees, and other liabilities. As of the end of 2013, the amount of other liabilities increased 45.17% from Rp15.59 trillion in 2012 to Rp22.64 trillion.

The increase was due to the issuance of securities by BRI amounted to USD500,000,000 (value as of 31 December 2013 amounted to Rp6.02 trillion) on 28 March 2013, which will mature on 28 March 2018 with fixed interest rate of 2.95% per annum.

BRI successfully maintained low-cost funds composition of around **60%** of the total Third Party Funds.

Financial Review

Equity

(In Rp Million)

Type of Equity	2011	2012	2013	Growth	
				2011-2012	2012-2013
Paid-up Capital	6.167.291	6.167.291	6.167.291	0,00%	0,00%
Additional paid-in capital - net	2.773.858	2.773.858	2.773.858	0,00%	0,00%
Differences arising from the translation of foreign currency financial statements	49.153	44.912	82.083	-8,63%	82,76%
Stock options	-	-	-	-	-
Unrealized gain (loss) on available for sale securities and Government Recapitalization Bonds - net	765.004	740.459	(727.644)	-3,21%	-198,27%
Total retained earnings	40.019.254	55.080.238	70.868.083	37,63%	28,66%
Total equity attributable to equity holders of parent entity	49.774.560	64.806.758	79.163.671	30,20%	22,15%
Non-controlling interest	45.769	75.021	163.751	63,91%	118,27%
Total equity	49.820.329	64.881.779	79.327.422	30,23%	22,26%

Equity grew 22.26%, higher than 2012 position of Rp64.88 trillion. This was mainly due to the significant increase in retained earnings by 28.66% from Rp55.08 trillion in 2012 to Rp70.87 trillion in 2013. The growth of retained earnings was driven by increase of net income from the current period by 14.27% to Rp21.35 trillion.

Capital

To meet the capital requirement in order to support assets' growth, both of earning assets (e.g. loans, securities) and non-earning assets (e.g. fixed assets, other assets), the Bank relies on two primary components that are equity and borrowing.

BRI has applied Basel II in calculating Risk Weighted Assets (RWA) for credit risk using standardized approach. The result of calculation showed that BRI recorded RWA for credit, market, and operational risks of Rp408.86 trillion or 25.67% above the previous year. To support BRI's activities as one of the largest creditors in MSME segment, BRI consistently ensures optimum capital structure to capture growth opportunities in the market, by maintaining a minimum level of capital.

To meet the minimum capital requirement of Tier I capital and total CAR, BRI establishes capital buffer

level to ensure all identified risks have been calculated and that BRI would be resilient on the face of business pressure, whether due to competition or changes in business environment. To meet its business needs, BRI utilizes various funding sources, such as customer deposit, conventional market, and equities.

At the end of 2013, 87.33% of BRI's assets were liability-backed and 12.67% were equity-backed assets. In 2013, BRI's assets grew 13.58% and total liabilities, albeit slightly lower, also grew 12.42%. However, total equities that rose by 22.26% offset the low growth of liabilities. Equity growth was mainly due to growth of retained earning by 28.66%. Considering the importance of capital structure in sustaining business expansion in the coming years, BRI is determined to manage robust capital structure that would enable optimum business growth.

Capital Structure Policy

In calculating Capital Adequacy Ratio/CAR BRI follows latest Bank Indonesia Regulation No. 14/18/PBI/2012 dated 28 November 2012, thus BRI implemented a policy to maintain capital structure that would be able to accommodate all key risks in the bank's operations, namely market, credit, and operational risks.

BRI's capital management policy was also aimed to keep strong capital structure to sustain future business, maintain the trust of capital market's investors, customers, and the overall market. Therefore, in managing its capital, BRI also considers factors such as optimum return to shareholders, maintain the balance between profit and gearing ratio and manage the benefits as well as security enabled by strong capital position.

BRI's capital adequacy is calculated using CAR, which reflects the capital adequacy to accommodate possible loss. Higher CAR indicates stronger capability of the Bank to absorb risks arising from credit/earning assets while also contributing significantly to profitability. BRI's CAR in 2013 stood at 16.99% from 16.95% in 2012. The increase of CAR was among others due to the capital growth from the Bank's substantial profit.

Financial Review

(In Rp Million)

Capital Adequacy Ratio Details	Bank Only		
	2011	2012	2013
Core Capital	38,215	51,593	65,964
Supplemental Capital	3,601	3,541	3,508
Investment	-	-	-
Total Capital	41,816	55,134	69,472
Total RWA for credit and market risks	226,605	261,145	333,457
Total RWA for credit and operational risks	277,303	323,698	406,563
Total RWA for credit, market, and operational risks	279,603	325,352	408,858
Capital Adequacy Ratio for credit and market risks	18.45%	21.11%	20.83%
Capital Adequacy Ratio for credit and operational risks	15.08%	17.03%	17.09%
Capital Adequacy Ratio for credit, market, and operational risks	14.96%	16.95%	16.99%

Pursuant to BRI regulation, the Bank's capital consists of:

- Core Capital**
The Bank's capital that consists of: paid-up capital, disclosed reserves that presented as: donated capital, additional paid-up capital, retained earnings (including retained earnings for specific purposes), impairment on financial instrument available for sale, and differences with financial statements of overseas branch office. As presented by the above table, BRI's Core Capital in 2013 stood at Rp65.96 trillion, representing a 27.85% growth from Rp51.59 trillion in the earlier year, due to additional capital from retained earnings.
- Supplemental Capital (maximum 100% of core capital)**
Supplemental Capital consists of: allowance for fixed assets revaluation, general provision for impairment losses on earning assets, subordinated loans, and gains from financial instruments classified as available for sale. The total Supplemental Capital of BRI in 2013 decreased by 0.92% to Rp3.51 trillion.
- Additional Supplemental Capital Allocated to Anticipate Market Risk**
In 2013 and 2012, BRI's core capital and supplemental capital amounted to Rp69.47 trillion and Rp55.13 trillion. BRI did not have additional supplemental capital allocated to anticipate market risk.

BRI's Supplemental Capital – Tier 2 Capital amounted to Rp3.51 trillion in December 2013, or 5.32% of core capital at Rp65.96 trillion. In accordance with Bank Indonesia Regulation No. 14/18/PBI/2012 dated 28 November 2012, the maximum level of supplemental capital is 100% of core capital. With supplemental capital stood at 5.32%, BRI therefore has ample room to strengthen its capital structure, such as by issuing subordinated bonds.

Cash Flows

(In Rp Million)

Cash Flows	2011	2012	2013
Net Cash from (used for) Operating Activities	15,668	(1,996)	4,399
Net Cash from (used for) Investing Activities	(10,670)	(5,714)	(12,377)
Net Cash from (used for) Financing Activities	466	(5,951)	(2,579)

Cash Flows from Operating Activities

In 2013, the total net cash flow from operating activities amounted to Rp4.40 trillion. Contributing to cash inflows were interest income, investment return, fees and commission, and sharia income, amounted to Rp59.35 trillion; recovery of Rp1.96 trillion; other operating income of Rp6.84 trillion, and increase of savings and time deposit amounted to Rp27.40 trillion and Rp24.32 trillion, respectively.

Cash inflows were offset by cash outflows, mainly utilized for interest expense, sharia expense, and other financing totalling to Rp14.88 trillion; other operating expenses of Rp25.23 trillion; and loans amounted to Rp87.88 trillion.

Cash Flows from Investing Activities

Net cash flows from investing activities in 2013 amounted to Rp12.38 trillion. This was mainly contributed by the increase of securities and government recapitalization bonds available for sale and held to maturity that amounted to Rp5.65 trillion.

Financial Review

Cash Flows from Financing Activities

In 2013, cash flows from financing activities stood at Rp2.58 trillion; mainly used to pay for borrowings of Rp1.80 trillion; and dividend payout and partnership and community development program (PKBL) amounted to Rp5.56 trillion. Cash outflows were offset by cash inflows from gains of issued securities of Rp4,80 trillion.

Solvency and Asset Quality

The Bank's ability to meet its obligations both long term and short term is reflected by its Solvency and Asset Quality ratio, which consists of Capital Adequacy Ratio, Asset Quality Ratio, and Liquidity Ratio.

- **Capital Adequacy Ratio**
As stated earlier, BRI's capital adequacy ratio stood at 16.99%, higher than 16.95% in 2012. This reflected BRI's ability to generate higher profit, driving core capital to grow by 27.85% and increased CAR in December 2013.
- **Non Performing Loans and Asset Quality Management**
In 2013, NPL improved to 1.63% from 1.83% in 2012, demonstrating positive outcome of the management's efforts to manage and maintain asset quality.
- **Liquidity**
 - **Loan to Deposit Ratio (LDR)**
Throughout 2013, BRI's LDR was stable and kept within BRI's internal target of 80%-90%. As of the end of 2013, LDR stood at 88.54%, grew from 79.85% in 2012. Increase of LDR was due to BRI's loan expansion and tighten banking liquidity condition during 2013.

Financial Review

- Profitability
 - Net Interest Margin (NIM)
BRI was able to record net interest margin of 8.55%. With this NIM level, BRI is Indonesia's leading bank with the highest profitability.
 - Profitability
In 2013, BRI achieved 5.15% Return on Assets. While for Return on Equity, which reflects returns to shareholders was maintained at 34.11%, one of the highest in the banking industry.
- Efficiency Ratio
 - Cost Efficiency Ratio (CER)
CER stood at 42.13% in 2013, which decreased from 43.11% in the earlier year. This showed BRI's successful strategies on operational efficiency and effectiveness. Loans and operational expansion was accompanied by IT roles and HR competence enhancements. Therefore, with increasing interest income due to growing loans, costs grew proportionally and were well controlled.
 - Operating Expense to operating Income Ratio (BOPO)
BOPO ratio at 60.58% in 2013 was relatively stable compared to 2012 and evidenced of BRI's success in maintaining operational activities efficiency and effectiveness.

Capital Expenditure

By the end of 2013, BRI operates more than 9,800 working units (see also "Corporate Profile" and "Marketing") that spread out across Indonesia. To expand its infrastructure, BRI has set out capital expenditure amounted to Rp1.95 trillion (see also "Fixed Assets" discussion).

(In Rp Million)

Capital Expenditure	2011	2012	2013
Land and buildings	209,875	233,031	402,571
Furnitures and inventories	143,403	78,743	116,409
Vehicles	128,224	216,977	694,558

Leasing	-	-	-
Total	649,974	1,445,290	1,947,985

Material Commitment for Capital Expenditure

In 2013, BRI made material commitments, mainly in Rupiah, therefore minimum risk was arising with respect to exchange rate fluctuation. The purposes of the material commitments in 2013 were:

1. Office building construction amounted to Rp43,783.93 million
2. Four and two-wheel vehicles procurement amounted to Rp26,791.34 million
3. IT and e-Banking infrastructure amounted to Rp17,280.00 million

The funding sources of capital expenditure were retained earnings, as well as reserves that have been set aside from net profit of the previous fiscal year.

Other Financial Information

2013 Target Achievements*

Target and Realization			
	2013 Targets	2013 Achievements	Status
Loans growth	Loans growth 22% - 24%	Loan grew by 23.7%	Achieved
Loans quality	NPL at 2%	NPL at 1.55%	Achieved

Loan to Deposit Ratio (LDR)	LDR at 80% - 90%	LDR 88.54%	Achieved
Growth of Operating Expense	Operating expense increase 15%	Operating expense increased 14.4%	Achieved
Net income growth	Net income growth 10% - 15%	Net income grew 14.2%	Achieved

* Bank only

Overall, in 2013, BRI (bank only) delivered satisfying performance, as evident from the following key performance indicators:

1. BRI's loans growth achieved the target of 23.7% and exceeded the banking industry's loan growth, which was recorded at 21.60% in 2013.
2. With strong loans growth, BRI was able to maintain loans quality. NPL maintained from 1.78% in 2012 to 1.55% in 2013.
3. BRI booked 88.54% loan to deposit ratio, which was within the LDR range that BRI targeted between 80%-90%.
4. Operating expenses grew 14.4%, however lower than the projected 15%, which showed BRI's ability to control the efficiency of its operational activities.
5. With business expansion and maintained operational efficiency, BRI's net income grew 14.2% in 2013 and amounted to Rp21.16 trillion.

2014 Targets

Considering Indonesian economy condition, BRI's solid infrastructure in terms of network, operations system, manpower, and sizeable customers, BRI has established the following growth strategy and targets for 2014:

1. BRI shall grow its loans, focusing on high yield loans
2. Maintained loans quality
3. Increase low-cost funds composition
4. Expand sources of alternative income, viz. fee-based income
5. Improve operational efficiency

Commitment and Contingency

BRI's commitments and contingencies were relating to funding, goods procurement contract, loans, and other legal matters.

In 2013, net commitment increased by 12.01% compared to 2012 due to Letter of Credit commitment, foreign exchange transactions, and loans. Meanwhile, net contingencies grew by 31.88% from 2012 position. This was due to increasing volume of issued guarantee, in standby L/C and bank guarantee. Detailed explanation on commitment and contingencies is presented under Note 42 of the Consolidated Audited Financial Statements.

(In Rp Million)

* Consolidated figures		

In accordance with Bank Indonesia Letter (BI) No. 13/658/DPNP/DPnP dated 23 December 2011, BRI is no longer required to set allowance for impairment losses of administrative account transactions (commitments and contingencies).

Derivative and Hedging Facilities

BRI performs hedging transaction as part of its risk management to safeguard foreign currency denominated asset portfolio. In addition, BRI did not use or issue derivative instruments for trading purposes.

Impact of Interest Rate Changes on Bank's Performance

Earning assets and interest-bearing liabilities are exposed to interest rate risk. To address this, the Board of Directors and the Management are responsible to establish, manage, and control interest rate by taking into account the Bank's risk appetite and financial performance targets. To that purpose, The Board of Directors and the management carry out sensitivity analysis of the effect of potential interest rate changes to the Bank's performance (see also Note 38 of the Consolidated Audited Financial Statements).

Throughout 2013, Bank Indonesia raised BI rate by 175 bps from 5.75% to 7.50% in response to inflation and current accounts deficit. Increase of BI rate prompted BRI to raise interest rate on savings and loans, which impacted interest income in 2013. With robust control on interest rate and optimization carried out on assets and liabilities composition, BRI was able to grow net interest income by 20.9% in 2013 compared to 2012.

Other Financial Information

Accelerating Fee Based Income Growth

In addition to improving loan quality to increase interest income, BRI also developed other income sources. One of the sources that have been continuously improving was fee-based income derived from BRI's various services, such as trade finance, remittance, administration services, and others.

In line with conventional and e-channel network expansion, BRI has added non-interest income sources by optimizing IT-based services, offering new product features to increase e-channel transaction that is more efficient, reliable, and accessible at any time and at any location. The consistent efforts have indicated positive results, as evident from growing fee-based income in line with e-channel network expansion.

Fee-based income composition to total income (bank only) continued to grow within the last five years. By 2013, fee-based income accounted for 7.2% of the total income and amounted to Rp4.9 trillion, from 6.9% in 2012 at Rp3.9 trillion.

Fee-based income from administration services in 2013 was predominant; it occupied 59.6% of the total fee-based income, or Rp2.89 trillion, due to BRI's large customer base. Further, fee-based income derived from e-banking network development recorded significant growth amounted to Rp673.60 billion in 2013, or soared by 78.5% from Rp377.3 billion in 2012. It presented an increase contribution of fee-based income that reached 13.9% of the total fee-based income.

Other Financial Information

Fee Based Income-composition*

(In Rp Billion and %)

Fee-Based Income-yoy growth*

(In %)

* bank only

Internal data indicated that e-channel network development accompanied by e-banking features were key drivers in the growth of fee-based income from e-banking transactions, supported by modern Information Technology development. Number of users, transaction frequency, and amount of e-banking transactions from ATM, SMS Banking, and Internet Banking conducted by BRI's customers recorded sharp growth in the last four years.

The transaction activities have generated the fee-based income growth from e-banking channel. With large customer base of 48 million accounts as of December 2013, the management was confident that fee-based income from e-banking transactions would continue to increase in the coming years.

Other Material Information

Material Information and Facts on Investment, Expansion, Divestment, Acquisition, or Debt/Capital Restructuring

There were no material information and facts on investment, expansion, divestment, acquisition, or debt/capital restructuring.

Recent Changes on Financial Accounting Standard and its Impact on Financial Statements

BRI adopted revised accounting standard on 1 January 2013, which was considered relevant to the consolidated financial statements of BRI and its Subsidiaries, but did not have a significant impact, SFAS No. 60 "Financial Instruments: Disclosure."

SFAS provides qualitative disclosure that would enable users of financial statements to understand the overall context of nature and extent of risks arising from financial instruments. By providing qualitative and quantitative disclosure, users of financial statements may have better evaluation on the risk exposure of an entity.

Accounting Policy and Financial Information on Extraordinary Events

This policy is used as a guideline for BRI to present disclosure on extraordinary events in its audited financial statements, such as natural disaster that affect customers with substantial loans.

In this financial reporting year, there was no accounting policy and financial information on extraordinary events.

Changes in Regulations and the Impacts on the Bank's Performance

Changes of regulations relevant to BRI's business activities, among others :

- **Law No.21 of 2011 on Indonesia Financial Services Authority (OJK Law)**

The enactment of OJK Law compelled BRI to carry out adjustments on its compliance function. As stipulated by Article 55 paragraph (2) juncto Article 7, as of 31 December 2013, the functions, duties, and authorities to control and supervise banking financial services activities (microprudential) are transferred from Bank Indonesia to the Indonesia Financial Services Authority (OJK).

With the transfer, BRI now coordinates with 2 (two) regulatory bodies, Bank Indonesia (BI) and OJK. BRI shall also comply with BI regulations, provided the regulations are not amended, replaced, or revoked by BI or OJK,

- **Circular Letter (SE) BI No.15/1/DPNP 15 Jan 2013 on Prime Lending Rate (SBDK) Transparency**

Amendment of SE BI No.13/5/DPNP dated 8 February 2011 on Prime Lending Rate Transparency.

BRI supports the implementation of this regulation by periodically publishes its SBDK. BRI also announces SBDK to all working units and to the public through BRI website.

- **Bank Indonesia Regulation (PBI) No.15/17/PBI/2013 dated 24 December 2013 on Hedge Swap Transaction with Bank Indonesia**

Amendment of PBI PBI No. 7/36/PBI/2005. With this regulation, Hedge Swap Transaction with Bank Indonesia may be carried out not only based on underlying transactions of the Bank, but also underlying transactions of the Customer:

1. Foreign investment in the form of loan agreement and/or securities issuance;
2. Direct Investment;
3. Foreign exchange proceeds from Export;
4. Investments on public facility infrastructure and production;
5. Investments on commercial papers issued by Indonesian Government; and
6. Investments on other economic activities.

Other Material Information

Limit of Hedge Swap Transaction with Bank Indonesia, which was initially set at an equivalent of USD500,0000 (five hundred thousand US Dollar) at minimum and the same amount of Underlying Transaction at maximum, has been amended to an equivalent of USD10,000,000,000 (ten million US Dollar) at minimum and at maximum the same amount of underlying transactions, in multiplies of USD1,000,000 (one million US Dollar)

- **PBI No.15/15/PBI/2013 on Statutory Reserves (GWM) in Rupiah and Foreign Currency for Commercial Banks**

The main points in the PBI are:

1. Fulfilment of GWM in Rupiah, as follows:
 - a. Primary GWM in Rupiah is 8% of Third Party Funds (TPF) in Rupiah
 - b. Secondary GWM in Rupiah is 4% of TPF in Rupiah
 - c. LDR of GWM in Rupiah has the following parameters:
 - i. Minimum LDR, targeted at 78%
 - ii. Maximum LDR, targeted at 92%, or lower than the previous stipulation of 100%
 - iii. Capital Adequacy Ratio (CAR) incentive is 14%

- iv. Lower parameter disincentive is 0.1
 - v. Upper parameter disincentive is 0.2
- d. GWM in Foreign Currency is 8% of TPF in foreign currency
2. CAR data used as reference is the Quarterly CAR calculated by OJK, with respect to transfer of oversight function from BI to OJK. If the result of CAR calculation received by BI from OJK differs from CAR calculation by the Bank, the prevailing calculation is OJK's.
 3. GWM tolerance: BI may provide tolerance in GWM fulfilment:
 - a. Primary GWM in Rupiah for banks who are undergoing merger or consolidation, with approval from OJK
 - b. LDR GWM for banks undergoing business limitation in terms of lending and funding imposed by OJK upon request of OJK
 4. Monitoring on the banks' compliance with the regulation:
 - a. Direct monitoring by BI;
 - b. Examination by BI and OJK; or BI
 - c. BI uses data of OJK's examination results

The implementation of this regulation does not have any financial impact on BRI.

- **PBI No.15/12/PBI/2013 on Capital Adequacy Ratio for Commercial Banks**

1. Required CAR remained as stipulated earlier (8% of RWA) for banks with rank 1 (one) risk profile;
2. Components and capital instruments requirements are stipulated as follows:
 - a. Core Capital (Tier 1) is minimum 6% of Risk Weighted Assets (RWA)
 - i. Primary core capital (common equity tier 1) is at minimum 4.5% of RWA
 - ii. Additional core capital (additional tier 1)
 - b. Supplemental Capital (tier 2)
3. Effective as of 1 January 2016, Banks are required to set aside additional capital as buffer, in the form of:
 - a. Capital Conservation Buffer, buffer against losses under crisis period, at 2.5% of RWA with gradual fulfilment.
 - b. Countercyclical Buffer, buffer against excessive lending that potentially disrupts financial system stability, at 0-2.5% of RWA and established by BI.

Other Material Information

- c. Capital Surcharge for Domestic Systemically Important Bank, at 1-2.5% of RWA for banks that have systemic impact according to OJK regulation.
With respect to the enactment of this regulation, BRI has prepared 16.99% total CAR, with Tier 1 composition of 16.13%.
- **PBI No.15/11/PBI/2013 dated 22 November 2013 on Prudential Principle on Investment**
 1. General provisions:
 - a. Banks may only invest in companies of the financial sector.
 - b. All investment must be approved by BI, including additional investment to the same investee, unless the fund is sourced from dividends.
 - c. Investment may be direct or through the capital market, with the sole purpose of long-term investments (not stock trading).
 - d. Limit of investment portfolio is in accordance with Banks' categorization based on BUKU.
 - e. Banks are not allowed to carry out investment in the amount that exceeds the required limit of participation, as stipulated in BI regulations on Legal Lending Limit.
 2. Requirements of investment, among others:
 - a. Investment Plan must be included in Bank's Business Plan (RBB)
 - b. The bank has satisfied CAR requirement according to BI risk profile;
 - c. The bank has sound level with composite rank of 1 (one) or 2 (two) in 3 (three) consecutive years or 4 (four) years for investment in new corporation and/or foreign entities;
 - d. Investment may not disrupt the bank's business and does not significantly increase bank's risk profile
 3. Banks must perform divestment if:
 - a. Investment would impair bank's capital and/or significantly increases bank's risk profile; or
 - b. Upon recommendation of subsidiary authority and/or order from BI.
 4. Banks may also perform divestment on its own initiative by meeting certain requirements.
 5. Banks must realize investment plan or divestment plan on own initiative by 6 (months) from BI approval.
- **Government Regulation No. 77 of 2013 on Income Tax Reduction for Public Listed Companies dated 21 November 2013**
 1. Domestic taxpayers that are Public Listed Companies are eligible to apply for income tax reduction facility of 5% (five percent) reduction from the generally applicable corporate tax, provided that the companies satisfy the following requirements:
 - a. At least 40% (forty percent) of total paid-up capital is listed for trading in Indonesia Stock Exchange and put in collective custody under deposit and settlement institution; shares are owned by at least 300 parties with no more than 5% ownership by each party

Other Material Information

- b. The requirements above must be met at least 183 days within 1 fiscal year.
2. The Government Regulation came into force on 21 November 2013.
3. Interest from time deposits and/or demand deposits of Partnership Program after operating expense and/or;
4. Fund transfer from other SOEs' Partnership Program (if any).

- **SOE Minister Regulation No. PER-06/MBU/2013 on SOE Manpower dated 22 November 2013.**

The Ministerial Regulation was enforced to manage outsourcing employment; SOEs are mandated to evaluate their systems and hiring pattern of outsourcing employees in order to ensure compliance with prevailing regulations, decent welfare of employees as well as companies' long term needs and ability. Board of Directors are required to establish Oversight Team on outsourcing in SOEs, involving respective Trade Unions.

BRI has complied with the regulation and has established a dedicated unit to manage outsourced staff.

- **SOEs Minister Regulation No. PER-08/MBU/2013 on SOEs Partnership with Small Enterprises and Environmental Development Programs dated 10 September 2013**

Sources of funding for Partnership and Community Development Programs are:

1. Calculated as expense at maximum 2% of previous year net income;
2. Balance of Partnership Program from net income allocation in 2012;

Material Information and Facts Subsequent to Date of Accountant's Report

There was no material information subsequent to date of accountant's report.

Transactions with Conflict of Interests

There was no transactions with conflict of interests during reporting year as defined by BAPEPAM-LK regulation No.IX.E.1 "Transaction with affiliated parties and Conflict of Interests on certain transaction".

Related Transactions

BRI conducted transactions with parties that have ownership and/or management relation. All transactions with related parties have been carried out in compliance with policies and requirements agreed by both parties. Therefore, BRI's transactions with related parties have been conducted appropriately.

Disclosure of transactions with related parties follow SFAS No. 7 (revised 2010) on "Disclosure of Related Parties" in order to provide appropriate financial statements. Material transactions with related parties during 2013 are presented under Note 43 of Audited Consolidated Financial Statements.

Dividend Policy

Dividend policy is established annually through AGMS. In 2013, BRI distributed dividend payout at 30% of 2012 net income of Rp5.56 trillion, or equal to Rp225.2320 per share. Detailed information on dividend payout is available in "Information for Investors" chapter.

Business Performance 2013

BRISyariah delivered satisfying business performance. Bank's assets grew by 23.51% from Rp14.09 trillion in 2012 to Rp17.40 trillion. Third party funds (TPF) rose by 15.45% from Rp11.95 trillion in 2012 to Rp13.79 trillion, while financing increased by 24.24% from Rp11.40 trillion in 2012 to Rp14.17 trillion in 2013.

BRISyariah's income after tax amounted to Rp129.56 billion for financial year 2013, or grew by 27.16% from income after tax in 2012 that amounted to Rp101.89 billion.

Subsidiaries

The outstanding performance reflected successful initiatives in the distribution development, launch of new products that address market needs, and BRISyariah's human resources that are growing in terms of number as well as competence.

Not only expanding its office network to 257 service units by the end of 2013, BRISyariah also developed alternative channels by opening Sharia Service Unit in BRI's offices, now totalling to 573 Units, and opening BRIS corner in Religious Affairs Offices (KUA) as well as Islamic boarding schools. BRISyariah also optimized the support of e-channel network comprising 418 ATMs, 708 EDCs, and e-banking services with various features.

Human resource of BRISyariah has grown and at the end of 2013 achieved a total of 6,314 employees, or 35.52% higher than 4,659 employees in 2012. At the head office, recruitment of new employees was focused on operational activities and formulation of policies, operating procedures, and information

technology. Meanwhile, at the branch office level, new employees were focused to constitute a strong sales organization.

Products and Services Development

As of 30 December 2013, PT Bank BRISyariah officially obtained the status as foreign exchange bank. Further, by the Decree of Indonesian Minister of Religious Affairs Regulation No. 30 of 2013 dated 12 April 2013 concerning the establishment of BPS BPIH (Bank receiving hajj instalment payment), BRISyariah was appointed as one of BPS BPIH entities for 2013-2017. With this responsibility, BRISyariah is expected to optimize its synergy with BRI as a transit bank in managing hajj funds, and further its reach to the public.

Risk Management

BRISyariah carried out prudent risk management. Risk profile has identified risks inherent to bank's activities, which comprise of 8 risks: credit, market, liquidity, operational,

compliance, strategic, reputational, and legal risks. The risks are analysed and mitigated. Through robust mitigation efforts and effective risk management, from eight risks, only two that are categorized as moderate, i.e. liquidity and strategic risks. Meanwhile, the other risks are categorized as low to moderate. Overall, the composite risk profile of BRISyariah is low to moderate.

BRISyariah will consistently conduct risk control and realize mitigation steps, aiming to achieve low risk profile for all inherent risks in the subsequent period.

PT Bank Rakyat Indonesia Agroniaga Tbk

Company in Brief

PT Bank Agroniaga Tbk was incorporated on 27 September 1989 in Jakarta by leading figures in agribusiness representing the Government SOEs, and national company. The majority shareholder at the time of incorporation was Dana Pensiun Perkebunan. In 2003, PT Bank Agroniaga listed its shares in Jakarta Stock Exchange and Surabaya Stock Exchange, with ticker code AGRO. In 2006, with the permit from Bank Indonesia, PT Bank Agroniaga Tbk successfully obtained the status as Foreign Exchange Bank. With the permit, the Bank may also provide banking services as a foreign exchange bank, after previously focusing on agribusiness sectors such as plantation, fishery, husbandry, and processing.

On 3 March 2011, according to the resolutions of BRI EGMS 2010 that mandated the acquisition, PT Bank Agroniaga Tbk became the subsidiary of PT Bank BRI (Persero) Tbk following the signing of Acquisition Deed by BRI and Dana Pensiun Perkebunan over 88.65% of the total fully issued and paid-in capital of Bank Agro. The Deed of Acquisition No. 14 was made before the Notary Fathiah Helmi, S.H.

Further, to meet Bapepam-LK Regulation No.IX.H.1, attachment to Decision of Bapepam-LK Chairman Nokep-259/BL/2008 dated 30 June 2008, BRI as the new controlling shareholder of Bank Agro is required to transfer Bank Agro's shares to the public. The minimum shares offered to the public must be equal to shares acquired during the implementation

of Mandatory Bidding Proposal, i.e. 3.15% of total Bank Agro's shares or 113,326,500 shares and owned by at least 300 (three hundred) parties for maximum 2 (two) years.

With respect to the above, BRI has offered 256,875,502 shares (7.10%) of Bank Agro from Bank Agro's total shares. As many as 256,375,502 shares were purchased by Dapenbun and as of 31 March 2012 Bank Agro's shares were owned by 2,286 parties. Therefore, as of 31 March 2012 Bank Agro Shares Transfer by BRI was completed. In total, BRI's share ownership on Bank Agro until 2012 amounted to 2,886,690,021 shares or 79.785% of Bank Agro's total shares.

On 10 October 2012, Bank Agro changed its name into PT Bank Rakyat Indonesia Agroniaga Tbk (BRIAGRO). In July 2013, BRI added Rp390 billion of capital to BRIAGRO.

BRIAGRO Profile

PT Bank Rakyat Indonesia Agroniaga Tbk. (BRIAGRO) as one of the national foreign exchange banks has the vision to focus its banking services in agribusiness financing such as plantation, fishery, animal husbandry, and product processing of the respective sector. BRIAGRO provides various banking products and services specifically to business entities in agribusiness market segments, such as lending to PT Perkebunan Nusantara (I-XIV) and its supporting group (partners and contractors), and financing for smallholders through KKPA and KKP based on recommendation of PT Perkebunan Nusantara.

In 2013, BRIAGRO opened four new branch offices, 1 sub-branch office, 1 cash office, and 2 ATMs. In total, BRIAGRO operates 13 branch offices, 10 sub-branch offices located throughout Jabodetabek, Surabaya, Medan, Pekanbaru, Bandar Lampung, Jambi, Bandung, Semarang, Rantau Prapat, Makasar, and Balikpapan as well as 3 cash offices and 34 ATMs. By the end of 2013, BRIAGRO is supported by 438 manpower with educational background relevant to support the Bank's main activities.

BRIAGRO Performance in 2013

BRIAGRO total assets as of 31 December 2013 amounted to Rp5.12 trillion or grew 26.80% compared to previous year. Lending increased 46.13%, or amounted to Rp3.70 trillion. Growth of lending was accompanied by third party funds that rose by 34.90% to Rp4.12 trillion. BRIAGRO was able to maintain its LDR at 89.77%. Net income after tax grew by 58.78% to Rp52.44 billion. With the achievement, BRIAGRO's ROA stood at 1.65%.

Products and Services Development

With rigorous competition in the banking sector in terms of collecting Third Party Funds (TPF), BRIAGRO implements initiatives to develop and create marketing strategy for BRIAGRO's savings and time deposits products that are appropriate for customers.

BRI Remittance Co.Ltd

BRI Remittance Co. Ltd. Profile

BRI Remittance Co. Ltd. (BRC) Hong Kong was established on 7 April 2005 in Hong Kong with paid-in capital amounted to HKD1,600,000.00. On 16 December 2011, BRI and BRC signed Instrument of Transfer and Bought and Sold Notes. As of the date of validation by Inland Revenue Department Hong Kong, BRI became the Controlling Shareholder of BRC, with 100% share ownership.

BRC's core business is Remittance, or money transfer from originator to beneficiary. To support Remittance Business in Hong Kong, today BRI implements BRIFAST system in BRC. The system is integrated online to more than 7,000 BRI's operational units. The integration of BRC with BRI's operational units accelerates money transfer from and to Hong Kong, and becomes a competitive advantage of BRI.

In 2013, BRI assets grew to HKD2.71 million, while operating income and net income amounted to HKD2.26 million and HKD 371,660, respectively. Thus, return on equity stood at 15.22%. In 2013, remittance transactions increased by 48% from Rp82.76 billion to Rp122.32 billion.

Corporate Governance Implementation

The Objectives of Corporate Governance Implementation

Good Corporate Governance (GCG) for BRI extends beyond complying with laws and regulations; GCG practices represent the Bank's continuous endeavours to innovate and enhance the implementation of GCG principles. It is also a manifestation of BRI's active participation as a proponent of healthy banking system in Indonesia based on GCG principles implementation. Since 2000, BRI has been strengthening its commitment to apply GCG principles in all aspects of business and banking operations.

Consistent implementation of GCG principles can be the tool to achieve numerous goals, including:

1. Maintaining long-term business continuity, hence the company's objectives can be achieved
2. Maximizing company's value
3. Increasing the Bank's competitiveness in national and international platform
4. Reinforcing confidence and trust of shareholders and stakeholders
5. Ensuring the Bank's sustainable soundness and advancements
6. Bolstering an efficient and effective resources management
7. Optimizing risk-return elements to be consistent with business strategy
8. Promoting decision-making processes based on GCG principles across the Bank's organization
9. Driving the culture of good corporate governance and good corporate citizen implementation.

BRI believes that through consistent and continuous implementation of GCG principles, the company's value and competitiveness in national and international platform shall improve. This will assure long-term business sustainability to reach the company's goals and provide optimum yield to stakeholders.

Basis of GCG Implementation

“Improvement of good corporate governance practices serves as the cornerstone for the Bank’s performance growth and long-term business developments as well as enabling optimum yield for stakeholders.”

”

In an effort to improve and achieve the best corporate governance implementation, BRI refers to the following laws and regulations:

1. Republic of Indonesia Law No 7 of 1992 on Banking, as amended by Law No. 10 of 1998
2. Republic of Indonesia Law No. 40 of 2007 on Limited Liability Companies;
3. Republic of Indonesia Law No. 19 of 2003 on State-Owned Enterprises;
4. Republic of Indonesia Government Regulation No. 21 of 1992 dated 29 April 1992 concerning Change of Legal Status of Bank Rakyat Indonesia to Limited Liability Company (Persero);
5. Regulation of State-Owned Enterprises Minister No. PER-01/MBU/2011 dated 1 August 2011 on Implementation of Good Corporate Governance in State-Owned Enterprises (BUMN), as amended by Regulation of State-Owned Enterprises Minister No. PER-09/MBU/2012 dated 6 July 2012;
6. Bank Indonesia Regulation No. 8/4/PB1/2006 dated 30 January 2006 on Implementation of Good Corporate Governance for Commercial Banks, as amended by Bank Indonesia Regulation No. 8/14/PB1/2006 dated 5 October 2006;
7. Bank Indonesia Circular Letter No 15/15/DPNP dated 29 April 2013 on Implementation of Good Corporate Governance for Commercial Banks

Furthermore, BRI also observes latest developments and applicable best practices, such as:

1. Principles of Corporate Governance from Organization for Economic Co-Operation and Development (OECD)
2. ASEAN Corporate Governance Scorecard
3. Indonesia GCG General Guidelines from National Governance Policy Committee (KNKG)
4. Indonesian Banking GCG Guidelines from National Governance Policy Committee (KNKG)

Internally, BRI has formulated and enforced operational policies applied across all operating units as guidelines for daily operational activities.

Basis of GCG Implementation

Foundation of GCG Best Practice Commitment

The Bank's commitment to GCG implementation is reflected in BRI's vision and mission. BRI's vision to become a leading Commercial Bank that always prioritizes customer satisfaction is detailed in BRI's mission to provide excellent services to customers through a vast network and supported by professional human capital, reliable information technology, risk management, and guided by excellent GCG practices.

It is the commitment of BRI that the governance implementation needs to be initiated top-down and exemplified by the Board of Directors and Board of Commissioners. The implementation of GCG principles across BRI's business activities need to be incorporated in vision-mission, core values, and policy strategy.

In addition, to demonstrate the commitment of the top management and all employees in improving the quality of GCG best practices implementation, within the last several years BRI has carried out a series of activities, including;

- Signing of Joint Decision Letter of the Board of Commissioners to comply with all items in GCG Guidelines and Corporate Code of Conduct.
- Corporate Culture Revitalization Kick-Off
- Signing of Corporate Culture implementation commitment charter by the Board of Directors
- Dissemination of BRI Corporate Governance implementation to BRI's stakeholders

Note :
BRI Board of Directors Decision Letter
No. 81/DIR/REN/02/2013 dated 13 February 2013.

BRI GCG Implementation Roadmap

Governance Mechanism

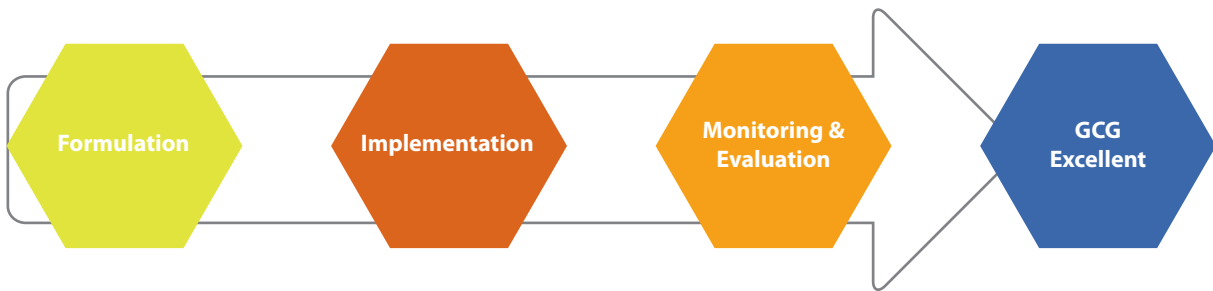

BRI Corporate Governance Policy

BRI Corporate Governance Policy is established by virtue of Joint Decision Letter of the Board of Commissioners and Board of Directors concerning GCG Policy. Since its initial conception in 2001, the policy has been refined 3 (three) times, the recent policy is in 2010, and is the general guidelines of GCG implementation across BRI's organization. In 2013, GCG policy was updated and enhanced through Joint Decision Letter of the Board of Commissioners and Board of Directors No 05-KOM/BRI/12/2013 - Nokep S.64-DIR/DKP/12/2013 dated 16

December 2013. BRI GCG policy covers 4 (four) governance aspects consisting of commitment, structure, process, and governance outcome.

To improve the implementation quality, BRI implement its GCG in phases which is formulation, implementation, and continuous monitoring and evaluation to move toward the end goal of GCG excellence.

These phases form the fundamental components of GCG implementation and GCG roadmap, and are consistently applied in all operational aspects of BRI.

Phase 1

1. Establishing Management's commitment to GCG
2. Building comprehensive GCG structure
3. Developing adequate GCG system, policy, and procedure

Phase 2

1. GCG Awareness
2. Corporate culture and code of conduct reinforcement
3. Active role of Top Management
4. Optimizing the role of supporting organs, inter alia:
 - a. Risk management and internal control system
 - b. Compliance unit
 - c. Internal and external audit
5. Developing GCG tools

Phase 3

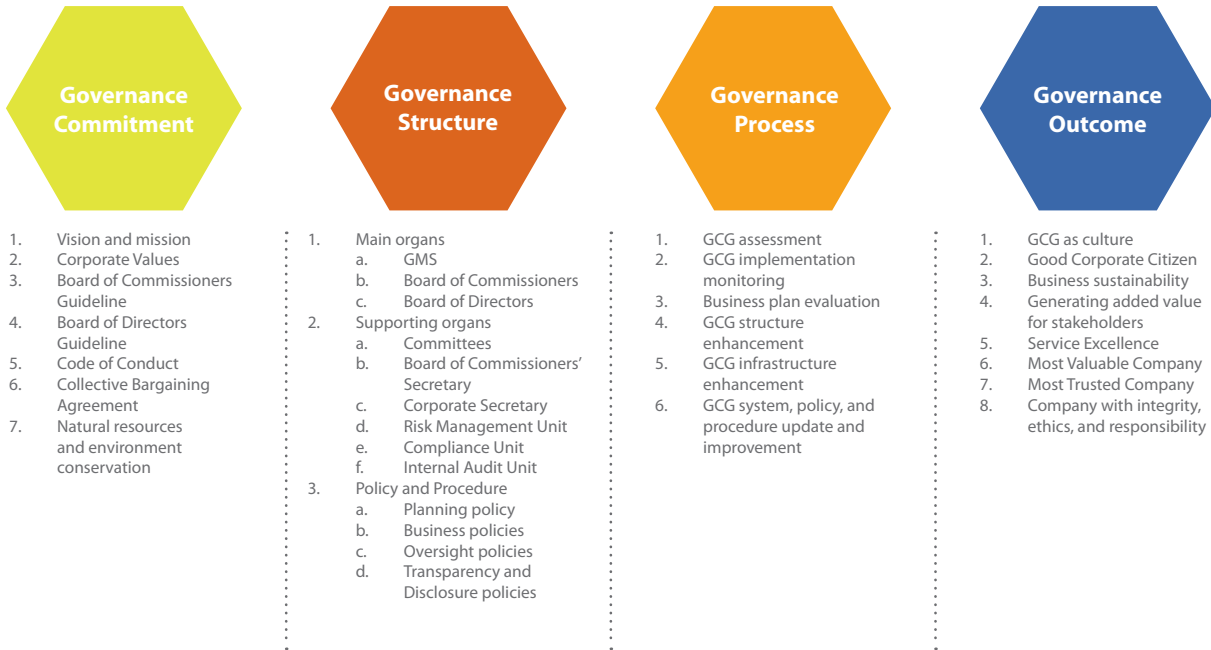

1. GCG assessment program
2. GCG implementation monitoring
3. Corporate performance evaluation
4. Business plan evaluation
5. GCG structure enhancement
6. GCG infrastructure enhancement
7. GCG system, policy, and procedure update and improvement

Last phase

1. GCG as culture
2. Good Corporate Citizen
3. Business sustainability
4. Generating added value for stakeholders
5. Service Excellence
6. Most Valuable Company
7. Most Trusted Company
8. Company with integrity, ethics, and responsibility

BRI GCG Implementation Roadmap

BRI has formed the following 4 (four) Corporate governance components:

BRI has ensured the comprehensiveness of BRI GCG Manual, which consists of GCG Policy, Code of Conduct, Manual for Board of Commissioners, Board of Directors, and Committees; and procedures as well as other supporting policies such as Whistleblowing System, Risk Management, Compliance policies, and others. The guiding documents are consistently evaluated and updated.

BRI GCG Implementation Roadmap

Guidelines, policies, and procedures of Corporate Governance

As part of the Bank's efforts to improve the roadmap for GCG application quality enhancement, BRI evaluates and updates the various internal policies and rules to ensure their compatibility with recent GCG best practices. The following table illustrates BRI's GCG The development of GCG implementation was illustrated in the table below :

2000-2001	2002-2005	2006-2009	2010-2012	2013

Corporate Culture Revitalization Activities 2013

Risk Management Unit Development

- Develop 18 Regional Offices
- Focusing on Risk Management function
 - Operational Risk Management Tools
 - Risk Profile development

Service Quality Performance Monitoring

Regular monitoring of service quality implementation in all units

Coaching and Role Play to improve service quality performance

AML-CTF Monitoring

Annual program; monitoring the implementation of AML-CTF program in all BRI's operational units

BRI Corporate Governance Dissemination

Other Monitoring:

- Network performance evaluation
- Risk Management

Orientation on GCG for New Employees

1. GCG
2. BRI Code of Conduct
3. Corporate Culture
4. AML-CTF program
5. Risk Management
6. Internal Control System
7. Operations
8. Credit

Micro Business Policy Dissemination

1. Micro loan restructuring
2. Micro policies
3. Micro reports
4. Rewards for 'Mantri'

Loan Policy Dissemination

1. Supervisor and loan admin officer briefing
2. Briefing session on loan administration
3. Associate auditor briefing

Other dissemination

1. Compliance Culture
2. IT Security awareness
3. Risk Management
4. Formation ratio standardization
5. Operational unit display standardization
6. BRI products and activities refreshment

Plan to Improve GCG Implementation Going Forward

To continue improving the GCG implementation, BRI has prepared the following programs that commencing in 2014:

1. Enhancement of GCG implementation transparency via website and annual report based on industry best practices
2. Continually enhance and update BRI GCG policy
3. Design and develop management information system to support business and control processes
4. Continually promote and disseminate GCG practices

Good Corporate Governance Implementation

Corporate Governance Management Information System

BRI has developed management information system to improve GCG quality and effectiveness. The system includes:

Monitoring System	Information Media	Knowledge Management	Others
Starweb System (service quality)	Knowledge Management System (Brilian)	Back Office Automation (BOA)	Remedy Requester console system
OPRA System (risk management)	Business Information System (BIS)	Portal e-Diklat (e-training portal)	BRI Unit report (MIR)
Compliance Dashboard	BRI search engine	Center of Training and Education Digital Library	e-Register BRI Public Relations
Guava Application	Marcomm insight	HR Portal	Loan Approval System (LAS)
Partnership and Community Development Program (PKBL) monitoring application	Public Folder BRI	Learning media: E-learning, Video conference, Diklat-tube, blog, and forum	MIS - HR

GCG Implementation Quality Assessment

To garner feedback with respect in improving the GCG implementation quality in the future, BRI periodically conducts GCG implementation assessment. The program enables the Bank to examine the progress of GCG principles implementation, impact on BRI's operations and business activities, and future improvements. The assessment also shows continuous growth of GCG implementation quality in BRI.

BRI self-assessment in 2013 used Bank Indonesia criteria and research program conducted by external party, with details as follows.

1. GCG Self-Assessment

BRI conducts periodic GCG self-assessment in compliance with Bank Indonesia, with the following results:

Bank	Percentage	Individual Composite Score	Consolidated Composite Score
BRI	96,02%	1,27	1,22
BRI Agro	1,22%	2,17	0,03
BRI Syariah	2,76%	1,35	0,04
Total Consolidated Composite Score			1,29

- Consolidated GCG assessment includes results of GCG assessment on subsidiaries considered to have significant impacts, which are:
 - PT BRI Syariah
 - PT BRI Agro Tbk.
- Calculation of significant impact of GCG assessment on Subsidiaries to BRI GCG consolidated assessment based on calculation of subsidiaries' total assets and consolidated total assets.
- Score of BRI GCG Self-Assessment in Semester II 2013 was 1.27 with "Very Good" Category.
- Score of PT Bank BRI Syariah GCG Self-Assessment in Semester II 2013 was 1.35 with "Very Good" Category.
- Score of PT BRI Agro, Tbk. GCG Self-Assessment in Semester II 2013 was 2.17 with "Good" Category.

Therefore, BRI GCG consolidated composite score for Semester II 2013 was 1.29 with "Very Good" category.

Good Corporate Governance Implementation

2. Corporate Governance Perception Index (CGPI)

- a. From July to November 2013, the Bank conducted GCG research and rating assessment program under CGPI, themed "Good Corporate Governance from Knowledge Perspective," with the following phases:

Phase	Description	Score
Self Assessment	Completion of questionnaires regarding GCG implementation in relation to the management's efforts to manage risks to reach the company's targets while implementing an ethical and sustainable business activities	15.59
Document Assessment	Submission of documents relating to GCG implementation to meet assessment requirements, in relation to management's efforts to manage risks to reach the company's targets while implementing an ethical and sustainable business activities	28.47
Paper Assessment	Explanation on the process and GCG implementation programs in relation to management's efforts to manage risks to reach the company's targets while implementing an ethical and sustainable business activities to meet assessment's requirements	11.70
Observations	The final phase of the assessment and a critical phase of CGPI research and rating, where CGPI assessment team visits the company for direct observation and to confirm GCG implementation programs in relation to management's efforts to manage risks to reach the company's targets while implementing an ethical and sustainable business activities	29.80
Total Score		85.56
Assessment Norm	Most Trusted Company	

GCG Assessment Aspect from Risk Perspective:

1. Commitment	5. Independency	9. Strategy
2. Transparency	6. Fairness	10. Ethics
3. Akuntabilitas	7. Competence	11. Knowledge Management
4. Responsibility	8. Leadership	

BRI's CGPI 2012 assessment result categorized BRI as "Indonesian Most Trusted Company."

- b. Based on IICG (Indonesian Institute for Corporate Governance) survey conducted in December 2013, BRI acquired "Most Trusted Company" rating.
- c. Based on investor and analyst survey conducted by SWA Research that involved 250 respondents (investors, analysts, and investment managers), generating a total of 1,690 responses, BRI was rated as "Trusted Company." The assessment was based on the following GCG principles:

Aspect and Weight	Issuer's Code : BBRI
Transparency (0.27)	75.16
Accountability (0.23)	75.83
Responsibility (0.22)	74.85
Independency (0.14)	67.84
Fairness (0.14)	60.43
Total score	72.09
Rating	Trusted Company

Good Corporate Governance Implementation

Plan for GCG Implementation Quality Improvement

Observing the results of periodical GCG implementation assessment in the preceding year, and as part to improve GCG practices, BRI has prepared a number of programs to enhance GCG implementation, commencing in 2014, among others:

1. Enhancement of GCG implementation transparency via website and annual report based on industry best practices
2. Continually enhance and update BRI GCG manuals
3. Design and develop management information system to support business and control processes
4. Continually promote and disseminate GCG practices

GCG Implementation Accolades

Throughout 2013, BRI has carried out numerous efforts to bolster the quality of GCG implementation across all aspects in the Bank. In recognition of the Bank's GCG implementation endeavors, the Bank received a number of GCG implementation awards in 2013, among others:

1 st Position Annual Report Award (ARA) Listed Financial SOE category				
Financial Services Authority (OJK), Bank Indonesia (BI), SOE Ministry, General Directorate of Tax, PT Bursa Efek Indonesia (BEI), National Governance Policy Committee (KNKG), Indonesian Accountants Association (IAI) 17 October 2013				
Company rated as "Most Trusted Company"	Company rated as "Trusted Company"	3 rd Position Best Financial Sector	3 rd Position Good Corporate Governance for Banks with Tier 1 Capital > 30 Trillion category	9 th Position The Best Corporate Governance
Corporate Governance Perception Index (CGPI) – The Indonesian Institute Of Corporate Governance (IICG) 16 December 2013	Investors and Analysts Assessment Survey 16 December 2013	The 5 th The Indonesian Institute for Corporate Directionship (IICD) Conference and Award Corporate Governance 30 October 2013	Economic Review "Indonesian Banking Award 2013" 26 September 2013	Finance Asia 26 June 2013

Corporate Governance Guidelines and Policies

Corporate Governance Charter

Since 2001, BRI has formulated GCG implementation general guidelines for all levels of the organization by virtue of Joint Decision Letter of the Board of Commissioners and Board of Directors, through BRI GCG Policy (GCG Charter). BRI has also updated the Charter 3 (three) times, with the last in 2010.

Good Corporate Governance Commitment

The Bank's commitment to consistently and continually implement GCG is reflected in:

- a. **Vision and Mission**
The Bank has outlined its vision that illustrates future goals and mission statement that details measures to realize the vision.
- b. **Core Value**
The Bank's core values include Corporate Culture translated into Corporate Behaviours that serve as the foundation of thinking, behaviour, and conduct.
- c. **Board of Commissioners and Board of Directors' Manuals**
Board of Commissioners and Board of Directors' manuals provide detailed explanation on structure, duties and responsibilities, task distribution, work ethics, meetings, organizations, and work relationship of the Board of Commissioners and Board of Directors. The manuals are reference for the Boards in implementing their day-to-day duties, to further the Bank's vision and mission.
- d. **Code Of Conduct**
The Bank's Code of Conduct describes business ethics and business conduct expected of the Bank's staff in implementing good management practices.

The Bank's Code of Conduct serves as standards for decent, ethical, and trustworthy behaviours carried out by the Bank's staff in their daily activities, including during interaction with stakeholders.

The Bank's Code of Conduct applies for all employees throughout all levels of the organization. Continuous and sustainable implementation of Code of Conduct in attitude, practice, commitment, and formal rules supporting the Corporate Culture implementation.

- e. **Collective Labour Agreement (CLA)**
Collective Labour Agreement (CLA) sets out working terms and conditions agreed based on joint deliberation and agreement between the Bank and the Bank's workers' unions. Both parties use CLA as guideline in conducting work relationship and as the key source of reference in an event of dispute.

The agreement is an enactment of Labour Law that outlines a harmonious industrial relationship between the Bank and all employees.

- f. **Natural Resources and Environmental Conservation**
BRI is committed to natural resources and environmental conservation as well sustainable economic development in the pursuit of living quality improvements and creating an environment that benefits not only for the Bank, but also local communities, and public at large.

In implementing its social and environmental responsibilities, BRI develops social and environmental responsibilities programs and strategies that are integrated with BRI's business strategy, which takes into account preservation of natural resources and the environment.

BRI's social and environmental responsibilities implementation is periodically published for the stakeholders.

Governance Structure

The Bank's governance structure consists of main and supporting organization organs as well as policies concerning corporate governance:

- a. **Main Organs**, consist of:
 1. **General Meeting of Shareholders (GMS)**
GMS is the highest organ of a company. GMS is also a decision-making forum where strategic deliberations are made in relation to the Bank's business interests, by taking into account articles of association as well as laws and regulations.

GMS consists of:

Corporate Governance Guidelines and Policies

- a). Annual GMS to ratify a number of agenda items, such as company's business plan, appointment and dismissal of Board of Directors and Board of Commissioners' members, external auditor appointment, corporate actions with significant impacts including utilization of net income, and approval of Annual Report including financial statements as well as oversight report from the Board of Commissioners. Annual GMS is required to be held 6 (six) months from the end date of financial year at the latest;
- b). Other GMS can be held at any time when deemed necessary for the best interest of the Bank.

Implementation of GMS refers to the Bank's articles of association and prevailing laws and regulations.

2. Board of Commissioners

Board of Commissioners are collectively responsible; therefore, individual members of the Board of Commissioners may not decide and act on behalf of the Board of Commissioners. Nevertheless, members of the Board of Commissioners may represent the Board upon approval from the Board of Commissioners.

The Board of Commissioners consists of Commissioners and Independent Commissioners. Independent Commissioners shall account for at least 50% (fifty percent) of the total Board of Commissioners' members.

Board of Commissioners shall ensure GCG implementation in all of the Bank's businesses, at all levels of the organization.

Board of Commissioners is not involved in decision-making process concerning the Bank's operations, unless regarding:

- a). Fund provision for related parties; and
- b). Other matters stipulated by the Bank's Articles of Association or prevailing laws and regulations.

Board of Commissioners' involvement or approval does not undermine the Board of Directors' responsibility for the Bank's management.

Board of Commissioners' duties and responsibilities execution refers to the Bank's Articles of Association and prevailing laws and regulations. Detailed explanation of BRI Board of Commissioners' duties and responsibilities is presented in the Board of Commissioners' Manual.

3. Board of Directors

The Board of Directors holds collegial responsibility. Each member of the Board of Directors carries out their respective duties and takes decisions according to distribution of duties and authorities. However, the duties execution of each members of the Board of Directors remains a shared responsibility.

President Director must be independent from the Controlling Shareholders.

Board of Directors shall implement GCG principles in all activities of the Bank, across all levels of the organization.

Board of Directors' duties and responsibilities execution refers to the Bank's Articles of Association and prevailing laws and regulations. Detailed explanation of BRI Board of Directors' duties and responsibilities is presented in the Board of Directors' Manual.

Board of Commissioners and Board of Directors Relationship

The relationship of Board of Commissioners and Board of Directors is a check and balances relationship. Essentially, both organs bear the duty to maintain the Bank's long-term business sustainability, pursuing the Bank's advancement and robustness.

The Board of Commissioners and Board of Directors are aligned in terms of vision, mission, core values, and the Bank's strategies. Board of Commissioners and Board of Directors approved the Bank's long term plan, annual work and budget plan, and other matters concerning the enactment of prevailing laws and GCG.

Corporate Governance Guidelines and Policies

b. Supporting organs, consist of:

1. Committees

- a). Committees under the Board of Commissioners, among others:
 - i. Audit Committee;
 - ii. Nomination and Remuneration Committee; and
 - iii. Risk Management Supervisory Committee

Detailed explanations on committees under the Board of Commissioners are prescribed in the Board of Commissioners' Manual, Risk Management Supervisory Committee Manual, Nomination and Remuneration Committee Manual, and Audit Committee Charter.

- b). Committees under the Board of Directors, among others:
 - i. Risk Management Committee (RMC);
 - ii. Credit Policy Committee;
 - iii. Credit Committee;
 - iv. Asset and Liability Committee (ALCO);
 - v. IT Steering Committee (ITSC);
 - vi. Human Resources Policy Committee; and
 - vii. Other committees that may be established

Detailed explanations of committees under the Board of Directors are available in Decree issued for respective committees.

2. Board of Commissioners' Secretary

Board of Commissioners' Secretary is an organ under the Board of Commissioners appointed by the Board. The Secretary is responsible to assist the execution of duties and responsibilities of the Board. Detailed explanations of the duties and responsibilities of Board of Commissioners' Secretary is outlined in the Bank's Board of Commissioners' Secretary Guidelines.

3. Corporate Secretary

The Bank appoints Corporate Secretary to support the Board of Commissioners and the Board of Directors in carrying out the duties and responsibilities concerning GCG and to manage the communications to stakeholders. Detailed explanations of the

duties and responsibilities of Corporate Secretary are stated in Corporate Secretary Guidelines..

4. Risk Management Unit

Risk Management implementation covers:

- a). Active oversight from Board of Commissioners and the Board of Directors
- b). Adequacy of Policies, procedures, and limit
- c). Risk Management processes and Risk Management information system
- d). Internal Control System

Detailed explanations on the Bank's Risk Management Unit's duties and responsibilities are stated in Risk Management General Policy (KUMR) and Risk Management Implementation Guidelines (P3MR).

5. Compliance Unit

Compliance Unit is an independent unit responsible for Compliance Function in BRI. Detailed explanations on the responsibilities of Compliance Director and his staffs are stated in Compliance Charter.

6. Internal Audit Unit

Internal Audit Unit is structurally under the direct supervision of President Director. The unit is directly responsible to the President Director and communicates to the Audit Committee. Internal Audit provides assurance as well as independent and objective consultancy in order to increase the added value and enhance the Bank's operations through systematic approach. The Unit evaluates adequacy and effectiveness of risk management, internal control, and the Bank's governance processes. Detailed explanations on the duties and responsibilities of Internal Audit are stated in Audit Charter.

7. External Audit

An examination of the Bank is also conducted by External Auditors, namely from Bank Indonesia, Indonesian Government Audit Board, other auditors according to regulations, and Public Accountant Firm. For the purpose of the Bank's financial statements audit, the Bank must appoint Public Accountant and Public Accountant Firm that are registered with Bank Indonesia.

Corporate Governance Guidelines and Policies

c. Policies, consist of :

1. Bank's Policy Planning

Bank's plans consist of:

- a). Long-term plan (RJP/corporate plan) – a strategic long term plan that outlines the Bank's 5 (five)-year plan. Policies relating to RJP are stated in RJP General Policy and RJP Implementation Guidelines.
- b). Bank's Business Plan (RBB) – contains details of strategy implementation, work program, and the Bank's 3-year performance target. Policies relating to RBB are stated in RBB General Policy and RBB Implementation Guidelines
- c). Corporate Work Program and Budgeting (RKAP), contains the Bank's performance target for 1 (one) year. Policies relating to RKAP are stated in the Bank's Circular Letter regarding RKAP.

2. Business Policies

BRI's internal regulations and policies, including Standard Operating Procedure (SE/SK/BPO/Juklak) needs to be line with predetermined GCG policy.

New products and/or activities need to be evaluated against prevailing policies. Policies regarding new products and/or activities are stipulated in separate set of policies.

3. Oversight Policy

- a). The Bank's oversight policy is implemented through 3 (three) lines of defense concept:
 - 1). First Line of Defense
Oversight performed by Business/Operational Units that are responsible to maintain output and business process quality in line with existing policies and procedures.
 - 2). Second Line of Defense
Implemented by risk management and compliance units, as stipulated by Bank Indonesia.

3). Third Line of Defense

Performed by Internal Audit by evaluating first and second lines of defense, and provide objective report to President Director and Board of Commissioners.

b). BRI's Oversight Policies consist of:

- 1). Internal control policies developed by taking into account the following scopes:
 - i. Controlled environment.
 - ii. Business risks review and management
 - iii. Control activities conducted at all levels of the Bank's structure
 - iv. Information and communication system
 - v. Monitoring, evaluation, and follow-up of internal control activities
- 2). Internal control policies include, among others, Internal Audit Policy, Anti-Fraud Strategy, Legal, and Compliance.
- 3). External Oversight Policies
External oversight is implemented by external auditors and banking supervisory body, according to existing regulations.
- 4). Transparency and disclosure policies
The Bank's internal policies relating to transparency and disclosure are stated in:
 - i. Transparency and disclosure guidelines;
 - ii. Bank's Confidentiality Policy; and
 - iii. Policies on reporting, both internal and external, including reports to banking regulatory and authority bodies, stipulated separately according to type of report.

Policy owner units periodically evaluate and update the Bank's internal policies according to the Bank's needs and developments.

Corporate Governance Guidelines and Policies

Governance Process

1. Governance process is a mechanism carried out by the company organs and staff members in the implementation of duties and responsibilities to achieve GCG. The governance process consists of:
 - a. **General Meeting of Shareholders**
Other GMS is held at the time and under the procedure stipulated by laws and regulations. GMS resolutions are published to stakeholders according to prevailing regulations.
 - b. **Board of Commissioners and Board of Directors' Functions, Duties, and Responsibilities Implementation**
The Board of Commissioners and Board of Directors carry out their functions, duties, and responsibilities in good faith, with prudence, and professionalism that satisfy the requirements set out in existing laws and regulations, articles of association, and Board of Commissioners and Board of Directors' manuals. Board of Commissioners and Board of Directors' performance evaluation is carried out based on an established mechanism.
 - c. **Bank's Business Activity Implementation**
Bank's business activities are carried out in line with the vision, mission, values, and Bank's strategies whilst adhering to prudential banking and GCG principles.
 - d. **Human Resource (HR) Management**
The Bank's HR management is conducted within the corridor of HR architecture founded upon GCG principles to support the realization of Bank's vision and mission.
 - e. **Social and Environmental Responsibility**
The Bank's social and responsibility implementation uphold GCG principles and are integrated with the Bank's strategy.
 - f. **IT governance**
The Bank's information technology utilization and management are carried out with the support of effective, efficient, and optimum IT governance in order to provide strategic added value for the Bank and in support of the Bank's risk management.
 - g. **Subsidiary Management**
The Bank's subsidiaries are established in line with business development aspirations and to provide added value as well as support to the Bank's core business. All subsidiaries are expected to grow and to independently manage their businesses. All transactions made between the Bank and subsidiaries are based on fair business principles.
 - h. **Bank's policies promulgation**
All policies of the Bank relating to business operations need to be promulgated to all staff members and other stakeholders. Policies also need to be administered and comprehensively recorded as reference of duties implementation.
 - i. **Process Documentation**
Documentation serves as record of activities and basis to evaluate activities' effectiveness. All governance processes are documented and organized in orderly manner; document retention is carried out according to applicable regulations.
2. The Bank needs to implement GCG principles consistently in all business activities, at all levels of the organization.
Policies relating to GCG principles implementation stipulated in SKB are the basis and/or guidelines for all organs and employees of the Bank as well as units, in applying policies, systems, procedures, and other business activities of the Bank.

Bank's Policies and Operating Procedures

BRI has various policies and operating procedures that reflect the Bank's commitment to sound corporate governance. Until end of 2013, BRI maintained 35 policies/charters, namely:

1. BRI's General Policy on Good Corporate Governance
2. BRI Policy on Corporate Culture;
3. BRI's Code of Conduct
4. BRI's Board Manual for the Board of Commissioners and Board of Directors
5. BRI's Guidelines for the Board of Commissioners' Committees and BRI's Audit Committee Charter;
6. BRI's Corporate Secretary Guideline;
7. BRI's General Policy for Managing Conflicts of Interest;
8. BRI's Policy on Whistleblowing System;
9. Policy regarding Customer Complaints and Procedures to Settle Complaints;
10. BRI's Transparency and Disclosure Guidelines;
11. BRI's Confidentiality Disclosure Policy;
12. BRI's Anti-Fraud Strategy;

Corporate Governance Guidelines and Policies

13. BRI's Disciplinary Rules;
14. BRI's Organizational General Policy;
15. BRI's General Policy on Long Term Plan (Corporate Plan);
16. BRI's General Policy on Bank Business Plan (RBB);
17. BRI's Work Plan and Budegeting (RKAP) Policy;
18. BRI's General Policy on Risk Management and its sub-policies;
19. BRI's Policy on Business Continuity Management;
20. BRI's Policy on New Products and/or Activities;
21. BRI's Policies and Procedures for the Implementation of Anti-Money Laundering and Counter-Terrorism Funding;
22. Compliance Charter;
23. Implementation of Compliance Culture in BRI's Units;
24. Audit Charter;
25. BRI's Internal Audit Guidelines;
26. Policy and Procedures on Information System Technology Audit;
27. Internal Audit Quality Management System;
28. Human Resources Architecture;
29. BRI's General Policy on Development and Training;
30. BRI's Rewards and Punishment policies;
31. BRI's General Policy on Information System Technology;
32. General Policy and Procedures on Information System Technology Security;
33. General Policy on Credits and its sub-policies
34. BRI's General Policy on Fixed Assets and Logistics Management; and
35. BRI's policy on the Procurement of Goods and Services

Information on Policies and Other Significant Programs

In executing its operational activities in line with the above policies, BRI conducts a number of programs in order to comply with regulatory requirements and to ensure the implementation of GCG best practices. The programs are:

- **Publishing Transparency of Financial Statement**

BRI consistently complies with regulations from relevant authorities to meet transparency principle by developing and publishing mandatory reports as detailed in the following table.

No	Type of Report	Published	
		Publication Media	Date
1.	BRI Annual Report 2012	Website BRI, Bapepam-LK, Indonesian Stock Exchange, Bank Indonesia, YLKI, Rating Institutions, Banking Associations, IBI, Economics and Finance Research Institutions, Economics and Finance Magazines	14 February 2013

	- 2012 (financial position as of 31 December 2012)	Bank Indonesia, Bapepam-LK,	01 February 2013
	- Quarter I 2013 (financial position as of 31 March 2013)	Indonesian Stock Exchange,	27 April 2013
	- Quarter I 2013 (financial position as of 31 March 2013)	Website BRI, Newspapers,	31 July 2013
	- Quarter III 2013 (financial position as of 30 September 2013)	Indonesian Stock Exchange Website	24 October 2013

Corporate Governance Guidelines and Policies

• Share Option

BRI has established internal policy on share option based on Bapepam-LK Regulation Number: Kep-44/PM/1998 dated 14 August 1998. The policy aims to provide incentive for internal management in the form of opportunity to gain direct benefit from the Bank's shares performance.

Management Stock Option Plan (MSOP) is carried out in 3 (three) phases within 3 years:

1. Phase I MSOP was conducted during Initial Public Offering (IPO) at Rp962.5 and exercising period of 5 years (10 November 2003 - 9 November 2008)
2. Phase II MSOP was conducted two years after IPO at Rp1,750 and exercising period of 5 years (10 November 2004 - 9 November 2009)
3. Phase III MSOP was conducted three years after IPO at a price that follows Stock Exchange regulation and exercising period of 5 years (10 November 2005 - 9 November 2010).

Shares owned by members of Board of Directors (excluding President Director) were made available during the directors' tenure as executives, and detailed as follows:

BRI MSOP Process Disclosure

Corporate Governance Guidelines and Policies

• Funding for Related Parties and Large Exposures in 2013

Pursuant to Bank Indonesia regulations, BRI has formulated written policies and procedures regarding Funding for Related Parties or Large Exposures, and/or Funding for other Parties from which conflicts of interest may arise. Funding for related parties are provided with the approval of BRI's Board of Commissioners. In addition, for the provision of funds with a minimum amount of Rp1 (one) trillion and / or by considerations of BRI Credit Committee or Board of Directors, the decision of the provision of these funds should be consulted to the Board of Commissioners. The policy in relation to said amount applies a single borrower, a group, the plasma-core partnership and state-owned enterprises or the government borrower.

Funding for Related Parties and Large Exposures			
No.	Funding	Amount	
		Borrowers	Nominal/Total Outstanding (in Rp million)
1	Related Parties	12	2,240,337
2	To main borrower:		
	• Individuals	8	42,315,576
	• Group	17	70,583,992

• Information Technology Governance

Responding to the following regulations:

- Bank Indonesia Regulation No 9/15/PBI/2007 dated 30 November 2007 on Risk Management Implementation on the Utilization of Information Technology in Commercial Banks
- Bank Indonesia Circular Letter No 9/30/DPNP dated 12 December 2007 on Risk Management Implementation on the Utilization of Information Technology in Commercial Banks
- SOE Minister Regulation No PER-02/MBU/2013 dated 18 February 2013 on Guidelines for Developing Information Technology Management for SOEs

BRI has formulated programs and policies on information technology management. The policies and programs include IT development strategy, software and hardware utilization policy, Bank's information security policy and customer confidentiality, HR developments in IT field, etc. Detailed explanations on these initiatives are presented in "Information Technology Management" sub-chapter.

• IT Architecture Framework

BRI recognizes IT governance as one of GCG's main pillars, therefore the Bank requires effective, efficient, and optimum IT governance that is applicable within BRI and refers to international IT governance practices.

BRI IT architecture has been formulated and is an integral part of IT Strategic Plan (ITSP) 2008-2013. Implementation and development of BRI IT refers to Bank Indonesia regulations concerning IT Risk Management implementation (MR-IT) for Commercial Banks. BRI IT architecture consists of 4 (four) elements:

1. Enterprise Architecture : Executive Summary
2. Assessment Phase : Business & IT Context
3. Design Phase : Enterprise Architecture Definition
4. Transition Plan Phase : Application, Information, and Infrastructure

Corporate Governance Guidelines and Policies

- IT Policy and Procedure**

Policies and procedures designed to support the Bank's governance process such as:

- BRI'S IT Certification (ISO)**

BRI's Operations Centre is operating with quality management system as required by ISO 9001:2008 for Provision of Payment System by RTGS, Clearing and Remittance. Certification is issued by Lloyd's Register Quality Assurance.

BRI's Contact Center is also operating with quality management system standard, which in line with ISO 9001:2008, as verified by Verification New Zealand Limited.

- BRI IT Development Plan**

BRI's IT development plan is aligned with the Bank's vision and mission, such as using IT to create integrated one-stop service on the back of extensive network and wide-range of products. BRI also aims to provide real time and online data access as well as to implement reliable technology security.

Corporate Governance Guidelines and Policies

- ### Policies on Transactions with Related Parties and Conflicts of Interest

Transactions with Related Parties

As one of the leading SOE banks, with largest operational network across the country, transactions with related parties, with other SOEs or transactions categorized as related transactions according to regulations, are inevitable for BRI. Anticipating the possibility, BRI applies policy on transactions with related parties that are equal with policy on transactions with other third parties. Both policies introduce similar conditions, that the determination of selling price, purchase price, lease expenses, and other transaction items required negotiation process to meet optimum quality, cost, and delivery (QCD) principles for the benefits of transacting parties.

BRI also disseminates Integrity Pact Statement to all partners/suppliers as basis of cooperation that upholds the highest standards of ethics and business principles.

Invitation and open encouragement (through print media) are extended to all parties related to BRI; together, BRI invites cooperation founded on GCG principles.

List of transactions with related parties is presented under note 43 in the Bank's Audited Consolidated Financial Statements.

Transactions with Conflicts of Interest

BRI's Policy on Conflicts of Interest is a sub-policy of BRI's Code of Conduct and outlined in Joint Decree of Board of Commissioners and Board of Directors Number 02-KOM/BRI/05/2012 and S.104-DIR/DKP/05/2012 dated 24 May 2012 on BRI's General Guidelines on Conflict of Interest Handling. The policy defines forms, causes, core principles, phases of handling, key success factors in the handling, and reporting to ensure transparency and disclosure of conflicts of interest.

The general policy serves as the primary regulation and reference in developing sub-policies on other activities such as handling of conflicts of interest on goods and services procurement, credit provision, and so forth.

Anticipating conflict of interest that may arise in a transaction, BRI stresses that internal and external parties that may be involved in such transactions may not be involved in decision-making process relating to the transactions. Therefore, no parties will be under the influence of another parties; decision-making on transactions shall be free from any pressure and shall result in objective decisions. To that end, all members of the Board of Directors may not own shares in companies affiliated to BRI or shares in subsidiaries.

In 2013, there were no transactions with parties that directly or indirectly have relationship with the Bank's core business, as defined by Bapepam-LK regulation No. IX.E.1 on "Conflicts of Interest."

Corporate Governance Structure and Mechanism

BRI continuously enhances corporate governance structure and implementation in order to ensure check and balances as well as clear and firm accountability from company's organs.

To assure that all main organs in the governance structure can function at optimum level, BRI has met the requirements for total and composition of Board of Commissioners and has formed Committees under the Board of Commissioners and Board of Directors in accordance with prevailing regulations. Clear separation between company's organs reflects strong check and balances as well as robust internal control system.

BRI's corporate governance structure is as follows:

Corporate Governance Structure and Mechanism

GMS is a mechanism through which shareholders may voice their opinions and cast their votes in the Bank's important decision-making process.

General Meeting of Shareholders

General Meeting of Shareholders (GMS) is the highest company organ. GMS is an instrumental decision-making forum for matters related with shareholders' investments, which will affect the Bank's operational outline. Pursuant to the Bank's Articles of Association and applicable laws and regulations, GMS has exclusive authority not transferable to the Board of Commissioners and Board of Directors.

Through GMS, shareholders exercise their rights to voice opinions and cast votes during crucial decision-making process that will determine the Bank's progress and future. GMS is also a forum to evaluate the performance of the Board of Commissioners and Board of Directors in terms of economic, social, and environmental achievements.

As stipulated by the Limited Liability Company Law and Bank's Articles of Association, GMS consists of:

Annual GMS

Annual GMS is held at the latest 6 (six) months after the end of financial year. During the meeting, Board of Directors present the following:

1. Annual Report
2. Recommendation of net income utilization provided that the Bank records positive income.
3. Recommendation on public accountant to audit the Bank's financial statements for the current year, based on suggestion from the Board of Commissioners, or to transfer the authority of Public Accountant Firm appointment to the Board of Commissioners.
4. Other matters that require GMS' approval in the interest of the Bank without prejudice to provisions in the Articles of Association.

As a State-Owned Enterprise, BRI is subject to Article 23 Law No. 19 of 2003 on State-Owned Enterprises and therefore 5 (five) months after the end of financial year BRI's Board of Directors must submit annual report to GMS for ratification.

Other GMS

Other GMS may be held as deemed necessary in the best interest of the Bank. Pursuant to Article 24 of the Bank's Articles of Association, the Board of Directors may organize Annual GMS and Other GMS preceded by Meeting Announcement and Invitation.

Reference

General Meeting of Shareholders refers to applicable laws and the Bank's Articles of Association. The laws are, among others:

1. Law No 19 of 2003 on State-Owned Enterprises.
2. Law No 40 of 2007 on Limited Liability Company,

Phases of GMS Implementation:

In general, phases of GMS implementation are as follows:

1. GMS invites through registered letter/newspaper activities issued or published at least 14 (fourteen) days before the date of GMS, excluding the date of invitation and the date of meeting.
2. The Bank must provide notifications of GMS invite 14 (fourteen) days before the invitations are made.
3. As a public company, and in order to ensure coherence of information on GMS plan or implementation, pursuant to Bapepam-LK regulation No. IX.I.1 the Bank must provide clear details of such plan to Bapepam-LK at least 7 (seven) days before the invitation.

Corporate Governance Structure and Mechanism

4. Following GMS implementation, the Bank must report results of GMS to Bapepam-LK 2 (two) working days at the latest and announce the GMS resolutions to the public through at least 2 (two) Indonesian-language newspapers, one of which is published nation-wide.
5. All issued shares have 1 (one) voting right unless stated otherwise by the Articles of Association.

During 2013, BRI held 1 GMS, namely the Annual GMS held on 28 February 2013 at the 21st floor of BRI Building I. The GMS was attended by 20,998,988,515 or 85.122% from the Bank's total issued shares and met GMS quorum requirement as stipulated by the Articles of Association. The GMS was declared valid and able to produce binding resolutions. The phases of BRI's Annual GMS implementation in 2013 were:

In 2013, BRI held 1 GMS. Among the resolutions was dividend pay out ratio of **30%** from 2012 net income.

Announcement	Invitation	Implementation	Result
Announced on 29 January 2013 in Kompas and Bisnis Indonesia daily newspapers	Announced on 13 February 2013 in Kompas and Bisnis Indonesia daily newspapers	Announced on 28 February 2013 Time 09.30 WIB Venue at 21st Floor BRI Building I	Published on 4 March 2013 in Kompas and Bisnis Indonesia daily newspapers

In accordance with the meeting agenda, several chief decisions were made through voting mechanism. Several important decisions resulted from the voting was favoured by **99.891%** of the total attending shares, objected by **0.036%** of the total attending share, while **0.073%** of the total attending shares abstained. The key resolutions are:

1. Approved the 2012 Annual Report and ratified the Board of Commissioners' Oversight Report as well as the Bank's Financial Statements for financial year 2012 audited by Public Accountant Firm Purwantono, Suherman, and Surja, in accordance with Report No. RPC-3167/PSS/2013 dated 23 January 2013; granted full acquittal and discharge to the Company's Board of Directors and Board of Commissioners for their management and oversight duties for financial year ended 31 December 2012 as long as the management activities bear no criminal element and have been reflected in the 2012 Annual Report of the Bank.
2. Ratified the Annual Report of Partnership and Environmental Development Programs for financial year 2012, including Financial Statements audited by Public Accountant Firm Purwantono, Suherman, and Surja, in accordance with Report No. 003/LAI/PKBLBRI/HSR.HT dated 12 February 2013; granted full acquittal and discharge to the Company's Board of Directors and Board of Commissioners for their management and oversight activities on the Partnership and Environmental Development Programs for financial year 2012 as long as the management activities bear no criminal element and have been reflected in the 2012 Annual Report of the Partnership and Environmental Development Programs.

 - i. Allocating 30% or Rp5,556,284,926,148 as dividends from financial year 2012 and shall be paid on 15 April 2013 to the Shareholders whose names are registered in the Company's Register as of 1 April 2013.

Corporate Governance Structure and Mechanism

- ii. Allocating 14% Rp2,592,932,965,535 as reserves for investments.
- iii. Allocating 56% or Rp10,371,731.862,145.10 as additional retained earnings.
- b. Provided the authority and power to the Board of Directors to set the schedule and mechanism of dividend pay out for financial year 2012, in accordance with prevailing regulations.
- c. Approved the appropriation of BRI's Environmental Development Program financial year 2013 as expenses of current year at 2% from 2012 net income, or Rp370,418,995,076.
- 4. a. Approved the salaries/honorarium for the Board of Directors and Board of Commissioners in 2013; the salaries/honorarium for the Board of Directors and Board of Commissioner shall remain in the same amount with salaries/honorarium in 2012.
- b. Conferred the authority and power to the Board of Commissioners, with approval from Shareholders of Series A Golden Shares to determine the amount of benefits provided for members of the Board of Directors and Board of Commissioners for financial year 2012.
- 5. Conferred the authority and power to the Board of Commissioners to appoint Public Accountant Firm to conduct audit on the Bank's Financial Statements for financial year 2013 and Financial Statements of Partnership and Environmental Development Programs for financial year 2013, and to determine honorarium as well as requirements in accordance with prevailing regulations.
- 6. Approved the enactment of SOE Minister Regulation No.PER-12/MBU/2012 dated 24 August 2012 on Supporting Organs of Board of Commissioners/Supervisory Board of SOEs.

Realization of GMS Resolutions

During reporting year of 2013, BRI has realized resolutions of GMS held for the financial year 2012.

Board of Commissioners Regulation of Reference

Undang-Undang Nomor 40 Tahun Law No. 40 of 2007 on Limited Liability Companies requires all companies incorporated under the jurisdiction of Indonesian law to have a Board of Commissioners assigned to supervise the management policies, the management process, either on the Company or the Company's line of businesses, as well as providing advices to the Board of Directors. Supervision and counselling is conducted for the benefit of the Company and in accordance with the Company's objectives.

In addition, Article 28 paragraph (3) of Law Number 19 Year 2003 on State-Owned Enterprises states that the Commissioners' term of office is 5 (five) years and may be reappointed for one (1) office term.

Members of BRI Board of Commissioners are prohibited from assuming multiple positions as members of the Board of Directors at other SOEs, regional owned enterprises, private companies, and other positions that may pose any conflicts of interest; and/or other positions, in accordance with the applied law and legislations.

The Board of Commissioners' Board Charter

BRI has a Board of Commissioners' Board Charter, also known as the BOC Work Manual, to guide the BOC in their daily tasks. The BOC Work Manual was structured as a reference for the BOC in their duties and as a basis for the implementation of Good Corporate Governance for the BOC. The Manual describes the duties, authorities, responsibilities, working hours, work ethics, meetings, organizational structure, and performance of duties related to the AGMS.

Moreover, in carrying out its duties and functions, the Board of Commissioners has always been guided by the Articles of Association, and the Joint Decree between the Board of Commissioners and Board of Directors.

Board of Commissioner Duties, Responsibilities, Authority and Obligation Duties and Responsibilities Duties

1. Supervision of the Board of Directors' management conduct and its policies, including management of the Company's Subsidiaries, Pension Fund and Financial Institution Pension Fund; and
2. Provide advice to the Board of Directors, including supervision on the implementation of the corporate plan that include the Company's Long Term Business Plans, Bank Business Plans, Company's Budget and Work Plans, Partnership and Community Development Program's Budget and Work Plan, and other work plans of the Board of Directors.

Additionally, the Board of Commissioners has also been assigned specific duties, as regulated by Bank Indonesia:

Corporate Governance Structure and Mechanism

- a. Supervision of the GCG implementation throughout all levels of the Company;
- b. Supervision of risk management application and
- c. The Company's compliance to Bank Indonesia regulations and other applied regulations, as well as the Company's commitment to Bank Indonesia and other relevant institutions.

Responsibilities

Each member of the Board of Commissioners is fully liable should one is guilty or negligent in performing his/her duties for the Company, unless the relevant member of the Board of Commissioners can prove that he/she:

- a. Has performed supervision with good faith and prudence, in compliance with the Company's objectives;
- b. Does not have any personal interest, directly or indirectly, for any of the Board of Directors' management conduct that has caused loss; and
- c. Has provided advice to the Board of Directors to prevent or extension of the said loss.

Authority

1. Inspecting the Bank's books, correspondences and other documents, and verifying the Bank's cash and other securities, as well as the Company's assets;
2. Access to the Company's premises, buildings and offices;
3. Requesting for clarification from the Board of Directors and/or other management staff on all issues related to the Bank's management;
4. Requesting the Board of Directors and/or other staff under the Board of Directors, with the Board of Directors' approval, to attend the Board of

- Commissioners' meetings;
5. Overseeing every action and decision that have and will be executed by the Board of Directors;
6. Temporarily discharging any member of the Board of Directors, as stipulated in the Articles of Association;
7. Establishing the Audit Committee, and any other committees if necessary, with consideration of the Company's capacity;
8. Hiring external expert for a certain period of time and on the company's expense, if necessary;
9. Managing the Company in certain conditions, for certain periods of time in accordance with the Company's Article of Association;
10. Conducting other supervisory authorities as long as it does not conflict with the prevailing laws, legislations, the Article of Association, and/or GMS decisions.
11. Attending Board of Directors meetings to provide insights on the discussed topics;
12. Appointing and discharging the Board of Commissioners' Secretary, upon recommendation from Series A Dwiwarna shareholders;

Obligations

1. Providing advises to the Board of Directors in managing the Company;
2. Providing opinions and approvals on the Company's business plans which comprise of the Company's Long Term Business Plans, Bank Business Plans, Company's Budget and Work Plans, Partnership and Community Development Program's Budget and Work Plan, and other work plans prepared by the Board of Directors;
3. Following the progress of the Company's activities, providing opinions and solutions to the GMS on important issues related to the Company's management;

The Board of Commissioners has various authorities to ensure effective supervisory duties.

Corporate Governance Structure and Mechanism

4. Reporting to the GMS if there is a decline in the Company's performance;
5. Proposing the appointment of a Registered Public Accountant to the GMS, to audit the Bank's reports;
6. Reviewing and analysing periodic reports and Annual Report prepared by the Board of Directors, and signing the Annual Report;
7. Providing clarification, opinion and proposal to the GMS on the subject of Annual Report, if requested;
8. Producing meeting minutes of the Board of Commissioners meetings and making file of its copies;
9. Reporting to the Bank on their and/or their families share ownership in the Company or in any other companies;

10. Providing reports to the GMS on its supervision activities that was done during the past financial year; and
11. Undertaking other obligations to execute its supervisory role while adhering to the prevailing laws, regulations, Articles of Association, and/or resolutions of GMS.

Composition of the Board of Commissioners

As of 31 December 2013, there are 8 (eight) members of BRI's Board of Commissioners. The number and composition of the Board's members are in accordance with the regulation, and should not exceed number of the members of BRI's Board of Directors, which consisted of 11 (eleven) members. BRI has 4 (four) independent Commissioners or 50 per cent of the total number of the

Board of Commissioners' members. Therefore, the number of members and composition of BRI's Board of Commissioners complies with the prevailing regulations.

All members of the Board of Commissioners possess integrity, competency, and excellent financial reputation. Members of the BRI's Board of Commissioners do not hold concurrent posts as Commissioner, Director, or Executives in other banks, with the exceptions as stated in Bank Indonesia's regulations about GCG implementation in Commercial Banks.

All members of BRI's Board of Commissioners reside in Indonesia and have gained the approval from Bank Indonesia on their fit and proper tests.

Composition of the BRI Board of commissioners as of 1 January 2013 to 31 December 2013 :

No.	Name	Position	Age (Years)	Date of Appointment
1.	Bunador Sanim	President Commissioner/ Independent Commissioner	68	I : 30 May 2006 II : 28 April 2011
2.	Mustafa Abubakar *)	Vice President Commissioner/ Commissioner	64	28 March 2012

4.	Aviliani	Independent Commissioner	52	I : May 2005 II : 20 May 2010
5.	Ahmad Fuad ***)	Independent Commissioner	59	28 March 2012
6.	Heru Lelono	Commissioner	58	20 May 2010
7.	Hermanto Siregar	Commissioner	50	28 April 2011
8.	Vincentius Sonny Loho **)	Commissioner	56	28 March 2012

*) Effective as of 27 July 2012 as a Vice President Commissioner following the approval from Bank Indonesia on his Fit and Proper Test

**) Effective as of 5 September 2012 as a Commissioner following the approval from Bank Indonesia on his Fit and Proper Test.

***) Effective as of 1 June 2012 as an Independent Commissioner following the approval from Bank Indonesia on his Fit and Proper Test.

Corporate Governance Structure and Mechanism

Commissioners' Independence

Bank Indonesia Regulation (PBI) No. 8/4/PBI/2006, amended by PBI No. 8/14/PBI/2006 on the implementation of Good Corporate Governance for Commercial Banks, stipulates that the banks must have Independent Commissioners at least 50 percent of the Board of Commissioners' members. As the case with Article 28 of Law Number 19 Year 2003 on SOEs which states that the composition of the Board of Commissioners must be set to enable effective, precise, quick, and independent decision-making.

To ensure the Board of Commissioners' Independence, the shareholders through the General Shareholders Meeting have appointed 4 (four) Independent Commissioners out of the total 8 (eight) members of the Board of Commissioners.

Independent Commissioners are members of the Board of Commissioners that are devoid of any financial, management, share ownership and/or family relations up to the second degree with other members of the Board of Commissioners, the Board of Directors, and/or controlling shareholders, or any other relationships that might influence their capability of acting independently. The appointment of Independent Commissioners will encourage an impartial working environment that values fairness and equality above all other interests including the interests of minority shareholders and other stakeholders.

BRI's independent commissioners must not have any conflicts of interest and act independently, which means that they do not have any conflicts of interest that might impair their ability to carry out tasks independently and impartially, both in their relationship with other Commissioners as well as with the Board of Directors.

All members of BRI's Board of Commissioners have fulfilled the basic criteria, as follows:

1. Do not have any financial or familial ties with the Board of Directors members and BRI's controlling shareholders, or any other relationship that might influence one's capability to act independently.
2. The Board of Commissioners' members do not hold any other position as executives or members of other Boards of Commissioners or Boards of Directors of more than 1 (one) non-financial institution, State-owned Enterprise, local government-owned enterprise, private enterprise, and other positions stipulated in the Company's Articles of Association and the prevailing regulations.
3. Have passed the Fit and Proper Test, in accordance with Bank Indonesia's regulation on Fit and Proper Test.
4. Nominated by the Shareholders and appointed in the General Shareholder's Meeting.
5. Within 5 (five) years prior to his/her appointment:
 - a. Has never been declared as bankrupt.
 - b. Has never been a member of a Board of Commissioners or a member of a Board of Directors that is guilty for causing the bankruptcy of a Company.
 - c. Has never been punished for a criminal act that inflicts loss in the state's finance and/or/SOEs and/or those related to the financial sector.

With **50%** composition of Independent Commissioner, BRI complies with Independence of Commissioner regulation that requires at least **50%**, as specified in BI Regulation (PBI) No. 8/14/PBI/2006

Corporate Governance Structure and Mechanism

The Commissioners Concurrent Positions

The regulation of Bank Indonesia states that the members of the Board of Commissioners are only allowed for concurrent position as members of the Board of Directors, or the Executive Officer at 1 (one) non-financial corporate institutions, or to carry out the monitoring function at one (1) non-bank subsidiaries controlled by BRI.

The concurrent position is only allowed if the non-independent members of the Board of Commissioners conduct their functional duties of the Bank's shareholders that is a legal entity in its group of companies; and or members of the Board of Commissioners hold the positions at nonprofit organizations or institutions, as long as he/she does not neglect the duties and responsibilities as a member of the Board of Commissioners.

In compliance with the regulation, currently some members of BRI's Board of Commissioners have concurrent positions on several non-profit organizations, as follows:

No	Name	Position	Concurrent Position
1.	Bunaser Sanim	President Commissioner/ Independent Commissioner	<ol style="list-style-type: none"> 1. Permanent lecturer of the Undergraduate and Graduate Program of Bogor Agricultural University 2. Actively involved in several organizations, including: Member of the Indonesian Association of Muslim Intellectuals (ICMI) Experts Council, Advisory Board Member of the Executive Committee of the Association of Indonesian Agricultural Economics (PERHEPI), Advisory Board Member of the International Center for Analysis of Finance and Economic (InterCAFE), Advisory member of the Indonesian Sharia Bank Association (Asbisindo), 1st Chairman of Indonesian Fertilizer Council (DPI) and 1st Chairman of Indonesian Society of Organic Agriculture (MAPORINA).
2.	Mustafa Abubakar	Vice President Commissioner/ Commissioner	Nil
3.	Adhyaksa Dault	Independent Commissioner	Nil
4.	Aviliani	Independent Commissioner	<ol style="list-style-type: none"> 1. - Feedback on the Report of PT. BRI (Persero), Tbk. Internal Audit Key Results, 4th Quarter of 2012.
- Feedback on PT. BRI (Persero), Tbk. Annual Internal Audit Plan 2013.
- Feedback on the Report of PT. BRI (Persero), Tbk. Internal Audit Result, 1st Semester, Year 2013

Meetings, Attendance and Decisions

Meeting Ethics

Pursuant to the procedures stipulated in the Articles of Association, the meeting of the Board of Commissioners is held at least once in a month, and may invite the Board of Directors if required. In practice, the Board of Commissioners meetings

Corporate Governance Structure and Mechanism

are held at least once a week and once a month joint meetings with the Board of Directors. The Board of Commissioners meeting is legal and authorized to make any binding decisions if more than 50% of its members are present or represented in the meeting. All decisions of the meetings are made in consensus. If the consensus is not reached, the decision would be based on affirmative votes by more than half of valid voters. All decisions of the meeting are binding to all member of the Board of Commissioners.

As stipulated in the BOC Work Manual, the meeting material must be submitted to the Board of Commissioners no later than three (3) working days before the meeting takes place, so that the Board of Commissioners have the opportunity to review the information and/or to request additional information prior to the meeting.

Frequency and Attendance

Throughout 2013, the Board of Commissioners conducted 41 meeting, as recapitulated below:

Corporate Governance Structure and Mechanism

Board of Commissioners' Training Program

Training programs are divided into 2 (two) categories, the Company Introduction Program and Competency Training Program.

Company Introduction Program

A company introduction program is provided to the members of the Board of Commissioners during the first time of appointment. This program consists of presentations, meetings, company visits and review of documents or other programs. The Corporate Secretary is responsible for conducting this program.

The introduction program includes:

- The implementation of the Company's corporate governance principles
- A description of the Company in relations to the purpose, nature, and scope of activity, financial performance and operations, strategy, long-term and short-term business plans, competitive positions, risks and other strategic issues;
- Information related to delegated authorities, internal and external audits, internal control systems and policies, including the Audit Committee
- Description of the duties and responsibilities of the Board of Commissioners, and also on things that are prohibited.

Competency Training Program

BRI provides training programs to support efforts in enhancing the Board of Commissioners' knowledge on current affairs as well as the development of the banking industry and other knowledge related to the Board of Commissioners' supervisory duties. Some of the general training programs include:

No	Date	Name of Commissioners	Subject of Training	Location
1	16 January 2013	Bunaser Sanim, Mustafa Abubakar, Ahmad Fuad, Hermanto Siregar	SOE Commissioners/ Supervisors Workshop	Jakarta
2	22 - 23 February 2013	Heru Lelono dan Ahmad Fuad	Socialization Workshop for PER-11/MBU/2012 and PER-21/MBU/2012 –SOE Workers Media	Bali
3	03 April 2013	Bunaser Sanim dan Mustafa Abubakar	SOE Commissioners/ Supervisors Workshop "Hyper Corporate Crime Prevention for SOEs" - BUMN Executive Club	Jakarta
4	10 - 14 June 2013	Ahmad Fuad	Leadership & Strategic Management in Banking School - Euromoney Training EMEA	Prague, Czech Republic
5	17 September 2013	Mustafa Abubakar dan Ahmad Fuad	The 7th Jakarta Risk Management Convention - BSMR	Jakarta

Corporate Governance Structure and Mechanism

Board of Commissioners' Performance Assessment

Board of Commissioners' Key Performance Indicator

BRI established its Key Performance Indicators through a set of targets stated in the Board of Commissioners' Work Plan and Budget. The Key Performance Indicators used as a reference for the BOC's performance include:

1. Off Site Supervision, encompassing the timeliness of Internal Audit Result's review, Financial report, GCG Self-Assessment, Risk Profile Report, and Compliance Report.
2. On-site supervision, encompassing the number of meetings, field visits, and the number and timeliness for studies conducted by committees under the Board of Commissioners' authority.
3. The Company's Performance, which encompasses Profitability (Net Profit and ROA), Liquidity, (Third Party Funds and LDR) and Loan Portfolio (Loan Expansion and NPL).

The Board of Commissioners' Assessment

The Board of Commissioners conducts self-assessment of its achievement based on the Key Performance Indicators stated in Work and Budget Plan periodically. However, the overall assessment of the performance of the Board of Commissioners and Board of Directors is conducted in the shareholders' forum, during the General Meeting of Shareholders.

The Board of Commissioners' Remunerations

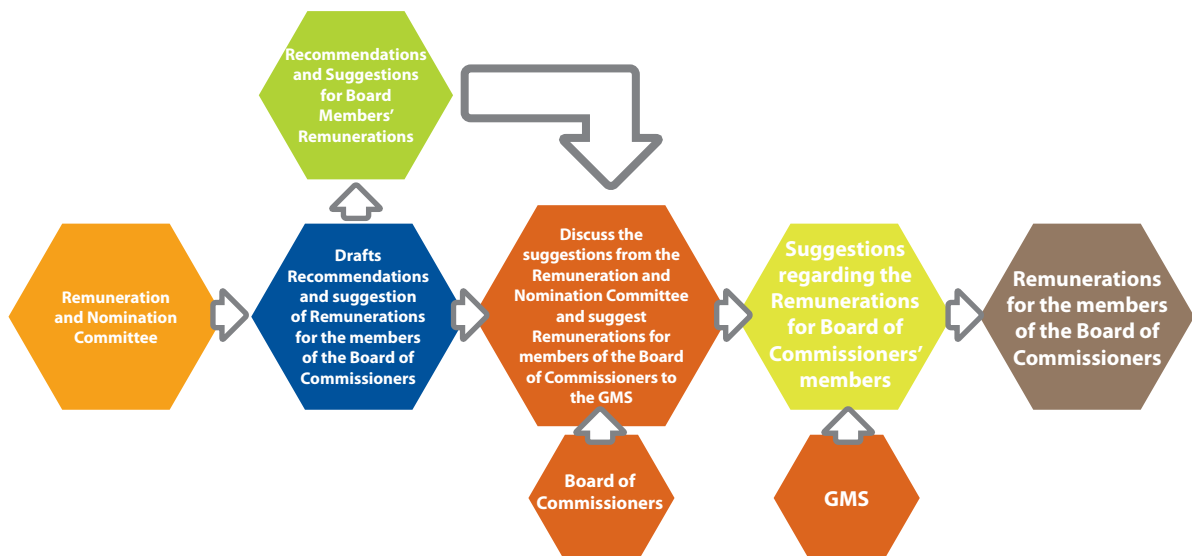

Policies and Procedures to establish the Board of Commissioners' Remunerations

BRI sets the remuneration for the Board of Commissioners with reference to the regulations of the Minister of State Owned Enterprises No.: PER-07/MBU/2010, updated with the PER-04/MBU/2013 regarding the Income Guidelines for Directors, Commissioners, and the Supervisory Board of SOE's. As per regulation, the amount of the Board of Commissioners' income is determined in the General Meeting of Shareholders (GMS). The BRI's Board of Commissioners' income components consist of: honorarium, allowances, facilities and Tantiem/Performance Incentive.

The amount of Salaries, Honorariums and Tantiems for the Board of Commissioners and Board of Directors are stipulated in the GMS.

The Board of Commissioners submits suggestions regarding the decision on the Board of Commissioners and Board of Directors' Salaries, Honorariums and Tantiems based on the recommendations from the Nomination and Remuneration committee, while taking into account the Company's performance, business size and results of the survey on the Banking industry's remunerations.

Below is a short description of the procedures for the establishment of the BRI's Commissioners' Remunerations:

Corporate Governance Structure and Mechanism

The 2013 GMS granted authority for the Board of Commissioners to establish the amount of 2013 Salaries, Honorariums, and 2012 Tantiems for the Board of Directors and the Members of the Board of Commissioners, with prior approval of the Dwiwarna Series A Shareholders. With this authority, the Board of Commissioners has determined Salaries, Honorarium and Tantiem, approved by Dwiwarna Series A Shareholders, dated March 25, 2013.

Facilities and other benefits for members of the Board of Commissioners and Board of Directors are determined by the Board of Commissioners that has been authorized by the General Meeting of Shareholders, as regulated by the Company's Articles of Association.

Remuneration Structure of the Board of Commissioners 2013

As stipulated in the 2013 GMS, the remuneration structure of the Board of Commissioners is as follows:

Short Term

Types of Remunerations and other Facilities	Amount Received in 1 year	
	Board of Commissioners	
	Person	Rp. million

Above Rp. 500 million and up to Rp. 1 billion	-	-
Below Rp. 500 million	-	-

There are no long-term or post-employment benefits to the Board of Commissioners.

The Commissioners' Share Ownership

As of 31 December 2013, each member of the Board of Commissioners owns less than 5 percent of the paid-in capital in BRI, other banks, non-bank financial institutions and other companies in the country or overseas. The list of the Board of Commissioners' share ownerships is as follows:

No.	Name	Position	Share Ownership
1.	Bunasor Sanim	President Commissioner/ Independent Commissioner	Nil
2.	Mustafa Abubakar	Vice President Commissioner	Nil
3.	Heru Lelono	Commissioner	Nil
4.	Hermanto Siregar	Commissioner	Nil
5.	Vincentius Sonny Loho	Commissioner	Nil
6.	Adhyaksa Dault	Independent Commissioner	Nil
7.	Aviliani	Independent Commissioner	Nil
8.	Ahmad Fuad	Independent Commissioner	Nil

Corporate Governance Structure and Mechanism

Board of Directors Regulation of Reference

The following are several external regulations used as a reference for the Board of Directors:

1. Republic of Indonesia Law No. 7 year 1992 on Banking, amended with Law of Republic of Indonesia No. 10 year 1998.
2. Republic of Indonesia Law No. 8 year 1995 regarding Capital Market.
3. Republic of Indonesia Law No. 19 year 2003 regarding State Owned Enterprises.
4. Republic of Indonesia Law No. 40 year 2007 regarding Limited Liability Companies.
5. Government Regulation No. 45 year 2005 regarding the Establishment, Management, Supervision, and Dissolution of State Owned Enterprises.

In addition, the Board of Directors' duties and responsibilities is also regulated in the policies of the Ministry of SOE, Bank Indonesia, the Financial Services Authority and other relevant authorities.

Requirements To be The Bank's Directors

The following are several basic rules regarding the requirements to be a member of the Bank's Board of Directors:

1. Regulation of Bank Indonesia
 - a. PBI No. 13/27/PBI/2011 regarding Commercial Bank article 27, that members of the Board of Directors shall comply with the requirements of integrity, competence, and Financial Reputation.
 - b. PBI No. 12/23/PBI/2010 regarding Fit and Proper Test, which stipulates that candidates for the Board of Directors shall pass the fit and proper test

and obtain approval from Bank Indonesia prior to performing their duties and functions.

- c. PBI No. 9/8/PBI/2007 article 8 regarding the Employment of Foreign Workers and Knowledge Transfer Programme in Banking Sector, stipulates that member of the Board of Directors with foreign nationality shall meet the following requirements:
 - i. Pass the fit and proper test; and
 - ii. Has adequate knowledge on Indonesia, especially on economy, culture and the Indonesian language. The entire Board of Directors of BRI is of Indonesian nationalities, thus the regulation is not applicable.
2. Law on Limited Liability Company and the Regulation of the Financial Services Authority (FSA)

The requirements to be Director of Limited Liability Company are regulated in article 93 of the FSA Regulation (was Bapepam-LK) No. IX.I.6, attachment Bapepam-LK Chairman Decree No. Kep-45/PM/2004 regarding Directors and Commissioners and Public Companies, which includes:

 - a. Possess good character and ethics
 - b. Has never been declared as bankrupt or caused bankruptcy to a company while he/she is appointed as member of the Board of Directors or Commissioners within 5 years prior to his/her appointment as the Bank's Director.
 - c. Has never been convicted of financial crime within 5 years prior to his/her appointment. In the

selection and appointment process of the Directors, BRI has fulfilled all of the above requirements.

Board of Directors' Charter

BRI has a Board Charter or the Directors' Board Manual as a guideline for the Board of Directors in carrying out roles and functions in the company management and in maintaining a relationship with the Board of Commissioners. The Board Charter was created by referring to the above regulations, containing guidelines for the Board of Directors and clearly details phases of activities that are structurally, systematically, and also easy to understand for consistent implementation by the Board of Directors in conducting their duties to achieve the Company's vision and mission.

The following are the Board of Directors' Guidelines in the BRI Board Charter:

1. General regulations on the Board of Directors' positions
2. The Board of Directors' duties and authorities
3. The Board of Directors' rights and obligations
4. The Board of Directors' division of duties and authorities
5. Implementation of the Board of Directors' duties in the management of the company
6. The principles of the Board of Directors' decision making process
7. The Board of Directors' Meeting
8. Corporate Secretary
9. Relationships with subsidiaries

Corporate Governance Structure and Mechanism

Board of Directors' Duties and Responsibilities

In compliance with the Articles of Association, the Board of Directors' duty is to manage the Company, the Company's assets, and represent the Company inside and outside of court. In carrying out its duty, the Board of Directors must conduct in the interest of the Company and in accordance with the Company's aims and objectives, based on good faith and full responsibility and also in accordance with the prevailing regulations, the Company's Articles of Association, and the General Meeting of Shareholders resolutions.

The members of the Board of Directors, including the President Director, are in equal position. The President Director's duty is to coordinate the Board's activities. Any action taken by the members of the Board other than Board meeting decision is regarded as personal responsibility until the Board Meeting approves such action.

BRI's Board of Directors' Duties and Responsibilities are as follows:

General

1. Being responsible for all actions related to the management of the Bank in accordance with the purposes, objectives and business activities; furthermore, to perform any actions related to the management and ownership that binds the Bank with other parties, by complying with the Articles of Association, prevailing laws and regulations, as well as General Meeting of Shareholders resolutions;
2. Being responsible in ensuring that the Bank's management is in accordance with the Bank's objectives; to manage the Company accordingly by performing the duties and responsibilities as stipulated in the Articles of Association and General Meeting of Shareholders resolutions, based on the prevailing laws and regulations.

Specific

1. Determining the duties and responsibilities related to the Board of Commissioners and Shareholders
 - a. Ensuring the implementation of the GMS resolutions;
 - b. Preparing the corporate plan (RJPP), Bank's business plan (RBB), and annual Company's budget and work plan (RKAP) and other work plans including any changes to obtain approval from the Board of Commissioners;
 - c. To hold GMS based on the written request of one or more Shareholders who have valid voting rights and who represent at the very least 1/10 (one tenth) of the number of shares issued;
 - d. Create and administer shareholders' list and special list containing the ownership of shares by members of the Boards of Commissioners and the Board of Directors and their families, in the Bank and in other companies;
 - e. Consulting the granting of loans above a certain amount to the Board of Commissioners with reference to prevailing regulations;
 - f. Submitting an annual report following the review by the Board of Commissioners within 5 (five) months, at the latest, after the fiscal year ended, to the GMS for approval.
2. Duties and responsibilities related to Accounting and Annual Report:
 - a. Maintaining the Bank's bookkeeping and administration in accordance with common practices;
 - b. Establishing an accounting system that complies with Indonesia's Accounting Standards and the principles of internal control, especially in terms of management, bookkeeping, archiving, and monitoring;
 - c. Preparing Annual Report and Financial Statements.
3. Duties and responsibilities related to Risk Management and Control:
4. Maintaining the following processes of Risk Management:
 - a. Ensuring that the Bank has the proper and systematic procedures in identifying, measuring, and controlling risks;
 - b. Ensuring that proper system and processes have been executed in monitoring and reporting the main risks identified by the Bank;
 - c. Monitoring and evaluating the existence of good management procedures in assessing the adequacy of the risk management and the internal control system, financial reporting and compliance;
 - d. Ensuring the adequacy of an effective control system to maintain:
 - i. Information reliability and integrity
 - ii. Compliance with the prevailing policies, plans, procedures, rules and regulations.
 - iii. Maintenance of the Bank's assets.
 - iv. The economical and efficient use of resources;
 - v. The achievement of the determined operational objectives and targets.
5. Executing annual evaluations to make public statements concerning the Bank's internal control, to ensure that all significant aspects of internal

Corporate Governance Structure and Mechanism

- control have been considered for the evaluation year up to the annual report's approval date.
6. Creating organizational structure, duties and responsibilities for the company's management and employees, including the appointment of the management.

- Coordinate and cooperate with fellow members of the Board to streamline the achievement of the company's targets.

Director of Compliance Main Responsibilities:

- Directing the Company's strategy and work plan, which includes the Long Term Plan (Corporate Plan), medium term Plan (Bank Business Plan/RBB), Company Work Plan and Budget (RKAP) and their amendments as guidelines in achieving the Company's performance targets.

- Directing the Company's target developments and achievements in Compliance.
- Providing progress reports and explanation of the Company's management.
- Directing follow-ups of internal and external audit results related to Compliance
- Carrying out the functions of the Substitute Director to ensure that the Directors' duties are performed well.
- Coordinate and cooperate with fellow members of the Board to streamline the achievement of the company's targets.

Director of Institutional and SOE Business Main Responsibilities:

- Directing the Company's strategy and work plan, which includes the Long Term Plan (Corporate Plan), medium term Plan (Bank Business Plan/RBB), Company Work Plan and Budget (RKAP) and their amendments as guidelines in achieving the Company's performance targets.
- Directing the Company's target developments and achievements in the Institutional and SOE Business.
- Providing progress reports and explanation of the Company's management.
- Directing follow-ups of internal and external audit results related to Institutional and SOE Business
- Carrying out the functions of the Substitute Director to ensure that the Directors' duties are performed well.
- Coordinate and cooperate with fellow members of the Board to streamline the achievement of the company's targets.

Corporate Governance Structure and Mechanism

Director of Network and Services Main Responsibilities:

1. Directing the Company's strategy and work plan, which includes the Long Term Plan (Corporate Plan), medium term Plan (Bank Business Plan/RBB), Company Work Plan and Budget (RKAP) and their amendments as guidelines in achieving the Company's performance targets.
2. Directing the Company's target developments and achievements in Networks and Services.
3. Providing progress reports and explanation of the Company's management.
4. Directing follow-ups of internal and external audit results related to Networks and Services.
5. Carrying out the functions of the Substitute Director to ensure that the Directors' duties are performed well.
6. Coordinate and cooperate with fellow members of the Board to streamline the achievement of the company's targets.

Mechanism of Substitute Director

Other than determining the general and specific duties of each Director, BRI has also set up a mechanism of substitute director with the following regulations:

1. The appointed Substitute Director has a corresponding field of work with the substituted Director position.
2. The Substitute for President Director must be substituted by 2 (two) Directors, except for the Director of Credit Risk Management and Director of Compliance.
3. There are Directors designated as Substitute Director for more than one field.

4. Substitute Director is effective if the substituted Director is absent or unable to attend for any reason, for at least 1 (one) day.
5. The appointment of Director as Substitute Director is done and recorded in the Handover Report in compliance with the prevailing regulations.
6. The Handover Report is prepared by the relevant Director's Secretary, signed by all related Directors and acknowledged by the President Director.
7. Should the appointed Substitute Director is absent or unable to attend for any reason, and there are tasks/activities that require urgent decision, then the decision can be made by other Substitute Director and acknowledged by the appointed Director, and the Handover Report between the two Substitute Directors is not necessary.
8. The Substitute Director has the same authority and responsibility with the substituted Director, and can be considered ex-officio.
9. The Substitute Director's authority and responsibility for the Credit Committee are regulated according to the applicable regulations in the field of credit.
10. Substitute Director is fully responsible for all decisions made during his time as a Substitute Director.

The Board of Directors' Successors Policy

To prepare for leadership succession in the future, BRI implements a policy reflected in the Talent Management System program that in line with the SOE Minister Regulation no. PER-01/MBU/2012 regarding the Guidelines for the Appointment and discharge of SOE's Board of Directors' members and amended with SOE Minister Regulation no. PER-01/MBU/2012. In this program, potential employees in the Talent Pool will have the opportunity to attend training programs or activities related to the field of management, business strategy, strategic planning, risk analysis and business potential, analysis of operational and financial performance as well as a variety of other programs.

Furthermore, when the company requires replacement of leadership, BRI will submit an internal candidate from the Talent Pool, which is facilitated by the Board of Commissioners by taking into account the recommendation of the Nomination and Remuneration Committee. The results of the internal candidates' selection will then be submitted to the Ministry of SOEs to undergo fit and proper test.

Board of Directors' Composition

There are 11 (eleven) members of the BRI's Board of Directors with the majority of having more than five (5) years experience in the bank operations as bank executives. All of the Board members reside in Indonesia and have gained approval from Bank Indonesia based on the results of their fit and proper tests.

BRI's Board of Directors' Composition as of 31 December 2013:

Corporate Governance Structure and Mechanism

No	Name	Position	Age	Date of Appointment
1.	Sofyan Basir	President Director	55	17 May 2005
2.	Sarwono Sudarto	Director of Operations	61	30 May 2006
3.	Sulaiman Arif Arianto	Director of Commercial Business	55	30 May 2006

5.	A. Toni Soetirto	Director of Consumer Business	55	30 May 2006
6.	Suprajarto	Director of Network and Services	57	5 September 2007
7.	Asmawi Syam	Director of Institutional and SOE Businesses	58	5 September 2007
8.	Achmad Baiquni	Director of Finance	57	20 May 2010
9.	Djarot Kusumayakti	Director of Micro, Small and Medium Enterprises Business	56	20 May 2010
10.	Randi Anto	Director of Compliance	52	28 April 2011
11.	Gatot Mardiwasiso	Director of HR Management	61	28 September 2011

Board of Directors' Independency

Members of BRI's Board of Directors do not hold any concurrent positions as Commissioners, Directors or Executives in other Banks/Institutions and do not have familial ties, up to the second degree, with fellow members of the board and/or with members of the Board of Commissioners. With this status, BRI's Board of Directors strives to act independently, and do not have any conflicts of interests that might disrupt their duties independently and in a critical manner, both in their relationship with other members of the board or with the Board of Commissioners.

The Board of Directors' members do not hold any concurrent positions as President Directors or other Directors in State owned enterprises, private enterprises, or any other positions related to BRI's management, including structural and functional positions in the central government institutions, local governments, and other positions, in accordance with BRI's articles of associations and prevailing regulations.

Within the period of 5 (five) years prior to the appointments, members of the BRI's Board of Directors:

- Has never been declared as bankrupt.
- Has never been a member of the Board of Directors, member of the Board of Commissioners, or member of Supervisory Board that is guilty for causing the bankruptcy of a Company.
- Has never been punished for a criminal act that inflicts loss in the state's finance and/or/SOEs and/or those related to the financial sector.

The Board of Directors' Meeting Ethics

The Board of Directors regularly holds internal meetings to discuss matters requiring the Board's consideration and to discuss other strategic plans.

The Board of Directors' Meeting Ethics

Based on Article 13 of the Articles of Association, BRI has stipulated the Board of Directors' meeting ethics, as follows:

1. The Board of Directors' meeting can be held anytime when deemed necessary as requested by one or more member(s) of the Board of Directors, or by written request from one or more member(s) of the Board of Commissioners by indicating the matters to be discussed.
2. The call for the Board of Directors' meeting must be done by a member who has the authority to represent the Board of Directors.
3.
 - a. The call for the Board of Directors' meeting must be done in written form and to be submitted or directly handed over to each member of the Board of Directors with sufficient proof of receipt, by documented postal or courier service, telex, facsimile, or e-mail no later than 3 (three) days before the meeting takes place, not counting the day of invitation and the day of meeting or in a shorter period in a case of urgent circumstances.
 - b. The said meeting call is not necessary for meetings that have been scheduled by previous Board of Directors' resolution or when all members of the Board of Directors were present in the meeting.
4. The call for the Board of Directors' meeting must state the meeting's name, date, time, and place. The Board of Directors' meetings can be held where the Company resides or where the Company's business activities take place.

Corporate Governance Structure and Mechanism

5. All Board of Directors' meetings are chaired by the President Director, and in the case of the President Director's absence or unavailability, which does not need to be confirmed to a third party, the Board of Directors' meetings will be chaired the Vice President Director. In the case of the Vice President Director's absence or unavailability for any reason, which does not need to be confirmed to a third party, the Board of Directors' meetings will be chaired by a member of the Board of Directors present and appointed at the meeting.
6. Only other members of the Board of Directors with a Letter of Authority may represent a member of the Board of Directors in the Board of Directors' meeting. A member of the Board of Directors can only represent one other member of the Board of Directors.
7. Meeting of the Board of Directors is valid and entitled to produce binding resolutions if attended and represented by more than half of the total members of the Board of Directors.
8. Decisions in meetings of the Board of Directors shall only be taken by consensus. If a consensus cannot be achieved, the decision should be taken by voting, with more than half affirmative votes from the total valid votes cast at the meeting.
9. If the affirmative votes are equal to those not in favours, the meeting's chairman will decide.

Board of Directors' Meetings and Attendance

Record of Directors' Attendance in BoD Meetings

No	Director	Position	Number of Meetings	Number of Attendance	Attendance (%)
1.	Sofyan Basir	President Director	56	48	85,71%
2.	Sarwono Sudarto	Director of Operations	56	51	91,07%

Board of Directors' Training Program

As for the members of Board of Commissioners, BRI provided two types of training for the Board of Directors; the Company Introduction Program and Competency Training Program.

Company Introduction Program

A company introduction program is provided to the members of the Board of Directors during the first time of appointment. This program consists of presentations, meetings, company visits and review of documents or other programs. The Corporate Secretary is responsible for conducting this program.

The program generally aims to provide brief insight to the new members of the BRI's Board of Directors for immediate contribution to BRI.

Information or knowledge base in the introduction program include: information or internal knowledge of the Company, External Information of the Company, and the introduction to documents related to the implementation of good corporate governance.

Competency Training Program

BRI provides training programs to support efforts in enhancing the Board of Directors' knowledge on current affairs as well as the development of the banking industry, economic, social development and their impacts on the Company's business development, along with other information related to Board of Directors' duties.

BRI takes into account several parameters in carrying out its Training Program:

- The Training Program is held to improve the Board of Directors' work function and effectiveness;
- The costs for the Training Program are included in the Board of Directors' Work Plan and Budget;
- All Board members participating in the Training Program including and not limited to seminars, trainings and workshops, are expected to share the information and knowledge to other Board Members, who did not participate in the Program;
- The materials of the Training Program must be well-documented by the Corporate Secretary and must always be available anytime it is needed.

Corporate Governance Structure and Mechanism

Below is the 2013 BRI's Board of Directors' Training Recapitulation:

No.	Date	Name of Participant	Subject of Training	Location
1	21 - 22 May 2013	Randi Anto and A. Toni Soetirto	World Hajj and Umrah Convention (WHUC) 2013 - Hajj People	London
2	22 - 23 August 2013	Randi Anto and A. Toni Soetirto	Bancassurance Distribution and Channel Management - UNI Strategic Pte. Ltd	Hong Kong
3	17 - 18 October 2013	Suprajarto	41th EFMA Congress Multidistribution	Paris

Board of Directors' Performance Assessment

The Board of Directors' Key Performance Indicator (KPI)

1. The availability of the Bank's Long Term Plan (Corporate Plan)
2. The availability of the Bank's Medium term plan (RBB/ Bank Business Plan)
3. The availability of the Company's Budget and Work Plan (RKAP)
4. The Company's Performance is achieved in line with the Bank's soundness, which encompasses risk profile, Good Corporate Governance (GCG), Profitability and Capitalization
5. The availability of the Company's management report and documents
6. The availability of explanations regarding the Company's management practice
7. Follow-ups on audit findings
8. The execution of the Substitute Directors' duties
9. The achievement of the Company's targets.

The Board of Directors' Assessment Mechanism

The Assessment is a collegial work result from all members of the Board, reflected annually as a unity in the implementation of the Company's Budget and Work Plan. The Assessment is conducted towards the Bank's soundness, which encompasses, risk profile, GCG, profitability and capitalization.

Assessor

The Board of Directors' assessors are the Board of Commissioners, the GMS, and Bank Indonesia.

Board of Directors' Remunerations

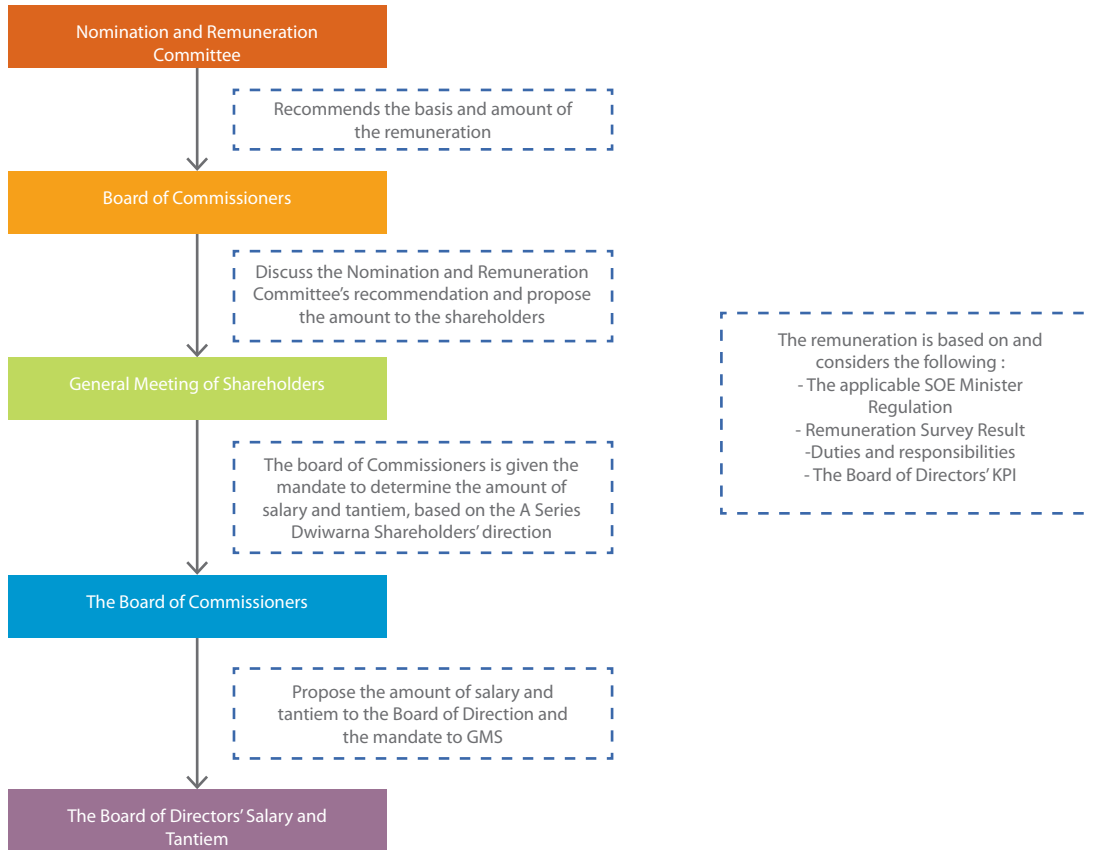

Procedures/Methods to Establish the Board of Directors' Remunerations

The Procedures to establish BRI's Board of Directors Remunerations are carried out through the following steps:

1. The Nomination and remuneration committee evaluates the remunerations policies applied for the Board of Directors.
2. The Nomination and remuneration committee provides recommendations regarding the remunerations policies for the Board of Directors to the Board of Commissioners and provides recommendations (if available) on the provision of options, such as stock options to the Board of Directors.
3. The Board of Commissioners submits recommendations for remunerations including honorarium and tantiem for the GMS to approve.
4. As for facilities related to remuneration that include vehicles, health insurance, phone credit, club membership and post-tenure allowance for members of the Board of Directors are proposed by the Nomination and Remuneration committee to obtain the Board of Commissioners' approval by previously consulting with the Serie A Dwiwarna Shareholders.

Corporate Governance Structure and Mechanism

The Board of Directors' Remunerations Procedures Chart

The Board of Directors' Remuneration Structure

The establishment of remuneration structure for the Board of Directors refer to rules stipulated in the Ministry of SOE Regulation no. PER-07/MBU/2010 on Income Guidelines for Directors, Commissioners, and the Supervisory Board of SOE's, which has been amended with PER-04/MBU/2013.

Based on the regulation, the principles to establish the Board of Directors' income are set by the General Meeting of Shareholders. The following are omponents in the Board of Directors income:

1. The Directors' salary proportion is 90% of the President Director's.
2. Directors' Bonus
 - a. Members of the Board of Directors have the rights to Religious Holiday's bonuses. The amount for this bonus is a maximum of twice the salary receives, with consideration to the company's capabilities.
 - b. Members of the Board of Directors have the rights to Annual Leave Bonuses. The maximum amount for this bonus is equal to the salary receives. The bonus will still be given even if the member does not use his/her rights or has not been granted leave due to the Company's interests.
 - c. Members of the Board of Directors are given extended leave bonus to a maximum of twice their salaries. The extended leave bonus will still be given even if the member does not use his/her rights or has not been granted leave due to the Company's interests.
 - d. The extended leave bonus is given after the member of the board has been appointed for a period of 3 (three) consecutive years in one position.
 - e. Members of the Board of Directors are given communications allowance at cost.
 - f. Members of the Board receive post-tenure allowance at the end of their tenures. The allowance is given in the form of memberships in an insurance program or pension saving. The Company pays for the Premium or yearly dues within the maximum amount of 25% of the Board member's annual salary.

Corporate Governance Structure and Mechanism

- g. Members of the Board are provided with monthly official housing compensation at the amount of 30% of monthly salary.
- h. Members of the Board are given utility costs allowance at the amount of 30% of the housing allowance.
- 3. Board of Directors' Facilities
 - a. The Company provides 1 (one) official vehicle, including maintenance and operational costs for each member of the Board. Decisions regarding types of vehicle and the amount are made with the consideration to the Company's financial capabilities.
 - b. The Company provides health facilities for each member of the Board, in accordance with the company regulations.
 - c. The Company provides legal aid facility for each member of the Board in any case of legal situations that is related to his/her position, the Company's objectives or business activities.
 - d. The Company provides a maximum of 2 (two) Club Membership/Corporate Members facilities to members of the Board, taking into account the Company's financial capabilities. The Club Membership facilities given are only in enrolment fee and annual fee
- 4. Tantiem/Performance Incentives
- 5. The following are process to establish tantiems/performance incentives for the Board of Directors as stipulated in the Ministry Regulations:
 - a. Tantiems are granted to members of the Board of Directors when the SOE gains profit in the relevant fiscal year.
 - b. Tantiems are given to the members of the Board of Directors if the Key Performance Indicators reaches more than 70%, and the soundness level exceeds 70.
 - c. The maximum achievement of key performance indicators taken into account in the tantiems is 150%.
 - d. The composition for tantiem is as follows:
 - 100% for President Director
 - Members of the Board of Directors receives 90% of the President Director's tantiem
 - e. BRI can provide tantiems following improvement in performance, even though it still experiences losses during the relevant fiscal year or accumulated losses from the previous year.

Remuneration Structure of (types and amount) the Board of Directors According to GMS

Short Term

Types of Remunerations and other Facilities	Amount Received in 1 year	
	Board of Directors	
	Person	Rp. million

6.	A. Toni Soetirto	Nil
7.	Lenny Sugihat	Less than 5%
8.	Djarot Kusumayakti	Nil
9.	Asmawi Syam	Nil
10	Suprajarto	Nil
11	Gatot Mardiwasiso	Less than 5%

Relationship of The Board of Commissioners and the Board of Directors

Work Relations

As two separate entities, both the Board of Commissioners and Board of Directors have different set of duties and responsibilities in daily tasks. The Board of Commissioners' main tasks are to supervise and provide recommendations, while the Board of Directors' are to carry out the General Meeting of Shareholders' decisions, the Board of Commissioners' instructions and manage the Company's operations. Nevertheless, both parties must continuously maintain coordination and work together to reach the company's targets and maintain the company's sustainability in the long run.

To this end, the Board of Commissioners and the Board of Directors have a check and balances work relationship, in relation to the performance of duties and responsibilities of the company's management, based on transparency and mutual respect. The Board of Commissioners and Board of Directors conduct regular meetings to synchronize vision and make important decisions regarding the sustainability of the company's business and operations.

Supervision and advisory by the Board of Commissioners are conducted for the benefit of the Company and in accordance with the Company's objectives. The supervisory duties include matters related to the Board of Directors' management policies, the Board of Directors management activities, on the Company or its business lines. To this end, all measures taken by the Board of Directors are within the supervisory scope of the Board of Commissioners. Particularly those related to the Bank's Business Plan (RBB) and/or the Company's Work Plan and Budget (CBP), including its implementation.

Financial Relations and Family Relations

There are no members of BRI's Board of Commissioners and Directors that hold concurrent positions as commissioners, directors or executives in other banks/institutions, nor having any first or second-degree family relations with fellow members of the Board of Commissioners and/or Board of Directors. This ensures BRI Directors to continuously act independently, without any conflicts of interests in carrying out duties and responsibilities independently and in a critical manner, both in the relationships between the directors or with the Board of Commissioners. BRI's Board of Directors is led by a President Director who is independent of the controlling shareholders.

Members of the Board of Directors do not hold any position as President Director or any other director positions in any State-owned Enterprises, regional owned enterprises, private companies or any other positions related to the management of BRI. This also applies for other structural or functionary positions in the central and local government institutions, as well as other positions, in accordance with BRI's statutes' regulations and prevailing regulations.

BRI's Board of Directors is chaired by a President Director who is independent from the controlling shareholder.

To maintain independence in its functions and to withhold the check and balance mechanism, BRI prohibits any types of relationship in between the Board of Commissioners and the Board of Directors

Joint Meeting of the Board of Commissioners and Board of Directors

As commonly found in companies that apply dual entity system, BRI clearly categorize the duties and responsibilities of both the Board of Commissioners and the Board of Directors in their daily operations. To synchronize their vision and resolve any important issues related to the company's business conduct and operations, the Board of Commissioners and the Board of Directors conduct regular joint meetings.

The Boards' joint meetings are held to discuss various topics related to work plans, operations, business opportunities, and other strategic issues that require the Board of Commissioners' approval. The meetings are also used to discuss the Board of Directors' periodic reports and to provide them with feedbacks, notes, and advices that are compiled in the minutes of meeting.

The meeting resolutions are binding and achieved by consensus or resolved with voting. They are to be followed up and implemented. In the voting process, any members of Board of Commissioners with conflicts of interest may not cast a vote, and explanation regarding the matter must be recorded in the minutes of meeting. All rules and guidelines regarding the boards' relations are stipulated in the Board Charter.

Relationship of The Board of Commissioners and the Board of Directors

Committees under The Board of Commissioners

The Board of Commissioners' Committees

Basis of Committee Establishment

The formation of Audit Committee refers to the following regulations:

1. Decision of BAPEPAM Chairman Number KEP-643/BL/2012 dated 7 December 2012 on Audit Committee Establishment and Duty Implementation Guidelines.
2. Bank Indonesia Regulation No. 8/4/PBI/2006 dated 30 January 2006 on Good Corporate Governance Implementation for Commercial Banks, amended by Bank Indonesia Regulation No. 8/14/PBI/2006 dated 5 October 2006.
3. SOE Minister Regulation No. PER-01/MBU/2011 dated 1 August 2011 on Good Corporate Governance Implementation in SOEs, amended by SOE Minister Regulation No. PER-09/MBU/2012 dated 6 July 2012.
4. PT Bursa Efek Jakarta (IDX) Board of Directors' Decision No KEP-305/BEJ/07-2004 dated 19 July 2004 concerning Regulation I-A on Listing of Shares and Equity Securities Other Than Shares Issued by Listed Company.

The Audit Committee establishment strengthens the Board of Commissioners' oversight function and enhances public trust to the Bank's management. The Committee monitors continuous improvement on policies, procedures, and practices across all levels of the organization to ensure sound management of the Bank as well as a robust risk management.

Audit Committee Charter

Based on the Audit Committee Charter 2011, the Audit Committee is established by BRI's Board of Commissioners to support the Board of Commissioners' effectiveness in carrying out its roles and responsibilities, particularly with respect to its oversight function in order to enhance public trust to the Bank's management.

Throughout 2013, the Audit Committee has carried out functions, duties, and responsibilities in accordance with the Audit Committee Charter. In several meetings with the Operational Units, the Audit Committee through the Board of Commissioners has requested the attendance of management staff members to provide information regarding the Bank's internal control and risk management.

Audit Committee Structure and Membership

The Audit Committee is consist of a Chairman, occupied by an Independent Commissioner, and members that consist of two Independent Commissioners, two Commissioners, and three non-Commissioners with expertise in finances, accounting, legal, and banking. The composition has met the requirements set forth in the Chairman Decree of Capital Market and Financial Institutions Supervisory Board No. Kep-29/PM/2004 and Bank Indonesia Regulation No. 8/4/PBI/2006, as amended by Bank Indonesia Regulation No. 8/14/PBI/2006. RMSC Independency

RMSC strives to uphold independency in carrying out its duties and in reporting its work results to the Board of Commissioners. All members of the Committee have no affiliation with the Board of Directors and are collectively competent as well as experienced.

RMSC members are professionals with sufficient competency in their respective fields with minimum 5 years experience. The members do not have professional or familial relationship with other members of the Board of Commissioners and Board of Directors. Members of RMSC have varied expertise background, such as strategic management, performance management, risk management, banking/finance, and accounting. The range of competency ensures recommendations' quality and is sources of BRI's risk management improvement.

Duties and Responsibilities

Based on RMSC Charter, RMSC is established to assist the implementation of duty and responsibility of the Board of Commissioners in evaluating and ensuring that the Bank's risk management has met adequacy requirements procedure and risk management methodologies, keeping the Bank's activities manageable within the acceptable risk limit and beneficial to the Bank.

Overall, duties and responsibilities of RMSC include:

1. Periodically evaluate and review risk management policies; provide recommendations to the Board of Commissioners as a basis of consideration to make necessary improvements on risk management policies.
2. Oversee the adequacy of identification, measurement, monitoring, control, and risk management information systems.
3. Evaluate and analyse the Bank's risk profile report on quarterly basis; provide recommendations for necessary improvements and enhancements.
4. Review and evaluate the Board of Directors' accountability report on risk management implementation at minimum on quarterly basis.
5. Evaluate and analyse the Board of Directors' recommendation on funding for related parties that require approval from the Board of Commissioners.
6. Evaluate and review the Work and Budgeting Plan, Bank's Business Plan, and Corporate Plan to obtain the Board of Commissioners' approval.
7. Monitor and/or respond to the Bank's Business Plan and Work and Budgeting Plan realization.
8. Evaluate and analyse loan approval proposals for loan over a certain amount that requires consultation with the Board of Commissioners.
9. Evaluate monitoring results on the Bank's compliance with Bank Indonesia's regulations and other laws.
10. Carry out other assignments from the Board of Commissioners

Committees under The Board of Commissioners

RMSC Meeting Frequency and Attendance

Considering the extensive scope and close link between the Bank's business risks, issues related to risk management are discussed not only in RMSC meetings, but also in the Board of Commissioners' meetings.

In 2013, RMSC has convened, both internally, or together with related Divisions/Operational Units to evaluate the implementation and risk management practices covering Market, Liquidity, Credit, Operational, Legal, Compliance, Strategic, and Reputational Risks as stipulated by prevailing Bank Indonesia regulations.

RMSC held 5 (five) meetings in 2013, with the following record of attendance:

No.	Name	Position	Total Meeting	Attendance	Attendance (%)
1.	Aviliani	Chair	16	16	100 %
2.	Bunador Sanim	Member	16	16	100 %
3.	Adhyaksa Dault*	Member	10	8	80 %
4.	Ahmad Fuad**	Member	6	6	100 %
5.	Mustafa Abubakar	Member	16	15	94 %
6.	Vincentius Sonny Loho	Member	16	13	81 %
7.	Ridwan Darmawan Ayub	Member	16	15	94 %
8.	I Gde Yadnya Kusuma	Member	16	14	88 %
9.	Pamuji Gesang Raharjo	Member	16	16	100 %

*Serves as Member of Risk Management Supervisory Committee as of 16 April 2013

** No longer serve as Member of Risk Management Supervisory Committee as of 15 April 2013

Committees under The Board of Commissioners

RMSC Activity Report

Throughout 2013, RMSC has performed the following:

1. Developed RMSC 2013 work plan and program, which elaborated the NRC's Charter.
2. Developed the Board of Commissioners' 2012 work plan and program together with Audit Committee, Nomination and Remuneration Committee, and Board of Commissioners' Secretary.
3. Conducted review to grant the Board of Commissioners' approval to Risk Management Implementation in the Use of Information Technology Policy.
4. Conducted review to grant the Board of Commissioners' approval to the Bank's Know Your Customer (KYC) Implementation Guideline Policy
5. Responded and provided recommendation on loan facility that the Board of Directors consulted with the Board of Commissioners.
6. Responded Conflict of Interests Guideline Policy draft.
7. Evaluated the Bank's Loan Portfolio Performance Report.
8. Evaluated the Board of Directors' Circular Letters concerning risk management policy implementation.
9. Reviewed the Bank's risk profile quarterly report.
10. Reviewed monthly and semester report from Compliance Director.
11. Together with Audit Committee, Nomination and Remuneration Committee, and the Board of Commissioners' Secretary including staff members reviewed the Bank's Business Plan and Work, and Budget Plan to grant the Board of Commissioners' approval.
12. Together with Audit Committee, Nomination and Remuneration Committee, and the Board of Commissioners' Secretary including staff members reviewed the Bank's monthly performance progress; provided recommendations and rendered opinions based on the review to the Board of Commissioners, to be clarified by the Board of Directors during joint meeting of the Boards.
13. Discussed enhancements on Risk-Based Bank's Soundness Assessment Guideline.
14. Carried out other assignments from the Board of Commissioners.

Committees under The Board of Commissioners

BRI has established seven committees under the Board of Directors to ensure effectiveness of operational duties and responsibilities execution.

Risk Management Committee (RMC)

RMC is the highest committee in BRI's risk management system. It is composed of all Board of Directors' members and appointed executive officers from one level below the Board of Directors. RMC is a non-structural and independent from the Operational Working Units.

RMC is mainly responsible to provide recommendations to the President Director concerning the formulation of policies, enhancements of policy implementation, evaluation of risk profile condition and progress, and other recommendations for improvements.

In risk management implementation, RMC has established sub-RMCs that are responsible to provide recommendations to BRI's President Director. The Sub-RMCs are:

1. Operational Risk Management Committee (ORMC) – a sub-RMC that focuses on operational risk exposure and operational risk management implementation. Operational risk comprises operational, legal, reputational, strategic, and compliance risks.
2. Credit Risk Management Committee (CRMC) – a sub-RMC that focuses on credit risk exposure and credit risk management implementation.
3. Market Risk Management Committee (MRMC) - a sub-RMC that focuses on market risk exposure and market risk management implementation. Market risk comprises foreign exchange, interest rate, and liquidity risks.

RMC Structure and Membership

The composition and membership of sub-RMCs are prescribed in the Board of Directors Decree No.519-DIR/DMR/07/2011 dated 18 July 2011.

Chair	Position
Chair I	Compliance Director (also serves as member with voting right)
Chair II	Credit Risk Control Director (also serves as member with voting right)
Secretary I	Head of Risk Management Division (also serves as member with voting right)
Secretary II	Head of Loan Administration Division (also serves as member with voting right)
Permanent members with voting right	1) Finance Director
	2) Operations Director
	3) Commercial Business Director
	4) SMEC Business Director
	5) Consumer Business Director
	6) Institutional and SOE Business Director
	7) Network and Services Director
Permanent members without voting right	1) Internal Audit Head
	2) All Heads of Divisions (excluding Risk Management Division and Credit Administration Division Heads)
	3) Special Branch Manager
	4) Regional Manager of DKI Jakarta
	5) Inspector of DKI Jakarta
Temporary Members	Invited based on relevance with issues

RMC Authority and Responsibilities

1. Provide recommendations to President Director concerning Risk Management Policy formulation and amendment if necessary. This includes implementation of risk management policies, risk management strategies, and contingency plan should abnormal external condition occurs.
2. Provide recommendations to President Director concerning risk measurement methodology and its adjustment.
3. Recommend risk limit and its adjustment.
4. Report risk profile and result of risk monitoring activities including recommendations for adjustments if necessary.

Committees Under the Board of Directors

Committee Work Program

RMC holds periodical meeting at least once every 3 months. RMC discusses, reviews, and approves suggestions and recommendations presented in the meeting in accordance with prevailing stipulations. Suggestions and recommendations include, among others, risk management policies, strategies, and procedures.

Details of Committee Activities

RMC meeting can be held if attended by at least 2/3 of permanent members without voting rights, including 3 (three) Directors, one of which is the Compliance Director. RMC meeting is led by RMC Chairman, if the Chairman is unable to attend a meeting, Deputy I or Deputy II may lead the meeting.

RMC meeting resolution is taken by consensus. If agreement is not achieved, permanent members with voting rights may carry out voting. This mechanism is deemed valid if voting is attended by over 50% permanent members with voting rights.

RMC Meeting Agenda

No	Activity	Date	Agenda
1	RMC I-2013	13 Feb 2013	<ol style="list-style-type: none"> 1. BRI Risk Profile Quarter IV-2012 2. Issue discussion (retail and medium loans, fee-based income from e-channel increase, mitigating loss potential due to foreign exchange movement, business continuity management implementation) 3. Capital analysis and stress test 4. Recommendations and Decisions by RMC
2	RMC II-2013	29 May 2013	<ol style="list-style-type: none"> 1. BRI Risk Profile Quarter I-2013 2. Issue discussion (CASA, classified loan, employee awareness to fraud) 3. Capital analysis and stress test 4. Recommendations and Decisions by RMC
3	RMC III-2013	31 July 2013	<ol style="list-style-type: none"> 1. BRI Risk Profile Quarter II-2013 2. Issue discussion (LDR in rupiah, Rupiah exchange rate depreciate against USD) 3. Capital analysis and stress test 4. Recommendations and Decisions by RMC
4	RMC IV-2013	29 Oct 2013	<ol style="list-style-type: none"> 1. BRI Risk Profile Quarter III-2013 2. Issue discussion (fraud in operational units, preparation towards 2014, cash ratio) 3. Capital analysis and stress test 4. Recommendations and Decisions by RMC

Credit Policy Committee (CPC)

CPC assists BRI's Board of Directors in formulating credit policies and provide recommendations with respect to credit policies.

CPC Structure and Membership

CPC structure and membership as established by the Board of Directors DecreeNo S.114-DIR/ADK/06/2012 dated 29 June 2012 is:

Chairman	: President Director
Secretary	: Head of Loan Administration Division (also serves as Member)
Permanent Members	: - 7 Directors responsible for Business, Finance, and Compliance - 17 Division Heads of Business, Strategic Planning, and Legal.

CPC Duties and Responsibilities

1. Provide recommendations to the Board of Directors in defining BRI's Credit General Policy (KUP), especially relating to prudential principle formulation in credit as prescribed by the policy.
2. Ensure that KUP is applied and implemented consistently; define the problem-solving mechanism to address any barriers or constraints in KUP implementation. CPC also periodically reviews KUP and recommend necessary adjustment or improvement to the Board of Directors.
3. Review and evaluate:
 - a. Appropriateness of credit authority enactment
 - b. Appropriateness of loan approval, development, and quality granted to parties related with the Bank and certain large debtors.
 - c. Appropriateness of Legal Lending Limit implementation
 - d. Compliance with prevailing laws and regulations concerning loan approval

Committees Under the Board of Directors

- e. Settlement of non-performing loans based on mechanism established in KUP
- f. Adequacy of Provision for Loss of Productive Assets/Allowance for Impairment Losses
- g. Certain large debtors and loans in credit list under special supervision
4. Review effectiveness of Credit Internal Control System
5. Administer periodic written report and recommendations for improvements to the Board of Directors with copies to the Board of Commissioners, concerning:
 - a. Monitoring result on KUP application and implementation
 - b. Result of monitoring and evaluation on point 3 above.
4. Manage process of KUP submission and approval to the Board of Directors and Board of Commissioners
5. Document all CPC minutes of meeting to be reported to President Director
6. Generate and circulate minutes of meeting 1 (one) week at the latest from the date of meeting, manage, and record CPC documents
7. Follow up CPC meeting resolutions to be incorporated into credit policy

CPC Meeting Agenda

1. Discuss final draft of KUP amendment/revision, if any, before the validation into the Board of Directors Decree
2. Discussed any important and urgent matters that require immediate response

CPC Work Program

With respect to the CPC functions, duties, and responsibilities as described above, the CPC's work plan consists of CPC meetings. The daily implementation of CPC duties and responsibilities is carried out by CPC Secretary and related Divisions.

CPC Activities

CPC meetings are held in accordance with the following rules:

1. CPC meeting is held when changes/revisions on KUP are made or when urgent matters that require immediate discussion by CPC take place
2. CPC meeting is chaired by President Director as CPC Chairman; if the Chairman is unable to attend, the meeting may be chaired by Credit Risk Control Director or other Directors members of the CPC
3. Resolutions of a CPC meeting are valid if the meeting is attended by 2/3 of the members, including a minimum of 3 (three) Directors. If any Division Heads who are members of the CPC are unable to attend, he/she may appoint a proxy.
4. CPC resolutions are taken by consensus and if agreement is not achieved, the final resolution will be taken in the Board of Directors' meeting.

CPC Work Mechanism

With respect to CPC functions, duties, and responsibilities, the daily implementation of CPC duties and responsibilities is carried out by CPC Secretary and related Divisions. CPC Secretary performs the following:

1. Formulate the CPC meeting material, define the CPC meeting agenda, and organize CPC meetings
2. Create and prepare the KUP draft, to be discussed in CPC meeting, if any changes/revisions are made to KUP
3. Present issues identified in KUP implementation to be resolved and to seek recommendations for improvements

CPC Meeting Frequency

In 2013, there are no CPC meeting as there were no changes in credit policies.

Credit Committee

Credit Committee is an operations committee that assist the Board of Directors in evaluating and/or considering loan application for an amount and/or type of loan established by the Board of Directors.

Credit Committee Structure and Membership

Credit Committee structure and membership are established through the Board of Directors Decree No.S.114-DIR/ADK/06/2012 dated 29 June 2012, with the following details.

Based on its membership and authority, Credit Committee at the Head Office is divided into:

1. BRI Credit Committee (BRI-CC)
2. Board of Directors Credit Committee (BOD-CC)
3. Division Credit Committee (Division-CC)
4. Special Branch Office Credit Committee (KCK-CC)

Based on its membership and authority, Credit Committee in Regional Office level is divided into 3 (three) Credit Committee:

1. Regional Office Credit Committee
2. Regional Office Credit Committee for Restructuring
3. Regional Office Credit Committee for Write-Off

Committees Under the Board of Directors

The following is composition of BRI and Directors Credit Committee (CC).

Credit Committee	Member	Decision Maker
BRI Credit Committee (for loan approval)	Commercial Business Director	President Director
	Institutional and SOE Business Director	
	MSME Business Director	
	Consumer Business Director	
	Credit Risk Management Director	
BRI Credit Committee (for Money Market Line and Treasury Product approval)	Finance Director	President Director
	Commercial Business Director	
	Institutional and SOE Business Director	
	MSME Business Director	
	Consumer Business Director	
	Credit Risk Management Director	
Directors Committee 1 (KKD-1) (for performing loan – medium loan approval initiated by Regional Office and Program & Partnership Business Division)	MSME Business Director	
	Commercial Business Director	
	Credit Risk Management Director	
Directors Committee 2 (KKD-2) (for performing loan – medium and corporate loan approval initiated by SOE Business Division)	Institutional and SOE Business Director	
	Commercial Business Director	
	Credit Risk Management Director	
Directors Committee 3 (KKD-3) (for performing loan – medium loan approval initiated by Corporate Business and Agribusiness and consumer loan Divisions)	Commercial Business Director	
	Consumer Business Director	
	Credit Risk Management Director	
Directors Credit Committee for Loan Restructuring and Settlement of Non-Performing Loans	MSME Business Director	
	Commercial Business Director	
	Institutional and SOE Business Director	
	Consumer Business Director	
	Credit Risk Management Director	

Credit Committee Duties and Responsibilities

Duties of the Committee

1. Approve or reject loan application within the authority set out by the Board of Directors
2. Coordinate with Assets and Liabilities Committee (ALCO) for loan approval with certain amount as set out by ALCO

Credit Committee Responsibilities:

1. Grant loan decisions based on professional expertise with honesty, objectivity, thoroughness, and conscientious
2. Declined requests and/or influence from interested parties to grant loan for the purpose of formality
3. Sign Loan Decision form to certify loan decision and as enactment of Credit Committee's responsibility; therefore, prior to signing, Credit Committee must:

- a. Ensure that granted loan facility is in compliance with banking regulations and meets robust credit principles
- b. Ensure that the approval of loan facility has been in line with KUP-BRI, PPK, and other loan policies.
- c. Ensure that the approval of loan facility is based on honesty, objective, thorough, and conscientious examination, devoid of influence from parties related with loan applicants.

Credit Committee Work Program

Credit Committee organizes meeting to decide loan facility within a certain amount. Credit Committee meeting follows a number of rules:

- Meets quorum requirement
 - a. Attended at minimum: by 60% of committee members for BRI Credit Committee
 - b. Attended by all committee members for committees other than BRI Credit Committee
- Decision-making:
 - a. Decisions in Directors and BRI Credit Committee follow the favour of the majority; the meeting will ask for the votes of members who are unable to attend by the circular decision.
 - b. Aside from BRI Credit Committee, loan decisions shall be taken unanimously.

Committee Activities

Credit Committee convenes to decide on new loan application or top-up facility. The amount of loan that

Committees Under the Board of Directors

requires consultation with the Board of Commissioners starts from Rp1 (one) trillion; loan consultation is also conducted if Directors and BRI Credit Committee BRI or the Board of Directors deems there are matters necessary to be consulted. The said amount applies for single debtor, group, nucleus as well as SOE or government debtors.

Committee Meeting Agenda

1. Provide loan decision for amount within the authority of each committee
2. Escalate issues that require CPC decision

Credit Committee Decisions in 2013:

Period	BRI's Credit Committee Decision	Directors Credit Committee Decision	Directors Credit Committee for Loan Restructuring
2013	258	39	26

Assets and Liabilities Committee (ALCO)

Asset and Liabilities Committee (ALCO) is responsible to assist BRI's Board of Directors in managing assets and liabilities in integrated manner, determining deposit and lending interest rate, determine mismatch policy, net open position and interest rate risk, manage and establish balance sheet structure and capital, and provide recommendations to the Board of Directors to determine policies established in ALCO meetings.

ALCO Structure and Membership

ALCO organizational structure is established by the Board of Directors Decree No.650-DIR/TRY/10/2009 dated 30 October 2009. In summary, ALCO structure is consist of:

Chairman (also serves as member)	: President Director
Substituting Chairman I (also serves as member)	: Finance Director
Substituting Chairman II (also serves as member)	: Substituting Officer of Finance Director (in accordance with the Decree on Substituting Director)
Secretary (also serves as member)	: Head of Treasury Division
Member	: - Directors - All Heads of Business, Services, and Operations Divisions - Regional Managers in Jakarta - Managers of Special Branch Offices

Assets and Liabilities Management (ALM) :

A group of analysts to support ALCO. As a supporting unit, ALM is responsible to analyse, among others sources and use of funds, Maturity and Re-pricing Gap, Primary and Secondary Reserve; conduct NOP monitoring; develop scenarios for deposit and lending interest rate as well as alternative pricing, define funding strategy; prepare data, presentation material, and other facilities needed in ALCO meetings.

ALCO Authority, Duties, and Responsibilities

1. Determine BRI's integrated asset and liability management policy
2. Determine prime interest rate for deposit, lending, and fund transfer price
3. Determine mismatch and net open position (NOP) policies.
4. Manage and determine balance sheet and capital structures.
5. Ensure Asset and Liability management has been in line with policies set in ALCO meetings

ALCO Work Program

ALCO periodically holds meetings to discuss BRI's assets and liabilities management with respect to the Board of Directors' strategy in:

- Bank's financial performance growth.
- Bank's portfolio composition and growth
- Risk management (limit mismatch and net open position guideline).
- Deposit interest rate, lending interest rate, and fund transfer price.

Committees Under the Board of Directors

Committee Activities

- a. BRI's ALCO meeting is chaired by ALCO Chairman. If the Chairman is unable to attend, meeting is chaired by Substituting Chairman I, or Substituting Chairman II provided that Substituting Chairman I is not present as well.
- b. ALCO secretary coordinates ALCO meeting; duties include prepare the meeting, prepare and present meeting material, and generate and circulate minutes of meeting. If ALCO secretary is not present, Head of Treasury Division as ALCO Secretary may be represented by Deputy of Treasury Division Head, or Head of Investment Banking Desk, or Head of Assets and Liabilities Management.
- c. ALCO convenes on a monthly basis.
- d. ALCO meetings need to be attended by at least 2/3 of ALCO members. Heads of Divisions, members of ALCO, who are unable to attend, may appoint proxy from Deputy level or at least Group Head .
- e. ALCO meeting resolutions are taken by consensus. If no agreement is achieved, ALCO meeting resolutions shall be valid if approved by 2/3 of the attending members including 2 Directors – one of which is the Chairman/Substituting Chairman.

Committee Meeting Agenda

Human Resource Policy Committee

Human Resource policy committee is an operations committee authorized to determine HR policies. The committee was established in 2008 with the purpose to improve effectiveness, efficiency, objectivity, and transparency of decision-making relating to HR matters and to provide assurance for stakeholders that all HR-related decisions have complied with GCG principles.

HR Policy Committee Structure and Membership

Chairman	: President Director
Member	: All members of BRI's Board of Directors
Secretary	: Head of Human Resource Policy and Development Division
Deputy Secretary	: Deputy of Human Resource Policy and Development Division Head

HR Policy Committee Authority, Duties, and Responsibilities

As an operations committee in HR, the HR Policy Committee has the following authority:

1. HR-related decision making that includes HR planning, recruitment, selection, career development, performance management, welfare, industrial relation, assessment, and HR Information Management System (HR-IMS)
2. Decision-making in HR operations including transfer (promotion, rotation, demotion), performance evaluation, and disciplinary sanction for Executives of Echelon 1 and 2.

HR Policy Committee Work Program

Work program of HR Policy Committee includes formulation of policies in HR policies and operations. HR Policy Committee composition and membership are stipulated by the Board of Directors Decision Letter No. S.109-DIK/02/2008 dated 29 February 2008.

Committees Under the Board of Directors

HR Policy Committee Meeting Frequency

In 2013, HR Policy Committee convened 5 (five) times to discuss policy matters and 8 (eight) meetings discussing operations matters, with 100% attendance level across all members. Details of meeting and meeting agenda are as follows:

Policy		
No	Date	Agenda Item
1	15 February 2013 - 18 March 2013	Stipulation on Short Term Incentive Payment
2	01 May 2013- 31 May 2013	2012 Bonus for BRI's Employees
3	18 June 2013 - 16 July 2013	Stipulation on Short Term Incentive Payment for BRI Employees 2013

HR Policy Committee Program Realization

Throughout 2013, the Committee did not amend or stipulate new policies.

Information System and Technology Steering Committee (ITSC)

In accordance with Bank Indonesia Regulation No.9/15/PBI/2007 dated 30 November 2007 and Bank Indonesia Circular Letter No. 9/30/DPNP dated 12 December 2007, both concerning Risk Management Implementation in the Use of Information Technology by Commercial Banks, BRI has established Information System and Technology Steering Committee by the Decree of BRI's Board of Directors Nokep: 625-DIR/TSI/10/2009 dated 19 October 2009 on Information System and Technology Steering Committee PT Bank Rakyat Indonesia (Persero), Tbk.

ITSC is a committee responsible to provide directives and recommendations on IST policies, development, and implementation in BRI.

ITSC Composition and Membership

ITSC composition and membership are established based on

BRI's Board of Directors Decree Nokep: 625-DIR/TSI/10/2009 dated 19 October 2009, outlined as follows:

Chairman	: Director of Operations
Deputy	: Director of Compliance
Secretary	: Information System and Technology Division Head
Member	: 19 Division Heads consist of Business, Operations, and Internal Audit Divisions

Committee membership is ex-officio and committee members represent parties that interact directly with IST as partners or users.

Committees Under the Board of Directors

ITSC Authority, Duties, and Responsibilities

1. Recommend a long-term (5-year) BRI IST development objectives stated in BRI IT Strategic Plan;
2. Recommend a short-term (annual) and long-term (5-year) BRI IST development priority, in line with the Corporate plan and Bank's Business Plan implemented by BRI's management
3. Recommend changes to IST long-term plan and strategy following changes to BRI's business policy and strategy;
4. Review and recommend the Functional Work Plan and BRI IST Investments and Exploitation Plan for short term (annual) IST development, operations, and maintenance based on BRI ITSP;
5. Monitor and evaluate the implementation of BRI IST project development, ensuring alignment with established plan and strategy;
6. Periodically monitor and evaluate IST development realization managed by IST Division;
7. Monitor effectiveness of risk management steps over BRI's IT investments, ensuring that the investments would contribute to BRI's business objectives achievements;
8. Recommend IST issue resolution that users and IST division are unable to resolve in effective, efficient, and timely manner.

ITSC Work Program

ITSC work program is to conduct duties and responsibilities as set out in the committee meetings.

Realization of Work Program

ITSC meetings evaluate BRI's IT progress and IT issues as determined by meeting agenda. In ITSC meetings, the Board of Directors provide strategy direction especially concerning certain e-channel development that requires close attention of the Board. The Board of Directors also reminds that development of application may not undermine mandatory development.

ITSC Meeting Agenda

ITSC meeting agenda in 2013 are as follows:

Meeting Agenda		
No	Date	ITSC Agenda Meeting
1	29 April 2013 (ITSC I)	ITSC I 2013 Agenda: <ul style="list-style-type: none"> • ITSP 2008-2013 Realization & Development of ITSP 2014-2018 • IT Budget Realization 2013 • IT Project Implementation 2013 • IT Performance • DRC Live Production
2	12 November 2013 (ITSC II)	ITSC II 2013 Agenda: <ul style="list-style-type: none"> • Live DRC • IT application training for IT officers and e-channel at branch office level • BRI project progress status • Business initiative and implementation • BI Finding follow-up • CLAS Project • ITSP 2014-2018 • Mocash Application • CMS Application

Project Management Office (PMO) Steering Committee

PMO Steering Committee is the highest forum in project management at corporate level. PMO Steering Committee provides strategic directives in terms of project management. Strategic decisions relating to project management among others include investment decisions related to approval, adjustment, project dismissal, and project implementation.

Committees Under the Board of Directors

PMO Steering Committee Structure and Membership

Structure and membership of PMO Steering Committee are stipulated by the Board of Directors Decree No.647-DIR/REN/09/2011 dated 30 September 2011, outlined as follows:

- Chairman : President Director
 Member :- Director that serves as Head of PMO
 - Directors responsible over Working Units as Project Owners
 - Directors responsible over Working Units as Project Supporting Units
 - Head of Units as Project Owners
 - Head of Units as Project Supporting Units

Job Position Evaluation Committee

Job Position Evaluation Committee reviews and recommends the Job Position Category proposed by the Job Position Evaluation Team.

Job Position Evaluation Committee Structure and Membership

Based on the Board of Directors Decree Nokep. S.38-DIR/REN/05/2010 dated 19 May 2010 on Organization General Policy Implementation Guideline, the structure and membership of Job Position Evaluation Committee is as follows:

1. Director of Compliance
2. Director of Operations
3. Head of Strategic Planning and Business Development Division
4. Head of Human Resources Policy and Development Division

The membership is ex-officio and is not personal membership.

Committees Under the Board of Directors

Job Position Evaluation Committee Duties and Responsibilities

The following are duties of the Job Position Evaluation Committee:

1. Provide direction and input on Job Position Category proposal submitted by the Job Position Evaluation Team during the Job Position Evaluation Committee meeting.
2. Recommend the Job Position Category to be approved by BRI's Board of Directors through the Board of Directors' meeting. The Job Position Category decision is stipulated in the Board of Directors' Decree.

Job Position Evaluation Committee Work Program

The Job Position Evaluation Team conducts the Job Position Evaluation. The results are then presented to the Job Position Evaluation Committee.

Job Position Evaluation Committee Meeting Frequency

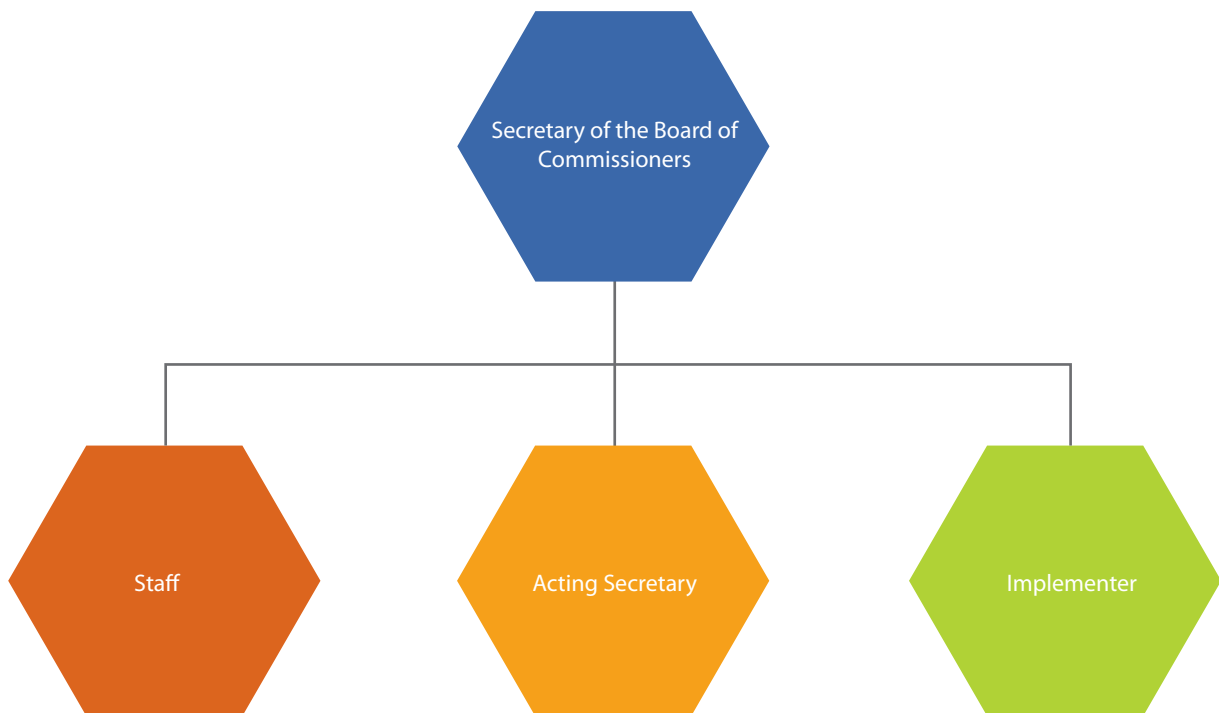

In 2013, Job Position Evaluation Committee held 2 (two) meetings with 100% attendance, and the following agenda:

No.	Date	Agenda
1.	5 June 2013	Result Report from Job Position Evaluation Team and Consultant
2.	13 June 2013	Revision over prior meeting

Secretary to the Board of Commissioners

As stated in the Board of Commissioners Guideline, Secretary to the Board of Commissioner's is position under the Board of Commissioners, appointed by the Board of Commissioners based on the recommendation made by Series A Dwiwarna shareholders, which costs incurred by the Bank. The Secretary is responsible to ensure seamless implementation of the Board of Commissioners' duties and responsibilities.

The following is the organizational structure of the Secretary of Board of Commissioners:

Secretary to the Board of Commissioners' Duties and Responsibilities

Overall, the duties are as follows:

1. Assist the Board of Commissioners to generate the Board of Commissioners' minutes of meeting
2. Coordinate the task execution with Staff Members, Secretary and Administer in BRI's Commissioners Bureau.
3. Coordinate the organization of the Board of Commissioners' meetings.
4. Coordinate the administrative, secretarial, and protocol duties of the Board of Commissioners.
5. Coordinate and follow-up requests and/or data/information collection from and/or to the management and external parties that are not included in Committees' duties, including information regarding regulations and stipulations relevant to the Board of Commissioners' duties and responsibilities.
6. Coordinate the budget formulation process and present the annual budget to the Commissioners Body as requested by the Bank's Corporate Secretary Division.
7. Coordinate compilation of input and suggestions for the General Meeting of Shareholders' agenda and material
8. Coordinate and follow up other tasks not included as duties of Committees under the BRI's Board of Commissioners.

Corporate Secretary

Basis of Reference

Corporate Secretary has a strategic role to ensure compliance and administrative procedures in decision-making as well as carrying out the corporate communications function to establish the Bank's goodwill. Regulatory requirements that serve as the basis of formation and enactment of the corporate secretary function among others are as follows:

1. Decision of Bapepam Chairman IX.I.4 No: Kep-63/PM/1996 concerning the Formation of Corporate Secretary
2. SOE Minister Regulation No: PER-01/MBU/2011 concerning the Implementation of Good Corporate Governance in the State-Owned Enterprises, as amended by PER-09/MBU/2012.

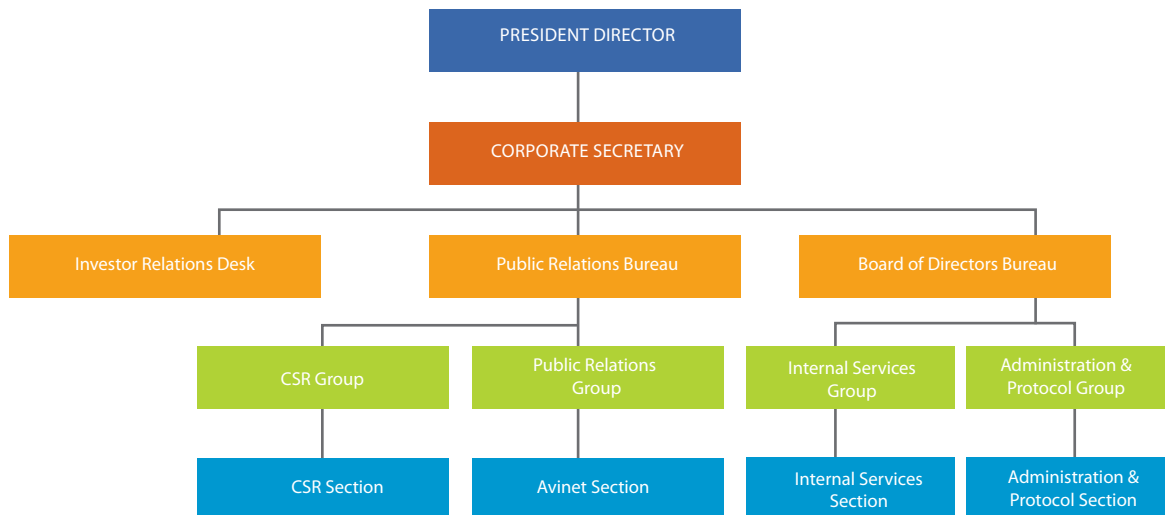

Corporate Secretary Guidelines

BRI's Corporate Secretary Guidelines was developed in 2007, an updated version of the 2003 guideline. The Guidelines covers qualifications, organizational structure as well as duties and responsibilities of Corporate Secretary, which among others are to hold the Board of Commissioners and Board of Directors' meetings, knowledge elaboration, communications, and so forth.

Corporate Secretary Organizational Structure

Based on the Board of Directors' Decree Nokep: 205-DIR/REN/04/2013, Corporate Secretary is supported by:

- a. Public Relations Function;
- b. Corporate Social Responsibility Function;
- c. Investor Relations Function;
- d. Protocol and Administration Function;
- e. Internal Services Function.

Note :
BOD Decision Letter No. : S.16-DIR/REN/04/2011 dated 27 April 2011

Corporate Secretary Appointment and/or Dismissal

BRI's Board of Directors appoints and/or dismisses Corporate Secretary. Corporate Secretary appointment and/or dismissal are reported to Bank Indonesia, Financial Services Authority, and Indonesia Stock Exchange.

Corporate Secretary Qualification and Training

In accordance with the Corporate Secretary qualification requirements set forth in BRI's Corporate Secretary Guidelines, Corporate Secretary requires to possess adequate legal and/or economic competence or other relevant competencies in order to sufficiently implement the duties and responsibilities. Other criteria includes extensive experience, reliable and able to maintain confidentiality, capable to perform as a good communicator, a good listener, and capable to undertake the role as the first "gate" of communications – providing recommendations to Board of Commissioners, Board of Directors, and other senior executives in BRI. To meet these criteria, Corporate Secretary shall receive training in the fields of legal, accounting, and corporate secretary best practices.

Corporate Secretary Function

Pursuant to the SOE Minister Regulation Number: PER-01/MBU/2011 dated 1 August 2011 on the Implementation of Good Corporate Governance, Corporate Secretary function includes:

1. To ensure that SOE has complied with disclosure requirements in line with GCG principles;
2. To provide all information required by the Board of Directors and Board of Commissioners periodically and/or at any time upon request;
3. As liaison officer; and

4. Administer and maintain the Bank's documents including, but not limited to, Shareholders' Register, Special Register, and Board of Directors, Board of Commissioners, and GMS' minutes of meeting.

Corporate Secretary Duties and Responsibilities

As set forth in the regulations, the primary duties of BRI's Corporate Secretary is to build BRI's corporate image through public relations, investor relations, and secretariat functions including the Board of Directors and Board of Commissioners' Bureaus. Corporate Secretary also manages relationship/information service to related working units and stakeholders, and overall supports the Bank's performance achievement in line with vision, mission, and business strategies.

Corporate Secretary is responsible to ensure good communication between the Bank and stakeholders, assure availability of information accessible to stakeholders according to reasonable needs of stakeholders.

With strategic duties and responsibilities, BRI's Corporate Secretary is directly responsible to President Director and submits report of task executions to the Board of Commissioners.

Duties and Responsibilities Execution

BRI's Corporate Secretary also holds the function as office of the board to ensure information availability as well as fulfilment of quorum during decision-making process of the Board of Directors and/or Board of Commissioners. In addition, Corporate Secretary is also responsible to update information on important regulations and provide corporate actions report to relevant regulators. To implement compliance function, Corporate Secretary exercises government relations' function with the purpose to create and maintain the Bank's goodwill before the regulators. The following section presents details of Corporate Secretary duty execution.

BRI Public Relations Function

Corporate Secretary conducts sound public relations, informing the Bank's programs to meet its responsibilities as citizen of the country, part of the community, and to empower stakeholders.

Public Relations function conducted by Corporate Secretary aims to build good corporate image through publications medium such as print and electronics media, outdoor media, expo, or collaboration with third parties. To that end, Corporate Secretary held the following public relations activities in 2013:

Corporate Secretary

Investor Relations

The Bank established Investor Relations function under the Corporate Secretary structure. Investor Relations is the Bank's liaison with capital market community and other external parties. Investor Relations is responsible to ensure the fulfilment of all disclosure requirements, as one of GCG principles, to capital market community; build relationship with shares, bonds, and other securities' investors, analysts, journalists, trustee agencies, rating institutions, Self Regulatory Organization (SRO), and other financial communities.

Corporate Secretary

To carry out the responsibility, and to meet regulatory requirements as well as to ensure effective communications, BRI's Investor Relations Desk hold various activities, including: public expose and analyst meeting; receive company visit, field visit, and conference call; investor newsletter publication, provide information update on investor relations website, attend investor conference, and non-deal road show domestic and overseas in financial centres in Asia, Europe, and America. BRI also provides information regarding the Bank's recent developments through GMS and Annual Report publication. In addition, BRI also utilizes internal communications channels to disseminate information. This is part of the Bank's commitment to ensure equity of access for all stakeholders.

BRI is determined to produce accurate and timely information in order to protect investors' interests, especially from risk of error of judgment in investing due to lack of information, insider trading, deliberate information misleading, or other unethical conducts with regards to information availability.

For the purpose of sufficient and accurate information, through Corporate Secretary function BRI forthrightly announced the resolutions of GMS held in 2012 as well as material information and other information relating to corporate actions, through Correspondence Forum with capital market authorities (OJK and Indonesia Stock Exchange), as well as via press release publications (details of BRI's press release and correspondences with capital market authorities are attached to this Annual Report). Moreover, in 2012 BRI published its Annual Report in two languages, Indonesian and English, and contained the Bank's performance. Shareholders and public at large may access information regarding the Bank's developments on website: www.ir-bri.com.

Further, there are a number of activities that BRI held for capital market investors, as follows:

a. Analyst Briefing

To comply with regulations and to improve communications effectiveness, BRI holds GMS, public expose and analyst meeting; receive company visits, field visits, and conference calls; investor newsletter publication, provide information updates on investor relations website, attend investor conferences, and non-deal road show of domestic and overseas (Asia, Europe, and America).

Board of Directors and Board of Commissioners Bureaus' Activities

BRI's Corporate Secretary also functions as office of the boards, where it ensures information availability and fulfilment of quorum requirement for decision making of the Board of Directors and Commissioners. In addition, Corporate Secretary is responsible to update information regarding regulations and to provide information on corporate actions to relevant regulators.

To carry out compliance function, Corporate Secretary exercises government relations' function with the purpose to create and maintain the Bank's goodwill before the regulators.

Communications with Investors

The GMS and Annual Report Publication are among the activities held by Corporate Secretary that serve as the channels to present material information to

shareholders. In GMS, the agenda items include presentation from the Board of Directors and Board of Commissioners' accountability report for their management of the Bank to shareholders and investors.

Investors are strategic shareholders whose investing decisions are highly influenced by the quality and speed of information. Information received at an inappropriate moment may bring abnormal benefits to some parties and may be against the law, as it possibly enable self dealing, insider trading, deliberate information misleading, and other unethical actions.

With capital market community, Corporate Secretary continuously builds good communications, particularly with investors and analysts. Materials presented directly to investors or through analysts are instrumental to investments decision-making. To maintain intensive and effective communications with investors, BRI holds various activities involving investors under the coordination of Corporate Secretary, as outlined by the table above.

Access of Information and Corporate Data

BRI consistently provides information in an integrated manner, timely, and effective, through website www.bri.co.id, a communication channel that offers information access convenience for stakeholders. Accessible information through the website includes BRI's banking products and services, corporate financial information, career opportunities, and other information on BRI.

To obtain further information, customers may contact Call BRI 14017 or (62-21) 57-987-400. Investors may contact Corporate Secretary/Investor Relations by email to: ir@bri.co.id or call to (62-21) 5751969.

Compliance Function

BRI conducts its Compliance Function based on Bank Indonesia Regulation No. 13/2/PBI/2011 dated 12 January 2011 on Implementation of Compliance Function in Commercial Banks. Compliance Function in BRI is conducted by Director of Compliance and Compliance Division. During 2013, the Director of Compliance is held by Randi Anto, who serves as of 12 July 2011, while Head of Compliance Division is M. Jarot Eko Winarno. Director of Compliance and Head of Compliance Division have met the independency criteria set out and required by Bank Indonesia.

Compliance Charter

Compliance Charter is established by the Decree of BRI's Board of Directors No.: S.223-DIR/DKP/10/2011 dated 25 October 2011 concerning BRI Compliance Charter. The Charter contains guideline of Compliance function and includes independency, authority, position as well as duties and responsibilities of compliance staff members.

Furthermore, to strengthen compliance function in BRI, the Bank has complemented its policies with other compliance policies such as: compliance culture implementation, prudential assessment, and Anti-Money Laundering (AML) and Counter-Terrorism Funding (CFT).

Compliance Unit

Compliance Unit is an independent working unit that supports the activities of Compliance Director. Compliance Unit, or Compliance Division, comprises 3 groups: Credit Compliance group, Non-Credit Compliance group, and Know Your Customer group.

Compliance Unit Independency

BRI conducts its Compliance Function based on Bank Indonesia Regulation No. 13/2/PBI/2011 dated 12 January 2011 on Implementation of Compliance Function in Commercial Banks. The Compliance Function in BRI is implemented by the Director of Compliance and Compliance Division. Director of Compliance and Head of Compliance Division have met the independency criteria set out by Bank Indonesia.

Compliance Function Duties and Responsibilities

In accordance with Bank Indonesia Regulation, Compliance Function has the following duties and responsibilities:

1. To realize Compliance Culture across organization levels and business activities in BRI.
2. To manage Compliance Risk in BRI.
3. To ensure that policies, provisions, systems, procedures, and business activities of BRI have been consistent with Bank Indonesia regulations and other applicable laws and regulations.

4. To ensure BRI's compliance to the commitment made to Bank Indonesia and/or other relevant authorities.

Implementation Compliance Function

a. Compliance Culture

All employees in BRI are responsible to enact the Compliance Culture. In 2013, continuing the 2012 program, continuous socialization program across BRI's operational units were carried out to reinforce the Compliance Culture implementation in BRI. In-class trainings were also conducted to enhance knowledge and internalize compliance, incorporated in BRI's staff development program.

b. Compliance Risk Monitoring

In monitoring compliance risk, the Compliance Division coordinates with Risk Management Division to identify, measure, observe, and control compliance risks in accordance with Bank Indonesia regulation on Risk Management Implementation for Commercial Banks. Compliance risk management effectiveness is presented in monthly Risk Profile Report.

c. Prudential Banking Principles Monitoring

Prudential banking principles monitoring aims to ensure BRI's compliance to prudential banking principle enforced by Bank Indonesia and other relevant supervisory authorities. Activities in prudential banking principles monitoring are:

1. Prudential principle testing
Testing is performed on final policy drafts and/or decision drafts to be enforced by BRI Board of Directors concerning credit and non-credit matters. Test results in 2013 showed that, in general, the Board of Directors' policy and/or decision drafts that were tested have fulfilled prudential principles as prescribed by the external and internal regulations.
2. Test results monitoring
A follow up of the foregoing, this activity aims to ensure that the follow-up of policies and/or decisions remain consistent and in compliance with prudential principles.
3. Internal policies review
Ensure that policies established by the Board of Directors and implemented internally in BRI, have met prudential principle.

Compliance Function

4. External policies resume
External policies resume and dissemination are applicable for new policies and amendment of existing policies from external regulators. This is part of policy socialization activities, ensuring that the external policies may be forthrightly available as reference for operational units in their respective fields.
5. External policies impact analysis/gap analysis
The purpose of such analysis is to examine the impact of external policies to BRI's existing internal policies as well as to ensure the consistency of BRI's internal policies with external policies.

Type of Activity	2012		2013	
	Loan	Non-Loan	Loan	Non-Loan
Prudential principle testing	321	133	331	181
Monitoring	300	80	280	116
Policy response	11	37	8	49
Internal policy review	25	18	17	13
External policy resume	39	33	38	55
External policy impact analysis	18	12	15	15

d. Monitoring the fulfilment of the Bank's commitment to relevant authorities

This activity aims to ensure that BRI fulfils its commitment with Bank Indonesia and other relevant authorities. The commitments may arise from audit results or letters issued by Bank Indonesia and/or other supervisory bodies. Results of monitoring on the Bank's commitment fulfilment are reported via Compliance Function Report submitted periodically to the Board of Directors, Board of Commissioners, and Bank Indonesia.

e. System, infrastructure, and compliance policy enhancements

To ensure the effectiveness of existing compliance standards, Compliance Function consistently evaluates and, when necessary, updates the compliance toolkit.

Several updates carried out during 2013 were conceptions/updates on compliance checklist concerning review of the Board of Directors' policy/decision drafts on new products and activities, securities, counter guarantee, uncommitted credit line, Joint Vehicle Financing for consumer loans, and individual consumer loans.

Moreover, continuous enhancements are also conducted on Compliance Dashboard, a tool developed by BRI to monitor BRI's compliance with regulatory requirements. The Dashboard also provides alert for related executive officers during decision or policy making. The dashboard monitors third party funds, derivatives, SID and LBU fines, NPL, CAR, Loan Portfolio of Corporate, Medium, Retail, and Micro segments.

AML-CTF Implementation

Activities pertaining to the Anti-Money Laundering (AML) and Counter-Terrorism Funding (CTF) in 2013 include:

1. Reviews on policies, procedures, and Operational Handbook (BPO) of AML and CTF implementation in accordance with BI Regulation No. 14/27/PBI dated 28 December 2012 and Bank Indonesia Circular Letter No: 15/21/DPNP/2013 dated 14 June 2013 on the Implementation of AML and CTF for Commercial Banks.
2. Sustainably socializes Policies and AML-CTF Implementation Procedures.
 - a. On-site socialization of:
 - i. AML-CTF policies and procedures implementation monitoring at BRI's operational unit level. Monitoring was performed using sampling method on 13 Regional Offices, 39 Branch Offices, 26 Sub-Branch Offices, 50 BRI Units, and 4 Priority Service Centres. Monitoring results have been submitted to each sampled Regional Offices for follow-up.
 - ii. Dedicated training on AML and CTF for instructors in BRI's Education and Training Centres (Pusdiklat) and Education Centres (Sendik).
 - iii. Held trainings for BRI employees; participants were asked to perform TOT (Training of Trainers) to staff in their respective units, recorded via TOT minutes.
 - iv. AML-CTF induction to new employees who will be associated with Know Your Customer principle, such as: Front Line staff (Customer Service officers and Tellers), FO (Funding Officer), and AO (Account Officer).

Compliance Function

- b. Off-site socialization:
 - i. AML-CTF material through e-learning module, enabling employees to conduct independent AML-CTF learning.
 - ii. Self-assessment method on AML-CTF implementation applied to BRI's operational units across Indonesia. Self-assessment aims to raise awareness and ensure AML-CTF implementation in all operational working units of BRI (Branch Offices, Sub-Branch Offices, Priority Service Centres, and BRI Units).
 - iii. Submission of action plan for AML and CTF implementation to Bank Indonesia; required further coordination with related Working Units to fulfil targets outlined in the action plan.
 - iv. Submitted customer data update plan and realization of customer data update for BRI customers and customers of Cross Border Correspondent Banking (CBCB).
 - v. Fulfilled reporting obligation to INTRAC by submitting Cash Transaction Report (CTR) and Suspicious Transaction Report (STR) as well as developed application for International Funds Transfer Instructions (IFTI) reporting.
 - vi. Followed-up request of information/data and account freeze/opening from external parties, such as Bank Indonesia, INTRAC, Corruption Eradication Commission (CEC/KPK), National Anti-Narcotics Agency (BNN), Police Department, and Tax General Directorate.

Bank's Compliance Level to Prevailing Laws and Regulations

The Bank's compliance level is measured based on the compliance risk profile measurement conducted in 2013, with score 2 (low to moderate).

USA Patriot ACT

The "Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Act of 2001" (the "USA PATRIOT Act") is established by the Government of the United States to prevent money-laundering and terrorism funding through foreign correspondent banks' accounts in US financial institutions. The Act requires all foreign banks that manage or plan to open correspondent accounts in the US to complete a standard form. To fulfil the USA Patriot Act requirement, BRI has completed foreign correspondent bank account certificate, which is accessible through BRI's website at www.bri.co.id. The certification applies for all accounts opened for BRI by Covered Financial Institutions.

Compliance Function Effectiveness Evaluation

The compliance function report is one of the information media for the Board of Commissioners in conducting monitoring function on BRI's compliance. During 2013, the Board of Commissioners have conducted oversight activities on BRI's compliance and issued 9 recommendations to the Board of Directors.

Compliance Function Quality Improvement

Going forward, to improve the quality of compliance function in BRI and to socialize Compliance culture across all levels of BRI's organizations, the Bank will continue to refine and complete compliance systems and policies, whilst intensively carries out the awareness regarding the importance of Compliance culture.

Participation in Compliance Director Communications Forum (FKDKP) is also a tool to build relationship with Compliance Function in other banks. Several activities under the forum are seminars, workshops, and trainings as well as other programs to promote Compliance function particularly in BRI.

Risk Management

Risk Management process is consistently implemented in all business activities and daily banking operations. Continuous risk management is a key factor to determine BRI's success in achieving its performance targets in the pursuit to become a sound bank with sustainable growth. The Bank implements integrated enterprise-wide risk management that covers management of credit, liquidity, operational, market, strategic, compliance, reputational, and legal risks in accordance with Bank Indonesia regulations.

As stipulated in BI regulations, BRI applies three lines of defense concept. The first line of defense comprises business/operational units that undertake transaction activities with due to observance to limit policies and operational guidelines (BPO) applicable in their respective fields. The second line of defense comprises risk management unit that monitors the adequacy of BRI's risk management practices according to risk tolerance. Risk Management unit independently determines policies, guidelines, and risk limits for business/operational units. In addition, Risk Management Division also carries out programs to raise risk awareness of the Operational Units, empowering them as the first line of defense, by promoting OPRA application that contains risk management process education and briefing leaders of working units in terms of risk management.

Internal Audit Unit forms the third line of defense that ensures adequate internal control exercised by the first and second line of defense. Internal Audit unit provides independent reports to President Director and Board of Commissioners.

[Detailed discussion on Risk Management is presented in "Risk Management" sub-chapter under "Operational Review" chapter.](#)

Internal Control System

Basis of Reference

To implement effective and extensive internal control system, BRI refers to the following Bank Indonesia regulations:

1. Bank Indonesia Regulation Number 5/8/PBI/2003 dated 19 May 2003 on the Implementation of Risk Management for Commercial Banks, as amended with BI Regulation No 11/25/PBI/2009 dated 01 July 2009
2. Bank Indonesia Circular Letter No 5/21/DPNP dated 29 September 2003 on the Implementation of Risk Management for Commercial Banks, as amended with BI Circular Letter No 13/23/2011 dated 28 October 2011
3. Bank Indonesia Circular Letter No 5/22/DPNP dated 29 September 2003 on Internal Control System Standard Guidelines for Commercial Banks

Internal Control System Framework

BRI's internal control refers to international standard COSO ERM framework (Internal Environment, Objective Setting, Event Identification, Risk Assessment, Risk Response, Control Activities, Information & Communication, and Monitoring).

Through this effort, BRI aims to obtain adequate assurance in safeguarding the Bank's assets, ensure the availability of accurate reports, improve compliance to prevailing regulations, minimize impact of financial losses, deviance including fraud, and breach of prudential banking principle. Internal control also enhances the organization's effectiveness and boost cost efficiency. Internal Control System is implemented in BRI to achieve the following objectives:

1. Assurance of the Bank's operational activities compliance with existing laws and regulations – including regulations from the government, banking supervisory authorities, and the Bank's internal policies, provisions, and rules.
2. Availability of accurate, complete, and timely financial and management information, especially relevant information required in decision-making.
3. Efficient and effective banking operations, by increasing effectiveness and efficiency of asset utilization and other resources, whilst protecting the Bank from loss risk.
4. Effective risk culture that encompass all levels of the organization, particularly in terms of early identification of weakness and fraud, assessment of policy reasonableness, and improvement of relevant procedures.
5. Minimal impact of loss, deviation including fraud, and breach of prudential banking principle.

Internal Control Implementation (Internal Control and Audit)

Internal audit provides assurances as well as independent and objective consultancies to generate added value for operational activities. Internal Audit supports the organization in its endeavours to realize organization's goals through systematic approach; evaluation and increase of risk management effectiveness, internal control, and governance process.

BRI's internal control framework complies with COSO ERM international standard to ensure effective operations and financial control.

Internal Control System

Internal Control System Effectiveness Evaluation

BRI continuously evaluates the effectiveness of internal control system implementation. Monitoring and mitigation banking activities main risks are consistently a priority and part of Internal Control System daily activities, enacted by operational working units or Internal Audit Unit. BRI also constantly evaluates and monitors internal control system adequacy to accommodate the continuously changing internal and external conditions and to improve effectiveness of Internal Control System.

Evaluation of internal control system implementation effectiveness primarily focuses on functional activities and core business processes. The evaluation is carried out on several interrelated control components, namely:

1. Control environment,
2. Risk identification, assessment, and mitigation,
3. Control activities and function separation,
4. Information, accounting, and communication systems, and
5. Monitoring activities on corrective actions for deviations/ weakness.

Results of internal control system evaluation are used as a basis for BRI's management to examine internal control implementation effectiveness and to determine improvement steps, system enhancements, or control policy update necessary to enable the Management to improve operational effectiveness while minimizing risks that may be detrimental to the Bank.

Monitoring and evaluation are further elaborated in various new policies such as Guidelines, Operating Manuals, or Work Instructions. Based on the examinations and discussions held during meetings of the Board of Commissioners with Committees, Internal Audit Unit, and several relevant divisions, BRI's internal control system was deemed adequate.

Further, to respond to the rapid and complex business developments of the Bank, Internal Audit expanded its organizational structure by assigning Resident Auditor – a newly formed audit function at Branch Office and BRI Unit level. Resident Auditors carry out periodic and sustainable monitoring activities to ensure rapid risk detection in operational working units.

To minimize fraud risk, BRI has established Special Investigations Unit responsible to analyze any red flags (abnormality), conduct fraud risk indicators analysis, and investigate any indications of fraud.

Internal Audit

Internal Audit Function

BRI's Internal Audit function is carried out by Internal Audit Unit (IAU) that reports directly to the President Director. It also has direct communication line with the Audit Committee, to coordinate and administer any information relating to audit activities and audit results. Internal Audit Unit has a highly strategic role in furthering the aims and objectives of the Bank through systematic, orderly, and structured approach in evaluating and improving the effectiveness of risk management, internal control, and governance process.

Basis of Reference

Internal audit function implementation in BRI refers to the following prevailing regulations, such as:

1. Chairman's Decree of Capital Market and Financial Institution Supervisory Agency No: KEP- 496/BL/2008 dated 28 November 2008 on the Internal Audit Formation and Charter Development Guidelines;
2. Bank Indonesia Regulation No.1/6/PBI/1999 dated 20 September 1999 on Assignment of Compliance Director and Standards for the Practice of the Bank Internal Audit Function (SPFAIB);
3. Bank Indonesia Regulation Number 5/8/PBI/2003 dated 19 May 2003 on the Implementation of Risk Management for Commercial Banks, as amended by Bank Indonesia Regulation No 11/25/PBI/2009 dated 01 July 2009
4. Bank Indonesia Circular Letter No 5/21/DPNP dated 29 September 2003 e Implementation of Risk Management for Commercial Banks, as amended by Bank Indonesia Circular Letter No 13/23/2011 dated 28 October 2011

5. Bank Indonesia Circular Letter No 5/22/DPNP dated 29 September 2003 on the Guidelines of Internal Control System for Commercial Banks
6. Bank Indonesia Regulation No.9/30/DPNP dated 12 December 2007 on the Implementation of Risk Management in the Use of Information Technology in Commercial Banks;

As well as other relevant regulations.

BRI also refers to the following best practices, such as:

1. The Internal Audit Function In Bank - Basel Committee On Banking Supervision;
2. International Standards for The Professional Practice of Internal Auditing of Internal Auditing (Standards);
3. Practice Advisories Under International Professional Practice Framework (IPPF);
4. Consortium of Indonesian Internal Auditing Professional Associations. 2004. Internal Audit Professional Standards. Jakarta. Internal Audit Education Foundation.

Internal Audit Charter comprises elements of vision, mission, attributes, auditor's code of conduct, position, role, function, duties, responsibilities, authority, audit scope, independency, objectiveness, professional requirements, communications & reporting, internal audit carried out by external parties (outsourced), quality assurance and improvement programs, policies, and procedures used as reference by Auditors in the enactment of their duties.

BRI Internal Audit Charter

Internal Audit Charter is prescribed in the Board of Directors' Decree Nokep.S.53-DIR/AIN/07/2008 dated 28 July 2008 on Internal Audit Charter as well as BRI's Internal Audit Policies and Procedures, as updated by the Joint Decree of the Board of Commissioners and Board of Directors Nokep.B.802-DIR/AIN/11/2013 dated 22 November 2013 on Internal Audit Charter of PT Bank Rakyat Indonesia (Persero), Tbk. Internal Audit Charter is formulated to provide a clear guidance on the purpose, authority, responsibility, and scope of internal audit's works in the organization.

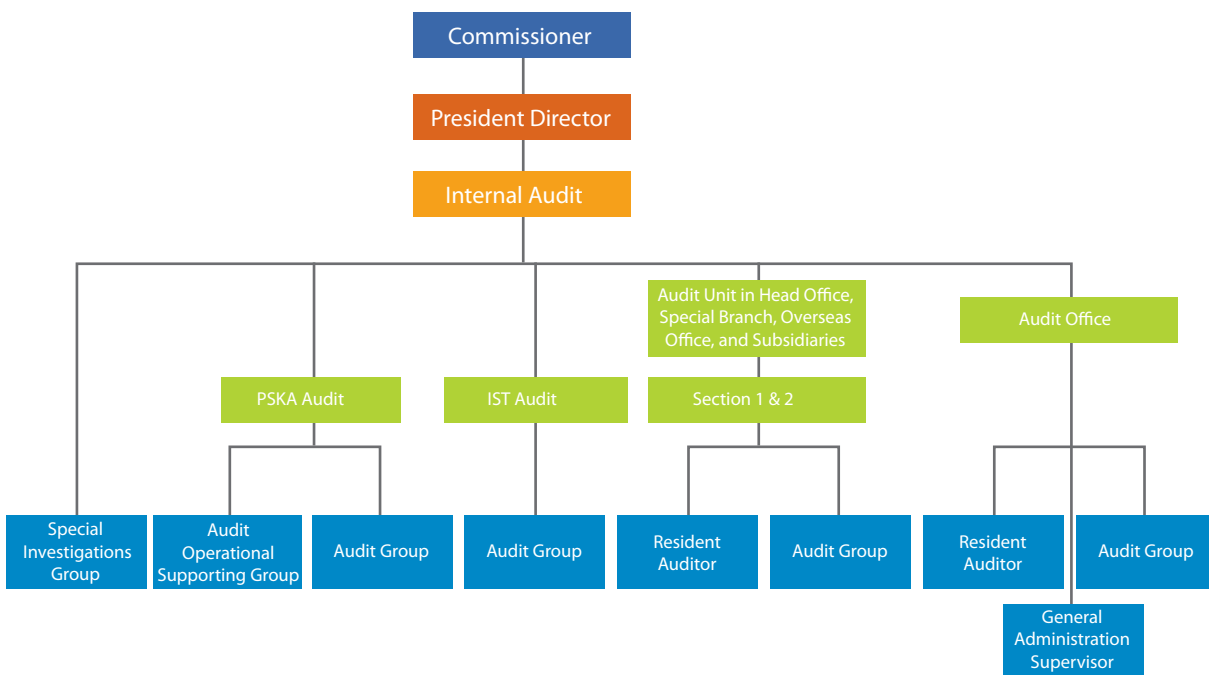

Internal Audit

Organizational Structure and Position

Organizational Structure

Internal Audit structure and position are stipulated by:

1. Director's Decision Letter on BRI Internal Audit Organizational Structure No. S.129-DIR/REN/08/2012 dated 9 August 2012 on PT BRI (Persero) Tbk. Internal Audit Organization.
2. BRI's Internal Audit Charter No. S 53-DIR/AIN/07/2008 dated 28 July 2008.

Structurally, BRI's Internal Audit Unit is under the President Director's direct supervision. It reports directly to the President Director and maintains communication line with the Audit Committee. Internal Audit provides assurances as well as independent and objective consultancies in order to generate added value and enhance operational activities. Internal Audit Unit supports the aims and objectives of the Bank through systematic, orderly, and structured approach in evaluating and improving the effectiveness of risk management, internal control, and governance process.

Position

Although structurally placed under the direct supervision of President Director, Compliance Director holds full responsibility for BRI's Internal Audit operations in accordance with the authority, and has communication line with the Audit Committee (Board of Commissioners). This enables the Head of Internal Audit Unit to communicate directly with the Audit Committee, presenting/reporting any issues relating to the audit activities.

The structure of BRI's Internal Audit is composed of Delivery Audit Unit and Support Audit Unit, with the following details:

1. Delivery Audit Function is composed of:
 - a. IST Audit Function
The scope of IST Audit comprises Working Units that are involved in the management and use of Information System Technology (IST), which covers the process of Core Banking and Non Core applications developments and operations; IST infrastructure operations in DC, DRC, and all Working Units; IST security, application, infrastructure, strategy, policy, risk management, supporting, and so forth.
 - b. Head Office, Special Branch, Overseas Office, and Subsidiaries Audit Function
The scope of this Audit Unit comprises Head Office (KP) Unit, Special Branch Office (KCK) Unit, Overseas (UKLN) Working Unit, and Subsidiary Entities (PA).

Internal Audit

- c. Inspection Office Function
The scope of Inspection Office Audit comprises Regional Offices, Branch Offices, Sub-Branch Offices, Cash Offices, and BRI Units.
- d. Investigations Audit Function

Investigations Audit function is a dedicated function for investigations with unlimited scope of audit.

2. PSKA Audit as Support Function
PSKA Audit reviews Internal Audit organization; new policies, procedures, and audit supporting facilities; audit quality improvement; software and hardware designs according to requirements and Internal Audit best practices.

To support Internal Audit function, BRI has 19 Delivery Audit Units (the units that implement audit activities) throughout Indonesia, responsible to supervise Regional Offices and Operational Working Units.

Head of Internal Audit and Appointment Head of Internal Audit

Head of Internal Audit unit leads the Bank's internal audit; the Head of IAU is appointed and dismissed by President Director with the approval from the Board of Commissioners, as stipulated in Bank Indonesia Regulation No 1/6/PBI/1999 the Assignment of Compliance Director and Standards for the Practice of the Bank Internal Audit Function. The appointment and dismissal of IAU Head is also stated in BRI Internal Audit Charter in Joint Decree of the Board of Commissioners and

Board of Directors Nokep.B.802-DIR/AIN/11/2013 dated 22 November 2013 on Internal Audit Charter of PT Bank Rakyat Indonesia (Persero), Tbk. The Decree affirms that Head of IAU is appointed and dismissed by President Director with the approval from the Board of Commissioners, and reported to Bank Indonesia and OJK.

As of the end of 2013, Ali Mudin served as Head of IAU. The profile of IAU Head is presented in "Corporate Data" chapter.

Human Resources and Internal Audit Qualifications

Internal Audit Unit continuously strives to provide services performed by skilled auditors with competencies that are compatible with requirements, scope of control, and risk profile of each audit field.

By 31 December 2013, Internal Audit is composed of 1 IAU Head, 17 Inspectors, 22 Deputy Inspectors, 1 Section Head, 69 Group Head, 439 Auditors (consist of Senior Auditor, Auditor, Junior Auditor, and Associate Auditor), 362 Resident Auditors in Branch Offices, and 1,139 Unit Resident Auditors.

Supporting BRI's Internal Audit is **17 Inspection Offices** across Indonesia, taking the role as strategic business partners of Regional Offices and its Operational Working Units.

Internal Audit

Duties and Responsibilities of IAU Head

1. Head of IAU effectively and efficiently manages Internal Audit function, ensuring that internal audit is able to provide added value for BRI.
2. Head of IAU is responsible to create audit plan, direct audit activities, implement audit, control and provide audit guidance, and evaluate existing procedures in order to generate assurance that BRI's goals and objectives will be optimally fulfilled.
3. Head of IAU reports periodically to the President Director

Duties and Responsibilities of Internal Audit

Duties and responsibilities of BRI's Internal Audit as stated in Internal Audit Charter are:

1. Internal Audit is directly responsible to the President Director
2. Supports President Director and President Commissioner in their supervisory duties by providing details in operational manner with regards to planning, execution, and findings monitoring.
3. Analyses and reviews finances, accounting, operations, and other activities through direct examination and indirect observation.
4. Identifies all possibilities to improve and increase efficiency and optimization of the use of resources and budget.
5. Provides objective improvement suggestions and information concerning audited activities to all levels of the management.
6. Submits report to the President Director and President Commissioner.

7. Assure that quality of line management in terms of risk management; internal control system, and business governance have been adequate and effective.
8. Examines and evaluates the execution of BRI Work Plan in order to ensure that all BRI's business activities may take place seamlessly and are able to meet stakeholders' expectation.
9. Submits audit findings to internal and external parties in timely manner, in accordance with existing policies, regulations, and procedures.
10. Maintain good relationship with Auditees, External Auditors, and third parties in the implementation of IA's tasks.

Audit Methodology

BRI applies Risk Based Internal Audit (RBIA) methodology with business process approach. RBIA is implemented in phases with consideration to risk management maturity corporate-wide. The methodology identifies business processes and units projected to have more significant risks in the Bank's target achievement; the identified processes and units are prioritized for audit therefore assuring that risk potentials are minimized according to the Bank's risk appetite. To ensure efficiency and effectiveness of risk-based audit, and to enhance audit role as Strategic Business Partner (SBP), IAU uses Computer Assisted Audit Techniques (CAATs) to perform data analysis.

Audit Evaluation

Quality assurance evaluation is conducted to ensure audit quality. Quality assurance is carried out by internal party through internal quality assurance review or by external reviewers. Quality assurance review by external party is exercised by PT SGS Indonesia through ISO

9001 surveillance. Result of ISO 9001:2008 surveillance visit 2/2012 by PT SGS Indonesia showed no major or minor findings.

Implementation effectiveness and compliance to the Bank Internal Audit Function Standard (SPFAIB) is evaluated by External Auditor (in 2011, evaluation was conducted by PriceWaterHouseCoopers), with results that BRI's Internal Audit function has been able to perform its roles according to the standards and gained "good practices" predicate.

Audit Activities

BRI's IAU is responsible to implement audit activities across BRI's line of management, as outlined in the audit scope under the Annual Audit Plan. The Plan, approved by President Director and President Commissioner, is composed of Regular Audit activities to be carried out on Line Management, Special Audit, Surprise Audit, and Mandatory Audit. Scope of audit is established based on risk assessment result.

Regularly, IAU monitors the enactment of management's commitment in order to improve internal control weaknesses within agreed schedule. IAU also provides opinion on the adequacy of improvement follow-up by the management by issuing statement letter of ADEQUATE or NOT ADEQUATE.

Monitoring results on the management's commitment enactment conducted on 548 working units throughout 2013 are as follows:

Internal Audit

No	Results of Management Commitment Monitoring 2013	Total Working Units	%
1	Adequate	287	52.37%
2	Not adequate	4	0.73%
3	Monitoring in progress	257	46.90%
TOTAL		548	100%

In 2013, BRI prioritized in auditing 3,463 working units or 62% of the total BRI's working units. The prioritization was made based on the corporate-wide risk assessment, consistent with BRI's goals and strategic plan, regulatory requirements, the Audit Committee and management's directives, risk profile, as well as the audit results of the preceding period.

As of 31 December 2013, BRI's IAU has conducted regular audits on 3,867 working units and achieved 111.67% of audit assignment target. IAU also carried out special auditing on 813 activities and 6 fraud auditing.

Coordination with External Auditors

BRI's operations and financial data accuracy are also examined by the external auditors, namely Bank Indonesia, The Audit Board of the Republic of Indonesia (BPK), and Public Accountant Firm. During the examination process by external auditors, IAU undertakes the role as liaison officer to coordinate audit process and to monitor the corrective actions taken by related working units as a follow up of external auditors' findings.

The purpose of the monitoring process is to ensure that the management takes actions to improve the internal control weaknesses identified by external auditors.

No	External Auditors	Findings	Status of Findings	
			Resolved	In progress
1	Bank Indonesia (BI)	555	312	243
2	Government of Indonesia Audit Board (BPK RI)	454	267	187
3	Public Accountant Firm	34	3	31

Audit Quality Improvement

To enhance audit quality and efficiency, BRI has developed strategic plan for IAU, consisting of:

1. Internal Business Process Improvement

Efforts taken to improve internal business process encompass the following:

- BRI Internal Audit strategy update to ensure its alignment with BRI's vision, mission, and strategy as well as the maturity of risk management implementation.
- Prepare continuous review on Internal Audit practices as a basis to refine Internal Audit Guidelines through seminars, benchmarking, and other sources.
- Review Internal Audit Guidelines (Policies and Procedures) according to regulations and best practices.
- Formulate and establish Operational Handbook for:
 - Audit Unit – Delivery Audit
 - Audit Unit – Non-Delivery Audit.
- Formulate and update the Audit Program (manual control outside of IT business process) to ensure availability of audit implementation technical guidelines that are consistent with prevailing regulations and targets.
- Prepare the parameter update (Key Risk Indicator) for assessment units and develop new monitoring pattern or anomaly data indicators (transactions) to support the implementation of continuous auditing through Electronic Data Centre.
- Conduct Quality Assurance Review (QAR) on audit implementation across Delivery Working Units to ensure effectiveness, efficiency, and compliance of audit activities as well as other organizational processes, in accordance with Internal Audit Procedures and BRI overall policies.
- Conduct ISO 9001:2008 surveillance visit 5 and ISO 9001: 2008 re-certification for the fifth period valid from 2014 to 2017.
- Collect and compile results of customer satisfaction survey (CSS) from auditees and report the end results to all Working Units.
- Evaluate the adherence of BRI's Internal Audit Function with SPFAIB and quality assurance review (QAR).

Internal Audit

2. Audit Information System and Technology Development

Audit IST development aims to enhance quality and efficiency of Risk-Based Audit implementation, through a number of programs that cover:

- a. Audit Management System Application (BRISMA) development, which integrates end-to-end audit process from Annual Audit Planning (PAT), individual audit planning, implementation of individual audit plan, reporting, and documentation. Enhancements on BRISMA include:
 - BRISMA audit management system application evaluation
 - BRISMA application development.
 - BRISMA data reference update
 - BRISMA User Forum implementation
- b. Management of Users and Audit Application Operations
- c. Conduct AER (Audit Electronic Register) application implementation and socialization. This application handles IT infrastructure (hardware) inventory available in each audit office.
- d. Socialization of BrideX 2.0 application as analytical

tools to improve risk indicator identification.

- e. Continuously develop Electronic Data Centre (PDE) phase III for auditors. PDE handles centralized audit data processing. Results of PDE data processing can be accessed by all auditors in their respective locations. Auditors with raw data that requires processing (ad hoc processing) may utilize BrideX, an offline application that handles data process with decentralized approach.
- f. Development of manual control for IT business process infrastructure. Manual control outlines minimum steps to be utilized in auditing process.

3. Learning and Growth

Programs with respect to Internal Audit staff's quantity and quality are:

- a. Periodically fulfil the Internal Audit structure in accordance with the established formation, through various HR fulfilment strategies.
- b. Improve auditors' competence through sustainable education that is expected to generate proportional guidance to auditors in their duty implementation.
- c. Career development for audit staff members.

External Auditor and Company's Public Accountant

The monitoring on BRI is implemented by BRI's internal auditors and external auditors, such as from Bank Indonesia, Indonesian Audit Board, and Public Accountant Firm.

Appointment of Public Accountant Firm

Pursuant to GMS resolutions dated 28 February 2013, based on the Board of Commissioners' Decree No B.101-KOM/07/2013 dated 31 July 2013 regarding the Appointment of Public Accountant Firm for Financial Statements' General Audit, BRI appointed Purwantono, Suherman dan Surja - Ernst and Young (PSS-EY) Public Accountant Firm, one of the big four Firms to conduct audit on BRI's 2013 financial statements. This was the third appointment for PSS-EY Public Accountant Firm to carry out BRI's financial statements audit and the third appointment for the public accountant responsible to audit BRI's financial statements.

The appointment was made with consideration to Public Accountant Firm evaluation results by the management and recommendation from the Audit Committee. Prior appointment of the Public Accountant Firm was for the financial year 2012 and 2011.

	Name of Public Accountant Firm	Audit Period
Public Accountant Firm	KAP Purwantono, Suherman dan Surja (Ernst and Young Global) Gedung Bursa Efek Indonesia Tower 2 Lt. 7 Jl. Jendral Sudirman Kav 52-53 Jakarta	3 years (2011-2013)

The Public Accountant Firm appointment was made according to effective regulations and through tender selection process based on the Firm's fulfilment of the following criteria:

1. Experienced as banking auditors
2. Understands Indonesian banking regulations, public companies regulation, companies entering stock market, and other relevant regulations.
3. Experienced and understands banking application and technology systems.
4. Understands banking products.
5. Experienced and understands risk management.

Other internal regulation used in reference to appoint Public Accountant Firm is the threshold of 5 (five) consecutive audit period at maximum and with the same partner for 3 (three) consecutive financial years.

Audit Fee

Audit fee paid by BRI to PSS-EY Public Accountant Firm amounted to Rp5.550.000.000 (five billion five hundred and fifty five million rupiah), including 10% (ten per cent) VAT and other related taxes. The fee has also included out of pocket expenses (OPE), which covered expenses for branch visits in Indonesia and audit on financial statements of branch offices and international offices. The services rendered were solely financial auditing services.

The assignment of Public Accountant Firm has met the requirements and fulfilled Bank Indonesia Regulation No.3/22/PBI/2001 dated 13 December 2001 as amended by Bank Indonesia Regulation PBI No: 7/50/PBI/2005 dated 29 November 2005 on the Financial Condition Transparency of Banks and BI Circular Letter No: 3/32/DPNP/IDPnP dated 14 November 2001 on Relationship Between Banks, Public Accountants, and Bank Indonesia.

The appointed Public Accountant Firm has administered audit results and management letter to the Bank in timely manner. The Public Accountant performed its tasks independently and has fulfilled all agreed criteria.

Code Of Conduct

In its Code of Conduct, BRI outlines the behaviour standard that is reasonable, appropriate, and trustworthy, to all BRI staff members. The Code of Conduct applies throughout all levels of the organization and aims to bolster GCG implementation quality.

The position of Code of Conduct

BRI's Code of Conduct describes basic principles of personal and professional behaviour expected of BRI staff members when carrying out their duties. The reasonable, appropriate, and trustworthy principles for all BRI staff members. The Code of Conduct applies for all BRI employees.

Since its conception in 2003, BRI's Code of Conduct policy has been updated in 2010 and 2013 through Joint Decree of the Board of Commissioners and Board of Directors Number 06-KOM/BRI/12/2013 dated 16 December 2013. The Code of Conduct implementation is accompanied by policies on gratification, Whistleblowing System (WBS-BRI) mechanism as a reporting channel for code of conduct breach, and BRI Disciplinary Rules that stipulates types of breach and mechanism for resolution.

Code of Conduct Commitment

The Bank's Code of Conduct applies throughout the organization. The principles defined in the Code of Conduct are continuously and sustainably applied in the daily attitude, practice, commitment, and formal policies to support the company culture that promotes highest moral and integrity standards when carrying out the operational duties.

BRI's Code of Conduct Elements

All employees of BRI are responsible to uphold the Code of Conduct in their day-to-day activities; strongly embedded business ethics are expected to maintain favourable environment for individuals and for the Bank. The elements of BRI's Code of Conduct are:

1. Compliance with the Law and Bank's Policies

In all of its business endeavours, the Bank is committed to comply with all prevailing laws and regulations. Bank's employees shall further the Bank's compliance commitment with regulations to strengthen BRI's compliance culture.

2. Relationship with Stakeholders

a. Code of Conduct towards Customers

The Bank is dedicated to improve customers' satisfaction and loyalty by providing banking products and/or services that meet customers' needs, with due observance to applicable regulations.

The Bank's staff members uphold the values of honesty and transparency when extending services to customers. These are the underlying principles of the Bank's employees' dedication to customers in order to ensure customers' loyalty to the banking products and/or services offered by the Bank.

b. Code of Conduct towards Partners

BRI is committed to build relationships with its Partners on the basis of legitimate and reasonable business practices; the Bank aims to generate optimum benefits for the organization by adhering to existing legal framework.

BRI's employees uphold professionalism by constantly prioritizing the Bank's interests over personal or other parties' interests.

BRI's employees ensure that all Partners comply with the Bank's policies as well as prevailing regulations and agree to safeguard any confidentiality in their relationship with Bank, unless a disclosure of confidentiality has been recognized and approved by the Bank.

- c. Code of Conduct towards Competitors
BRI is committed to maintain sustainable business growth based on prudential banking principle by maintaining professionalism as well as healthy and robust competition.

BRI's employees uphold the principle of fair competition in carrying out business activities, positioning competitors as impetus to performance improvement

- d. Code of Conduct towards Regulators
BRI is committed to fulfill all obligations and requirements as established by banking regulators and other relevant authorities.

BRI's employees are committed to maintain seamless communications with banking regulators and other relevant authorities guided by ethical standard and prevailing regulations.

- e. Code of Conduct towards Shareholders
BRI is committed to generate positive and optimum return for shareholders.

BRI's employees adhere to transparency and

accountability principles in reporting activities; reports produced by the Bank are viable as a basis of considerations during decision-making processes.

3. Relationship with the Community and the Environment

BRI is committed to uphold local wisdom, to generate benefit, and to contribute to environmental conservation in areas where the Bank operates. A good rapport with local communities is fundamental to the Bank's success and key to maintaining customers' loyalty and trust.

BRI's employees are committed to be exemplary citizens in any areas where they are assigned. This is part of the endeavours to further the Bank's business and goals with respect to empowering people's economy.

4. Relationship with Employees

- a. Code of Conduct towards Employees
BRI is committed to provide equal opportunities to all employees; enabling them to take active participation in the journey to realize the Bank's vision and mission without discrimination, based on equality and mutual trust.

BRI's employees shall actively participate in realizing the Bank's vision and mission by duly performing their tasks and responsibilities to increase productivity and performance.

- b. Code of Conduct for Employee Peers
BRI is committed to

create an environment that is conducive for growing performance by outlining a set of ethics to guide employees when interacting among their peers.

BRI's employees care, value, and respect one another.

5. BRI's Information Confidentiality

- a. Customer Information Protection
BRI is committed to safeguard the public's trust in order to sustain the Bank's business.

BRI's employees uphold the ethics and obligation to protect all customers' information from uninterested parties.

- b. Use of BRI's Internal Information
BRI's employees uphold the ethics in respect of dissemination of BRI's internal information that may only be disclosed to relevant parties in accordance with applicable policies. BRI's employees are required to safeguard the Bank's internal information.

6. BRI Reporting Integrity and Accuracy

BRI is committed to produce appropriate, accurate, and accountable reports for the management, shareholders, customers, and other interested parties.

BRI's employees are responsible for official documentation of the Bank's activities; all records shall be accurate, transparent, comprehensive, and timely.

Code Of Conduct

7. Conflicts of Interests

BRI is committed to establish and to enact policies pertaining to conflicts of interests that bind the Bank's employees to prevent corruption, collusion, and nepotism practices within the Bank.

BRI's employees are prohibited from deliberately placing oneself in a position or situation that may lead to conflicting interests of self and the Bank, the Bank's customers, or any third parties, from which the Bank may incur losses or impaired gain.

During any decision-making processes, BRI's employees must be free of personal or certain parties' influence, which may, knowingly or otherwise, impair their judgment to take decisions in the best interests of the Bank.

8. Political Activities and Contributions

BRI is committed not to allow funding or use of the Bank's facilities and resources for and/or by parties with political purposes or similar endeavours in nature.

BRI's employees uphold the principle not to contribute their time, money, or personal resources for political activities.

9. Gratification

BRI is committed to interdict the Bank's employees from seeking or receiving any forms of gratification that are not in accordance with prevailing regulations.

BRI's employees uphold the principle not to seek or to receive any forms of gratification for personal gains or for the advantage of employees' family members.

Gratification referred to herein appertains to benefaction in general from any third parties or customers to Bank's employees.

BRI's Code of Conduct Enforcement

Efforts to enact and enforce BRI's code of conduct are performed deliberately and continuously by means of the following actions, commitment, and policies:

1. Code of Conduct Update
To align code of conduct implementation with GCG and recent business practices, BRI evaluates, formulates, and establishes Joint Decree of BRI's Board of Commissioners and Board of Directors No. 06.Kom/BRI/12/2013 and No. 65-DIR/DKP/12/2013 concerning BRI Code of Conduct. Applicable to all employees, the Joint Decree outlines the policies, definitions, and requirements to abide by all Code of Conduct items.
2. Statement of Compliance with BRI Code of Conduct
To effectively apply Code of Conduct, BRI's employees are required to read and understand the Code of Conduct; all employees are also required to sign "statement of compliance with BRI's Code of Conduct."
3. Code of Conduct Dissemination
BRI's Management has the obligation to ensure that all employees have received, read, and understood the Bank's Code of Conduct as stated in the foregoing Joint Decree. To that end, BRI's Management, in coordination with HR Policy and Development Division and Legal Division, distribute content of BRI's Code of Conduct in hardcopy and softcopy.
4. Penalty to Code of Conduct Violation
BRI has established rigorous penalty for any breach on Code of Conduct items. The penalty is applied in tier, from verbal warning, written warning, to employment termination and legal actions should the breach is deemed material such as corruption and fraud. In addition, sanctions imposed by the Bank also consider the severity of breach and accompanying evidences.
5. Management's Commitment Affirmation from BRI's Management on the commitment not to seek and/or receive any forms of gratification from customers, debtors, partners, or other third parties; affirmation is published in mass media and BRI's website.
6. Anti-Fraud Commitment
Anti-Fraud commitment is the foundation of all policies, provisions, and regulations applied for all BRI's activities and enacted through implementation of GCG principles, Risk Management, as well as Internal Control System.

Code Of Conduct

Anti-Fraud Statement is performed through anti-fraud commitment made by BRI's Board of Directors and Board of Commissioners and commitment statement from employees across all operational units. All units are required to formulate and/or update employees' Anti-Fraud Commitment at least one time every year during Performance Improvement Forum (FPK).

7. Integrity Pact
Cooperation with partners in terms of goods and/or services procurement requires the formulation and signing of Integrity Pact as a sign of commitment to implement GCG principles during cooperation.

Integrity Pact covers the following:

- a. Independency
- b. Duty of Care and loyalty
- c. Prudent person rule
- d. Conflict of interest rule
- e. Duty abiding the laws

8. Statement of Conflicts of Interests
Working units are required to disclose transactions that contain conflicts of interests by detailing name and position of the person with conflicting interests, name and position of personnel that approve transaction that contain conflicts of interests, type of transaction, nominal of transaction, and other description as required. All employees are also required to complete Annual Disclosure form with respect to conflicts of interests, in accordance with BRI's internal policy.

9. Reward and Punishment Policy
BRI has formulated policies concerning compensation and benefits – defined according to the Bank's policies and ability, with due observance to prevailing laws and regulations. Aside from providing compensation and benefits, the Bank also consistently applies disciplinary rules. Discipline enforcement is deemed necessary to maintain professional performance of duties and responsibilities and to create healthy, favourable work environment.
10. Dissemination and others
BRI's Code of Conduct induction program is provided for all new BRI's employees through education program held in BRI's education centres, while policies are continually and consistently disseminated.

Further, BRI's code of conduct among others encompassing anti-fraud strategy, corporate culture, risk awareness culture, compliance culture, and service culture are promulgated across all BRI's Working units.

Corporate Culture

BRI's Corporate Culture

Core values are important guidelines for employees' behaviour and conduct in their relationship with customers, fellow employee members, the management, and other external parties. Core values are also BRI's corporate culture, which includes the following:

1. Integrity
2. Professionalism
3. Customer satisfaction
4. Leadership
5. Appreciation to HR

To support the implementation of BRI corporate planning, in 2013 BRI's management continued to revitalize BRI's Corporate Culture, with respect to the following conditions:

- a. Growing composition of junior staff members in BRI, bringing their own habits and customs.
- b. Rapid organizational development and addition of new working units.
- c. Shift in customers' need orientation and modern lifestyle.
- d. Rigorous banking competition.
- e. Other internal and external factors.

The following changes were carried out in conducting the BRI's Corporate Culture Revitalization:

- a. Concept reinvigoration,
- b. Program enhancement,
- c. System integration
- d. Corporate Culture Measurement Tool Upgrade.

- e. Formulation of communications channels, accompanied by regular and continuous values dissemination.

One of the examples of concept reinvigoration was the empowerment of Change Leader (CL) and Change Agent (CA) roles as the driving wheels of BRI's Corporate Culture Revitalization across all working units. Revitalization program, both in the form of values internalization and dissemination, shall continue every year through Strategic Forum at the Head Office, Communications Forum at the Regional Offices, to Performance Improvement Forum at Working Units throughout Indonesia.

During 2013, programs relating to BRI's Corporate Culture Revitalization among others were:

- a. Change Agent Brainstorming at the Head Office and Special Branch Offices.
- b. Corporate Culture Revitalization Kick Off by BRI's Board of Directors, witnessed by Heads of Divisions and Deputy Heads of Divisions.
- c. Training for Trainers for all Change Agents at Head Office and Special Branch Offices.

The need to revitalize BRI's Corporate Culture was driven by growing BRI's employees, business competition, and to support internalization process in BRI's working units. Corporate Culture revitalization aims to empower employees in addressing future business challenges by

demonstrating behaviour consistent with BRI's corporate culture. The following are efforts in revitalizing the corporate culture:

1. Improve the role of change leader and change agent in working units.
2. Redefine change agent ratio
3. Tiered monitoring and evaluation that supported by a system.

Compliance Culture

Compliance Culture is described in BRI's Board of Directors policies that bind all employees in BRI. Compliance Culture statement includes:

The main pillars to build BRI's compliance culture across all Working Units throughout Indonesia are:

- a. Management's Role in Working Units (leadership)
- b. Dissemination of new policies/change of policies
- c. Availability of Policies in Working Units
- d. Information Dissemination on compliance issues

Continuing the dissemination program in the preceding year, working units are required to continuously and sustainably disseminate information concerning BRI's Corporate Culture implementation. Each employee has a role to ensure that values, behaviour, and actions have been consistent with external and internal policies as well as commitments made to regulators. Employees are also expected to actively report the compliance issues. Head of Working Units need to be committed and to set examples in implementing corporate culture to be emulated by their staff members. In addition, all working units need to have all policies necessary as reference of duty implementation.

BRI Service Culture

Service Culture contains key values that define customers' expectation. Service Culture guides the behaviour and conduct of the Bank's staff members when interacting with external and internal customers.

Since Service Culture Kick Off initiated in 2012, as part of BRI's corporate culture revitalization, BRI has been continually strengthening the commitment to extend excellent services and to embed the commitment to all working units through numerous activities, among others:

a. Service Culture Internalization

Service Culture contains key values that define the customers' expectation. Service Culture guides the behaviour and conduct of the Bank's staff members when interacting with external and internal customers. BRI's largest micro network compels the Bank to implement service culture; BRI conducts Training and Motivational program for BRI Units. Inviting Head of BRI Unit, BRI Unit Supervisor, Customer Service officer, and Teller, training and motivational program is a refreshment forum for staff members in micro business to enhance BRI's services.

b. SQ Vaganza 2013

BRI is dedicated to deliver the best services to customers. To appreciate and to boost the motivation of BRI's front line staff in extending quality services, BRI holds biannual SQ Vaganza for BRI's Security Officers, Customer Service officers, and Tellers throughout Indonesia. The competition is held at Branch Office, Regional Office, and National levels. Winners of SQ Vaganza are eligible to enjoy the best experiences of Mass Rapid Transportation, Marina Bay Sands, and SQ Airlines of Singapore.

Corporate Culture

Risk Awareness Culture

To implement risk awareness culture, adequate communications are continuously carried out across the organization to highlight the importance of effective internal control through, among others:

1. Top 50 Quarterly Risk Issue published in a handbook, outlining risk issues in working units and implemented risk control.
2. Risk Management Function embedded in all Working Units, responsible to implement risk awareness culture; and Risk Management Department established in all BRI's Regional Offices.
3. Risk Management Forum as the medium for working unit leaders and their staff members to meet and discuss risks inherent to business or operational activities. Results of discussion that require further follow up and resolution from decision makers will be escalated.
4. Risk Management dissemination.
5. Letters issued to working units concerning internal control.

Anti-Fraud Culture

BRI enacts Anti-Fraud culture through Anti-Fraud Awareness implementation, to increase an understanding of the importance preventing fraud by all parties. Anti-Fraud Awareness implementation is reported every semester to Compliance division. Anti-Fraud Awareness is conducted through dissemination program and anti-fraud statement formulation, employee awareness, and customer awareness, as follows:

1. Formulation and dissemination of anti-fraud statement. BRI's management asserts zero tolerance to fraud in BRI Units. The anti-fraud statement is set forth in the Anti-Fraud Commitment signed by BRI's Board of Commissioners, Board of Directors, and employees.
2. Employee awareness, among others by issuing Top 50 Risk Issue Handbook and letters for control improvement to working units. Other means include Risk Management Function Refreshment, Risk Management Dissemination in BRI's Working Units, and Risk Management Forum.
3. Customer awareness, by educating customers to increase their concern and cautiousness towards transaction security through; working units are encouraged to promote cautiousness to front line officers against unlawful levies and other motives of fraud.

BRI's anti-fraud strategy is founded on 4 (four) pillars of interrelated fraud control strategies:

- 1) Prevention
- 2) Detection
- 3) Investigations, reporting, and sanctioning
- 4) Monitoring, evaluation, and follow-up.

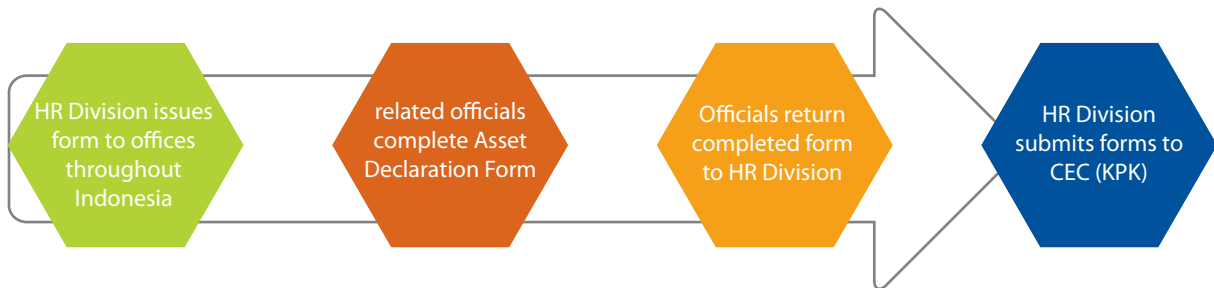

BRI's Anti-Fraud strategy is a manifestation of the Board of Directors' commitment to prevent fraud. The Board of Directors applies zero tolerance to any kind of fraud, internal or external.

Three pillars of fraud prevention are:

1. Anti-Fraud awareness: efforts to build awareness on the importance of preventing fraud by all parties. Anti-fraud awareness is implemented by formulating and disseminating anti-fraud commitment, designing employee awareness program, and carrying out customer awareness program.
2. Vulnerability assessment: refers to the process of identifying, analysing, and measuring operational risk potential and the probability of internal as well as external fraud incidents in all operational activities. Results of identification are informed to related parties and are continually updated, particularly with respect to activities where fraud risk is significant.
3. Know Your Employee (KYE): observe the behaviour of employees in working units.

Corporate Culture

Assets Declaration Mechanism for Public Officials

Pursuant to the Board of Directors' Decree concerning the Executives Required to Complete the Assets Declaration Form and Decree Nokep 182- DIR/SDM/03/2011 concerning the Additional Executives Required to Complete Assets Declaration Form, BRI's echelons 1 and 2 executives that are Permanent Employees, or BRI's echelons 1 that are Contractual Employees, serving the following positions:

1. Head of Internal Audit Unit
2. Head of Division
3. Head of Regional Office
4. Head of Special Branch Office
5. Inspector
6. Echelon 1 executive assigned outside of BRI, namely Echelon 1 executives assigned in BRI

Pension Fund, BRI's Employees Welfare Foundation (YKP), BRI's Subsidiaries, BRI's Pension Fund's Subsidiaries, and BRI's YKP's Subsidiaries.

7. Employee serving as Head of Working Unit, which is equivalent to division.

Executives of Echelon 2 are as follows:

1. Deputy Head of Division
2. Deputy Head of Regional Office
3. Deputy Inspector
4. Head of Desk, equivalent to Deputy Head of Division
5. Head of Bureau
6. Deputy Head of Special Branch Office
7. Head of IST Audit
8. Head of PSKA (Audit)

9. BRI's executive of echelon 2 assigned outside of BRI, namely echelon 2 executives assigned in BRI Pension Fund, BRI's Employees Welfare Foundation (YKP), BRI's Subsidiaries, BRI's Pension Fund's Subsidiaries, and BRI's YKP's Subsidiaries.
10. Employee serving as Deputy Head of Working Unit, which is equivalent to division.
11. Employee serving other position equivalent to Head of Working Units.

The following table details recapitulation of fraud cases monitoring and settlement

Fraud Monitoring and Cases Settlement		
Internal Fraud in 1 year	Total case	
	Previous year	Current year
Total Fraud	101	146
Resolved	66	106
Undergoing the Bank's internal settlement process	25	29
Pending resolution process	4	4
Pursued through legal proceedings	6	7

Whistleblowing System

BRI has developed Whistleblowing System, which is implemented through the internal policy of BRI's Board of Directors' Decree. Whistleblowing System aims to create an environment that is conducive for disclosure of incidents that may result in financial and non-financial losses, including impairment of the Bank's corporate image.

Whistleblowing System Management

BRI's Whistleblowing System (WBS) is directly managed by the President Director.

Information that can be reported through WBS-BRI among others are:

1. Fraud;
2. Deliberate misconduct/wilful negligence by the management.
3. Illegal actions (violence against employees or the leadership, blackmail, drug abuse, harassment, and other criminal actions);
4. Violation of law
5. Breach of Bank's SOP;
6. Breach of BRI's Code of Conduct; or
7. Actions that endanger the work safety and health or endanger the Bank's security and bring losses to the Bank.

Reports must be clear and accountable, and at minimum includes the following details:

1. Matter of breach;
2. Parties involved;
3. Period of breach;
4. Site of breach;
5. Description of breach; and
6. Supporting evidences.

WBS Mechanism

As of one the supporting elements in BRI's anti-fraud strategy, whistleblowing mechanism enables reports of breach to be lodged directly to President Director via phone call or short messaging service (SMS) or by written letter.

WBS Handling

The process to manage and follow up reports/disclosures is as follows:

1. President Director receives and transfers all reports of breach to a dedicated WBS officer for data verification, initial collection of evidence, and start of procedure to process report.
2. The Board of Directors determines next step on reports. The follow up actions include:
 - a. Investigation by internal Audit provided that, based on the substance of report, the Internal Audit team is capable to respond and initiate investigation.
 - b. Investigation by external investigators if, based on the substance of report, follow up actions requires competence/knowledge/skills beyond the capacity of Internal Audit team.
3. Investigation team conducts thorough investigation and report the results to the Board of Directors for further deliberation. The Board of Directors may take any of the following decisions:
 - a. To terminate and dismiss the report if investigation concludes the report as unfounded or unproven.
 - b. To submit results of investigation to Breach Forum (PKP) if investigation concludes the report as valid.
 - c. To submit any criminal breaches or corruption to investigators for further process in line with BRI's policies and applicable legal procedure. Communication and coordination with Legal Division will be managed to ensure that evidences gathered during investigation process are adequate to be submitted to relevant authorities.

Whistleblower's Protection

BRI provides protection and confidentiality assurance to all whistleblowers in terms of:

1. Confidentiality of whistleblower's identity (name, address, contact number, fax, email, working unit).
2. Protection from vengeful actions committed by the reported party or institution, including protection from pressure, delay of promotion, employment dismissal, legal suit, material threats, to physical violence. The protection applies not only for the whistleblower, but may also extend to the whistleblower's family members.

Whistleblowing System

Details of WBS in 2013

Report Handling

Reports are categorized by source (internal/external), availability of whistleblower's identity (available/not available), media of reporting (mail/SMS), and type (complaint/report of breach), as detailed in the following table:

Period	Reports Received	Source		Channel			Resolved	In process	Classification	
		Internal	External	SMS	Mail	Phone/Direct			Complaint/input	Report of breach
2009	50									
2010	111	634	138	626	140	6	503	269	532	249
2011	278									
2012	333									
2013	278	228	50	231	47	-	300	247	173	105
Total	1050	862	188	857	187	6	803	516	-	-

Development Plan

To improve the effectiveness of WBS-BRI, BRI has developed the following strategy:

1. Increase internal and external dissemination regarding WBS through all operational units and mass media.
2. Evaluate and enhance policies as well as WBS-BRI reporting system.

Legal Cases

Recapitulation of Legal Cases involving BRI in the last three years is presented in the following section.

1. Material cases

2011	2012	2013
336	309	270

2. Details

2013 Quarters	Total	Credit	Treasury & Investment	Operational & Services	Support
Quarter 1	59	54	-	1	4
Quarter 2	81	71	-	5	5
Quarter 3	60	58	-	-	2
Quarter 4	70	63	-	1	6
Total	270	246	-	7	17

3. Legal Case and Settlement Status

Legal Case	Number of Cases		
	Civil	Criminal	Industrial Relation
Resolved (has binding legal resolution)	901	-	29
In the process of settlement	1377	1	35
Total	2278	1	64

4. Legal claim and status of resolution

Legal claims	
1. Case facts	Claim filed by PT MPPC against BRI and BRI Pension Fund to defer termination of BOT Agreement between PT MPPC and BRI as stated in decision No. 157/Pdt.G/2010/PN.JKT/PST jo No. 203/G/PT.DKI jo No. 268/K/PDT/2011/MARI jo No. 247/PK/PDT/2013
Merits of the case	PT MPPC claimed payments on lease of BRI Building II, Parking Building, and all facilities as the right of PT MPPC. However, such claim is in contrary with Decision on BOT Agreement between PT MPPC and BRI.
Settlement status	In mediation process
Impact on the Bank's financial condition	-
2. Case facts	Legal remedy on the loss of gold collateralized under pawn scheme
Merits of the case	Plaintiff obtained credit facility by pledging gold and fixed asset of premises as principal collaterals. Gold collateral was committed under Fiduciary scheme and kept in SDB. The commitment was later changed to Pawn and kept in the same SDB. Debtor later applied for credit limit increase; prior to approval, the gold collateral in SDB was re-examined, which revealed difference between gold weight measured and weight measurement in the Bank's records. Witnessed by debtor, the gold's genuineness was examined and declared as counterfeit. Upon the finding, Debtor filed civil claim through South Jakarta District Court. BRI suspected fraud committed by the Debtor and reported the Debtor to the Police Force on grounds of suspected fraud. Debtor has also reported a number of BRI's executives to the District Police for suspected fraud.
Settlement status	In process of appeal to DKI Jakarta High Court
Impact on the Bank's financial condition	-

5. Administrative penalty from relevant authorities

During reporting year, no cases handled by the Bank that involved the Management or Executive Officers of BRI. Therefore, relevant authorities (Bank Indonesia, OJK, IDX) did not impose administrative penalty on BRI as an institution, or on individual members of the management or executive officers.

Other Important Information

Social and Environmental Responsibilities

Reference

BRI's programs with respect to social and environmental responsibilities cover the environmental, social and community development, consumer, and labor, occupational health and safety responsibilities, on the basis of the following legal framework:

1. Republic of Indonesia Law No 8 of 1999 on Consumer Protection
2. Republic of Indonesia Law No 13 of 2003 on Labor
3. Republic of Indonesia Law No 40 of 2007 on Limited Liability Company
4. Financial Services Authority Regulation No 1/POJK.07/2013 on Consumer Protection in Financial Services Sector
5. SOE Minister Regulation No Per-05/MBU/2007 as amended by Minister Regulation No Per-08/MBU/2013 on Partnership Program of State-Owned Enterprises with Small Enterprises and Environmental Development Program.

Environmental Responsibility

Activities

Among the various programs that BRI undertake for the environment is BRI's synergy with Kehati Foundation to conserve Mangrove. Mangrove's existence has been threatened by coastal abrasion, which could change the ecosystem and the livelihood of people living in coastal areas. The condition impelled BRI to save the ecosystem, the communities, and businesses that sustain them by creating coastal green belt using mangrove. To that end, BRI synergizes with Kehati Foundation as an institution with expertise in biodiversity, including mangrove in Indonesia.

In addition to the program, BRI, in partnership with Bisnis Indonesia Daily newspaper, held training for 150 medium and small enterprises, themed Creating Go Green Business Environment. BRI's CSR program in collaboration with Bisnis Indonesia evidenced BRI's genuine concern for an environmentally friendly business environment.

Financial impact or costs incurred from environmental programs, such as clean and reusable material and energy, and so forth.

(in Rp billion)

Field	Total Costs 2012 (restated)	Total Costs 2013
Natural conservation (including tree planting)	1.20	3.90
Public utilities	11.89	12.27
Political activities	No funds disbursed for political activities	No funds disbursed for political activities

Social and Community Development Responsibility Activities

In enacting social responsibility, BRI's approach is to empower and to bring benefit for communities, especially Micro and Small Enterprises (SME) and underprivileged community.

BRI's programs for economic empowerment among others are education and training packages for business communities, or community members who aim to improve their skills. One of the program's locations is Purwokerto, where BRI provided training for agricultural community living remotely in forest area on goat farming. BRI also donated goats for village residents to be managed using colony system. The assistance was expected to boost the local economy of the village residents.

Aside from empowerment programs, BRI also focuses on Education. By focusing on education, BRI aspires to contribute to Indonesia, building skilled and capable young generation for the betterment of the nation.

Currently, there are 3 (three) priority corridors form BRI's education programs, covering:

1. Scholarship:
 - a. Nusantara Cerdas Scholarship for students from East Indonesia.
 - b. Indonesia Cerdas Scholarship, regular scholarships for high performing students yet underprivileged. In 2013, BRI allocated Rp28.9 billion for 6,025 students throughout Indonesia.
 - c. BRI Journalist Scholarship; scholarship for journalists from national print media to pursue Master's Degree.
2. Facility Assistance
 - a. School renovation
 - b. Vehicle for Mobile library (Central Kalimantan)
 - c. Kapal Pintar boat (Raja Ampat)
 - d. School library.
 - e. Renovation of schools located in border areas of Indonesia and neighbouring country. In 2013, BRI disbursed Rp2.4 billion for 4 elementary schools, namely SD Yayasan Pendidikan Kristen in Sota District, Merauke Regency; SDN Hanowai in Debulik Village, Lamaknens Belu District, Atambua Regency; SDN 001 Aji Kuning in Aji Kuning Village, Sebatik Island, Nunukan Regency; and SDN 12 Entikong, Sanggau Regency.
3. Community Training and Empowerment
 - a. BRI Studentpreneur (empowering students as young entrepreneurs), in collaboration with Gajah Mada University and Yogyakarta Muhammadiyah University.
 - b. Assistance for one-day workshop selling mastery held by Pendidikan Budi Wanita Foundation, Bandung.
 - c. Fund assistance for Skill Building program to Empower People with Disabilities.
 - d. Collaboration with Jawa Pos to hold "Design Course – Artistic Design – SKKM" (Creative School for Media)
 - e. Synergy with Bogor Agricultural University to build Centre for Horticulture Development – Agribusiness Development Centre (ADC) in Pasir Sarongge Village, Cianjur – West Java.
 - f. Collaboration with Republika newspaper to manage Santripreneur Program in Islamic boarding schools. The program provided students with husbandry skills; BRI also donated farm animals to the boarding schools.
4. Health Program
 - e. In collaboration with Dentistry Faculty of University of Indonesia, BRI sponsored palate and cleft lip reconstructive surgery in Mohamad Al Kadri Hospital, Pontianak.
 - f. BRI supported the operations of clinic Rumah Sehat Amira to provide health services for poor families in Jakarta.
 - g. BRI, ANTV, and Gatot Subroto Hospital sponsored free cataract surgery for journalists and their families.

Other Important Information

Financial impact or costs incurred from social and community development activities, such as local hire, community empowerment around the Bank's offices, public infrastructures, donations, and others.

Consumer Responsibility

References

BRI's consumer responsibility refers a set of legal framework, such as:

1. Republic of Indonesia Law No 7 of 1992 on Banking, as amended by Law No. 10 of 1998
2. Republic of Indonesia Law No 8 of 1999 on Consumer Protection
3. Financial Services Authority Regulation No 1/POJK.07/2013 on Consumer Protection in Financial Services Sector
4. Bank Indonesia Regulation No 7/7/PBI/2005 on Customer Complaint Handling, as amended by BI Regulation No 10/10/PBI/2008
5. Bank Indonesia Regulation No 7/6/PBI/2005 on Banking Products Information Transparency and Utilization of Customers' Personal Data
6. Bank Indonesia Circular Letter No 15/1/DPNP on Prime Lending Rate Information Transparency

Service improvement programs for Consumers

1. BRI has established service level agreement with respect to customer complaint handling. This policy is formally outlined in Board of Directors Decree on User Authority and SLA for Customer Complaint Handling.
2. Customers who are unsatisfied with the Bank's complaint resolutions may bring their case to Banking Mediation Institution, as stated in Board of Directors' Decree on Policy and Procedure for BRI and Customer Dispute Settlement through Banking Mediation Institution.
3. The following functions have been established to follow up customer complaint:
 - a. Complaint Response. This function is responsible to, among others, receive and record complaints, and explain procedure of customer complaint handling.
 - b. Complaint Handling and Settlement. This function is responsible to, among others, handle and settle complaints, including to process documents required during settlement process.
 - c. Complaint Monitoring. This function is responsible to, among others, monitor that complaint-handling process does not exceed a certain period. Monitoring activities are conducted regularly; list of unresolved complaints are submitted to relevant Divisions.
 - d. Complaint Settlement Reporting. This function is responsible to, among others, submit complaint settlement reporting by quarter to Bank Indonesia.

Other Important Information

Policy and service program implementation

Policy on customer complaint handling is implemented through the following:

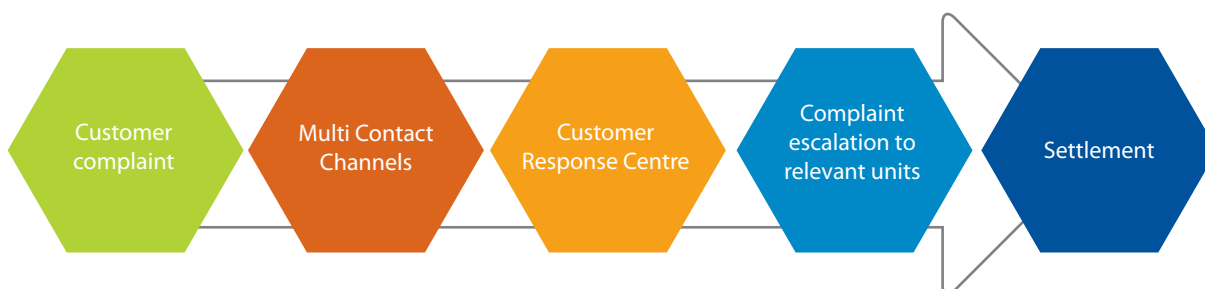

1. Complaint Handling System (CHS) application, now embedded to all working units.
2. Promulgation of policies across levels of the organization, conducted by Network Operations and Services (OJL) Department in each Regional Office.

Customer Complaint Channels

BRI has prepared multi channels for customers to lodge their complaints through the following:

3. Customer Service assigned throughout BRI's Operational Units
4. Contact number: 14017, 500017, 021-57987400, 08001017017, 021-5758899, and 021-5751234 (three latter numbers are dedicated lines for premium customers)
5. Email: kartu_kredit@bri.co.id and contactcenter@bri.co.id
6. Twitter account @kontak_bri
7. Facebook account BANK BRI Official
8. YouTube channel BANK BRI

Other Important Information

Certifications

BRI Contact Centre Service has obtained AS/NZS ISO 9001:2008 certifications, valid from 5 December 2011 to 5 December 2014.

Implementation Evaluation

The evaluation of complaint settlement procedure is conducted together with relevant divisions. The evaluations among others covered:

1. Customer inquiry on delivery of credit card replacement. To follow up the inquiry, the team has tested the access to credit card delivery register application, in team leader call centre.
2. Handling of complaints submitted through social media (Twitter, Facebook, and YouTube). Internal coordination was required to ensure follow up.
3. Complaint from consumer loan customer, reported to Consumer Loan Division. Complaint on consumer loan was transferred to Credit Card Division through CHS/Proklamasi application to ensure complaint settlement monitoring.

Labor, and Occupational Health and Safety Responsibility

Reference

BRI's Labor and Occupational Health and Safety Responsibility is enacted based on the following legal framework:

1. Republic of Indonesia Law No 1 of 1970 on Occupational Safety
2. Republic of Indonesia Law RI No 23 of 1992 on Health
3. Republic of Indonesia Law No 13 of 2003 on Labor
4. Labor Minister Regulation No Per-05/Men/1996 on Occupational Health and Safety Management System

Programs address gender and work opportunity equality, facilities and occupational safety, employee turnover, accident rate, training, etc.

Corporate Social Responsibility Report

- 390 Principles and Commitment
- 393 Responsibility Towards the Environment
- 394 Responsibility Towards Employees, Health and Safety at Work
- 396 Responsibility Towards the Community

403 Responsibility Towards Customers

“ Commitment to Community and Environment “

The implementation of a quality Corporate Social Responsibility for key stakeholders has been part of the effort to support the company's continuous performance improvement, both short-term and long-term

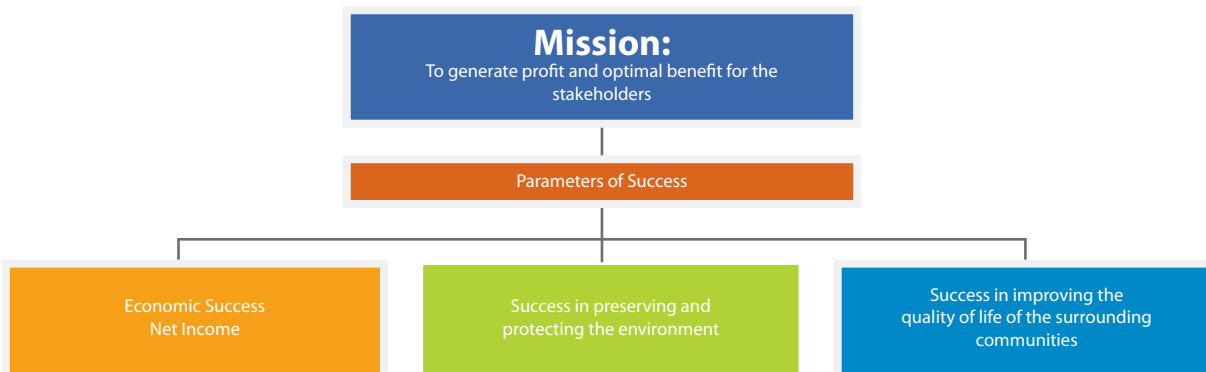

Corporate Social Responsibility Report

Principles and Commitment

As an implementation of corporate social responsibility, BRI consistently demonstrates strong commitment to continuously growing and evolving with the local community wherever its outlet is operating. We aim for a quality growth that able to balance successful performance which measured by profit, success in protecting the environment, and success in improving the quality of life of the communities located around our operational areas. To ensure quality growth, BRI has designed and implemented a range of programs which covers all aspects of operations, and is intended to fulfill all stakeholders' expectations, as described in the mission statement and its relation with the three basic aspects of the corporate social responsibility implementation, as follows.

BRI's Corporate Social Responsibility Mission Statement:

“ Social responsibility activity is a form of social investment, enacted through the intensification of mutual relationships with local communities and in collaboration with various stakeholders, including the Government, NGOs and mass organizations.

”

For BRI, corporate social responsibility is implemented as a social investment by maintaining mutual relationship with the surrounding communities and collaborating with various parties, such as the Government, NGOs, and other community organizations.

Considering the importance of this social investment, BRI demonstrated its commitment in achieving the company's CSR-related mission through the implementation of various strategic programs, with the objectives of:

- Achieving a harmonious relationship between the company and the communities.
- Assisting the growth and development of small businesses and cooperatives to become independent, resilient and competitive in order to increase employment rate through professional management.
- Establishing small businesses and cooperatives development that can potentially provide mutual long-term relationships with the Company's business through the channeling of partnership funds and sustainable development, by concentrating in the aspects of equality, independence, professionalism and ethics.
- Participating in the environmental conservation program while, at the same time, helping to improve people's quality of life in the areas of education, health and welfare.

To achieve the strategic objectives of corporate social responsibility implementations, BRI continues to develop programs that focus on the positive impact for all stakeholders as well as its sustainability for the development of the surrounding communities.

Basic Reference

BRI's planning and implementation of corporate social responsibility programs have been prepared in accordance with the applied laws and regulations, which cover the environmental responsibility, social responsibility and community development, consumer responsibility and responsibility for manpower, health and safety. The laws and regulations are as follows:

Principles and Commitment

1. Law of the Republic of Indonesia No 8 of 1999 regarding Consumer Protection (CPA)
2. Law of the Republic of Indonesia No 13 of 2003 regarding Manpower
3. Law of the Republic of Indonesia No 40 of 2007 regarding Limited Liabilities Company
4. The Indonesian Financial Services Authority Regulation No 1/POJK.07/2013 regarding Consumer Protection in the Financial Services Sector
5. Regulation of Minister of SOEs No Per-05/MBU/2007 amended with Regulation No Per-08/MBU/2013 concerning SOE's partnership program for Micro Business and Community Development Program.

Activity Outline

The implementation of BRI corporate responsibility involves interaction with the stakeholders in every aspect of the company's operations. A thorough description of these interactions is presented in the BRI Sustainability Report, which contains a description of the Company's participation and programs in the efforts to preserve, conserve and care for the earth's resources. The goal of this is maintaining a balance of economic, social and community environment, including respecting workers' rights and the application of good governance.

In compliance with the the Capital Market Supervisory Agency and Financial Institution (Bapepam-LK) Regulation Number: KEP-431/BL/2012 dated 1 August 2012 regarding Submission of Issuer or Public Company Annual Report, BRI submits a corporate responsibility report of its activity implementation which comprises of four topics, covering the company's corporate responsibility on: (1) Environment (2) Manpower Practices (3) Social and Community Development (4) Product Responsibility. Detailed descriptions of each topic can be found in BRI's sustainability report and in this financial report description in each related chapter.

Responsibility Towards the Environment

BRI's operational activities do not involve any material or physical processes that could directly impact the environment, yet BRI is still committed to participate in the efforts to improve and preserve the environment – both direct and indirect.

Active participation is conducted in the form of green initiatives re-forestation around the operational unit location and the surrounding environment, sponsorship of environment-related events, direct assistance in community development schemes focusing on environmental activities, and so forth. Several activities that have been implemented are:

- Participation in MECS (Mangrove Ecosystem Conservation and Sustainable Use), a mangrove forest preservation program, through continuous funding.
- Training for the establishment of an environmentally friendly business environment for lower middle entrepreneurs, with Bisnis Indonesia.
- Initiated the School Forest program in 27 High Schools in 9 cities, as a method of public education, especially in academic sector, about the significance of clean and healthy environment.
- Provided cleaning equipment for the community around Tondano Lake, Tomohon, Minahasa Regency.

(Further information can be found at Social Responsibility - Environmental Development - BRI Cares about Nature Conservation)

BRI's indirect participation toward environmental conservation includes adopting policies that aim to reduce the negative impact of our operations on the environment. In addition to provide positive effect on environmental conservation efforts, these policies have also helped in creating more effective and efficient operational activities.

Operational policies that indicate BRI's commitment toward the environment include:

- A paperless system for the administrative work in order to reduce the amount of paper consumed, supported by a fully integrated information technology system which includes:
 - Loan Approval System
 - E-SPJ (electronic travel document administration)
 - HR Portal
 - Policy socialization through public folder
 - Online Performance Management System
 - Change of attendance logging, from manual to electronic.
- A policy to save electricity, including the use of energy saving lights and maintaining reasonable room temperatures in all offices.
- A policy to test operational vehicles to reduce emissions.
- A policy to replace technical equipment in collaboration with an authorized, competent company that manages hi-tech waste products.
- A policy to offer investment or working capital loans only to industries that apply environmentally friendly practices, either for small, medium, or large enterprises.
- A policy to save water by using recycled water as part of good governance at BRI Head Office.

Financial Impact

The total fund allocated for renovation and construction of public facilities as well as environmental conservation in 2013 was amounted to Rp. 16.17 billion, detailed as follows:

(In Rp billion)

Sector	2012 Total Fund (restated)	2013 Total Fund
Development of public facilities	Rp. 11.89	Rp. 12.27
Environmental conservation	Rp. 1.20	Rp. 3.90
Total	Rp. 13.09	Rp. 16.17

Responsibility Towards Employees, Health and Safety at Work

A description of corporate responsibility implementation toward our employees can be found in the Sub-Chapter, "Review of Operations-Human Resource Management".

Health and Safety at Work Policy

To ensure the health and safety (HSE) of all employees, customers, and other stakeholders within the operational unit area, BRI has developed and applied a Business Continuity Management Policy (MKU). This policy covers Disaster Management Plan, which in addition to ensure the application of HSE, it is also intended to maintain the sustainability of vital business/operational activities, safeguard BRI's assets, and as a precautionary measure in the events of disaster/disruption.

This HSE policy has been included in the Collective Bargaining Agreement to comply with the Decree of the Directorate General for the Industrial Relations and Workforce Social Security Management No. Kep 107/PHIJSK-PKKAD/PKB/VIII/2011 on Registration of collective bargaining agreement between PT.Bank Rakyat Indonesia (persero) Tbk and PT.Bank Rakyat Indonesia (persero) Tbk Workers Union.

Activity

BRI applies the MKU to all operational units with the establishment/ updating of the Crisis Management Team, preparation/ updating of Call Tree and the assignment of alternate sites. BRI's Operational Unit has also conducted the Threat and Disaster Risk Assessment (PRAB) which is aimed to map disaster-prone unit and to make an inventory of required resources as a preparation for disaster/threat in each unit.

BRI's capability in implementing its business continuity has been tested and proven during some of the disasters experienced by certain BRI operational units throughout 2013, such as the earthquake in Aceh, flood in Ambon, Jakarta, and Kendari, and the volcanic eruption in North Sulawesi and North Sumatera. BRI took advantage of its mobile outlets which is e-Buzz and mobile teras spread throughout BRI's operational areas as alternate site during the disaster events, thus the operational unit can operate as soon as possible after a disaster occurs.

Furthermore, the Risk Management Division continuously coordinates the implementation of BCM with related operational units, including trials/ testing of the DC-DRC 2013 Switch Over and evacuation in the event of

disaster in several BRI office buildings, including BRI's Head Office Building and IT Building in Ragunan, South Jakarta.

In addition to natural disasters preparation, all BRI working units are also prepared for any incidents of workplace accidents as the majority of all BRI's operational activities take place in a confined space, either in high-rise buildings, soho, home office or mobile units.

With the majority of activities conducted inside closed spaces, the applied health and safety principles are focused more on the implementation of basic program to mitigate the risk of workplace accidents and to protect the employees' health conditions. This basic program comprises of a minimum one disaster simulation per year and includes the following:

- Training in evacuation procedures from multi-story buildings.
- Basic training in the use of fire extinguishers.
- Exercises for security officers in rescuing victims from a building.
- Other relevant basic training.

In addition to these basic programs, and still within the framework of protecting employees from workplace accidents, BRI has a strict policy which requires the employees to always follow the safety procedures detailed by their project officer, during a field visit review. Moreover, all BRI employees are also protected by work accident insurance during work visits.

BRI also applies a work safety standard by equipping all of its operational facilities with adequate safety equipment, whether in mobile

units, offices, or multi-story buildings. BRI also requires that information on evacuation routes in case of emergency to be provided at all events organized by external parties at the BRI Building.

In case of a health emergency occurring to an employee, the company provides healthcare facilities in the form of oxygen tubes and First Aid boxes, available at all BRI working units.

All BRI employees receive a number of health and safety related facilities:

- BRI provides special benefit packages to employees to maintain their health and/or to receive medical treatment. The company covers all expenses, within reasonable limits.
- BRI also organizes annual General Medical Checkups (GMC) for its employees, which is a preventive measure to ensure good health among its employees.
- Subsidies are provided for eyeglasses so as to optimize employee performance.
- All BRI employees are included as beneficiaries of the Workers' Social Security (Jamsostek) scheme.

To establish quality health services for all BRI employees, particularly those working in the Head Office, BRI works in conjunction with BRI Medika (a subsidiary of the BRI Pension Fund) to provide medical health checks. In addition to that, we also have 2 (two) Ambulances on standby at BRI Head Office to offer first aid assistance in the event of an accident.

Name:

BRI Medika

Location:

BRI I Building, Jakarta

Operational Hours :

08.00 – 16.30WIB

Doctors :

3 General Practitioners

Health Facilities :

Medical examinations, drug prescription and delivery, laboratory check ups.

Financial Impact

Implementation of the training and provision of basic safety equipment does not result in any material impact on BRI finances.

Responsibility Towards The Community

KUR (People Business Loan) Outstanding BRI to National

As stated above, BRI is determined to achieve business development results with the surrounding community. One implementation of this determination is to seek the local economic growth through increased entrepreneurial competence and financial resources. Thus it would support the surrounding community's business initiatives. In addition to economic support, BRI also seeks to aid community with a variety of social programs. Hence, BRI's programs in achieving corporate social responsibility for the community consists of two main programs:

- Programs Loan distribution, including:
 - KUR (People Business Loan)
 - Other programs loan (KKPE, KUT dll)
- Implementation of Corporate Social Responsibility, including:
 - BRI Peduli (BRI Cares)
 - Partnership programs

People Business Loan Distribution

The People Business Loan, commonly referred as KUR, is loan/financing by banks to Micro and Small Enterprises that are considered feasible but not yet bankable; in other words, small businesses that have good business prospects and the ability to repay the loans. For BRI, the distribution of these loans is a way to improve the status of mentoring partners in Partnership and Community Development Program (PKBL), to become bankable small businesses that are ready to grow.

BRI has become one of the Government's strongholds in providing People Business Loan, due to the result of BRI's competitive advantage of having the largest banking network in real time online outlets, as well as significant experience in the micro business. When combined, these factors enable BRI to easily distribute loans, while also maintaining loan quality.

To that end, BRI's People Business Loan market share in 2013 was stood at 64.11% of the total KUR, and 94.1% of the total KUR borrowers throughout Indonesia.

Financial Impact of KUR

BRI has served more than 9 million customers by the end of 2013, with total People Business Loan amounting to more than Rp 69 trillion. In December 2013, BRI's outstanding in KUR was amounted to Rp 27.7 trillion, a 35.12% increase from Rp 20.5 trillion in 2012. As of the end of 2013, the total debtors of KUR was recorded at 2.7 million, or 22.73% increase from the previous year of 2.2 million. BRI managed to maintain KUR quality, with 1.42% Non-performing Loans (NPL) recorded in 2013, improved compared with 1.65% in 2012.

These figures highlight the significant role of BRI in enhancing financial inclusion in Indonesia and BRI indirect provisions to improve the living standards of communities located around BRI operational areas.

Other Program Loans

In addition to micro-financing scheme extension through KUR, BRI also offers other loan programs with the objectives to improve the regional economy through the establishment of food and energy security, supported by its network and extensive experience in micro finance.

BRI provides loans of Food and Energy Security (KKP-E), Warehouse Receipt Subsidy Scheme (S-SRG) and the Bio-Energy Development and Plantation Revitalization programs (KPEN-RP) with a Non-Partnership Model. The Food and Energy Security loan scheme has helped many farmers, livestock farmers, fishermen, and fish farmers in increasing their production levels.

Financial Impact

By the end of 2013, BRI has disbursed the Food and Energy Security loan to 25,127 groups of Farmers/Livestock Farmers/Cultivators/Cooperation to increase their production yields. The total outstanding loans increased 16.67% from Rp2.46 trillion to Rp2.87 trillion.

Corporate Social Responsibility (CSR) Program

The Company's Corporate Social Responsibility program directed to empower and benefit the community at large, particularly for Micro and Small Enterprises (MSE) or in the category of economically disadvantaged. This program is the manifestation of corporate social responsibility implementation in social aid and community developments, carried out through the Partnership Program and Community Development (PKBL).

PKBL is a corporate social responsibility program conducted to comply with the Minister of State-Owned Enterprise Regulation No. PER-08/MBU/2013 dated 10 September 2013 on Amendments to Minister of SOE Regulation No. 05/MBU/2007 regarding the SOE Partnership Program with Small Businesses and Community Development Programs.

In reference to the above Minister regulations, BRI has internally stipulated a number of technical regulations through circular letters to working Units, including:

- NOSE.S.19 – DIR/ADK/04/2006, dated 28 April 2006 on Partnership Program and Community Development of PT. Bank Rakyat Indonesia (Persero) Tbk.
- Letter B.789 PRG/KBL/12/2010, dated 03 December 2010 on Community Development Program

- Letter B.257 SKP/CSR/07/2012, dated 09 July 2012 on Community Development Program
- Letter B.752 SKP/CSR/07/2013, dated 19 July 2013 on the Requirements for Community Development Program and Mechanism of the Community Development Aid Disbursement.
- Letter .S.32 – DIR/SKP/11/2013, dated 29 November 2013 on the Implementation of the community Development Program of PT. Bank Rakyat Indonesia (Persero) Tbk.
- Letter B.131.PRG/KBL/03/2009, dated 5 March 2009 on Community Development Financial Aid for Emergency Responses.
- Letter B.524-PRG/KBL/09/2012, dated 5 September 2012 on Guidelines for the Bookkeeping of Partnership Loans.
- Director's Letter B.176-DIR/PRG/03/2013, dated 13 March 2013 on Changes to the Interest Rate Distribution of Partnership Loans
- Letter B.54-DIR/PRG/01/2012, dated 31 January 2012 on the Partnership Loan Breakdown

The CSR/PKBL activities funding allocation is decided in the Annual General Meeting of Shareholders (AGMS) and is considered as a cost, each amounting to a maximum of 2% from previous year's net income, both for the Partnership Program and Community Development. In 2013, the total allocation of fund for the PKBL program was taken from the program's fund balance sourced from the Company's profit allocated to the end of 2012.

The total realization of funds for the PKBL in 2013 reached Rp 271.44 billion, which comprised of Partnership Fund disbursements of Rp131.32 billion and Community Development Fund disbursements of Rp140.12 billion.

Total KUR Borrowers BRI to National

Responsibility towards The Community

Partnership Program

BRI Partnership Program is a financing and assistance program for micro and small businesses, including cooperatives that have business feasibility but has not yet been eligible for BRI's commercial loan scheme. In practice, BRI views the implementation of the partnership program as part of its efforts to achieve the company's mission, which is "To carry out best practices by prioritizing banking services to micro, small and medium enterprises (MSME) to bolster the local economy".

This program aims to increase productivity within micro and small businesses of mentoring partners, so they become sustainable businesses in the future. Partners within this Partnership program are expected to be BRI's commercial customers in the future.

Through this Partnership Program, BRI offers entrepreneurship development programs as well as financing facilities with accessible requirements. This development program is implemented in various forms, including assistance in basic entrepreneurial knowledge, basic product marketing, and product promotional activities by engaging mentoring partners in a variety of micro business product exhibitions at regional, national and international levels. Participation at these exhibitions not only allows mentoring partners to gain new insights but also gives them an opportunity to expand the awareness of their products.

The financing and the selection process are done selectively to comply with the Company's long-term plans. With consideration to the efficiency of assistance, control and ease of marketing, BRI now focuses more on channeling funds to clusters of specific businesses.

The year 2013 was marked with the temporary termination of Partnership Loans disbursement in April by the SOE Ministry, resulting in the decrease of total realization of fund disbursement compared to 2012. Nevertheless, by following the business cluster formation, in 2013 BRI succeeded in channeling the partnership program fund to 3,723 mentoring partners, bringing the total number of mentoring partners assisted through the end of 2013 to 23,725. The total amount of partnership loan funds disbursed reached Rp130.06 billion, including the fund distribution in partnership with other SOEs: PTPN IX and PTPN XI of Rp 90 billion in the sector of Plantation, bringing the total amount of disbursed partnership fund in 2013 to Rp. 717.48 billion. In addition to loans, BRI also disbursed a partnership development fund of Rp. 1.26 billion in 2013.

The following table details the disbursement of partnership loans during 2013, divided by economic sectors:

Business Sector	2013 Realization	% Composition
	In Rp Billion	
Industry	2.57	1.98%
Trade	18.51	14.23%
Agriculture	2.90	2.23%
Livestock	5.96	4.58%
Plantation	91.80	70.58%
Fishery	2.79	2.14%
Service	4.01	3.08%
Others	1.52	1.17%
Sub Total	130.06	100.00%
Development Fund	1.26	
Total	131.32	

Responsibility towards The Community

Balinese Coffee Business Development

Economic Empowerment Program – BRI

Balinese coffee, including the arabica coffee produced in Landih Village, Bangli Regency, Bali, is quite popular in Indonesia. Wayan Jamin, a coffee entrepreneur and chairman of the KSU Bale Dana Mesari, has assisted dozens of coffee farmer groups in his village, and has been in this industry for decades. The village's speciality is the B36 Arabica Coffee and the B36 Luwak (Civet) Coffee, in which the coffee beans come from Landih Village coffee farmers and from 2 hectares of coffee land inhabited with wild civets.

KSU Bale Dana Mesari's Arabica and Luwak Coffee are high quality coffees, which processed through an organic method with organic fertilizers obtained from the farmers' traditionally maintained livestock farm. Facilitated by the KSU Bale Dana Mesari, the farmers' coffee yields are processed into organic Arabica coffee marketed as B36 Bali Arabica Coffee throughout Bali and exported internationally.

Through its Partnership Program, BRI has facilitated 7 coffee farmer groups or 105 individuals through the KSU Bale Dana Mesari, using a total land of 43 Ha.

The financing provided by BRI is used to improve the production process with the purchase of coffee bean processing machines. This machine has improved the efficiency and quality in processing red coffee beans into clean coffee beans. Clean beans mean higher selling prices of coffee to the cooperative. To maintain quality and efficiency in coffee processing, technology is required in the process. Hence, BRI and KSU Bale Dana Mesari are ready to support and facilitate hundreds of coffee farmers that wish to develop their business.

Responsibility towards The Community

2013 Community Development Program Realization

Description :

- Public Facilities
- Natural Disasters
- Education/Training
- Health
- Religious Facilities
- Nature Conservation
- Aid for Poverty Eradication

BRI Peduli - Community Development Program

BRI's Community Development Program through BRI Peduli program aimed to improve the social conditions and quality of life of communities living around BRI operational areas by focusing on economic empowerment. Economically empowering aid is seen as a more beneficial because not only it supports the people's economic condition, it also helps them in sustaining their own livelihood.

To provide synergy with the Partnership Program and to be in line with the PKBL implementation objectives, which is supporting the community welfare by cultivating economic capacity, social condition, environmental condition and community development, Community Development fund was focused on Education and Training for the Economic Empowerment sector in 2013.

This focus is aimed to improve the communities' living standards, enhance public knowledge and competence, while providing a synergy with the disbursement of Partnership Program Fund.

Realization of BRI Peduli Community Development in 2013 has been recapitulated as follows:

Business Sector	2013 Realization	% Composition of BRI Peduli
	In Rp Billion	
Public Facilities	12.27	8.76%
Natural Disasters	3.97	2.83%
Education/Training	73.28	52.29%
Health	20.46	14.60%
Religious Facilities	23.12	16.50%
Nature Conservation	3.90	2.79%
Aid for Poverty Eradication	3.13	2.23%
Total	140.12	100%

BRI Peduli Program for Education

In line with CSR program objectives, BRI Peduli program for Education is focused on education for economic empowerment, and is intended as a stimulus to encourage creative and innovative entrepreneurs in the community. The program is implemented through the BRI Studentpreneur Program in collaboration with universities in Indonesia, along with MSME training for the communities in collaboration with NGOs or government agencies.

In 2013, to expand the scope of entrepreneurship development program, BRI also took some Islamic boarding school (pesantren) students to carry out a program of economic empowerment, through BRI Santripreneur program.

Responsibility towards The Community

BRI Works with Pesantren for Santripreneur

One of the many ways to develop and strengthen the MSME is to create and facilitate new entrepreneurs through education and economically empowerment trainings. BRI has consistently organized the BRI Studentpreneur program for the past few years, in 2013 BRI expanded the scope of the program to the Islamic boarding school level, with the Santripreneur program.

The Santripreneur program is intended to increase independence and stimulate entrepreneurship amongst the boarding school students. The Santripreneur Program is implemented through livestock farming training for students in the boarding schools.

In addition to livestock farming training, BRI also supported the schools by providing the actual livestock.

The boarding schools that was selected for pilot project is the Al Bayan Boarding School in Lebak, Banten. BRI provided training and also 50 goats, which were granted as start-up capital for Al Bayan Boarding School. Students who received training from the Santripreneur program are expected to be pioneers in the development of goat farming in boarding school. Al Bayan boarding school sent around 20 students to receive training in raising goats, who are expected to share their knowledge with other students on raising the livestock and waste processing into organic fertilizer.

BRI Peduli Program for Public Facility

BRI provides assistance of public facilities/infrastructure renovation and construction, including: the construction of wells/water storage for drought areas in Purwodjo, construction of agrobusiness development center in Pasir Sarongge with IPB, provision of equipments for Tanah Abang G Block Culinary Centre, improvement of rural roads in Pesawahan Banyumas village, and others. The total distribution of BRI Peduli program for public facilities in 2013 was amounted to Rp12.27 billion.

BRI Peduli for Natural Disasters

As part of its efforts to help victims of natural disasters, BRI provides emergency response assistance through its operational units located closest to affected areas. In 2013, BRI distributed Rp 3.97 billion to help with the natural disaster mitigation efforts, including Mount Sinabung, Tanah Karo, North Sumatera; Earthquake in Bener Meriah, Nangro Aceh Darussalam; flood victims in Jakarta; and the Haiyan typhoon victims in the Philipines. This financial aid was distributed for food, clothing, medicine, blankets and other emergency needs.

BRI Peduli Program for Public Health

This program is a manifestation of BRI commitment in improving the community healthcare in Indonesia. The total funding disbursed in 2013 for health-related activities was Rp20.46 billion for various activities, including: the development of Rumah Sehat Amira, free cataract surgeries, mass circumcision, mouth and harelip surgeries in Pontianak, Blood Donor by the BRI employees, and other activities.

Responsibility towards The Community

BRI Peduli Program for Religious Facilities

Contributing to the wellbeing and the quality of religious aspects of the community, BRI strives to prepare and offer assistance to the renovation and construction of mosques and other religious facilities around the operational unit. Total fund distributed for the improvement of religious facility through the BRI Peduli program for Religious Facilities in 2013 was Rp 23.12 billion.

BRI Peduli Program for Nature Conservation

Activities carried out by BRI to protect the environment were carried out through several activities, including: equipments to clean lakes from water hyacinth, School Forest program in 9 provinces and 27 schools, participation in forest conservation and mangrove planting in the north coast of Java. In 2013 Rp 3.90 billion was disbursed to fund these activities.

BRI Peduli Program for Poverty Eradication

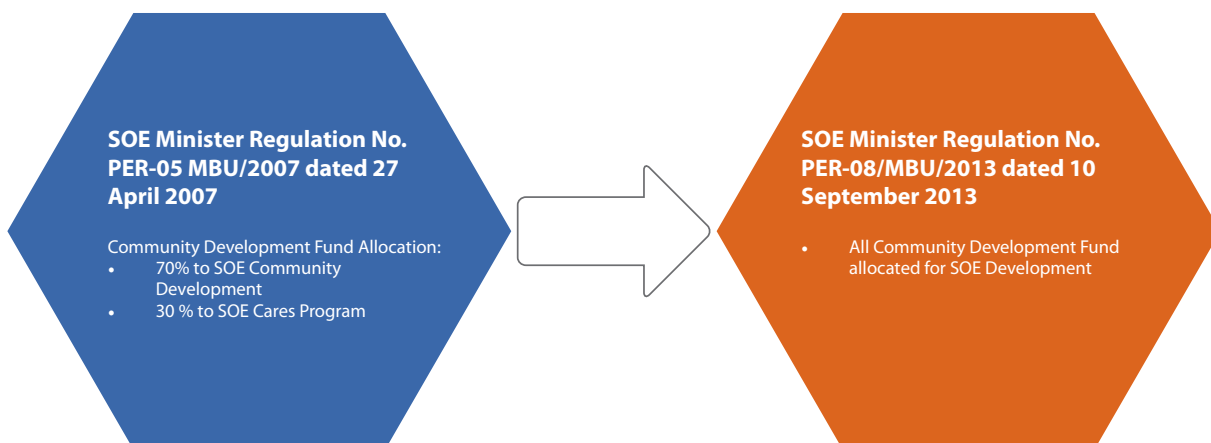

The most recent addition to the Community Development program was made in September 2013, to comply with the SOE Minister Regulation No. PER.05/MBU/2013 dated 1 May 2013. The realization of this sector is implemented through basic foods supplies distribution and social aids in several areas:

- 20,000 free food packages in the month of Ramadhan, at 15 points in Jabodetabek
- 4000 free food packages in 'BUMN Berbagi Sembako' event in Gorontalo and Central Kalimantan.
- Social aid for orphans of Misbach Chunur Foundation, Cimahi
- Assistance for Community Empowerment in Cimande through the Farmers Group
- Social aid for orphans and the underprivileged through Dompot Umat Berdikari Foundation

Total amount of BRI Peduli for poverty eradication reached Rp. 3,13 billion.

Impacts of Amendment to Regulations

The SOE Minister Regulation No. PER-05/MBU/2007 dated 27 April 2007 was amended with SOE Minister Regulation No. PER-20/MBU/2012 Dated 27 December 2012, and was finally amended with The SOE Minister Regulation PER-08/MBU/2013 dated 10 September 2013 regarding Amendment to the SOE Minister Regulation No. PER-05/MBU/2007 dated 27 April 2007 on SOE Partnership Program with Small Businesses and Community Development Program. With that in effect, the PKBL fund management has been handed over to comply with the specified provisions.

Responsibility Towards Customers

The bank's customers are among the most vital stakeholders in ensuring BRI's sustainability over the long run. With their central role in ensuring the availability of bank funding (through savings, deposits, etc.) and maintaining the business of loan disbursement (through a variety of loan products) and banking services, the customers' trust and satisfaction is an element that needs to be managed properly.

To maintain customers' trust and satisfaction, BRI offers a variety of banking products and services to suit the customers' needs, with quality, diverse product features, ease of access with the provision of network services and a conventional e-channel, accurate transaction records, real time online services, and customer service to handle customer complaints.

Detailed descriptions of the programs can be found in the following sections: "Products and Services", "Operational-Marketing Highlights", and "Management Discussion and Analysis-Business Overview".

Customer Service Policy

To settle customer complaints, since 2010 BRI released Bank BRI Director's Decree No. S.46 –DIR/LYN/07/2010 regarding Policy and Procedures of Customer Complaint Settlement of PT Bank Rakyat Indonesia (Persero) Tbk. This policy of customer complaint settlement has consistently been applied through a series of steps including:

- Stipulation of the service level agreement for the customer complaints settlement as regulated in BRI Decision Letter No. S.35 –DIR/LYN/05/2013 regarding User and SLA's Authority in Customer Complain Settlement.
- Settlement through the Organization for Banking Mediation for unsatisfied customers with the settlement conducted by BRI, in compliance with BRI Director's Decision Letter No. S. 49 –DIR/OPS/10/2006 regarding BRI's Policy and Procedures of Dispute

Settlement with Customer through the Organization for Banking Mediation.

- Determination of the customer complaints settlement function, including: Complaint Reception, Handling and Settlement of Complaint, Complaint Monitoring and Complaints Settlement Reporting.

To provide quality and responsible services for its customers, BRI service policy is set as illustrated in the following diagram:

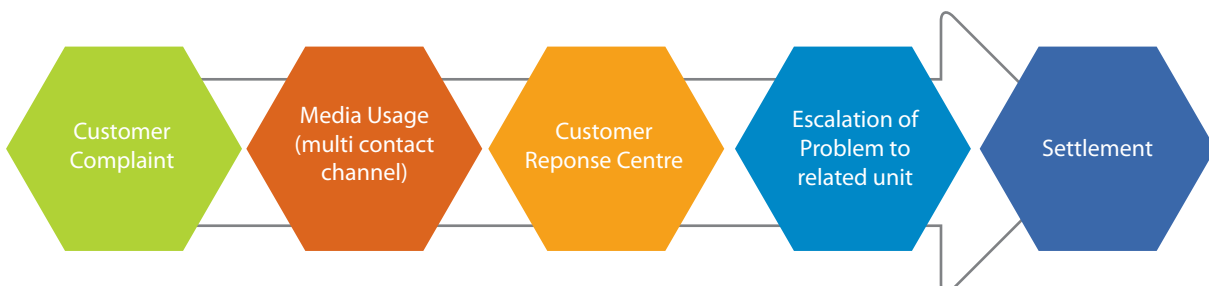

Responsibility Towards Customers

Policy Implementation

To improve customer satisfaction and trust, and as an implementation of its policies, BRI includes various programs to :

- Improve accessibility to its network, both conventional or e-channel:
 - Opening of 756 additional offices, 4,000 ATMs and 41,221 EDC units (more details can be found in “Network Expansion” chapter)
 - Investment in BRI’s banking technology infrastructure (More details can be found in “Information Technology” chapter)
- Improvements on the accessibility of BRI’s product and services information:
 - Development of BRI’s website, www.bri.co.id, where customers can find in-depth information about products and services offered.
 - BRI’s Contact Center
Through BRI’s Contact Center, customers can obtain further information about BRI including product information, marketing programs and the latest BRI services. They can also submit any complaints about BRI services.
 - Mobile Banking BRI
With this latest service, customers can enjoy easy access to BRI’s banking services as well as obtaining information about BRI’s products and ATM network, including finding the nearest ATM location in real time.
- Improvements on the service quality with the implementation of Service Level Agreement (SLA) in the settlement of customer complaints, including:
 - Implementation of the Complaint Handling System (CHS) application in all operational units.
 - Socialization of SLA policies in settlement of customer complaints.
 - Improve access through BRI’s multi-channel contacts:
 1. Customer Service in all BRI’s Operational Working Units
 2. Telephone 14017, 500017, 021-57987400
 3. Premium Call 08001017017, 021-5758899, dan 021-5751234
 4. Website www.bri.co.id
 5. Email : kartu_kredit@bri.co.id and contactcenter@bri.co.id
 6. Internet banking: <https://ib.bri.co.id>
 7. Social Media: Twitter: @kontak_bri
 8. Facebook: BANK BRI Official
 9. Youtube: BANK BRI
 10. Customer complaints can be sent by mail to:
The nearest BRI outlets; or Contact Center, Service Department BRI Head Office
 11. Print and electronic media
 12. Face to face: Directly to BRI’s Customer Service Officer in the nearest BRI outlets
 - Customer Complaints Procedure:

Responsibility Towards Customers

- Evaluation of the number of complaints settlement, is recapitulated as follows:

Customer Complaints Settlement Rate				
Year	Complaints Received	Complaints Followed-up	Complaints Resolved	Complaints in process
2011	173,728	173,728	170,263	3,465
2012	168,672	168,672	165,192	3,482
1st Quarter - 2013	35,862	35,862	32,606	3,256
2nd Quarter - 2013	35,943	35,943	33,290	2,653
3rd Quarter - 2013	34,562	34,562	30,859	3,703
4th Quarter - 2013	35,942	35,942	34,224	1,718

* In-process complaints will be followed up in the following year

- A survey on BRI's service standard was conducted to obtain feedback for improvement in customer service level. This survey was administered by an independent firm, Marketing Research Indonesia (MRI), with the following results:

Evaluated Aspects	2012	2013
Phone Banking Officer	82.21	92.99
Phone Banking IVR	87.50	90.19

In addition to the above index that showed an increase in the level of service, BRI also received recommendations on various aspects of services for further improvements in the future.

Certification of Service Level

BRI's Contact Center Service has been certified with ISO 9001:2008 by the Verification New Zealand Limited, valid from 5 December 2011 to 5 December 2014

Financial Impact

BRI capital investment in 2013, which allocated specifically to further enhance the service quality and to expand BRI's network was amounted to Rp1.45 trillion. (See also a rundown of capital expenditure in the "Financial Review" section).

Independent Auditors' Report

Report No. RPC-4702/PSS/2014

**The Shareholders, Boards of Commissioners and Directors
PT Bank Rakyat Indonesia (Persero) Tbk**

We have audited the accompanying consolidated financial statements of PT Bank Rakyat Indonesia (Persero) Tbk and its subsidiaries, which comprise the consolidated statement of financial position as of December 31, 2013, and the consolidated statement of comprehensive income, statement of changes in equity, and statement of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information.

Management's responsibility for the consolidated financial statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with Indonesian Financial Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with Standards on Auditing established by the Indonesian Institute of Certified Public Accountants. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

This report is originally issued in the Indonesian language.

Independent Auditors' Report (continued)

Report No. RPC-4702/PSS/2014 (continued)

Opinion

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of PT Bank Rakyat Indonesia (Persero) Tbk and its subsidiaries as of December 31, 2013, and their consolidated financial performance and cash flows for the year then ended, in accordance with Indonesian Financial Accounting Standards.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

1. GENERAL

a. Establishment

PT Bank Rakyat Indonesia (Persero) Tbk (hereinafter referred to as "BRI") was established and started its commercial operations on December 18, 1968 based on Law No. 21 year 1968. On April 29, 1992, based on the Government of the Republic of Indonesia (the "Government") Regulation No. 21 year 1992, the legal status of BRI was changed to a limited liability corporation (Persero). The change in the status of BRI to become a limited liability corporation was documented by notarial deed No. 133 dated July 31, 1992 of notary Muhani Salim, S.H. and was approved by the Ministry of Justice of the Republic of Indonesia in its Decision Letter No. C2-6584.HT.01.01.TH.92 dated August 12, 1992 and published in Supplement No. 3A of the Republic of Indonesia State Gazette No. 73 dated September 11, 1992. BRI's Articles of Association was then amended by notarial deed No. 7 dated September 4, 1998 of notary Imas Fatimah, S.H., pertaining to Article 2 on "Term of Corporate Establishment" and Article 3 on "Purpose, Objectives and Business Activities" to comply with the provisions of Law No. 1 year 1995 on "Limited Liability Company" that was approved by the Ministry of Justice of the Republic of Indonesia in its Decision Letter No. C2-24930.HT.01.04.TH.98 dated November 13, 1998 and was published in Supplement No. 7216 of the Republic of Indonesia State Gazette No. 86 dated October 26, 1999 and notarial deed No. 7 dated October 3, 2003 of notary Imas Fatimah, S.H., among others, regarding the Company's status and compliance with the Capital Market Laws which were approved by the Ministry of Justice and Human Rights of the Republic of Indonesia in its Decision Letter No. C-23726 HT.01.04.TH.2003 dated October 6, 2003 and published in Supplement No. 11053 of the Republic of Indonesia State Gazette No. 88 dated November 4, 2003.

Based on Bank Indonesia's Decision Letter No. 5/117/DPwB2/PWPwB24 dated October 15, 2003, regarding "SK appointment of BRI as a foreign exchange commercial bank", BRI has been designated as a foreign bank through Letter of Monetary Board No. SEKR/BRI/328 dated September 25, 1956.

Based on notarial deed No. 51 dated May 26, 2008 of notary Fathiah Helmi, S.H., BRI amended its Articles of Association, among others, to comply with the provisions of Government Regulation No. 40 year 2007 on "Limited Liability Company" and Capital Market and Financial Institution Supervisory Agency's ("Bapepam-LK") Regulation, whose function has been transferred to the Financial Services Authority ("OJK") starting January 1, 2013, No. IX.J.I on "The Main Provisions of the Articles of Association of a Company that Conduct Public Offering of Shares and Public Company", which was approved by the Ministry of Laws and Human Rights of the Republic of Indonesia in its Decision Letter No. AHU-48353.AH.01.02.Year 2008, dated August 6, 2008 and was published in Supplement No. 23079 of the Republic of Indonesia State Gazette No. 68 dated August 25, 2009.

Subsequently, BRI's Articles of Association has been amended several times. The latest amendment was documented in notarial deed No. 57 dated March 28, 2012 of candidate notary Dina Chozie, S.H., replacement of notary Fathiah Helmi, S.H., and was approved by the Ministry of Laws and Human Rights in its Decision Letter No. AHU-AH.01.10-2076 dated June 8, 2012. According to Article 3 of BRI's latest Articles of Association, BRI's scope of business is to conduct and support the Government's policy and program in the economic sector and in the national development in general, particularly in conducting business in the banking sector, in accordance with the prevailing laws and regulations, including the conduct of operating activities based on Sharia principles.

b. Recapitalization Program

In realization of the recapitalization program for commercial banks, set forth in Government Regulation No. 52 year 1999 regarding the Increase in Investments in Shares by the Republic of Indonesia in State-Owned Banks, BRI received all the recapitalization with a nominal amount of Rp29,149,000 in the form of Government recapitalization bonds issued in 2 (two) tranches at their nominal amounts of Rp20,404,300 on July 25, 2000 and Rp8,744,700 on October 31, 2000 (Notes 10 and 30b).

These consolidated financial statements are originally issued in the Indonesian language.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

1. GENERAL (continued)

b. Recapitalization Program (continued)

Furthermore, as stated in the Management Contract dated February 28, 2001 between the Republic of Indonesia as represented by the Government through the Ministry of Finance and BRI, the Government determined that the recapitalization requirement amount of BRI to achieve a minimum Capital Adequacy Ratio of 4% was Rp29,063,531. Therefore, BRI returned the excess of recapitalization amounted to Rp85,469 in the form of Government Recapitalization bonds to the Republic of Indonesia on November 5, 2001 (Notes 10 and 30a).

On September 30, 2003, the Ministry of Finance issued Decision Letter No. 427/KMK.02/2003 dated September 30, 2003 regarding the final amount and the implementation of the Government's rights as a result of the additional investment of the Republic of Indonesia in the capital of BRI under the recapitalization program for commercial banks. Based on this Decision Letter, the Ministry of Finance affirmed that the final recapitalization requirement of BRI amounted to Rp29,063,531 (Note 30a).

c. Initial Public Offering of Shares and Stock Split

In relation to BRI's Initial Public Offering (IPO) of shares, based on the registration statement dated October 31, 2003, the Government, acting through the Ministry of State-Owned Enterprises agreed to conduct an IPO of 3,811,765,000 common shares of BRI together with over-subscription option shares and over-allotment option shares.

The IPO consists of the International Public Offering (under Rule 144A of the Securities Act and "S" Regulation) and the Indonesian Public Offering. BRI submitted its registration to Bapepam-LK and such registration statement became effective based on the Chairman of Bapepam-LK letter No. S-2646/PM/2003 dated October 31, 2003 (Note 30a).

BRI's IPO of shares consists of 3,811,765,000 shares with a nominal value of Rp500 (full Rupiah) per share and with a selling price of Rp875 (full Rupiah) per share. Subsequently, 381,176,000 shares under the over-subscription option and 571,764,000 shares under the over-allotment option at a price of Rp875 (full Rupiah) per share were exercised on November 10, 2003 and December 3, 2003, respectively. After BRI's IPO and the exercise of the over-subscription option and the over-allotment option by underwriters, the Republic of Indonesia owns 59.50% of shares of BRI (Note 30a). On November 10, 2003, the above mentioned offered shares were initially traded at the Jakarta and Surabaya Stock Exchanges (currently the Indonesia Stock Exchange) and all shares of BRI have been simultaneously listed.

Based on the notarial deed No. 38, dated November 24, 2010, notary Fathiah Helmi, S.H., stock split was performed of Rp500 (full Rupiah) per share to Rp250 (full Rupiah) per share. The deed was received and recorded in the administration database system of the Ministry of Laws and Human Rights of the Republic of Indonesia in its letter No. AHU.AH.01.10-33481 dated December 29, 2010. Stock split was performed in 2011 and BRI schedule that the end of trading shares with a previous nominal value or Rp500 (full Rupiah) per share in Regular and Negotiation Market is on January 10, 2011 and the date of commencement of legitimate trade with the new nominal value or Rp250 (full Rupiah) per share is dated January 11, 2011.

These consolidated financial statements are originally issued in the Indonesian language.

e. Subsidiaries

PT Bank BRISyariah

On June 29, 2007, BRI entered into a Sale and Purchase of Shares Agreement with the shareholders of PT Bank Jasa Arta ("BJA") to acquire 100% of BJA's shares at a purchase price of Rp61 billion. Based on BRI's Shareholders' Extraordinary General Meeting, as stated under the notarial deed No. 3 dated September 5, 2007 of notary Imas Fatimah, S.H., the shareholders approved the above acquisition of BJA and subsequently obtained the approval of Bank Indonesia, according to letters No. 9/188/GBI/DPIP/Rahasia dated December 18, 2007 and No. 9/1326/DPIP/Prz dated December 28, 2007. The acquisition was completed on December 19, 2007 based on Acquisition Deed No. 61 of notary Imas Fatimah, S.H., whereby BRI acquired 99.99875% of the issued shares of BJA and 0.00125% was granted to BRI's Employee Welfare Foundation (Yayasan Kesejahteraan Pekerja BRI).

Based on notarial deed No. 45 dated April 22, 2008 of notary Fathiah Helmi, S.H., the name PT Bank Jasa Arta was changed into PT Bank Syariah BRI ("BSB"). Based on the Governor of Bank Indonesia's Decision Letter No. 10/67/KEP.GBI/DpG/2008 dated October 16, 2008, BSB obtained the approval to change its business activities from a conventional bank into a commercial bank that conducts business activities based on Sharia principles. Within 60 (sixty) days from the decision date, BSB was obliged to perform its business activities based on Sharia principles and within a maximum of 360 (three hundred sixty) days from the decision date, BSB was obliged to settle all its loan receivables and debtor or customer liabilities from the previous conventional banking activities.

On December 19, 2008, BRI has entered into a spin-off agreement to transfer the assets and liabilities of BRI's Sharia Business Unit ("UUS BRI") to BSB, based on notarial deed No. 27, dated December 19, 2008 on "The Spin-Off Agreement of BRI's Sharia Business Unit into PT Bank Syariah BRI" of notary Fathiah Helmi, S.H., with effective date on January 1, 2009. As a result of the spin-off as of the effective date:

1. All assets and liabilities of UUS BRI in possession of BRI by operation of law were transferred and become the rights, liabilities or expenditures to be operated under BSB's responsibility as the receiving entity.
2. All of the UUS BRI's operations, business and office activities by operation of law were transferred to and/or operated under BSB's benefit, loss and responsibility.

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

1. GENERAL (continued)

e. Subsidiaries (continued)

PT Bank BRISyariah (continued)

All of the UUS BRI's rights, claims, authorities and liabilities based on any agreements, actions or existing which were made, performed, or which occurred on or before the effective date of the spin-off including but not limited to the stated list of assets and liabilities of UUS BRI and all legal relations between UUS BRI and other parties by operation of law, have been transferred to and or operated under BSB's benefit, loss and responsibility.

Based on BSB's Shareholders' Statements of Agreement as stated in notarial deed No. 18 of notary Fathiah Helmi, S.H., dated April 14, 2009, the name of PT Bank Syariah BRI was changed to PT Bank BRISyariah ("BRIS") as approved by the Governor of Bank Indonesia's Decision Letter No. 11/63/KEP.GBI/DpG/2009 dated December 15, 2009.

BRIS' Articles of Association has been amended several times. The latest amendment was documented in the notarial deed of Decision of PT Bank BRI Syariah's Annual Shareholders' General Meeting Statement No. 113 dated June 26, 2013 of Notary Fathiah Helmi, S.H., notary in Jakarta, regarding the addition of the issued and fully paid capital. The amendment was approved by the Minister of Law and Human Rights of the Republic of Indonesia in its Decision Letter No. AHU-40622.AH.01.02.Tahun 2013 dated July 25, 2013.

According to Article 3 of BRIS's latest Articles of Association, the scope of BRIS's business is to conduct banking business based on Sharia principles.

Total assets of BRIS as of December 31, 2013 and 2012 amounted to Rp17,419,045 and Rp14,088,915, respectively, or 2.78% and 2.56%, respectively, of the consolidated total assets. Total Sharia income for the years ended December 31, 2013 and 2012 amounted to Rp1,740,253 and Rp1,338,400, respectively, or 2.93% and 2.70%, respectively, of the consolidated interest income.

BRISyariah's Head Office is located at Jl. Abdul Muis No. 2-4, Jakarta Pusat, and has 51 domestic branch offices and 195 sub-branch offices.

PT Bank Rakyat Indonesia Agroniaga Tbk (BRI Agro)

On August 19, 2010, BRI entered into Sale and Purchase of Shares Agreement (PPJB) with the Agricultural Estate Pension Fund (Dapenbun), as the owner of 95.96% shares of BRI Agro, to acquire the shares of BRI Agro with total nominal value of Rp330,296 for 3,030,239,023 number of shares at a price of Rp109 (full Rupiah) per share. After the acquisition, the shareholdings of BRI Agro's investors comprise of 76% by BRI, 14% by Dapenbun and 10% by the public.

The shareholders approved the acquisition of BRI Agro based on BRI's Shareholders' Extraordinary General Meeting according to notarial deed No. 37 dated November 24, 2010 of notary Fathiah Helmi, S.H. Bank Indonesia also granted approval of the acquisition in its Letter No. 13/19/GBI/DPIP/Rahasia dated February 16, 2011. The acquisition was completed on March 3, 2011 based on the notarial deed No. 14 of notary Fathiah Helmi, S.H., whereby BRI owned 88.65% of the total issued and fully paid shares of BRI Agro, as stated in notarial deed No. 68 dated December 29, 2009, of notary Rusnaldy, S.H. The above mentioned matter also considered the effects of Series I Warrants which are exercisable up to May 25, 2011.

These consolidated financial statements are originally issued in the Indonesian language.

PT Bank Rakyat Indonesia Agroniaga Tbk (BRI Agro) (continued)

In compliance with Bapepam-LK's Regulation No. IX.H.1, Attachment to Decision of Chairman of Bapepam-LK No. Kep-259/BL/2008 dated June 30, 2008 regarding "Public Company Takeovers", BRI, as the new controlling shareholder of BRI Agro, is required to conduct mandatory Tender Offer for the remaining BRI Agro's shares which are owned by the public. The Tender Offer statement became effective May 4, 2011 based on Chairman of Bapepam-LK's letter No. S-4985/BL/2011 and was announced on two daily newspapers, *Bisnis Indonesia* and *Investor Daily*, both on May 5, 2011. The Tender Offer period commenced on May 5, 2011 and concluded on May 24, 2011. On the closing date of the Tender Offer period, BRI acquired 113,326,500 additional shares (3.15% of the total shares of BRI Agro). The price used for the Tender Offer is at Rp182 (full Rupiah) per share.

On July 1, 2011, BRI enacted the sale of 256,375,502 shares to Dapenbun as a result of Dapenbun's exercise of its buy option at a price of Rp109 (full Rupiah) per share. Based on Bapepam-LK's Regulation No. IX.H.1, the re-transfer period of the Tender Offer is within a maximum period of 2 (two) years, however, in the case of BRI Agro, BRI shall meet the minimum public shareholding of 10% no later than May 24, 2013. This is in compliance with the letter received from the Indonesian Stock Exchange No. S-06472/BEI.PPJ/09-2011 dated September 23, 2011. As of December 31, 2012, total shares of BRI Agro which has been transferred back to the public comprised of 500,000 shares, reducing BRI's ownership to 79.78% while maintaining Dapenbun's ownership at 14%.

Based on the notarial deed of Statement Decision Meeting No. 30 dated May 16, 2012 of notary Rusnaldy, S.H., PT Bank Agroniaga Tbk changed its name to PT Bank Rakyat Indonesia Agroniaga Tbk ("BRI Agro") and has been approved by Bank Indonesia on its Governor's Decision Letter No. 14/72/KEP.GBI/2012 dated October 10, 2012.

On May 10, 2013, BRI Agro submitted Registration Statement of Limited Public Offering IV ("PUT IV") to the Board of Commissioners of OJK in connection with the issuance of Preemptive Rights of 3,846,035,599 Common Shares with par value of Rp100 (full amount) per share. On June 26, 2013, the Board of Commissioners of OJK through its letter No. S-186/D.04/2013, approved the Statement of Registration for a Limited Public Offering IV, thus increasing the number of its issued capital stock by 3,832,685,599 shares.

As a results of PUT IV, BRI Agro's Articles of Association was amended as stated in notarial deed of Decision Meeting Statement No. 107 dated July 30, 2013, of Notary M. Nova Faisal, S.H., M.Kn, regarding the increase of issued and fully paid capital, increasing BRI's ownership to 80.43%, Dapenbun to 14.02% and public to 5.55%. This amendment was approved by the Minister of Law and Human Rights of the Republic of Indonesia in its Decision Letter No. AHU-0074249.AH.01.09.Tahun 2013 dated August 1, 2013.

Total assets of BRI Agro as of December 31, 2013 and 2012 are Rp5,122,727 and Rp4,041,003 or 0.82% and 0.73%, respectively, of the consolidated total assets. Total interest income for the years ended December 31, 2013 and 2012 is Rp420,186 and Rp349,990 or 0.71% and 0.71% respectively of the consolidated total interest income.

These consolidated financial statements are originally issued in the Indonesian language.

(Expressed in millions of Rupiah, unless otherwise stated)

1. GENERAL (continued)

e. Subsidiaries (continued)

PT Bank Rakyat Indonesia Agroniaga Tbk (BRI Agro) (continued)

In accordance with Article 3 of its Articles of Association, BRI Agro's scope of business is to conduct commercial banking activities.

BRI Agro through Letter of Bank Indonesia No. 22/1037/UUps/Ps6D dated December 26, 1989, obtained its license as a commercial bank.

BRI Agro's head office is located at Plaza Great River, Jl. H.R. Rasuna Said Blok X2 No. 1, Jakarta, and has 12 branches and 10 sub-branches.

BRI Remittance Co. Limited Hong Kong (BRI Remittance)

On December 16, 2011, BRI entered into the Instrument of Transfer and the Bought and Sold Notes to acquire 100% of BRIngin Remittance Co. Ltd. (BRC) Hong Kong shares (equivalent to 1,600,000 shares) at a purchase price of HKD1,911,270. This acquisition was legalized by the Inland Revenue Department (IRD) Hong Kong with stamp duty dated December 28, 2011 and approved by Bank Indonesia in its letter No. 13/32/DPB1/TPB1-3/Rahasia dated December 1, 2011.

According to the Annual General Meeting of Bringin Remittance Co. Ltd dated July 2, 2012, and the issuance of a Certificate of Change of Name No.961091 dated October 11, 2012 by the Registrar of Companies Hong Kong Special Administrative Region, the name Bringin Remittance Co. Ltd was officially changed to BRI Remittance Co. Ltd Hong Kong.

Total assets of BRI Remittance Co. Ltd Hong Kong as of December 31, 2013 and 2012 are Rp4,124 or 0.0007% and Rp2,815 or 0.0005%, respectively, of the consolidated total assets.

BRI Remittance's scope of business is to conduct commercial remittance activities.

BRI Remittance's head office is located at Lippo Centre, Tower II, 89 Queensway, Admiralty, Hong Kong.

2. SUMMARY OF ACCOUNTING POLICIES

a. Basis of preparation of the consolidated financial statements

Statement of Compliance

The consolidated financial statements as of and for the years ended December 31, 2013 and 2012 were prepared and presented in accordance with Indonesian Financial Accounting Standards, which includes the Statements and Interpretations issued by the Financial Accounting Standards Board Indonesian Institute of Accountants and Bapepam-LK's Regulation No. VIII.G.7, Appendix of the Decision of the Chairman of Bapepam-LK No. KEP-347/BL/2012 dated June 25, 2012 regarding the "Guidelines on Financial Statements Presentations and Disclosures for Issuers or Public Companies", and the prevailing banking industry practices.

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

2. SUMMARY OF ACCOUNTING POLICIES (continued)

a. Basis of preparation of the consolidated financial statements (continued)

Statement of Compliance (continued)

BRIS (Subsidiary), which is engaged in banking activities based on Sharia principles, presents its financial statements according to SFAS No. 101 on "Sharia Financial Statements Presentation", SFAS No. 102 on "Accounting for *Murabahah*", SFAS No. 104 on "Accounting for *Istishna*", SFAS No. 105 on "Accounting for *Mudharabah*" and SFAS No. 106 on "Accounting for *Musyarakah*" and SFAS 107 on "Accounting for *Ijarah*", which supersede SFAS No. 59 on "Accounting for Sharia Banking" associated with recognition, measurement, presentation and disclosure for the respective topics, SFAS No. 110 on "Accounting for *Sukuk*" and the Indonesia Sharia Banking Accounting Guidelines (PAPSI) issued by Bank Indonesia and IAI.

The consolidated financial statements have been prepared on a historical cost basis, except for some accounts that were assessed using another measurement basis as explained in the accounting policies of the account. The consolidated financial statements have been prepared on accrual basis, except for the revenue from *istishna* and the profit sharing from the *mudharabah* and *musyarakah* financing and the consolidated statements of cash flow.

The consolidated statements of cash flows have been prepared using the direct method with cash flows classified into operating, investing and financing activities. For purposes of the consolidated statements of cash flows, cash and cash equivalents consist of cash, current accounts with Bank Indonesia and current accounts with other banks, placements with other banks and Certificates of Bank Indonesia maturing within 3 (three) months from the date of acquisition, provided they are neither pledged as collateral for fund borrowings nor restricted.

The reporting currency used in the consolidated financial statements is the Indonesian Rupiah (Rp). Unless otherwise stated, all figures presented in the consolidated financial statements are rounded off to millions of Rupiah.

b. Consolidation principles

The consolidated financial statements include the financial statements of BRI and its Subsidiaries whose majority shares are owned or controlled by BRI.

Where control over a Subsidiary began or ceased during the year, the results of operations of a Subsidiary are included in the consolidated financial statements only from the date that control was acquired or up to the date that control has ceased.

Control over a Subsidiary is presumed to exist where more than 50% of the Subsidiary's voting power is controlled by BRI, or BRI has the ability to control the financial and operating policies of a Subsidiary, or has the ability to remove or appoint majority of the Subsidiary's Board of Directors, or control the majority vote during management meeting.

The purchase method of accounting is used to account for the acquisition of Subsidiaries. The cost of an acquisition is measured at the fair value of the assets given up, shares issued or liabilities undertaken at the date of acquisition plus costs directly attributable to the acquisition. The excess of the cost of acquisition over the fair value of the net assets of the Subsidiaries acquired is recorded as goodwill.

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

2. SUMMARY OF ACCOUNTING POLICIES (continued)

b. Consolidation principles (continued)

All significant balances and transactions, including unrealized gains/losses are eliminated to reflect the consolidated financial position and results of operations of BRI and Subsidiaries as a single entity.

The consolidated financial statements are prepared using uniform accounting policies for transactions and events in similar circumstances. If the Subsidiaries' financial statements use accounting policies which are different from those adopted in the consolidated financial statements, appropriate adjustments are made to the Subsidiaries' financial statements.

The non-controlling interest represents the non-controlling shareholders' proportionate share in the income for the year and equity of the Subsidiaries based on the percentage of ownership of the non-controlling shareholders in the Subsidiaries.

c. Financial assets and financial liabilities

Financial assets consist of cash, current accounts with Bank Indonesia, current accounts with other banks, placements with Bank Indonesia and other banks, securities, securities purchased under agreement to resell, Government Recapitalization Bonds, export bills, derivatives receivable, loans, acceptances receivable, investment in associated entities at cost method and other assets.

Financial liabilities consist of liabilities due immediately, deposits from customers, deposits from other banks and financial institutions, securities sold under agreement to repurchase, derivatives payable, acceptances payable, marketable securities issued, fund borrowings, subordinated loans and other liabilities.

BRI adopted SFAS No. 50 (Revised 2010), "Financial Instruments: Presentation", SFAS No. 55 (Revised 2011), "Financial Instruments: Recognition and Measurement", and SFAS No. 60 including its amendment in 2012, "Financial Instruments: Disclosure".

SFAS No. 50 (Revised 2010) contains the requirements for the presentation of financial instruments and identifies the information that should be disclosed. The presentation requirements apply to the classification of financial instruments, from the perspective of the issuer, into financial assets, financial liabilities and equity instruments; the classification of related interest, dividends, losses and gains; and the circumstances in which financial assets and financial liabilities should be offset. This SFAS requires the disclosure of, among others, information about factors that affect the amount, timing and certainty of an entity's future cash flows relating to financial instruments and the accounting policies applied to those instruments.

SFAS No. 55 (Revised 2011) establishes the principles for recognizing and measuring financial assets, financial liabilities and some contracts to buy or sell non-financial items. This SFAS provides the definitions and characteristics of derivatives, the categories of financial instruments, recognition and measurement, hedge accounting and determination of hedging relationships.

SFAS No. 60 including its amendment in 2012, requires disclosures of significance of financial instruments for financial position and performance, and the nature and extent of risks arising from financial instruments to which BRI is exposed during the period and at the end of the reporting period, and how BRI manages those risks.

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

2. SUMMARY OF ACCOUNTING POLICIES (continued)

c. Financial assets and financial liabilities (continued)

(i) Classification

BRI classifies its financial assets in the following categories at initial recognition:

- Financial assets held at fair value through profit or loss, which have 2 (two) sub-classifications, i.e. financial assets designated as such upon initial recognition and financial assets classified as held for trading;
- Loans and receivables;
- Held to maturity investments; and
- Available for sale investments

Financial liabilities are classified into the following categories at initial recognition:

- Fair value through profit or loss, which has 2 (two) sub-classifications, i.e. those designated as such upon initial recognition and those classified as held for trading;
- Other financial liabilities that are not classified as financial liabilities at fair value through profit or loss are categorized and measured at amortized cost.

Classes of financial assets and liabilities at fair value through profit or loss consist of financial assets or liabilities held for trading which BRI acquires or incurs principally for the purpose of selling or repurchasing in the near term, or holds as part of a financial instrument portfolio that is managed together for short-term profit or position taking.

Loans and receivables are non-derivatives financial assets with fixed or determinable payments that are not quoted in an active market, other than:

- those that BRI intends to sell immediately or in the short term, which are classified as held for trading and those that BRI upon initial recognition designates as at fair value through profit or loss;
- those that BRI upon initial recognition designates as available for sale investments; or
- those for which BRI may not recover substantially all of its initial investment, other than because of loans and receivables deterioration, which classified as available for sale.

Held to maturity investments consist of quoted non-derivatives financial assets with fixed or determinable payments and fixed maturity that BRI has the positive intention and ability to hold to maturity. Investments intended to be held for an undetermined period are not included in this classification.

The available for sale category consists of non-derivatives financial assets that are designated as available for sale or are not classified in one of the other categories of financial assets. After initial recognition, available for sale investments are measured at fair value with gains or losses being recognized as part of equity until the investment is derecognized or until the investment is determined to be impaired at which time the cumulative gains or losses previously reported in equity is included in the consolidated statements of comprehensive income. The effective yield and (where applicable) results of foreign exchange restatement for available for sale investments are reported in the consolidated statements of comprehensive income.

These consolidated financial statements are originally issued in the Indonesian language.

Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

2. SUMMARY OF ACCOUNTING POLICIES (continued)

c. Financial assets and financial liabilities (continued)

(i) Classification (continued)

Other financial liabilities pertain to financial liabilities that are neither held for trading nor designated at fair value through profit or loss upon recognition of the liability.

(ii) Initial recognition

- a. Purchase or sale of financial assets that requires delivery of assets within a time frame established by regulation or convention in the market (regular purchases) is recognized on the settlement date.
- b. Financial assets and financial liabilities are initially recognized at fair value. For those financial assets or financial liabilities not measured at fair value through profit or loss, the fair value includes directly attributable transaction costs. The subsequent measurement of financial assets and financial liabilities depends on their classification.

Transaction costs only include costs that are directly attributable to the acquisition of a financial asset or issuance of a financial liability and an additional charge that would not occur if the instrument is not acquired or issued. For financial assets, transaction costs are added to the amount recognized in the initial recognition of the asset, while for financial liabilities, transaction costs are deducted from the amount of debt recognized on initial recognition of a liability. The transaction costs are amortized over the terms of the instrument based on the effective interest rate method and recorded as part of interest income for transaction costs related to the asset or as part of interest expense for transaction costs related to financial liabilities.

BRI, upon initial recognition, may designate certain financial assets at fair value through profit or loss (fair value option). The fair value option is only applied when the following conditions are met:

- the application of the fair value option reduces or eliminates an accounting mismatch that would otherwise arise; or
- the financial assets are part of a portfolio of financial instruments, the risk of which are managed and reported to key management on a fair value basis; or
- the financial assets consist of a host contract and embedded derivatives that must be bifurcated.

The fair value option is applied to certain loans and receivables that are hedged with credit derivatives or interest rate swap, but for which the hedge accounting conditions are not fulfilled. Otherwise, the loans would be accounted for at amortized cost, while the derivatives are measured at fair value through profit or loss.

The fair value option is also applied to investment funds that are part of a portfolio managed on a fair value basis. Furthermore, the fair value option is applied to structured investments that include embedded derivatives.

These consolidated financial statements are originally issued in the Indonesian language.

Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

2. SUMMARY OF ACCOUNTING POLICIES (continued)

c. Financial assets and financial liabilities (continued)

(iii) Subsequent measurement

Available for sale financial assets and financial assets and liabilities at fair value through profit or loss are subsequently measured at fair value.

Loans and receivables, held to maturity investments and other financial liabilities are measured at amortized cost using the effective interest rate method.

(iv) Derecognition

a. Financial assets are derecognized when:

- the contractual rights to receive cash flows from the financial assets have expired; or
- BRI has transferred its rights to receive cash flows from the financial assets or has assumed an obligation to pay the cash flows in full without material delay to a third party under a “pass-through” arrangement; and either (a) BRI has substantially transferred all the risks and rewards of the assets, or (b) BRI has neither transferred nor retained substantially all risks and rewards of the assets, but has transferred control of the assets.

When BRI has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognized to the extent of BRI's continuing involvement in the asset.

Loans are written off when there is no realistic prospect of collection in the near future or the normal relationship between BRI and the debtors has ceased to exist. When a loan is deemed uncollectible, it is written off against the related allowance for impairment losses.

b. Financial liabilities are derecognized when they end, i.e. when the obligation under the liability is discharged, cancelled or expired.

Where an existing financial liability is replaced by another from the same creditor on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as derecognition of the original liability and the recognition of a new liability and the difference in the respective carrying amounts is recognized in the consolidated statements of comprehensive income.

(v) Income and expense recognition

- a. Interest income and interest expense on available for sale assets and financial assets and liabilities measured at amortized cost, are recognized in the consolidated statements of comprehensive income using the effective interest rate method.
- b. Gains and losses arising from changes in the fair value of the financial assets and liabilities held at fair value through profit or loss are included in the consolidated statements of comprehensive income.

Gains and losses arising from changes in the fair value of available for sale financial assets are recognized directly in equity (other comprehensive income), except for impairment losses and foreign exchange gains and losses, until the financial asset is derecognized or impaired.

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

2. SUMMARY OF ACCOUNTING POLICIES (continued)

c. Financial assets and financial liabilities (continued)

(v) Income and expense recognition (continued)

When a financial asset is derecognized or impaired, the cumulative gains or losses previously recognized in equity should be reclassified to consolidated statements of comprehensive income.

(vi) Reclassification of financial assets

BRI is not allowed to reclassify any financial instrument out of or into the fair value through profit or loss category while it is held or issued.

BRI is not allowed to classify any financial assets as held to maturity investments, if the entity has, during the current financial year or during the 2 (two) preceding financial years, sold or reclassified a significant amount of held to maturity investments before maturity (more than an insignificant amount in relation to the total amount of held to maturity investments) other than sales or reclassifications that:

- a. are so close to maturity or the financial asset's repurchase date that changes in the market rate of interest would not have a significant effect on the financial asset's fair value;
- b. occur after BRI has collected substantially all of the original principal of the financial assets through scheduled payments or prepayments; or
- c. are attributable to an isolated event that is beyond BRI's control, is non-recurring and could not have been reasonably anticipated by BRI.

(vii) Offsetting

Financial assets and liabilities are offset and the net amount is presented in the consolidated statements of financial position when and only when, BRI has a legal right to offset the amounts and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

Income and expenses are presented on a net basis only when permitted by the accounting standards.

(viii) Amortized cost measurement

The amortized cost of a financial asset or liability is the amount at which the financial asset or liability is measured at initial recognition, minus principal repayments, plus or minus the cumulative amortization using the effective interest rate method of any difference between the initial amount recognized and the maturity amount, minus any reduction for impairment.

(ix) Fair value measurement

The fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction on the measurement date, which includes the fair value obtained from IDMA's (Interdealer Market Association) quoted market prices or broker's quoted price from Bloomberg and Reuters on the measurement date.

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

2. SUMMARY OF ACCOUNTING POLICIES (continued)

c. Financial assets and financial liabilities (continued)

(ix) Fair value measurement (continued)

When available, BRI measures the fair value of an instrument using quoted prices in an active market for that instrument. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service or regulatory agency and those prices represent actual and regularly occurring market transaction on an arm's length basis.

If a market for a financial instrument is inactive, BRI establishes fair value using valuation technique. BRI uses its own credit risk spreads in determining the fair value for its derivatives liability and all other liabilities for which it has elected the fair value option. When BRI's credit spread increases, BRI recognizes a gain on these liabilities, because the value of the liabilities has decreased. When BRI's credit spread decreases, BRI recognizes loss on those liabilities as an impact of the increase in liability.

BRI uses several commonly applied valuation techniques for determining fair values of financial instruments of lower complexity, such as exchange value options and currency swap. For these financial instruments, inputs into models are observable market data.

For more complex instruments, BRI uses internally developed models, which are usually based on valuation methods and techniques generally recognized as standard within the industry. Valuation models are used primarily to value derivatives transacted in the over-the-counter market, unlisted debt securities (including those with embedded derivatives) and other debt instruments for which markets were or have become illiquid. Some of the inputs to these models may not be market observable and are therefore estimated based on certain assumptions.

For financial instruments with no quoted market price, a reasonable estimate of the fair value is determined by reference to the fair value of other instruments with equal substance or calculated based on the expected cash flows of the underlying net asset of those securities.

The output of a valuation technique is an estimate or approximation of a value that cannot be precisely determined and the valuation technique employed may not fully reflect all factors relevant to the positions that BRI holds. Valuations are therefore adjusted, with additional factors such as model risks, liquidity risk and counterparty credit risk. Based on the established fair value valuation technique policy, related controls and procedures applied, BRI's management believes that these valuation adjustments are necessary and considered appropriate to fairly state the values of financial instruments measured at fair value in the consolidated statements of financial position. Price data and parameters used in the measurement procedures applied are generally reviewed carefully and adjusted, if necessary, particularly in view of the current market developments.

In cases when the fair value of unlisted equity instruments cannot be determined reliably, the instruments are carried at cost less impairment value. The fair value for loans and receivables as well as liabilities to banks and customers are determined using a present value model on the basis of contractually agreed cash flows, taking into account credit quality, liquidity and costs.

The fair values of contingent liabilities and irrevocable loan commitments correspond to their carrying amounts.

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

2. SUMMARY OF ACCOUNTING POLICIES (continued)

c. Financial assets and financial liabilities (continued)

(ix) Fair value measurement (continued)

Financial assets and assets held or liabilities to be issued are measured at bid price; financial liabilities and liabilities held or liabilities to be acquired are measured at ask price. Where BRI has consolidated assets and liabilities positions with off-setting market risk, middle-market prices can be used to measure the off-setting risk positions and bid or ask price adjustment is applied to the net open positions as appropriate.

(x) Sukuk Financial Asset

BRI and Subsidiaries adopted SFAS No. 110 "Sukuk Investment" which regulate the recognition, measurement, presentation and disclosure of *Ijarah Sukuk* and *Mudharabah Sukuk* transactions.

Before initial recognition, the entity determines the classification of investments in *sukuk* either measured at cost or fair value.

After the initial recognition, investment in *ijarah sukuk* and *mudharabah sukuk* is measured as follows:

a. Measured at cost

- The investment is held in a business model whereby the primary goal is to obtain contractual cash flows and has contractual terms in determining the specific date of principal payments and or the results.
- *Sukuk* acquisition cost includes transaction cost.
- The difference between the acquisition cost and the nominal value is amortized on a straight-line basis over the period of the *sukuk*.
- Impairment loss is recognized if the recoverable amount is less than the carrying amount and is presented as an impairment loss in the statement of comprehensive income.

b. Measured at fair value

- The fair value is determined with reference to the following order:
 - Quoted price in active market.
 - Price from the current transaction, if there is no available price quotations in an active market.
 - Fair value of similar instrument, if there is no available price quotations in an active market and no price from the current transaction.
- *Sukuk* acquisition cost does not include transaction cost.
- The difference between fair value and carrying value is presented in the consolidated statements of comprehensive income.

All investment in *sukuk* of BRI and Subsidiaries was done under *ijarah* contracts.

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

2. SUMMARY OF ACCOUNTING POLICIES (continued)

d. Quasi-reorganization

Based on SFAS No. 51 on "Accounting for Quasi-reorganization", quasi-reorganization is an accounting procedure which enables an enterprise to restructure its equity by eliminating accumulated losses and revaluing all its assets and liabilities based on fair values without a legal re-organization. Under quasi-reorganization, the company will have a fresh start with its statements of financial position showing current values without accumulated losses as the accumulated losses are eliminated against the additional paid-in capital account.

The estimated fair values of assets and liabilities of BRI under the quasi-reorganization was determined based on the best information available in accordance with the characteristics of the related assets and liabilities, with consideration on the level of risks or market values of the related assets and liabilities. If the market value is not available, the estimated fair value is determined based on the market values of similar types of assets, estimated present value or discounted cash flows. For certain assets and liabilities, the valuation is undertaken in accordance with the related SFAS.

Based on BRI's Shareholders' Extraordinary General Meeting held on October 3, 2003 notarized under deed No. 6 of the the same date of notary Imas Fatimah, S.H., the shareholders approved in principle the quasi-reorganization plan of BRI as of June 30, 2003 (Note 3).

BRI has performed revaluation of its assets and liabilities in conjunction with the quasi-reorganization as of June 30, 2003. Since the fair value of net assets (total assets less total liabilities) of BRI is higher than their book value, based on SFAS No. 51 (before revision in 2003), in the implementation of quasi-reorganization, BRI did not recognize the excess of such net assets against accumulated losses and used the book values of the assets and liabilities at the implementation date of quasi-reorganization. As a result of the above quasi-reorganization, BRI's deficit was eliminated against the additional paid-in capital account which amounted to Rp24,699,387 as of June 30, 2003.

Bank Indonesia, in its letter No. 5/105/DPwB2/PwB24 dated September 19, 2003, stated that in undertaking the quasi-reorganization, BRI should refer to SFAS No. 51 (before revision in 2003) and with consideration to other related aspects in implementing the quasi-reorganization.

e. Transactions with related parties

BRI and Subsidiaries engage in transactions with related parties as defined in SFAS No. 7 (Revised 2010) on "Related Party Disclosures".

A party is considered a related party to BRI and Subsidiaries if:

- 1) directly or indirectly, through one or more intermediaries, a party (i) controls, or controlled by, or under common control with BRI and Subsidiaries; (ii) has an interest in BRI and Subsidiaries that provides significant influence on BRI and Subsidiaries or (iii) has joint control over BRI and Subsidiaries;
- 2) it is a member of the same group as BRI and Subsidiaries;
- 3) it is a joint venture of a third party in which BRI and Subsidiaries have ventured in;
- 4) it is a member of key management personnel in BRI and Subsidiaries;
- 5) it is a close family member of the individual described in clause (1) or (4);
- 6) it is an entity that is controlled, jointly controlled or significantly influenced by or for whom has significant voting rights in several entities, directly or indirectly, by the individual described in clause (4) or (5); and
- 7) it is a post-employment benefit plan for the employees benefit of either BRI and Subsidiaries or entities related to BRI and Subsidiaries.

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

2. SUMMARY OF ACCOUNTING POLICIES (continued)

e. Transactions with related parties (continued)

Transactions with related parties are made on the same term and conditions as those transactions with third parties. All transaction done by BRI have complete with Bapepam-LK Regulation No. IX.E.1 regarding "The affiliate transactions and conflict of interest of certain transactions", at the time the transaction were made. All material transactions and balances with related parties are disclosed in the relevant notes to the consolidated financial statements and the details have been presented in Note 43 of the consolidated financial statements. Furthermore, material transactions and balances between BRI and Subsidiaries and the Government of the Republic of Indonesia (RI) and other entities related to the Government of the Republic of Indonesia are also disclosed in Note 43.

f. Allowance for impairment losses on financial assets

On each statements of financial position reporting date, BRI assesses whether there is an objective evidence that financial assets not carried at fair value through profit or loss are impaired.

Financial assets are impaired when an objective evidence demonstrate that a loss event has occurred after the initial recognition of the asset and that the loss event has an impact on the future cash flows of the financial asset that can be estimated reliably.

The criteria used by the entity to determine the existence of an objective evidence of impairment loss include:

- a) significant financial difficulty of the issuer or obligor;
- b) a breach of contract, such as a default or delinquency in interest or principal payments;
- c) the creditor, for economic or legal reasons relating to the debtor's financial difficulty, grants the debtor a concession that the creditor would not otherwise consider;
- d) it becomes probable that the debtor will enter into bankruptcy or other financial reorganization;
- e) the disappearance of an active market for that financial asset because of financial difficulties; or
- f) observable data indicating that there is a measurable decrease in the estimated future cash flows from a portfolio of financial assets since the initial recognition of those assets, although the decrease cannot yet be identified with the individual financial assets in the portfolio, including:
 - 1) adverse changes in the payment status of debtors in the portfolio; and
 - 2) national or local conditions that correlate with defaults on the assets in the portfolio.

The estimated period between the occurrence of the event and identification of loss is determined by management for each identified portfolio. In general, the periods used vary between 3 months and 12 months; in exceptional cases, longer periods are warranted.

BRI first assesses whether an objective evidence of impairment exists individually for financial assets that are individually significant or collectively for financial assets that are not individually significant. If BRI determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Accounts that are individually assessed for impairment and for which an impairment loss is or continues to be recognized are not included in the collective assesment of impairment.

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

2. SUMMARY OF ACCOUNTING POLICIES (continued)

f. Allowance for impairment losses on financial assets (continued)

BRI determines the loans to be evaluated for impairment through individual evaluation if one of the following criteria is met:

1. Loans which individually have significant value and an objective evidence of impairment;
2. Restructured loans which individually have significant value.

Based on the above criteria, BRI performs individual assessment for: (a) Corporate and middle loans with collectibility classification of substandard, doubtful and loss; or (b) Restructured corporate and middle loans.

BRI determines loans to be evaluated for impairment through collective evaluation if one of the following criteria is met:

1. Loans which individually have significant value but there is no objective evidence of impairment;
2. Loans which individually have insignificant value;
3. Restructured loans which individually have insignificant value.

Based on the above criteria, BRI performs collective assessment for: (a) Corporate and middle loans with collectibility classification of current and special mention which have never been restructured; or (b) Retail and consumer loans.

Calculation of allowance for impairment losses on financial assets assessed collectively grouped based on similar credit risk characteristics and taking into account the loan segmentation based on historical loss experience and the possibility of failure (probability of default). Loans that have historical loss data and information that is categorized as a disaster prone areas by the Government of the Republic of Indonesia and supported by internal policies of BRI, the calculation of allowance for impairment losses is done by calculating the overall loss rate which include the actual loss rate plus the risk factors associated relevant based on a survey conducted periodically to external and internal parties of BRI.

BRI uses the migration analysis method, which is a statistical model analysis method to collectively assess allowance for impairment losses on loans. Under this method, BRI uses 3 (three) years historical data to compute for the Probability of Default (PD) and Loss of Given Default (LGD).

BRI uses the fair value of collateral as the basis for future cash flow if one of the following conditions is met:

1. Loans are collateral dependent, i.e. if the source of loans repayment is made only from the collateral;
2. Foreclosure of collateral is most likely to occur and supported by legally binding collateral agreement.

Impairment losses on financial assets carried at amortized cost are measured as the difference between the carrying amount of the financial assets and present value of estimated future cash flows discounted at the financial assets original effective interest rate. If loans or held to maturity securities and Government Recapitulation Bonds have a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate determined under the contract.

As a practical guideline, BRI may measure impairment on the basis of an instrument's fair value using an observable market price, the calculation of the present value of the estimated future cash flows of a collateralized financial asset reflects the cash flows that may result from foreclosure less costs for obtaining and selling the collateral, whether or not foreclosure is probable.

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

2. SUMMARY OF ACCOUNTING POLICIES (continued)

f. Allowance for impairment losses on financial assets (continued)

Losses are recognized in the consolidated statements of comprehensive income and reflected in an allowance for impairment losses account against financial assets carried at amortized cost.

Interest income on the impaired financial assets continues to be recognized using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss. When a subsequent event causes the amount of impairment loss to decrease, the impairment loss previously recognized must be recovered and the recovery is stated in the statements of comprehensive income.

For financial assets classified as available for sale, BRI assesses on each statements of financial position reporting date whether there is objective evidence that a financial asset or a group of financial assets is impaired. In the case of equity instruments, a significant or prolonged decline in the fair value of the security below its cost is an objective evidence of impairment resulting in the recognition of an impairment loss. Impairment losses on available for sale marketable securities are recognized by transferring the cumulative loss that has been recognized directly in equity to the statements of comprehensive income. The cumulative loss that has been removed from equity and recognized in the statements of comprehensive income is the difference between the acquisition cost (net of any principal repayment and amortization) and the current fair value, less any impairment loss previously recognized in the consolidated statements of comprehensive income.

Impairment losses recognized in the statements of comprehensive income on available for sale equity instruments should not be recovered through a reversal of a previously recognized impairment loss in the current year statements of comprehensive income.

If in a subsequent period, the fair value of debt instrument classified as available for sale securities increases and the increase can be objectively related to an event occurring after the impairment loss was recognized in the statements of comprehensive income, the impairment loss is reversed, with the amount of reversal recognized in the statements of comprehensive income.

If the terms of the loans, receivables or held to maturity securities are renegotiated or otherwise modified because of financial difficulties of the debtor or issuer, impairment is measured using the original effective interest rate before the modification of terms.

If in the next period, the amount of allowance for impairment losses is decreased and the decrease can be related objectively to an event that occurred after the recognition of the impairment losses (i.e. upgrade debtor's or issuer's collectibility), the impairment loss that was previously recognized has to be reversed, by adjusting the allowance account. The reversal amount of financial assets is recognized in the current year consolidated statements of comprehensive income.

The recoveries of written-off financial assets in the current year are credited by adjusting the allowance for impairment losses accounts. Recoveries of written-off loans from previous years are recorded as operating income other than interest income.

In connection with compliance to Bank Indonesia, BRI implemented Bank Indonesia Regulation No. 14/15/PBI/2012 dated October 24, 2012 on "Assessment of Commercial Bank Asset Quality" as a guidance to calculate the minimum allowance for impairment losses that should be provided in accordance with Bank Indonesia Regulation.

Financial assets of the Subsidiary that is engaged in Sharia Banking, BRIS applies PBI No. 8/21/PBI/2006 dated October 5, 2006 as amended by PBI No. 13/13/PBI/2011 dated March 24, 2011 in determination of impairment losses.

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

2. SUMMARY OF ACCOUNTING POLICIES (continued)

f. Allowance for impairment losses on financial assets (continued)

Sharia productive assets consist of current accounts with Bank Indonesia and other banks, placements with Bank Indonesia and other banks, securities, *murabahah* receivables, *musyarakah* financing, *isthisna* receivables, *qardh* receivables, and commitments and contingencies with credit risk.

The minimum allowance to be established in accordance with PBI is as follows:

- a) 1% of earning assets classified as Current, excluding placements with Bank Indonesia, Government Bonds, other debt instruments issued by the Government of the Republic of Indonesia and earning assets secured by cash collateral;
- b) 5% of earning assets classified as Special Mention, net of deductible collateral;
- c) 15% of earning assets classified as Sub-standard, net of deductible collateral;
- d) 50% of earning assets classified as Doubtful, net of deductible collateral; and
- e) 100% of earning assets classified as Loss, net of deductible collateral.

The criterias for assessment of the value of collateral that can be deducted in the calculation of allowance for impairment losses are based on Bank Indonesia Regulations.

g. Current accounts with Bank Indonesia and other banks

Current accounts with Bank Indonesia and other banks are stated at amortized cost using the effective interest rate method less allowance for impairment losses. The current accounts with Bank Indonesia and other banks are classified as loans and receivables.

h. Placements with Bank Indonesia and other banks

Placements with Bank Indonesia and other banks consist of placement in deposit facility of Bank Indonesia such as Deposit Facility, Term Deposit and Sharia Deposit Facility whereas placements with other banks represent placements of funds in the form of inter-bank call money and time deposits.

Placements with Bank Indonesia and other banks are stated at amortized cost using the effective interest rate method less allowance for impairment losses. Placements with Bank Indonesia and other banks are classified as loans and receivables.

i. Securities and Government Recapitalization Bonds

Securities consist of securities traded in the money market such as Certificates of Bank Indonesia, Deposits Certificates of Bank Indonesia, Bank Indonesia Sharia Certificates, Government bonds, promissory notes, subordinated bonds, mutual fund units, medium term notes, US Treasury Bonds, credit linked notes and bonds traded in the stock exchange.

Securities include bonds issued by the Government that are not related with the recapitalization program such as Government Debentures (Surat Utang Negara or SUN), Government Treasury Bills (Surat Perbendaharaan Negara or SPN) and Government bonds in foreign currency purchased from primary and secondary markets.

Government Recapitalization Bonds are bonds issued by the Government in connection with the recapitalization program for commercial banks which consist of bonds under BRI's recapitalization and Government Recapitalization Bonds purchased from the secondary market.

Securities and Government Recapitalization Bonds are initially measured at fair value. After the initial recognition, the securities and Government Recapitalization Bonds are recorded according to their category, i.e. as held to maturity, fair value through profit or loss or available for sale.

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

2. SUMMARY OF ACCOUNTING POLICIES (continued)

i. Securities and Government Recapitalization Bonds (continued)

The value of securities and Government Recapitalization Bonds is stated based on the classification as follows:

- 1) Held to maturity securities and Government Recapitalization Bonds are carried at amortized cost using the effective interest rate method. BRI does not classify securities or Government Recapitalization Bonds as held to maturity financial assets if BRI has, during the current financial year or during the two preceding financial years, sold or reclassified more than an insignificant amount of held to maturity securities or Government Recapitalization Bonds before maturity other than sales or reclassifications that are defined in SFAS No. 55 (Revised 2011) which is applicable in the relevant periods.
- 2) Securities and Government Recapitalization Bonds classified as fair value through profit or loss are stated at fair value. Gains and losses from changes in fair value of securities and Government Recapitalization Bonds are recognized in the consolidated statements of comprehensive income.
- 3) Securities and Government Recapitalization Bonds classified as available for sale investments are stated at fair value. Interest income is recognized in the consolidated statements of comprehensive income using the effective interest rate method. Foreign exchange gains or losses on available for sale securities and Government Recapitalization Bonds are recognized in the statements of comprehensive income. Other fair value changes are recognized directly in equity until the securities and Government bonds are sold or impaired, whereby the cumulative gains and losses previously recognized in equity are recognized in the consolidated statements of comprehensive income.

j. Export bills

Export bills represent negotiated export bills that have been discounted and guaranteed by other banks. Export bills are stated at acquisition cost after deducting the discount and allowance for impairment losses. Export bills are classified as loans and receivables

k. Loans

Loans represent the lending of money or equivalent receivables under contracts or borrowing and lending commitments with debtors, whereby the debtors are required to repay their debts with interest after a specified period of time.

Loans are initially measured at fair value plus transaction costs that are directly attributable and additional costs to obtain financial assets and after initial recognition, are measured at amortized cost based on the effective interest rate method less allowance for impairment losses.

Loans are classified as loans and receivables.

Loans extended under syndication agreements are recognized at the nominal amount to the extent of the risks, borne by BRI and BRI Agro.

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

2. SUMMARY OF ACCOUNTING POLICIES (continued)

k. Loans (continued)

Restructured loans are stated at the lower of carrying value on the date of restructuring or value of the future cash receipts after the restructuring. Losses resulting from the difference between the carrying value on the date of restructuring the present value of future cash receipts after the restructuring is recognized in the statement of comprehensive income. After the restructuring, all future cash receipts specified by the new terms are recorded as a return of principal loans and interest income in accordance with the terms of the restructuring.

Loans are written off when there is no realistic prospect of collections in the future and all collateral have been realized or foreclosed. When loans are deemed uncollectible, it is written off against the related allowance for impairment losses. Subsequent payment of loans written off are credited to the allowance of impairment losses in the statement of financial position.

l. Sharia receivables and financing

Sharia receivables are receivables resulting from sale or purchase transactions based on *murabahah*, *istishna* and *ijarah* contracts. Sharia financing consists of *mudharabah* and *musyarakah* financing.

Murabahah is a sale or purchase contract between the customer and BRIS, whereby BRIS finances the investment and working capital needs of the customer sold with a principal price plus a certain margin that is mutually informed and agreed. Repayment on this financing is made in installments within a specified period. *Murabahah* receivables are stated at net realizable value, which is, the balance of the receivables less allowance for impairment losses. Deferred *Murabahah* margin is presented as a contra account of *Murabahah* receivables.

Istishna is a sale contract between *al-mustashni* (buyer) and *al-shani* (producer who also acts as seller). Based on the contract, the buyer orders the producer to make or produce *al-mashnu* (ordered goods) according to the specifications required by the buyer and to sell them at the agreed price. *Istishna* receivables are presented based on the outstanding billings less allowance for impairment losses.

Ijarah is a leasing agreement between the *muajjir* (lessor) and the *mustajir* (lessee) on *ma'jur* (leased items) to obtain benefits on the items being leased.

Mudharabah financing is a joint financing made between BRIS, as the capital provider (*shahibul maal*) and the customer, who manages the business (*mudharib*), during a certain period. The profit sharing from such project or business is distributed according to agreed *nisbah* (pre-determined ratio). *Mudharabah* financing is stated at the outstanding balance of the financing less allowance for impairment losses. Allowance for impairment losses is provided based on the quality of the financing as determined by a review of each individual account.

Musyarakah financing is an agreement between the investors (*musyarakah partners*) to combine their capital and conduct a joint business in a partnership with the profit or loss sharing based on an agreement or proportionate to the capital contribution, it is stated at the outstanding balance of the financing less allowance for impairment losses. BRI provides allowance for impairment losses based on the quality of the financing as determined by a review of each individual account.

These consolidated financial statements are originally issued in the Indonesian language.

Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

2. SUMMARY OF ACCOUNTING POLICIES (continued)

m. Acceptances receivable and payable

Acceptances receivable and payable represent letters of credit (L/C) transactions that have been accepted by the accepting bank.

Acceptances receivable and payable are stated at amortized cost. Acceptances receivable are stated net of allowance for impairment losses.

Acceptances receivable are classified as loans and receivables. Acceptances payable are classified as financial liabilities measured at amortized cost.

n. Investment in associated entities

BRI and Subsidiary adopted SFAS No. 15 (Revised 2009), "Investments in Associates Entities", which prescribes the accounting for investments in associated entities as to determined significant influence, accounting method to be applied, impairment in value of investments and separate financial statements.

BRI's investment in its associated company is measured using the equity method. An associated entities is an entity in which BRI has significant influence or share ownership of 20% up to 50%. Under the equity method, the cost of investment is increased or decreased by BRI's share in net earnings or losses of, and dividends received from the investee since the date of acquisition.

The consolidated statements of comprehensive income reflects the share of the results of operations of the associated entities. Where there has been a change recognized directly in the equity of the associated entities, BRI recognizes its share of any such changes and discloses this, when applicable, in the consolidated statement of changes in equity. Unrealized gains and losses resulting from transactions between BRI and the associated entities are eliminated to the extent of BRI's interest in the associated entities.

After application of the equity method, BRI determines whether it is necessary to recognize an additional impairment loss on BRI's investment in its associated entities. BRI determines at each reporting date whether there is any objective evidence that the investment in the associated entities is impaired. If this is the case, BRI calculates the amount of impairment as the difference between the recoverable amount of the investment in associated entities and its carrying value, and recognizes the amount in the statements of comprehensive income.

BRI's investment in its associated entities with no significant influence or share ownership under 20% are recorded in accordance with SFAS No. 55 (Revised 2011) and reduced by allowance for impairment losses.

o. Premises and equipment

BRI and Subsidiaries adopted SFAS No.16 (Revised 2011) , "Premises and Equipment" and IFAS No. 25, "Land Rights".

IFAS 25 prescribes that the legal cost of land rights in the form of Business Usage Rights ("Hak Guna Usaha" or "HGU"), Building Usage Right ("Hak Guna Bangunan" or "HGB") and Usage Rights ("Hak Pakai" or "HP") when the land was acquired initially are recognized as part of the cost of the land under the "Premises and Equipment" account and not amortized.

Meanwhile the extension or the legal renewal costs of land rights in the form of HGU, HGB and HP were recognized as part of "Deferred Charges, Net" account in the consolidated statements of financial position and were amortized over the shorter of the rights' legal life and land's economic life.

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

2. SUMMARY OF ACCOUNTING POLICIES (continued)

o. Premises and equipment (continued)

In accordance with the transitional provision of IFAS 25, the initial costs in the form of HGU, HGB and HP which were recognized as part of "Deferred Charges, Net" account in the consolidated statements of financial position prior to January 1, 2012 were reclassified to "Premises and Equipment - Land" account and ceased to be amortized effective January 1, 2012.

All premises and equipment are initially recognized at cost, which comprises its purchase price and any costs directly attributable in bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

Subsequent to initial recognition, premises and equipment are carried at cost less any subsequent accumulated depreciation and impairment losses.

Premises and equipment acquired in exchange for a non-monetary asset or for a combination of monetary and non-monetary assets are measured at fair values, unless:

- (i) the exchange transaction lacks commercial substance, or
- (ii) the fair value of neither the assets received nor the assets given up can be measured reliably.

Depreciation of an asset starts when it is available for use and is computed using the straight-line method based on the estimated economic useful lives of the assets as follows:

	<u>Years</u>
Buildings	15
Motor vehicles	5
Computers and machineries	3 - 5
Furniture and fixtures	5

The carrying amounts of premises and equipment are reviewed for impairment when events or changes in circumstances indicate that the carrying values may not be fully recoverable.

The carrying amount of an item of premises and equipment is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising from the derecognition of the asset is directly included in the profit or loss when the item is derecognized.

The asset residual values, useful lives and depreciation method are evaluated at each year end and adjusted prospectively if necessary.

Land are stated at cost and not depreciated.

If the cost of land includes the costs of site dismantlement, removal and restoration, and the benefits from the site dismantlement, removal and restoration is limited, that portion of the land asset is depreciated over the period of benefits obtained by incurring those costs. In some cases, the land itself may have a limited useful life, in which case it is depreciated in a manner that reflects the benefits to be derived from it.

Constructions in-progress are stated at cost, including capitalized borrowing costs and other charges incurred in connection with the financing of the said asset constructions. The accumulated costs will be reclassified to the appropriate "Premises and Equipment" account when the construction is completed and available for intended use. Assets under construction are not depreciated as these are not yet available for use.

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

2. SUMMARY OF ACCOUNTING POLICIES (continued)

o. Premises and equipment (continued)

Repairs and maintenance is charged to the profit or loss as incurred. The cost of major renovation and restoration is capitalized to the carrying amount of the related premises and equipment when it is probable that future economic benefits in excess of the originally assessed standard of performance of the existing asset and is depreciated over the remaining useful life of the related asset.

p. Impairment of Non-Financial Assets

BRI and subsidiaries adopted SFAS No. 48 (Revised 2009), "Impairment of Assets", prospectively, including goodwill and assets acquired from business combination before January 1, 2011.

SFAS No. 48 (Revised 2009) prescribes the procedures to be employed by an entity to ensure that its assets are carried at no more than their recoverable amounts. An asset is carried at more than its recoverable amount if its carrying amount exceeds the amount to be recovered through use or sale of the asset. If this is the case, the asset is described as impaired and this revised SFAS requires the entity to recognize an impairment loss. This revised SFAS also specifies when an entity should reverse an impairment loss and prescribes disclosures.

BRI assesses at each annual reporting period whether there is an indication that an asset may be impaired. If any such indication exists, or when annual impairment testing for an asset (i.e. an intangible asset with an indefinite useful life, an intangible asset not yet available for use, or goodwill acquired in a business combination) is required, BRI makes an estimate of the asset's recoverable amount.

An asset's recoverable amount is the higher of an asset's or Cash Generating Unit (CGU)'s fair value less costs to sell and its value in use, and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. Impairment losses of continuing operations are recognized in the consolidated statement of comprehensive income as "impairment losses". In assessing the value in use, the estimated net future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

In determining fair value less costs to sell, recent market transactions are taken into account, if available. If no such transactions can be identified, an appropriate valuation model is used by BRI and Subsidiaries to determine the fair value of the assets. These calculations are corroborated by valuation multiples or other available fair value indicators.

Impairment losses of continuing operations, if any, are recognized in the consolidated statements of comprehensive income under expense categories that are consistent with the functions of the impaired assets.

q. Foreclosed collaterals

Foreclosed collaterals acquired in settlement of loans (included as part of "Other Assets") are recognized at their net realizable values. Net realizable value is the fair value of the collateral after deducting the estimated costs of disposal. The excess in loan balances which has not been paid by debtors over the value of foreclosed collaterals is charged to allowance for possible losses on loans in the current year. The difference between the value of the collateral and the proceeds from sale thereof is recognized as a gain or loss at the time of sale of the collateral.

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

2. SUMMARY OF ACCOUNTING POLICIES (continued)

q. Foreclosed collaterals (continued)

Management evaluates the value of foreclosed collaterals periodically. Allowance for losses foreclosed collaterals formed by impairment of foreclosed collaterals.

Reconditioning costs arising after foreclosure capitalized in the accounts of the foreclosed collaterals.

r. Prepaid expenses

Prepaid expenses are amortized over their useful lives using the straight line method.

s. Liabilities due immediately

Liabilities due immediately represent the liability of BRI to external parties which by nature should be paid immediately in accordance with the requirements in the agreement which have been previously determined. This account is classified as other financial liabilities and measured at amortized cost.

t. Deposits from customers and other banks and other financial institutions

Demand deposits represent funds deposited by customers whereby the withdrawal can be done at any time by using a check, or through transfer with a bank draft or other forms of payment order. These deposits are stated at the amount due to the account holder.

Wadiah demand deposits represent third party funds which are available for withdrawal at any time and earn bonus based on BRIS policy. *Wadiah* demand deposits are stated at the amount due to the account holder of the deposit in BRIS.

Saving deposits represent customers' funds which entitle the depositors to withdraw under certain agreed conditions. Deposits are stated at the amount due to the account holders.

Wadiah saving deposits represent funds deposited by customers in BRIS, whereby the deposits can be withdrawn any time and does not require BRIS to give interest unless in the form of bonus in a voluntary way. *Wadiah* saving deposits are stated at the amount due to the account holders.

Mudharabah saving deposits represent funds from third parties which earn bonus based on a predetermined and pre-agreed profit-sharing return ratio (nisbah) from income derived by BRIS from the use of such funds. *Mudharabah* saving deposits is stated at the customers' saving balance.

Time deposits represent funds deposited by customers that can be withdrawn only at a certain point of time as stated in the contract between the depositor and BRI and BRI Agro. Time deposits are stated at the nominal amount provided in the certificates of deposits or at the amount stated in the agreement.

Mudharabah time deposits represent third party funds that can be withdrawn only at a certain point in time based on the agreement between the customer and BRIS. *Mudharabah* time deposits are stated at the nominal amount as agreed by the deposit holder and BRIS.

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

2. SUMMARY OF ACCOUNTING POLICIES (continued)

t. Deposits from customers and other banks and other financial institutions (continued)

Deposits from other banks and other financial institutions consist of liabilities to other banks, either domestic or overseas, in the form of demand deposits, saving deposits, time deposits and inter-bank call money through the issuance of promissory notes with a term of up to 90 (ninety) days and stated at the amount due to banks and other financial institutions.

Deposits from customers and other banks and financial institutions are classified as other financial liabilities measured at amortized cost using effective interest rate method except deposits and temporary *syirkah* funds which are stated at the Bank's payable amount to customers. Incremental costs directly attributable to the acquisition of deposits from customers are deducted from the amount of deposits.

u. Securities purchased under agreement to resell

Securities purchased under agreement to resell are presented as assets in the consolidated statements of financial position, at the resale price net of unamortized interest and net of allowance for impairment losses. The difference between the purchase price and the resale price is treated as unearned interest income (unamortized) and recognized as income over the period starting from when those securities are purchased until they are resold using effective interest rate method.

Securities purchased under agreement to resell are classified as loans and receivables.

v. Marketable securities issued

Marketable securities issued by BRI consist of Bonds.

The marketable securities issued are recognized initially at fair value and subsequently measured at amortized cost using the effective interest rate method (EIR). Amortized cost is calculated by taking into account any discount or premium associated related to the initial recognition and transaction costs that are an integral part of the effective interest rate.

w. Borrowings

Borrowings represent funds received from other banks, Bank Indonesia or other parties with a repayment obligation based on borrowing agreements.

Borrowings are recognized initially at fair value and subsequently measured at amortized cost using the effective interest rate method (EIR). Amortized cost is calculated by taking into account any discount or premium associated related to the initial recognition and transaction costs that are an integral part of the effective interest rate.

x. Subordinated loans

Subordinated loans are recognized initially at fair value and subsequently measured at amortized cost using the effective interest rate method. Amortized cost is calculated by taking into account any discount or premium associated related to the initial recognition and transaction costs that are an integral part of the effective interest rate.

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

2. SUMMARY OF ACCOUNTING POLICIES (continued)

y. Provision

Bank adopted SFAS No. 57 (Revised 2009), "Provisions, Contingent Liabilities and Contingent Assets".

Provisions are recognized when BRI and Subsidiaries have a present obligation (legal or constructive) that, as a result of past events, the settlement of the liability is likely to result in an outflow of resources that contain economic benefits and a reliable estimate of the amount of the obligation can be made.

Provisions are reviewed at each reporting date and adjusted to reflect the best estimate of the present. If the outflow of resources to settle the obligation is most likely won't occur, the provision is reversed.

z. Allowance and on time interest payment in BRI unit

On Time Interest Payment (Pembayaran Bunga Tepat Waktu (PBTW)) represents incentives given to Micro Loans (Kredit Umum Pedesaan (Kupedes)) debtors who settled their loans according to the mutually agreed installment schedules. The amount of PBTW is 25% of the interest received from either Kupedes working capital loans or Kupedes investment loans. PBTW is recorded as a deduction from interest income on loans. BRI provided Allowance for On Time Interest Payment (CPBTW) for the PBTW and present it in "Other liabilities".

aa. Interest Income and Interest Expense

Interest income and expense for all interest bearing financial instruments are recognized in the consolidated statements of comprehensive income using the effective interest rate method. The effective interest rate is the rate that precisely discounts the estimated future cash payments or receipts through the expected life of the financial instrument (or, wherever appropriate, a shorter period) to obtain the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, BRI and BRI Agro estimates future cash flows considering all contractual terms of the financial instruments except future credit losses.

This calculation includes all commissions, provision fees and other forms received by the parties in the contract that are inseparable from the effective interest rate, transaction costs and all other premiums or discounts.

If the value of a financial asset or group of similar financial assets has decreased as a result of impairment losses, the interest income subsequently obtained is recognized based on the interest rate used to discount future cash flows in calculating impairment losses.

Loans for which the principal or interest are past due for 90 (ninety) days or more, or loans with doubtful timely payment, are generally classified as impaired loans and the aforementioned interest income is reversed when the loan is classified as impaired.

ab. Fees and commissions

Fees and commissions directly related to lending activities, or fees and commissions income related to a specific period, are amortized over the term of the contract using the effective interest rate method and classified as part of interest income in the consolidated statements of comprehensive income.

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

2. SUMMARY OF ACCOUNTING POLICIES (continued)

ab. Fees and commissions (continued)

Fees and commissions that are not related to the credit activity or a period of time and/or associated with the service provided, are recognized as revenue at the time of the transaction and recorded under other operating income.

ac. Sharia income and expense

Sharia income consists of income from *murabahah*, *istishna*, *ijarah* transactions and profit sharing from *mudharabah* and *musyarakah* financing. Income from *murabahah* and *ijarah* transactions is recognized using the accrual method. Income from *istishna* transactions and profit sharing from *mudharabah* and *musyarakah* financing are recognized when the cash installments are received. Expenses based on Sharia principles consist of *mudharabah* profit sharing expense and *wadiah* bonus expense.

ad. Employee Benefits

Short-term employee benefits

Short-term employee benefits such as salaries, social security contributions, short-term leaves, bonuses and other non-monetary benefits are recognized during the period when services have been rendered. Short-term employee benefits are measured using undiscounted amounts.

Defined contribution plan

Contribution payable to the pension fund equivalent to a certain percentage of salaries for qualified employees under the BRI's defined contribution plan. The contribution is accrued and recognized as expense when services have been rendered by qualified employees and actual payments are deducted from the contribution payable. Contribution payable is measured using undiscounted amounts.

Defined benefit plan and other long-term employee benefits

BRI adopted SFAS No. 24 (Revised 2010), "Employee Benefits".

The post-employment benefits and other long-term employee benefits such as gratuity for services and grand leaves are accrued and recognized as expense when services have been rendered by qualified employees. The benefits are determined based on BRI's regulations and the minimum requirements of Labor Law No. 13/2003.

The post-employment benefits and other long-term employee benefits are actuarially determined using the *Projected Unit Credit Method*.

Provisions made pertaining to past service costs are deferred and amortized over the expected average remaining service years of the qualified employees. Furthermore, provisions for current service costs are directly charged to operations of the current year/period. Actuarial gains or losses arising from adjustments and changes in actuarial assumptions are recognized as income or expense when the net cumulative unrecognized actuarial gains or losses at the end of the previous reporting period exceed 10% of the present value of the defined benefit obligations or 10% of the fair value of plan assets, at that date. The actuarial gains or losses in excess of the aforementioned 10% threshold are recognized on a straight-line method over the expected average remaining service years of the qualified employees.

Actuarial gains or losses and past service costs from other long-term employee benefits are recognized directly in the consolidated statement of comprehensive income of the current period.

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

2. SUMMARY OF ACCOUNTING POLICIES (continued)

ae. Stock options

In connection with the IPO, BRI has granted stock options to Directors and employees of certain positions and levels based on criteria established by BRI. Cost of stock compensation at the issuance date is calculated using the fair value of the stock options and is recognized as part of "Salaries and Employee Benefits Expense" based on cliff-vesting scheme using the straight-line method over the vesting period. The accumulation of stock compensation cost is recognized as "Stock Options" in the equity.

The fair values of the stock options granted are calculated using the Black-Scholes option pricing model.

af. Earnings per Share

BRI adopted SFAS No. 56 (Revised 2011), "Earnings per Share".

Basic earnings per share is calculated by dividing income for the year attributable to equity holders of the Parent Entity by the weighted average number of issued and fully paid shares during the related year.

ag. Foreign currency transactions and balances

BRI maintains its accounting records in Indonesian Rupiah. Transactions in foreign currencies are recorded at the prevailing exchange rates in effect on the date of the transactions. As of December 31, 2013 and 2012, all foreign currency denominated monetary assets and liabilities are translated into Rupiah using the Reuters spot rates at 4.00 p.m. WIB (Western Indonesian Time). The resulting gains or losses are credited or charged to the current consolidated statements of comprehensive income.

The exchange rates used in the translation of foreign currency amounts into Rupiah are the following (full Rupiah):

	2013	2012
1 United States Dollar	12,170.00	9,637.50
1 Great Britain Pound Sterling	20,110.93	15,514.93
100 Japanese Yen	11,575.00	11,176.50
1 European Euro	16,759.31	12,731.62
1 Hong Kong Dollar	1,569.54	1,243.27
1 Saudi Arabian Riyal	3,244.81	2,569.59
1 Singapore Dollar	9,622.08	7,878.61
1 Malaysian Ringgit	3,715.47	3,147.97
1 Australian Dollar	10,855.65	10,007.10
1 Chinese Yuan	2,010.28	1,546.52
1 Thailand Baht	371.15	314.85
1 Swiss Franc	13,674.16	10,536.25
1 Canadian Dollar	11,434.22	9,686.91
1 Bruneian Dollar	9,620.94	7,878.61
1 Danish Krone	2,246.78	1,708.60
1 South Korean Won	11.53	9.00

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

2. SUMMARY OF ACCOUNTING POLICIES (continued)

ah. Translation of the financial statements of Overseas Branch and Representative Offices

BRI has 1 (one) branch office in Cayman Islands and 2 (two) representative offices located in New York and Hong Kong which are considered as separate foreign entities.

For consolidated financial statements purposes, all accounts of the overseas branch and representative offices are translated into Rupiah with the following exchange rates:

- Assets and liabilities, commitments and contingencies - using Reuters spot rates at 4.00 p.m. WIB at statements of financial position reporting date.
- Revenues, expenses, gains and losses - using the average middle rate during the month. The ending year balances consist of the sum of the translated monthly balances of revenues, expenses and profit and losses during the year.
- Equity - Capital Stock and Additional Paid-in Capital using historical rates.
- Statements of cash flows - using the spot rate published by Reuters at 4.00 p.m. WIB on statements of financial position reporting date, except for the profit and loss accounts which are translated at the average middle rates and equity accounts which are translated at the historical rates.

The resulting difference arising from the translation process on the above financial statements is included in equity as "Differences Arising From The Translation of Foreign Currency Financial Statements".

ai. Derivatives Instrument

Derivatives financial instruments are valued and recognized in the consolidated statements of financial position at fair value. Each derivatives contract is carried as asset when the fair value is positive and as liability when the fair value is negative.

Derivative transactions are recognized in accordance with SFAS No. 55 (Revised 2011). Derivative receivables and payables are classified as financial assets and liabilities measured at fair value through profit or loss.

Gains or losses resulting from fair value changes are recognized in the consolidated statements of comprehensive income.

The fair value of derivatives instruments is determined based on discounted cash flows and pricing models or quoted prices from brokers of other instruments with similar characteristics.

aj. Taxation

BRI and Subsidiaries adopted SFAS No. 46 (Revised 2010), "Accounting for Income Tax".

Current tax expense is provided based on the estimated taxable income for the current year. Deferred tax assets and liabilities are recognized for temporary differences between the financial and the fiscal bases of assets and liabilities at each reporting date.

Deferred tax assets are recognized for all deductible temporary differences and carry forward of uncompensated tax losses to the extent that it is probable for temporary differences and carry forward of uncompensated tax losses to be utilized in deducting future taxable profit.

The carrying amount of deferred tax assets is reviewed at each reporting date and is reduced when it is no longer probable that sufficient taxable profits will be available to compensate part or all of the benefit of the deferred tax assets.

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

2. SUMMARY OF ACCOUNTING POLICIES (continued)

aj. Taxation (continued)

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realized or the liability is settled based on tax laws that have been enacted or substantively enacted as at statements financial position reporting date. The related tax effects of the provisions for and/or reversals of all temporary differences during the year, including the effect of change in tax rates, are recognized as "Income Tax Benefit (Expense), Deferred" and included in of net profit or loss for the year, except to the extent that they relate to items previously charged or credited to equity.

Amendments to tax obligations are recorded when an assessment is received or, if appealed against by BRI, when the result of the appeal is determined.

For each of the consolidated entity, the tax effects of temporary differences and tax loss carry forward, which individually is either asset or liability, are shown at the applicable net amounts.

Assets and liabilities on deferred tax and current tax can be offset if there is a legal enforceable right to offset.

ak. Segment information

BRI and Subsidiaries adopted SFAS No. 5 (Revised 2009), "Operating Segments". The revised SFAS requires disclosures that will enable users of financial statements to evaluate the nature and financial effects of the business activities in which the entity engages and the economic environments in which it operates.

A segment is a distinguishable component of the business unit that is engaged either in providing certain products (business segment), or in providing products within a particular economic environment (geographical segment), which is subject to risks and rewards that are different from those of other segments.

Segment revenue, expenses, results, assets and liabilities include items directly attributable to a segment as well as those that can be allocated on a reasonable basis to that segment. They are determined before intra-group balances and intra-group transactions are eliminated.

BRI and Subsidiaries presents segments operation based on BRI's internal report that is presented to the Board of Directors as the chief operation decision maker.

BRI has identified and disclosed financial information based on main business (business segment) classified into micro, retail, corporate, others and subsidiaries, including geographical segment.

A geographical segment is engaged in providing products or services within a particular economic environment with risks and different returns compared to other operating segments in other economic environments. BRI's geographical segment covers Indonesia, Asia and United States of America.

al. Use of significant accounting judgments, estimates and assumptions

The preparation of the BRI and Subsidiaries consolidated financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities, at the end of the reporting period. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amounts of the asset and liability affected in future periods.

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

2. SUMMARY OF ACCOUNTING POLICIES (continued)

al. Use of significant accounting judgments, estimates and assumptions (continued)

Judgments

The following judgments are made by management in the process of applying BRI and Subsidiaries' accounting policies that have the most significant effects on the amounts recognized in BRI and Subsidiaries' consolidated financial statements as follows:

Going concern

BRI's management has assessed the ability of BRI and Subsidiaries' ability in going concern and believes that BRI and Subsidiaries have the resources to continue its business in the future. Furthermore, the management is not aware of any material uncertainties that may cast significant doubt to the BRI's ability to continue as a going concern. Therefore, the consolidated financial statements have been prepared on going concern basis.

Classification of financial assets and financial liabilities

BRI and Subsidiaries determines the classifications of certain assets and liabilities as financial assets and financial liabilities by judging if they meet the definition set forth in SFAS No. 55 (Revised 2011). Accordingly, the financial assets and financial liabilities are accounted for in accordance with BRI's accounting policies disclosed in Note 2.

Fair value of financial instruments

If the fair value of financial assets and financial liabilities recorded in the consolidated statements of financial position is not available in an active market, such fair value is determined using various valuation techniques including the use of mathematical models.

Inputs for this model come from observable market data as long as the data is available. When observable market data is not available, it is deemed necessary for management to determine the fair value. Management's considerations include liquidity and volatility feedback model for long-term derivatives transactions and discount rate, rate of early payment and default rate assumptions.

Held to maturity classification

The securities under held to maturity classification requires significant judgment. In making this judgment, BRI and Subsidiaries evaluates its intention and ability to hold such investments to maturity. If BRI and Subsidiaries fails to keep these investments to maturity other than in certain specific circumstances, for example, selling an insignificant amount close to maturity, it will be required to reclassify the entire portfolio as available for sale securities. The available for sale securities would therefore be measured at fair value and not at amortized cost.

Financial assets not quoted in an active market

BRI and Subsidiaries classifies financial assets by evaluating, among others, whether the asset is quoted or not in an active market. Included in the evaluation on whether a financial asset is quoted in an active market is the determination on whether quoted prices are readily and regularly available, and whether those prices represent actual and regularly occurring market transactions on an arm's length basis.

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

2. SUMMARY OF ACCOUNTING POLICIES (continued)

al. Use of significant accounting judgments, estimates and assumptions (continued)

Judgments (continued)

Contingencies

BRI and Subsidiaries are currently involved in legal proceedings. The estimate of the probable cost for the resolution of claims has been developed in consultation with the aid of the external legal counsel handling BRI and subsidiaries defense in this matter and is based upon an analysis of potential results. Management does not believe that the outcome of this matter will affect the results of operations. It is probable, however, that future results of operations could be materially affected by changes in the estimates or in the effectiveness of the strategies relating to these proceedings.

Estimates and Assumptions

The key assumptions concerning the future and other key sources of estimating uncertainty at the reporting date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are disclosed below. BRI based its assumptions and estimates on parameters available when the consolidated financial statements were prepared.

Existing circumstances and assumptions about future developments may change due to market changes or circumstances arising beyond the control of BRI and subsidiaries. Such changes are reflected in the assumptions when they occur.

Allowance for impairment losses on loans and Sharia financing/receivables

The management of BRI and subsidiaries review its loan portfolio and financing/receivables to assess impairment on an annual basis by updating provisions made during the period as necessary based on the continuing analysis and monitoring of individual accounts by credit officers.

In determining whether an impairment loss should be recorded in the consolidated statements of comprehensive income, BRI and subsidiaries assess for any observable data indicating the existence of measurable decrease in the estimated future cash flows from loan portfolio before the decrease is individually identified in the portfolio.

This evidence may include observable data indicating that there has been an adverse change in the payment status of group borrowers, or national or local economic conditions that correlate with breach on assets in group. BRI and subsidiaries use estimates in the amount and timing of future cash flows when determining the level of allowance for losses required. Such estimates are based on assumptions of several factors and actual results may differ, resulting to future changes in the amount of allowance for losses.

Impairment of securities

BRI determines that securities are impaired based on the same criteria as financial assets carried at amortized cost.

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

2. SUMMARY OF ACCOUNTING POLICIES (continued)

al. Use of significant accounting judgments, estimates and assumption (continued)

Estimates and Assumptions (continued)

Useful lives of premises and equipment

The management of BRI estimates the useful lives of premises and equipment based on the period over which the assets are expected to be available for use. The estimated useful lives of premises and equipment are reviewed periodically and are updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial obsolescence and legal or other limits on the use of the assets. In addition, estimation of the useful lives of premises and equipment is based on collective assessment of industry practice, internal technical evaluation and experience with similar assets. It is possible, however, that future results of operations could be materially affected by changes in estimates brought about by changes in the aforementioned factors mentioned. The amounts and timing of recorded expenses for any period are affected by changes of those factors and circumstances during recording. A reduction in the estimated useful lives of premises and equipment increases the recorded operating expenses.

Impairment of non-financial assets

BRI and Subsidiaries assesses impairment of non-financial assets whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. The factors that BRI considers important which may lead to impairment assessment are the following:

- a) significant underperformance relative towards expected historical or projected future operating results;
- b) significant changes in the manner of use of the acquired assets or the overall business strategy; and
- c) significant negative industry or economic trends.

The management of BRI and Subsidiaries recognizes an impairment loss whenever the carrying amount of an asset exceeds its recoverable amount. The recoverable amount is the higher amount between fair value less cost to sell using use of asset value (or cash generating unit). Recoverable amounts are estimated for individual assets or, if not possible, for the cash-generating unit to which the asset belongs.

Recognition of deferred tax assets

Deferred tax assets are recognized for all unused tax losses to the extent that it is probable that the taxable income can be compensated against the losses. Significant management judgment is required to determine the amount of deferred tax assets that can be recognized, based upon the likely timing and level of future taxable income together with tax planning strategies.

BRI reviews its deferred tax assets at each date of the statements of financial position reporting and reduces the carrying amount to the extent that it is no longer probable that sufficient taxable income will be available to compensate part or all of the deferred tax assets.

Present value of retirement liability

The cost of defined retirement pension plan and other post employment benefits is determined using actuarial valuations. The actuarial valuation involves making assumptions about discount rates, expected rates of return on assets, future salary increases, mortality rates and disability rate. Due to the long-term nature of these plans, such estimates are subject to significant uncertainty.

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

2. SUMMARY OF ACCOUNTING POLICIES (continued)

am. Allowances for impairment losses on non-earning assets and commitments and contingencies

In accordance with Circular Letter of Bank Indonesia (BI) No. 13/658/DPNP/DPnP dated December 23, 2011, BRI and BRI Agro are no longer required to provide allowance for impairment losses on non-earning assets and administrative accounts (commitments and contingencies), but the management is required to continue calculating the allowance for impairment losses in accordance with the applicable accounting standards.

For non-earning assets, the management of BRI and BRI Agro determine the impairment losses at the lower amount between the carrying value and fair value after deducting cost to sell.

For commitments and contingencies with credit risk, BRI management determines the impairment losses based on the difference between the carrying amount and the present value of the payment obligations that are expected to occur (when payment under the guarantee has become probable).

an. Changes in accounting policies and disclosures

BRI adopted the revised accounting standard on January 1, 2013, which are considered relevant to the consolidated financial statements of BRI and Subsidiaries but does not have a significant impact, is the annual improvements to Financial Accounting Standards of SFAS No. 60 "Financial Instruments: Disclosures". Annual improvements to Financial Accounting Standards provide qualitative disclosures in the context of the quantitative disclosures that enable users of financial statements to be able to correlate the related disclosures, in order for users of financial statements to understand the overall picture of the nature and extent of risks arising from financial instruments. The interaction between the disclosure of qualitative and quantitative results in information disclosure that enables users of financial statements to evaluate an entity's exposure to risks better.

3. IMPLEMENTATION OF QUASI-REORGANIZATION

As an impact of the economic condition, BRI incurred significant losses in 1999 which amounted to Rp28,221,364. After BRI's recapitalization in July 2000 and October 2000, the allowance for possible losses on earning assets of BRI has been reduced significantly when the non-performing earning assets were transferred to the Indonesian Bank Restructuring Agency (BPPN). BRI's accumulated losses amounted to Rp24,699,387 in its statements of financial position as of June 30, 2003.

In order to have a fresh start on its financial position showing the current values with no deficit, BRI implemented quasi-reorganization on June 30, 2003 (Note 2d).

The management of BRI has prepared projected financial statements showing strong profitability and sound Capital Adequacy Ratio (CAR) based on the primary strength of BRI as one of the major banks in Indonesia which focuses on micro-finance, consumer financing, small and middle businesses (UKM) and agribusiness sectors.

These consolidated financial statements are originally issued in the Indonesian language.

		40,718,495		42,524,126

As of December 31, 2013 and 2012, current accounts with Bank Indonesia based on Sharia banking principles amounted to Rp679,112 and Rp528,298, respectively.

Current accounts with Bank Indonesia are maintained to comply with Bank Indonesia's Minimum Legal Reserve Requirements (GWM).

As of December 31, 2013 and 2012, the GWM ratios of BRI (Parent Entity) (unaudited) are as follows

	2013	2012
Primary GWM - Rupiah	8.02%	10.64%
Secondary GWM - Rupiah	8.40	4.94
Primary GWM - Foreign Currency	8.00	8.17

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

5. CURRENT ACCOUNTS WITH BANK INDONESIA (continued)

The calculation of the GWM ratios as of December 31, 2013 is based on Bank Indonesia's regulation (PBI) No. 15/7/2013 dated September 26, 2013, regarding "Second changes on PBI No. 12/19/PBI/2010 dated October 4, 2010 on GWM of Commercial Banks with Bank Indonesia in Rupiah and Foreign Currencies". While the calculation of the GWM ratios as of December 31, 2012 is based on PBI No. 13/10/PBI/2011 dated February 9, 2011, regarding "Changes on PBI No. 12/19/PBI/2010 dated October 4, 2010 on GWM of Commercial Banks with Bank Indonesia in Rupiah and Foreign Currencies".

Secondary GWM in Rupiah is set at:

- 2.5% of third-party fund (TPF) in Rupiah until September 30, 2013;
- 3% of TPF in Rupiah since October 1, 2013 until October 31, 2013;
- 3.5% of TPF in Rupiah since November 1, 2013 until December 1, 2013, and
- 4% of TPF in Rupiah since December 2, 2013.

As of December 31, 2013 and 2012, based on the above Bank Indonesia regulations, BRI is required to maintain minimum primary reserves both in Rupiah and in foreign currencies of 8%, respectively. BRI is also required to maintain secondary reserves in Rupiah of 4% and 2.5% as of December 31, 2013 and 2012.

BRI has complied with Bank Indonesia's regulation regarding the minimum legal reserve requirement as of December 31, 2013 and 2012.

Less: Allowance for impairment losses	(77)	(171)
	<u>9,435,120</u>	<u>4,841,975</u>

c) By Collectibility:

Current accounts with other banks as of December 31, 2013 and 2012 were classified as "Current".

d) Average annual interest rates on current accounts with other banks:

	2013	2012
Rupiah	0.59%	1.58%
United States Dollar	0.01	0.10

e) Movements in the allowance for impairment losses on current accounts with other banks:

	2013	2012
Beginning balance	171	61
Provision (reversal) during the year (Note 33)	(94)	110
Ending balance	<u>77</u>	<u>171</u>

BRI assess allowance for impairment losses on current accounts with other banks on an individual basis using objective evidence, except for current accounts with other banks owned by BRIS (Subsidiary) (based on sharia principles) assessment was performed using a collectability guidance of Bank Indonesia.

The minimum allowance for impairment losses on current accounts with other banks provided based on Bank Indonesia regulations amounted to Rp77 and Rp171 as of December 31, 2013 and 2012, respectively.

Management believes that the allowance for impairment losses on current accounts with other banks is adequate.

These consolidated financial statements are originally issued in the Indonesian language.

BRI assessed placements with Bank Indonesia and other banks individually for impairment based on whether an objective evidence of impairment exists, except for the placements with Bank Indonesia and other banks based on Sharia principles whereby assessment is made using Bank Indonesia's guidelines on collectibility.

Management believes that no allowance for impairment losses is necessary as of December 31, 2013 and 2012, because management believes that placements with Bank Indonesia and other banks are fully collectible.

Information with respect to classification of not impaired and impaired financial assets is disclosed in Note 38.

These consolidated financial statements are originally issued in the Indonesian language.

CLN represents a debt security where the coupon payments and principal repayment are linked to credit default event of the Republic of Indonesia (reference entity). BRI will receive all interest payments and full principal repayment if there is no credit default event. If credit default event occurs to the reference entity, the issuers will settle the CLN with bonds issued by the reference entity or cash at a certain amount. Credit default events that can occur to the reference entity among others are (i) failure to pay any matured obligation, (ii) repudiation/moratorium and (iii) restructuring in which the payment terms are unfavorable to the creditors.

The embedded credit default swap as of December 31, 2013 and 2012 have a liability fair value of USD3,225,160 and USD5,392,134 (equivalent to Rp39,250 and Rp51,967), respectively, which were recognized as derivatives payable in the consolidated statements of financial position (Note 12). The net gain from the changes in fair value of the embedded credit default swap was recognized as income for the years ended December 31, 2013 and 2012 amounted to USD2,166,975 (equivalent to Rp26,372) and USD6,221,952 (equivalent to Rp59,964), respectively.

As of December 31, 2013 and 2012 BRI recognized net unrealized gains from increase in fair value of CLN classified as "fair value through profit or loss" amounted to USD404,078 and USD1,387,416 (equivalent to Rp4,918 and Rp13,371) which was recorded in the consolidated statements of financial position as derivatives receivable (Note 12) and consolidated statements of comprehensive income as unrealized gain from changes in fair value of securities and Government Recapitalization Bonds.

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

8. SECURITIES (continued)

- e) Movements in the allowance for impairment losses on securities:

	<u>2013</u>	<u>2012</u>
<u>Rupiah</u>		
Beginning balance	760	1,510
Provision (reversal) during the year (Note 33)	12	(750)
Ending balance	<u>772</u>	<u>760</u>

BRI assessed individually for impairment based on whether an objective evidence of impairment exists, except for the securities of BRIS (Subsidiary) based on Sharia principles whereby assessment is made using Bank Indonesia's guidelines on collectability.

The minimum allowance for impairment losses on securities based on Bank Indonesia regulations amounted to Rp772 and Rp760, as of December 31, 2013 and 2012, respectively.

Management believes that the allowance for impairment losses on securities is adequate.

- f) The average annual interest rates:

	<u>2013</u>	<u>2012</u>
Rupiah	7.24%	6.25%
United States Dollar	4.07	3.94

- g) BRI recognized unrealized loss - net in the value of "Fair Value through Profit or Loss" securities amounted to Rp21,820 and RpNil for the years ended December 31, 2013 and 2012, respectively, which are recorded under "Unrealized gain from changes in fair value of securities and Government Recapitalization Bonds - net" in the consolidated statements of comprehensive income.
- h) BRI recognized net gain resulting from the sale of securities amounted to Rp78,252 and Rp42,670, for the years ended December 31, 2013 and 2012, respectively, which are recorded under "Gain on sale of securities and Government Recapitalization Bonds - net" in the consolidated statements of comprehensive income.

Information with respect to classification of not impaired and impaired financial assets is disclosed in Note 38.

<u>Rupiah</u>		
≤ 1 month	207,634	14,281
	8,926,072	5,934,772

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

9. EXPORT BILLS (continued)

c) By Period (continued):

BRI assessed export bills individually for impairment based on whether an objective evidence of impairment exist.

Management believes that no allowance for impairment losses is necessary as of December 31, 2013 and 2012, because management believes that export bills are fully collectible.

Information with respect to the classification of not impaired and impaired financial assets is disclosed in Note 38.

10. GOVERNMENT RECAPITALIZATION BONDS

This account represents bonds issued by the Government related to BRI's recapitalization program and Government Recapitalization Bonds purchased from the secondary market.

In connection with the recapitalization program, BRI received bonds issued by the Government at a nominal amount of Rp29,149,000 in 2 (two) tranches, at nominal amounts of Rp20,404,300 on July 25, 2000 and Rp8,744,700 on October 31, 2000, all of which earn interest at a fixed rate. Based on the management contract dated February 28, 2001 between the Government and the Directors and Boards of Commissioners of BRI, the total Government Recapitalization Bonds needed for BRI's recapitalization was determined at Rp29,063,531 (Note 30a), therefore the recapitalization excess of Rp85,469 should be returned to the Government and BRI will not earn the interest income on such bonds. On November 5, 2001, BRI returned the Government Recapitalization bonds amounted to Rp85,469, including the related interests on such bonds to the Government.

The details of Government Recapitalization Bonds are as follows:

a) By Ownership Purpose and Remaining Period to Maturity:

	2013	2012
<u>Fair value through profit or loss</u>		
≤ 1 month	199,314	-
<u>Available for sale</u>		
≤ 1 month	712,105	715,616

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

12. DERIVATIVES RECEIVABLE AND PAYABLE (continued)

a) Cross currency and interest rate swap (continued)

BRI enters into cross currency and interest rate swap contracts with several counterparties, whereby BRI and counterparties agree to exchange funds in USD and Rupiah with the amount equal at the effective date of the contract. Thus, BRI/counterparties shall pay interest according to the funds received.

If the funds received are in USD, the beneficiary must pay fixed rate or floating rate of SIBOR 3 (three) months, LIBOR 3 (three) months or LIBOR 6 (six) months plus certain margin. On the contrary, the beneficiary pays fixed rate or floating rate of floating rates of interest prevailing in the market plus certain margin if funds received are in Rupiah.

b) Foreign currency spots - purchase and sale

As of December 31, 2013, BRI has outstanding foreign currency spot purchase and sale contract with notional amount of USD63,000,000 and contractual purchase amount of Rp769,942 and contractual sale amount of Rp770,005.

c) Foreign currency swap

As of December 31, 2013, BRI has outstanding foreign currency swap contracts with notional purchase amount of USD34,000,000 and notional sale amount of USD14,000,000 with the contractual purchase amount of Rp393,359 and the contractual sale amount of Rp147,291.

Information with respect to classification of not impaired and impaired financial assets is disclosed in Note 38.

	<u>419,144,730</u>	<u>336,081,042</u>

f) Other Significant Information:

1) The average annual interest rates for loans are as follows:

	2013	2012
Contractual Rate		
Rupiah	11.79%	12.11%
Foreign Currencies	4.47	4.53
Effective Interest Rate		
Rupiah	15.95%	16.80%
Foreign Currencies	4.58	4.65

- 2) The loans are generally collateralized by registered mortgages, by powers of attorneys to sell, demand deposits, time deposits or by other guarantees generally accepted by banks (Notes 20, 21 and 22).
- 3) Working capital and investment loans represent loans to customers for working capital requirements and capital goods.
- 4) Consumer loans consist of housing, motor vehicles and other personal loans.
- 5) Program loans represent loan facilities channeled by BRI based on the guidelines from the Government to support the development of Indonesia's small scale industry, middle and cooperative units.
- 6) Kupedes loans represent loan facilities channeled by BRI through BRI's Units. The target of these loans is micro businesses and fixed income employees that require additional funds, in accordance with the maximum limit amount stated in the Kupedes manual. The economic sectors covered under Kupedes include agriculture, manufacturing, trading and others.
- 7) Syndicated loans represent loans provided to customers under syndication agreements with other banks. BRI's participation as member in the syndicated loans ranged from 2.97% until 74.94% as of December 31, 2013 and 2012.

These consolidated financial statements are originally issued in the Indonesian language.

Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

13. LOANS (continued)

f) Other Significant Information (continued):

- 8) Loans to employees with 5.5% annual interest rate, intended for the acquisition of vehicles, houses and other necessities with 4 (four) to 20 (twenty) years maturity. Loan principal and interest payments were collected through monthly payroll deductions. Difference between employee loan's interest rates and Base Lending Rate (BLR) is deferred and recorded as deferred expense for employee loans as part of other assets. Deferred expense for employee loans amounted to Rp640,498 and Rp708,141 as of December 31, 2013 and 2012, respectively (Note 18).

- 9) Loans granted by BRI to related parties, other than loans to key employees (Note 43) are as follows:

	2013	2012
PT Perusahaan Listrik Negara (Persero)	10,288,290	8,211,065
Perum BULOG	9,355,324	3,570,265
PT Pertamina (Persero)	8,603,110	10,348,229
PT Taspen (Persero)	5,100,000	4,500,000
Kementerian Keuangan Republik Indonesia	3,778,698	1,711,741
Perum Pegadaian	3,602,519	4,769,429
PT Kereta Api Indonesia (Persero)	2,709,044	714,538
PT Telekomunikasi Indonesia (Persero) Tbk	2,250,000	3,625,000
PT Pupuk Kalimantan Timur	1,836,399	892,162
PT Dayamitra Telekomunikasi	1,610,438	1,000,000
Others	19,269,961	17,868,775
	68,403,783	57,211,204

- 10) Loans that have been restructured by BRI (Parent Entity) during 2013 and 2012, that were reported to Bank Indonesia amounted to Rp2,190,691 and Rp3,582,981, respectively. Restructuring scheme generally involves extension of the loan maturity date and rescheduling of overdue interest payment.

- 11) In its report on Legal Lending Limit to Bank Indonesia as of December 31, 2013 and 2012, BRI indicated that there is no debtor either related party or third party who has not complied with or exceeded the Legal Lending Limit.

- 12) The details of non-performing loans and allowance for impairment losses by economic sector are as follows:

	2013	2012
Trading, hotels and restaurants	5,489,984	3,904,999
Construction	1,492,326	1,510,299
Manufacturing	1,314,935	1,050,306
Transportation, warehousing and communications	1,254,465	998,893
Business services	1,147,967	675,248
Agriculture	821,780	595,414
Social services	81,758	69,115
Mining	46,927	84,077
Electricity, gas and water	26,173	35,037
Others	1,249,673	2,471,928
	12,925,988	11,395,316
Less: Allowance for impairment losses	(3,790,925)	(4,595,451)
	9,135,063	6,799,865

These consolidated financial statements are originally issued in the Indonesian language.

(Expressed in millions of Rupiah, unless otherwise stated)

13. LOANS (continued)

f) Other Significant Information (continued):

13) Ratios:

a. The ratios of non-performing loans (NPL) based on Bank Indonesia regulations are as follows:

(i) Consolidated

	2013	2012
Total non-performing loans	6,735,938	6,296,470
Total loans	434,316,466	350,758,262
% non-performing loans (NPL)	1.55%	1.80%

(ii) BRI (Parent Entity)

	2013	2012
Total non-performing loans	6,654,494	6,203,863
Total loans	430,617,872	348,227,188
% non-performing loans (NPL)	1.55%	1.78%

b. The ratio of small scale industry loans to BRI's total loans is 41.71% and 42.45% as of December 31, 2013 and 2012, respectively (unaudited).

Movements in the allowance for impairment losses on loans:

	2013	2012
Beginning balance	14,677,220	15,951,531
Provision during the year (Note 33)	3,946,083	2,593,691
Loans written off during the year	(4,317,861)	(4,447,510)
Foreign currency translation	866,294	579,508
Ending balance	15,171,736	14,677,220

BRI's (Parent Entity) allowance for impairment losses balance includes the allowance for disaster prone areas amounted to Rp1,166,798 and Rp1,847,010, as of December 31, 2013 and 2012, respectively (Note 2f).

The minimum allowance for impairment losses on loans based on Bank Indonesia regulation (Note 2f) amounted to Rp10,265,927 and Rp9,024,876, as of December 31, 2013 and 2012, respectively.

Management believes that the allowance for impairment losses on loans is adequate.

Information with respect to classification of not impaired and impaired financial assets is disclosed in Note 38.

These consolidated financial statements are originally issued in the Indonesian language.

		1,435,761		685,912
		3,679,684		4,786,121

b) By Collectibility:

All acceptances receivable were classified as "Current" as of December 31, 2013 and 2012.

c) By Period:

The classifications of acceptances receivable based on the remaining period until maturity are as follows:

	2013	2012
<u>Third parties</u>		
≤ 1 month	986,137	530,585
> 1 month - 3 months	281,528	1,530,415
> 3 months - 1 year	976,258	2,039,209
	2,243,923	4,100,209

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

15. ACCEPTANCES RECEIVABLE AND PAYABLE (continued)

c) By Period (continued):

The classifications of acceptances receivable based on the remaining period until maturity are as follows (continued):

	2013	2012
<u>Related parties (Note 43)</u>		
≤ 1 month	241,061	43,378
> 1 month - 3 months	830,344	425,110
> 3 months - 1 year	364,356	217,424
	1,435,761	685,912
	3,679,684	4,786,121

The total acceptances payable is equal to the total of acceptances receivable from customers.

BRI assessed acceptance receivables individually for impairment based on whether an objective evidence of impairment exist.

Management believes that no allowance for impairment losses is necessary as of December 31, 2013 and 2012, because management believes that acceptances receivable are fully collectible.

Information with respect to classification of not impaired and impaired financial assets is disclosed in Note 38.

16. INVESTMENT IN ASSOCIATED ENTITIES

The details of investment in associated entities are as follows:

Company Name	Type of Business	Percentage of Ownership	2013		
			Cost	Accumulated Equity in Net Earnings of Associated Company	Carrying Value

24. MARKETABLE SECURITIES ISSUED

BRI issued marketable securities with details as follows:

	2013
<u>United States Dollar</u>	
BRI Bonds	
Net of unamortized discount and issuance cost amounted to Rp61,867 as of December 31, 2013	6,023,133

On March 28, 2013, BRI issued and listed the BRI bonds year 2013 amounted to USD500,000,000 (full amount) in Singapore Exchange Securities Trading Limited (SGX-ST) for 5 (five) year period, and will mature on March 28, 2018 with fixed interest rate of 2.95% per annum. The bonds were issued at 99.20% or equivalent to USD495,980,000 (full amount) and the interest is paid semi-annually commencing on September 28, 2013. On the issuance date, the bonds were rated Baa3 and BBB by Moody's and Fitch, respectively.

The net proceed of the issuance of BRI bonds will be used to strengthen general funding structure.

As of December 31, 2013, BRI bonds year 2013 is rated BBB and Baa3 by Fitch and Moody's, respectively.

Management believes that all requirements/restrictions required under the trustee agreement have been complied with.

25. FUND BORROWINGS (continued)

b) Borrowings from PT Sarana Multigriya Finansial (Persero), PT Permodalan Nasional Madani (Persero) and Lembaga Pembiayaan Ekspor Indonesia

- Borrowings from PT Sarana Multigriya Finansial (Persero) represents *mudharabah* financing facility obtained by BRIS (Subsidiary) on December 14, 2012, used for mortgage loan. The financing facility is for 5 (five) years period and will be mature on December 14, 2017 with the agreed *nisbah* portion for PT Sarana Multigriya Finansial (Persero) and BRIS are 63.46% and 36.54%, respectively.
- Borrowings from PT Permodalan Nasional Madani (Persero) represents loan facilities used to refinance debtors of BRI Agro (Subsidiary) for investment loan purposes, among others are Koperasi Primer untuk Anggotanya (KKPA), Koperasi Petani Sawit Makmur, Koperasi Perkebunan Belimbing Makmur and others. These loan facilities (4 facilities) are secured by fiducia in the form of government bonds maturing January 31, 2013. Average annual interest rates on these loans is 7.05% for the year 2012.
- Borrowing from Lembaga Pembiayaan Ekspor Indonesia represents loan facilities used to refinance the debtors of BRI Agro (Subsidiary), among others are KUD Delima Sakti, Kopbun Siampo, KUD Hidup Baru and others. These loan facilities (2 facilities) with no collateral will mature on March 28, 2013 and June 4, 2013, respectively. The average annual interest rates on these loans is 7.27% for the year 2012.

c) Bilateral Borrowings

On August 26, 2011 and September 27, 2011, BRI obtained bilateral loan with PT Bank Pan Indonesia Tbk (Panin Bank) amounted to USD25,000,000 and USD200,000,000, respectively, to fulfill liquidity needs in anticipation of BRI's business expansion, with annual interest rate of LIBOR plus 1.20% margin annually and LIBOR plus 2.20% margin annually, respectively, payable every 3 (three) months. The loan amounted to USD25,000,000 was paid on August 26, 2012.

The maturity date of loan facilities amounted to USD200,000,000 was divided into two stages, the first USD100,000,000 should be paid on August 27, 2012, while the second USD100,000,000 should be paid on September 27, 2012. At the maturity date of the first USD100,000,000 loan, on August 27, 2012, the facility is extended by changing the interest rate at LIBOR plus 2% margin annually. While, at the maturity date for the second USD100,000,000, on the September 27, 2012, the facility is extended by changing the interest rate at LIBOR plus 1.5% margin annually. These loan facilities was paid on August 27, 2013 and September 27, 2013, respectively.

29. SUBORDINATED LOANS

BRI obtained subordinated loans in Rupiah with details as follows:

	2013	2012
<u>Rupiah</u>		
Subordinated Bond II	1,998,052	1,996,266
Two-step loans	98,972	120,296
	<u>2,097,024</u>	<u>2,116,562</u>

a. Subordinated Bond II

On December 22, 2009, BRI issued Rp2,000,000 "BRI Subordinated Bond II Year 2009" which are registered in the Indonesia Stock Exchange and bears a fixed interest rate. The Subordinated Bond II were issued at 100.00% of their nominal value with a fixed annual interest rate of 10.95%, payable every 3 (three) months. The Subordinated Bond II will be due and must be settled with the same value as the principal of the Subordinated Bond on December 22, 2014. Principal repayment of the Subordinated Bond can only be done after receiving approval from Bank Indonesia, however, if in the future the obligation to obtain approval from Bank Indonesia as stated above is no longer mandatory, therefore the principal repayment of the Subordinated Bond can be made without receiving the approval from Bank Indonesia.

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

29. SUBORDINATED LOANS (continued)

a. Subordinated Bond II (continued)

The net proceeds from the issuance of the Subordinated Bond II are intended for loans expansion under a prudent principle.

The Subordinated Bond II are not guaranteed by special collateral nor guaranteed by the Republic of Indonesia or other third parties and are not included in the bank guarantee program implemented by the Deposit Insurance Agency (Lembaga Penjamin Simpanan/LPS) or other insurance corporation. BRI does not establish provision for principal repayment fund of the Subordinated Bond with consideration to optimize the use of the fund in accordance with the planning of the use of the issuance fund of the Subordinated Bond.

The issuance and classification of the Subordinated Bond II as subordinated loans were approved by Bank Indonesia, through its letter No. 11/90/DPB1/TPB1-3 dated November 11, 2009.

As of December 31, 2013 and 2012, "BRI Subordinated Bond II Year 2009" obtained a "idAAA" rating from PT Pemeringkat Efek Indonesia. The trustee of this Subordinated Bond is PT Bank Mandiri (Persero) Tbk.

The trustee agreement covers several covenants affecting BRI and requires a written approval from the trustee before conducting the following:

- Reduction of authorized, issued and paid capital stock, except as requested and or instructed by the Government of the Republic of Indonesia and or authorized parties (including but not limited to Bank Indonesia, Ministry of Finance of the Republic of Indonesia and Ministry of State-Owned Enterprises).
- Conduct merger and or separation and or dissolution and or acquisition, or allowing or giving approval to Subsidiaries to conduct merger and or separation and or dissolution and or acquisition, except as requested and or instructed by the Government of the Republic of Indonesia and or authorized parties (including but not limited to Bank Indonesia, Deposit Insurance Agency or other insurance corporation in accordance with the prevailing regulations, Ministry of Finance of the Republic of Indonesia and Ministry of State-Owned Enterprises), in accordance with the prevailing regulations, including but not limited to OJK regulations.

BRI has complied with the above trustee agreement.

b. Two-step Loans

The two-step loans in Rupiah represent the loans from the Government which were funded by the Asian Development Bank (ADB), International Bank for Reconstruction and Development (IBRD), International Fund for Agricultural Development (IFAD), United States Agency for International Development (USAID) and Islamic Development Bank (IDB). The interest rates of these loans vary based on the respective agreements with terms ranged from 15 (fifteen) up to 40 (forty) years. The average annual interest rates for subordinated loans were 4.38% and 4.40%, for the years ended December 31, 2013 and 2012, respectively. The maturity of these loans are various up to 2027.

These consolidated financial statements are originally issued in the Indonesian language.

	<u>2,097,024</u>	<u>2,116,562</u>

30. EQUITY

a. Capital stock

The details of authorized, issued and fully paid capital stock of BRI as of December 31, 2013 and 2012 (Note 1c) are as follows:

	<u>Number of Shares</u>	<u>Nominal Value Per Share (Full Rupiah)</u>	<u>Share Value (Full Rupiah)</u>	<u>Percentage of Ownership</u>
Authorized Capital Stock				
- Series A Dwiwarna share	1	250	250	0.00%
- Series B Common shares	59,999,999,999	250	14,999,999,999,750	100.00
	<u>60,000,000,000</u>		<u>15,000,000,000,000</u>	<u>100.00%</u>
Issued and Fully Paid Capital Stock				
Republic of Indonesia				
- Series A Dwiwarna share	1	250	250	0,00%
- Series B Common shares	13,999,999,999	250	3,499,999,999,750	56.75
Public				
- Series B Common shares	10,669,162,000	250	2,667,290,500,000	43.25
	<u>24,669,162,000</u>		<u>6,167,290,500,000</u>	<u>100.00%</u>

Series A Dwiwarna share is the share that gives the shareholder preferential rights to approve the appointment or dismissal of Commissioners and Directors, changes in Articles of Association, approve on BRI's merger, dissolution, acquisition and separation, submission of request for bankruptcy and liquidation of BRI.

Series B shares are common shares that can be owned by the public.

Capital Structure

In response to the Management Contract entered into between the Government of the Republic of Indonesia, as represented by the Government through the Ministry of Finance and BRI on February 28, 2001, the Ministry of Finance issued the Decision Letter No. 427/KMK.02/2003 dated September 30, 2003 regarding the final amount and the implementation of the rights of the Government arising from the additional investment of the Republic of Indonesia in the capital of BRI in connection with the recapitalization program for commercial banks. Based on such Decision Letter, the Ministry of Finance determined that the final recapitalization requirement amount of BRI is Rp29,063,531 (Note 10).

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

30. EQUITY (continued)

a. Capital stock (continued)

Capital Structure (continued)

The Government's rights arising from the additional investment of the state to BRI were implemented as follows: Rp29,063,531 converted to 3,272,000 new shares issued by BRI with a par value of Rp1 million per share and Rp25,791,531 from the recapitalization fund recorded as additional paid-in capital in BRI's capital structure. This decision of the Ministry of Finance has been implemented retrospectively since June 30, 2003.

Based on BRI's Shareholders' Extraordinary General Meeting held on October 3, 2003 as covered by notarial deed No. 6 dated October 3, 2003 of notary Imas Fatimah, S.H., BRI's shareholders decided on, among others, the following:

1. Capital restructuring of BRI as of June 30, 2003 arising from the recapitalization fund of Rp29,063,531 to increase BRI's issued and fully paid capital stock owned by the Republic of Indonesia from Rp1,728,000, consisting of 1,728,000 shares at a par value of Rp1 million per share, to become Rp5,000,000 consisting of 5,000,000 shares at the same par value per share and the balance of Rp25,791,531 recorded as additional paid-in capital.
2. Change in par value per share (stock split) from Rp1 million to Rp500 (full Rupiah).
3. Increase in BRI's authorized capital stock of Rp5 trillion, divided into 5,000,000 shares at a par value of Rp1 million per share, to Rp15 trillion divided into 30,000,000,000 shares at a par value of Rp500 (full Rupiah) per share.
4. Change in classification of BRI's shares to Series A Dwiwarna and Series B shares.
5. Utilization of general and specific reserves as of June 30, 2003 amounted to Rp1,386,616 to cover the accumulated losses as of June 30, 2003.
6. Quasi-reorganization plan of BRI as of June 30, 2003 to eliminate the accumulated losses of Rp24,699,387 against the recorded additional paid-in capital (Note 3).
7. Plan to undertake the Initial Public Offering (IPO) of BRI's shares.
8. Follow up actions on the amendments to the Articles of Association
 - i. Agree on the change in the status of BRI, to be a Publicly Listed Limited Liability Company, thereafter the name will be changed from "PT Bank Rakyat Indonesia (Persero)", to "Perusahaan Perseroan (Persero) PT Bank Rakyat Indonesia Tbk" and simplified to "PT Bank Rakyat Indonesia (Persero) Tbk".
 - ii. Agree to change all provisions in the Articles of Association of BRI with revisions in accordance with Law No. 8 Year 1995 on "Capital Markets" and Decision of the Chairman of the Capital Market Supervisory Agency (Bapepam) No. KEP-13/PM/1997 dated April 30, 1997 on "The Main Provisions of the Articles of Association of a Company that Conduct an Initial Public Offering of Shares and Public Company".

The changes in BRI's Articles of Association in connection with the above Extraordinary General Shareholders' Meeting were covered in notarial deed No. 7 dated October 3, 2003 by notary Imas Fatimah, S.H. and were approved by the Ministry of Justice and Human Rights through its Decision Letter No. C-23726 HT.01.04.TH.2003 dated October 6, 2003.

These consolidated financial statements are originally issued in the Indonesian language.

30. EQUITY (continued)

a. Capital stock (continued)

Capital Structure (continued)

Stock split was conducted based on Notarial Deed No. 38 dated November 24, 2010, whereby the par value per share of Rp500 (full Rupiah) became Rp250 (full Rupiah) per share, effective January 11, 2011 (Note 1c).

On October 13, 2003, the President of the Republic of Indonesia issued Government Regulation No. 49 Year 2003 regarding the sale of a portion of shares of BRI owned by the Republic of Indonesia and issuance of new shares of BRI, excluding the participation from the Republic of Indonesia, through the capital market and or direct sale to investors.

Initial Public Offering (IPO) of BRI's Shares

Based on the letter from the Chairman of Bapepam No. S-2646/PM/2003 dated October 31, 2003, the registration statement submitted by BRI in connection with the IPO of BRI's shares of 3,811,765,000 Series B common shares consisting of 2,047,060,000 Series B common shares owned by the Republic of Indonesia (divestment) and 1,764,705,000 new Series B common shares issued with a par value of Rp500 (full Rupiah) per share and initial offer price of Rp875 (full Rupiah) per share to the public, became effective October 31, 2003. Such offered shares were initially traded on November 10, 2003 and simultaneously all of BRI shares were listed on the Jakarta and Surabaya Stock Exchanges (currently the Indonesia Stock Exchange).

Subsequently, the over-subscription option of 381,176,000 Series B common shares owned by the Republic of Indonesia (divestment) and over-allotment option of 571,764,000 Series B common shares owned by the Republic of Indonesia (divestment) with a price of Rp875 (full Rupiah) per share were exercised on November 10, 2003 and December 3, 2003, respectively. After BRI's IPO and the exercise of the over-subscription option and the over-allotment option, the Republic of Indonesia owns 59.50% of the outstanding common shares of BRI.

Stock Allocation Program

Based on the above Extraordinary General Shareholders' Meeting, BRI's shareholders agreed to, among others, the employee and management stock ownership plan through an Employee Stock Allocation Program (ESA) and Management Stock Option Plan (MSOP). The ESA consists of a Bonus Share Plan, Shares Purchase at a Discount and Additional Shares Grant programs. While MSOP is granted to Directors and employees at certain levels and positions. Costs and discounts related to the ESA and MSOP programs are paid by the Bank through the allocation of reserves. The compensation cost relating to MSOP is recognized through stock options under equity. The management and execution of the ESA and MSOP programs are performed by the Directors, while the supervision is performed by the Board of Commissioners.

These consolidated financial statements are originally issued in the Indonesian language.

30. EQUITY (continued)

b. Additional Paid-in Capital

The details of additional paid in capital as of December 31, 2013 and 2012 are as follows:

Additional capital by the Government related to the recapitalization program	1,092,144
Previous balance of paid up capital from IPO by the Government	5
Additional paid-in capital from IPO	589,762
Exercise of stock options	
Year 2004	49,514
Year 2005	184,859
Year 2006	619,376
Year 2007	140,960
Year 2008	29,013
Year 2009	14,367
Year 2010	43,062
Remaining MSOP Stage-I which already expired	504
Remaining MSOP Stage-II which already expired	1,845
Remaining MSOP Stage-III which already expired	8,447
	<u><u>2,773,858</u></u>

In line with the realization of the Recapitalization Program for Commercial Banks as set forth in Government Regulation No. 52 Year 1999 on the "Increase in Investment by the Republic of Indonesia in State-Owned Banks", the Government determined that the recapitalization requirement amount of BRI to achieve a CAR of 4% was Rp29,063,531. Up to June 30, 2003, the authorized and issued capital stock of BRI has not yet been increased by additional capital from the above recapitalization program, therefore, the paid up capital from the Government of Rp29,063,531 was recorded temporarily under "Additional Paid-in Capital" together with the previous balance of paid up capital of Rp5 from the Government.

Based on the Decision Letter No. 427/KMK.02/2003 dated September 30, 2003 of the Ministry of Finance as explained in letter a above, from the final recapitalization requirement of BRI amounted to Rp29,063,531, the amount of Rp3,272,000 was converted to paid up capital and the remaining balance of Rp25,791,531 was recorded as additional paid in capital (Note 28a). Moreover, with the implementation of the quasi-reorganization by BRI, the accumulated losses before quasi-reorganization as of June 30, 2003 amounted to Rp24,699,387 (Note 3) was eliminated against additional paid-in capital, resulting the additional paid-in capital amounted to Rp1,092,149 as of June 30, 2003.

On November 10, 2003, BRI conducted an IPO by issuing 1,764,705,000 new series B common shares with a par value of Rp500 (full Rupiah) per share at the offering price of Rp875 (full Rupiah) per share, resulting in additional paid-in capital as follows:

Total new Series B Common shares issued to the public under the IPO (shares)	<u>1,764,705,000</u>
Premium per share (full Rupiah)	<u>375</u>
Total premium on shares before discount	661,764
Less: - 3% discount given to BRI customers	(2,961)
- Cost of IPO	<u>(69,041)</u>
Additional paid-in capital from IPO	<u><u>589,762</u></u>

These consolidated financial statements are originally issued in the Indonesian language.

b. Additional Paid-in Capital (continued)

The employees of BRI exercised their stock options starting on November 10, 2004 for MSOP I, November 10, 2005 for MSOP II and November 15, 2006 for MSOP III. During 2004 until 2010, stock options exercised totaled to 569,876,000 shares for MSOP I, II and III, which consist of 4,728,500 shares in 2010, 4,553,000 shares in 2009, 7,499,000 shares in 2008, 31,379,000 shares in 2007, 250,721,000 shares in 2006, 185,610,000 shares in 2005 and 85,385,500 shares in 2004. The additional paid-in capital arising from the exercise of stock options amounted to Rp43,062 in 2010, Rp14,367 in 2009, Rp29,013 in 2008, Rp140,960 in 2007, Rp619,376 in 2006, Rp184,859 in 2005 and Rp49,514 in 2004.

c. Differences Arising from Translation of Foreign Currency Financial Statements

This account represents the exchange rate differences resulting from the translation of the financial statement of the overseas branch/representative offices of BRI (Cayman Islands, New York and Hong Kong) from United States Dollar and Hong Kong Dollar to Indonesian Rupiah (Note 2ah). Assets and liabilities as well as commitments and contingencies denominated in foreign currencies were translated into Rupiah using the Reuters spot rates at 4.00 p.m. WIB (Western Indonesian time) on the statements of financial position date. The statements of comprehensive income for the year ended as of such date is derived from the accumulation of the monthly statements of comprehensive income balances which are translated into Rupiah by using the average exchange middle rate for the respective months.

d. Distribution of Net Income

Based on the Annual General Shareholders' Meetings of BRI held on February 28, 2013 and March 28, 2012, the Shareholders agreed to distribute the dividend from net income for the years ended December 31, 2013 and 2012 as follows:

	Income 2012	Income 2011
Dividends	5,556,285	3,016,585
General and specific reserves	2,592,933	150,829
Appropriation for partnership and environmental development funds	-	603,315

BRI recorded the allowance for *tantiem* in the current consolidated statements of comprehensive income in accordance with SFAS No. 24 (Revised 2010) on "Employee Benefits".

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

37. TAXATION (continued)

b) Tax Expense (continued)

Estimated taxable income in 2013 and 2012 are used as a basis for fulfillment of annual tax return (SPT) for corporate income tax that reported by BRI to Tax Office (KPP). Income tax of BRI and Subsidiaries are computed for each company as a separate legal entity.

Examination of fiscal year 2010

The General Directorate of Tax based on Tax Assessment Letter No. 00198/207/10/093/12 dated November 28, 2012, affirmed the under payment of Value Added Tax on Goods and Services in the amount of Rp1,418 including fine in the amount of Rp194 which was billed through Tax Billing Letter No. 00112/107/10/093/12 dated November 28, 2012. Tax principal was already approved by the BRI, but for administrative sanctions and penalties are currently being proposed for deletion process according to the existing tax regulations.

The General Directorate of Tax based on Tax Assessment Letter No. 00003/206/10/093/12 dated November 28, 2012, affirmed the under payment of Income Tax in the amount of Rp1,484,041 which was already approved by BRI in the amount of Rp34,529. The management is in the opinion that BRI's treatment to disapprove the tax under payment is already in accordance with the existing tax regulations, therefore, BRI is currently filing for an objection.

The total payment for tax under payment of Value Added Tax and Goods (including penalty) and income tax by BRI amounted to Rp36,142 and was paid on December 27, 2012.

On February 27, 2013, BRI has contested the Under Payment of Tax Assessment Letter of Income Tax No. 00003/206/10/093/12 dated 28 November 2012. To qualify for the requirement of objection, BRI has paid a deposit of Rp1,449,512 to the State Treasury on February 28, 2013. After the assessment, management BRI believes that the period for filing an objection and appeal until the decision of the review takes about 3 years and 3 months. Appeal decision and reconsideration decision has the possibility of rejected by the Tax Court, therefore BRI has formed the cost for the possible losses from the appeal process until the reconsideration decision amounted to Rp483,171 in 2013 (Note 18).

c) Deferred Tax Assets

The computation of deferred tax benefit (expense) of BRI is as follows (Note 2aj):

	<u>2013</u>	<u>2012</u>
<u>Parent Entity</u>		
Reversal for allowance for possible losses on earning assets	(188,278)	(422,227)
Reversal of provision for personnel expense	(63,849)	(164,263)
Unrealized loss (gain) on trading securities and Government Recapitalization Bonds	(1,129)	220
Depreciation of premises and equipment	(77,005)	(60,667)
	<u>(330,261)</u>	<u>(646,937)</u>
Subsidiaries	3,070	21,235
	<u>(327,191)</u>	<u>(625,702)</u>

These consolidated financial statements are originally issued in the Indonesian language.

Under article 17 (2) of Law No. 7 year 1983 regarding "Income Tax" which was revised for the fourth time by Law No. 36 year 2008, the corporate tax rate is 25%.

In addition, based on the above Law No. 36 year 2008 dated September 23, 2008, the Government Regulation No. 81 year 2007 dated December 28, 2007 on "Reduction of the Income Tax Rate on Resident Corporate Tax Payers in the Form of Publicly-listed Companies" and the Ministry of Finance Regulation No. 238/PMK.03/2008 dated December 30, 2008 on "The Guidelines on the Implementation and Supervision on the Rate Reduction for Domestic Tax Payers in the Form of Public Companies" stipulates that resident publicly-listed companies in Indonesia can obtain the reduced income tax rate at 5% lower than the highest existing income tax rate, provided they meet the prescribed criteria, i.e., public companies whose shares are owned by the public at a minimum of 40% or more of the total paid-up shares are traded in the Indonesia Stock Exchange and such shares are owned by at least 300 (three hundred) parties and each party owning only less than 5% of the total paid-up shares. These requirements should be fulfilled by the publicly-listed companies for a period of 6 (six) months in 1 (one) tax year. Based on Letter No. DE//2014-0098 dated January 6, 2014 and the monthly report of shares ownerships, form No. X.H.I-2 dated January, 6 2014 from the Securities Administration Agency (Biro Administrasi Efek), Datindo Entrycom on the ownership of BRI's shares during 2013), all of the above mentioned required criteria to obtain the tax rate reduction on BRI's consolidated financial statements for the year ended December 31, 2013 were fulfilled by BRI.

38. RISK MANAGEMENT

The key to success in BRI's accomplishment as a strong and healthy bank with sustainable growth is the business implementation accompanied by an integrated and systematic risk management of credit, liquidity, operational, market, strategic, compliance, reputational and legal risk in accordance with Circular Letter of Bank Indonesia No. 13/23/DPNP dated October 25, 2011 on Risk Management Implementation for Commercial Banks.

The principles of integrated and systematic risk management are stated in the Risk Management General Policy (KUMR) which represents the supreme rule in the risk management implementation in BRI's business activities. KUMR includes general policy, strategy, organization, risk management, information system, process and implementation of risk management, up to internal control system. Implementation of risk management policies are set for derivative transactions in accordance with the type of derivative risks.

These consolidated financial statements are originally issued in the Indonesian language.

38. RISK MANAGEMENT (continued)

Board of Commissioners (BOC) and Board of Director (BOD) is responsible for effective risk management at BRI and have an important role in supporting and overseeing the implementation of risk management across working units.

BOC evaluate the implementation of risk management policies that was led by BOD. Evaluation is done to ensure that BOD manage the activity and risks effectively. In conducting supervision of BRI's risk management, BOC were assisted by the Risk Management Oversight Committee (KPMR).

BOD determine the policy and risk management strategy comprehensively along with its implementation. BOD ensure that all material risks and the impact has been followed up, and remedial measure for problems or irregularities in business activity has been implemented. BOD appoint a Special Director, in this case Director of Compliance and Risk Management, to implement the process of monitoring and controlling bank-wide risk.

BRI's BOD were assisted by Risk Management Committee (RMC) as the highest committee in BRI's risk management structure. RMC is responsible to provide recommendations to the President Director in formulating policies, enhance policy implementation, evaluating the progress and condition of risk profiles, and providing remedial measure.

To address issues that were specific to certain types of risk and required immediate decisions, RMC conducted sub-RMC meetings. There were 3 (three) types of sub-RMC: CMRC (Credit Risk Management Committee), MRMC (Market Risk Management Committee), and ORMC (Operational Risk Management Committee), was form to discuss issues related to credit, market, operational and other risks.

Risk management within BRI is a function that is independent, in example business function and audit function. These functions plays an active roll in implementing risk management at different levels of authority. BRI's Risk Management was implemented with the concept of three lines of defense. First line of defense is the business and operational units with functional activity, responsible for implementing and maintaining internal controls and ensuring output quality are accordance with policies and procedures that have been developed. Second line of defense monitors the implementation of risk management procedures with an appropriate risk tolerance and establishes policies, guidelines, and risk limits for business and operational units independently. Third line of defense evaluate the first line and second lines of defense, and provide report to the President Director and BOC independently.

Credit Risk Management

Credit risk is risk due to default of debtor and/or other party in meeting their obligation to BRI. BRI monitors the credit quality as part of early identification of credit impairment. Credit risk management is done by including limits of acceptable risk exposure for individual third party, limits on geographics boundaries, and limits on each industry. Limit determination is done through credit risk rating for each debtor. Credit risk rating is updated periodically to estimate potential loss as risk due to credit expansion and as a basis to determine the following improvement.

Implementation of Credit Risk Management is not solely intended to put BRI as a bank that is complied with the regulation, but also as a form of management's obligation in implementing credit risk management system at an optimum level of risk and return, and in accordance with best practice in the banking industry, which is expected to support BRI's business activities.

These consolidated financial statements are originally issued in the Indonesian language.

38. RISK MANAGEMENT (continued)

Credit Risk Management (continued)

Loan distribution performed by business unit already considered the credit risk from granting until fully paid. Monitoring on credit risk are done on a regular basis to prevent Non Performing Loan (NPL).

Through the implementation of Early Warning System (EWS) in the development of the condition of the debtor's business, effective credit risk management could minimize risk of loss and optimize capital usage to obtain maximum income.

Credit risk management of BRI is intended to minimize possible losses due to unsettled loans and other financial contracts, both in the individual level and the overall loan portfolio. Credit risk management is also intended to meet the regulatory requirements of Bank Indonesia.

1. Analysis of maximum exposure to credit risk and collateral and other credit enhancement

The carrying value of BRI's financial assets other than loan and receivable and securities purchased under agreement to resell best represent the maximum exposure to credit risk

The table below shows the net maximum exposure to credit risk of securities purchase under agreement to resell as of December 31, 2013.

	Maximum Exposure	Collateral	Net Exposure
Securities purchased under agreements to resell	14,440,063	15,133,887	-

For the loans and receivables, BRI uses the collateral to minimize the credit risk. Loans and receivables are classified into two major category :

1. Secured loans
2. Unsecured loans

For *secured loans*, BRI determined the type and value of collateral according to the loan scheme. Types of collateral are as follows :

- a. Physical collateral, such as land and buildings, proof of vehicle ownership, and property.
- b. Financial collateral, such as time deposit, savings, demand deposit, securities, and gold.
- c. Others, such as guarantees, government guarantees, and guarantee institution.

In times of default, BRI will use the collateral as the last resort in recovering its investment.

Unsecured loans consist of fully unsecured loans such as credit cards and partially secured loans such as loans for fixed income employees, loans for retirees, and other consumer loans. In their payment obligations, partially secured loans are generally made through automatic payroll deduction.

Although it is included in the unsecured loans category, the risk level of partially secured loans is lower than the carrying value. As for fully unsecured loan, the risk level is equal to the carrying value.

Credit risk mitigations for partially secured loans consist of employee recruitment decision letter and certificate of retirement.

These consolidated financial statements are originally issued in the Indonesian language.

Liquidity Risk Management

BRI manages liquidity risk as an effort to meet every financial liability that has been agreed upon in a timely manner and in order to maintain adequate and optimal liquidity level. In order to support liquidity management, BRI has determined liquidity risk management policy which covers liquidity management, liquidity allowance maintenance, funding strategy determination, early warning system, measurement and determination of liquidity risk limit including high quality liquid asset and emergency funding plan (contingency plan).

The purpose of this policy is to ensure daily fund adequacy in meeting its obligations during normal or crisis condition in a timely manner from various available source of fund, including ensuring the availability of high quality liquid asset.

Asset and Liability Analysis According to Contractual Maturity

Future potential liquidity risk encountered by BRI is measured through Liquidity Gap Analysis, which is the projection of the excess or shortage of liquidity based on the maturity of assets and liabilities, after taking into account the business expansion needs. This information is also used as a consideration in planning and managing liquidity, including business expansion need. With the implementation of effective liquidity risk management, it is expected that liquidity risk can be minimized as well as enhancing the overall banking system stability.

The tables below represent information about the mapping of financial assets and liabilities within a certain time scale (maturity buckets) based on their remaining maturity as of December 31, 2013 and 2012:

Description	Total	2013

Market Risk Management

Market risk is loss risk which arises due to the movements of market factors which consist of interest rates and exchange rates that are against the position held by BRI, on the statements of financial position or administrative accounts. The positions are those in the trading book and banking book.

BRI has implemented treasury and market risk application system (GUAVA), an integrated system used by the front, middle, and back office function. Through the application, it is possible to measure the market risk by using an internal model approach (Value-at-Risk) which is integrated with the daily process transaction. Besides monitoring instrument risk exposure, it also covers market risk monitoring limit and transaction limit such as dealer transaction nominal limit, cut loss limit, stop loss limit, and Value-at-Risk (VaR) limit. Monitoring is conducted daily to accelerate the availability of updated information to support timely decision, especially for instruments classified into trading.

1. Value-at-Risk (VaR): Purpose and Limitation of the Method

BRI uses internal model approach to measure VaR potential loss due to changes in the market price of trading portfolio based in historical data. VaR potential loss from market risk is measured by using assumption of changes in risk factor according to normal distribution pattern. BRI uses VaR to measure exchange rate for trading and banking book position as well as measuring interest rate risk for trading book position.

2. Value-at-Risk (VaR) Assumption

VaR potential loss is measured based on estimated value by using 99% confidence level and unchanged market risk position in 1 (one) day holding period, which means that the potential loss which might exceed VaR value in normal market condition, in average, may occur once every one hundred days. The method used in VaR is Delta Gamma.

The following tables present information on VaR value starting from January 1, 2013 until December 31, 2013 and January 1, 2012 until December 31, 2012. BRI has no trading portfolio as at December 31, 2012.

	2013	
	Exchange Rate*)	Interest Rate
Daily Average	18,104.97	5,849.11
Highest	30,828.99	30,322.73
Lowest	8,082.87	7.22

*) Including trading and banking book.

These consolidated financial statements are originally issued in the Indonesian language.

38. RISK MANAGEMENT (continued)

Market Risk Management (continued)

2. Value-at-Risk (VaR) Assumption (continued)

	2012	
	Exchange Rate*)	Interest Rate
Daily Average	22,738.54	6,332.23
Highest	37,003.37	26,493.55
Lowest	8,953.73	0.02

*) Including trading and banking book.

3. Back Testing

The purpose of back testing is to ensure that the result of internal model measurement for interest risk and exchange rate risk is valid. When performing back testing, BRI compares between estimated result of daily VaR and rate changes realization.

Based on back testing procedures for exchange rate risk and interest risk, the actual loss for the whole year result is already consistent with VaR forecast model. The result of the back testing is reported quarterly to the Risk Management Committee (RMC).

4. Market Risk Outside Trading Book

a. Interest Rate Risk

Financial instrument with interest rate basis possesses risk due to potential change in interest rate which affects future cash flow.

The management is responsible in determining, maintaining, and controlling interest rate by weighing bank's risk appetite and financial performance achievement target. Review of interest rate is performed at least once in a month during Asset and Liability Committee (ALCO) forum.

The following table presents information on the average annual interest rates for financial asset and liability position as of December 31, 2013 and 2012:

	2013		2012	
	Rupiah (%)	Foreign currencies (%)	Rupiah (%)	Foreign currencies (%)
Assets				
Placements with Bank Indonesia and other banks	5.05	0.16	4.39	0.49
Securities	7.24	4.07	6.25	3.94
Loans	11.79	4.47	12.11	4.53
Government Recapitalization Bonds	4.59	-	3.73	-
Liabilities				
Deposit from customers				
Demand deposits	2.55	0.32	2.87	0.17
Saving deposits	1.26	0.22	1.40	0.19
Time deposits	6.12	1.51	5.84	1.76
Deposits from other banks and other financial institutions	3.91	0.07	2.99	0.57
Fund borrowings	3.22	1.19	3.99	1.64
Subordinated loans	7.67	-	7.68	-
Marketable securities issued	-	2.95	-	-

Sensitivity rate is used to analyze probable change of interest rate affecting the banking book portfolio gain and loss. In the above sensitivity analysis, interest rate change assumption basis are 1%.

These consolidated financial statements are originally issued in the Indonesian language.

Operational Risk Management

BRI Operational Risk Management is implemented according to Bank Indonesia Regulation No. 11/25/PBI/2009 on Risk Management Implementation of Commercial Bank, which requires risk management implementation to cover pillars on active supervision of the Boards of Commissioners and Directors, policy adequacy, limit determination and procedure, identification process adequacy, measurement, monitoring and risk management as well as risk management information and internal control systems. The main objective of risk management implementation is managing operational risk exposure caused by internal and external factors that influences business and operational activities such as inadequate or failed of internal processes, human resources, IT failures and external events such as natural disaster, potentially severe, financial and non financial losses. Operational risk exposure management includes mitigation of legal, reputational, compliance, and strategic risk exposure in every business process and operational activities.

Each of BRI operational working unit is responsible for the implementation of risk management process through internal control system in business and operational activities in each of business unit. It begins from the phase of identification, measurement, monitoring and risk mitigation. The Board of Directors determined Risk Management Function in every business unit starting from Head Office level (Desk/Division), Regional Office, Special Branch Office, Branch Office which covers operational, marketing, and micro business, and Sub Branch Office.

Operational Risk Management Unit in the Head Office and Regional Office is responsible in making the guidance of operational risk management implementation, developing and implementing policy or procedure and methodology, and also monitoring, reviewing, and controlling operational risk management process. On the other hand, Operational Risk Management Unit is involved in composing and monitoring BRI's operational risk profile, assessing the risk management adequacy of a new product and/or activity, and supporting the business unit or risk owner in order to develop risk culture awareness, anti fraud strategy implementation, and compliance towards risk management principles. In order to discuss operational risk mitigation and risk control improvement, Operational Risk Management Committee (ORMC) is held quarterly and it's coordinated by Operational Risk Management Unit and related desk/division/business unit.

Internal Auditor in The Head Office and Inspectorate Office within Indonesia is responsible in monitoring and validating the internal control adequacy of business and operational activities in every business unit and also the consistency of operational risk management implementation in BRI as a bank wide.

These consolidated financial statements are originally issued in the Indonesian language.

38. RISK MANAGEMENT (continued)

Operational Risk Management (continued)

BRI's operational risk management implementation is facilitated by operational risk management tools called Operational Risk Assessor (OPRA), consists of Risk and Control Self Assessment (RCSA), Key Risk Indicator (KRI), Incident Management (IM), Risk Management Forum and Maturity. In order to perceive risk management, it is focused on building risk culture awareness and risk management training continuously to all of BRI employees and also improving internal control in every business and operational activities.

1. Risk Control and Self Assesment (RCSA)

RCSA is a risk management tool, qualitatively and predictively, which is used to identify, measure risks by using dimension of impact and likelihood. RCSA has already been implemented in Head Office Division or Desk, Regional Office, Special Branch Office, Branch Office embedded BRI Unit, Sub Branch Office, and Priority Service Centre. Policy on RCSA is stipulated through BRI Circular Letter No. S.25-DIR/DMR/12/2012.

RCSA is used to help the business unit to to identify, measure operational risk in every business and operational activities independently, monitor and determine the action plans or towards improvements.

The main risk issue is assessed, identified an updated by considering business development such as product implementation and or new activity, change in competition condition, new market segment, change in internal/external policy, as well as other changes which affect BRI risk exposure. Working unit performs RCSA assessment by considering loss event data in Incident Management (IM)/Loss Event Database (LED), Key Risk Indicator (KRI) and Audit Result (LHA) of the working unit. RCSA evaluation is performed quarterly, however, the frequency will be increased in time of significant increase in risk exposure.

RCSA consolidation report stated above is reported regularly to the BOD in RMC that was held quarterly.

2. Incident Management (IM)/Loss Event Database (LED)

Recording of operational loss event in BRI business activity is Loss Event Database (LED), performed in Incident Management (IM). This tool is developed to document data of financial and non financial loss, covering actual loss, potential loss and near misses, as well as chronological recording of loss incident since occurrence up to declaration of settlement, including improvement measure and incident handling conducted. Policy on Incident Management is stipulated through BRI Circular Letter No. S.30-DIR/DMR/11/2013.

Based on loss event data in IM module, loss event analysis can be performed based on loss event data causes, functional activities, event types and business lines. LED information system can be used to determine the preventive actions in risk mitigation, based on the process of incident handling for the financial loss, non financial loss, financial recovery and also litigation process.

BRI operational loss event data has been documented consistently and systematically since 2007 in loss event database matrix which is classified into 8 business lines and 7 event types based on the dimension of lost event severity/loss and likelihood/frequency.

These consolidated financial statements are originally issued in the Indonesian language.

(Expressed in millions of Rupiah, unless otherwise stated)

38. RISK MANAGEMENT (continued)

Operational Risk Management (continued)

2. Incident Management (IM)/Loss Event Database (LED) (continued)

In order to calculate operational capital charge and Risk Weighted Average, according to regulator policy, BRI used Basic Indicator Approach method (BIA) since it has been implemented in 2010. However, BRI has been prepared for The Standardised Approach (TSA) and Advanced Measurement Approach (AMA). BRI's LED also has been used to calculate operational risk capital charge by Advanced Measurement Approach (AMA) method, based on Extreme Value Theory (EVT) and Loss Distribution Approach (LDA). In order to implement the advanced operational risk capital charge calculation, BRI has identified gap analysis for The Standardised Approach (TSA) and Advanced Measurement Approach (AMA) implementation forward.

3. Key Risk Indicator (KRI)

KRI is a tool to detect risks trend/risks increasing and or risks decreasing both leading or historical. Risks trend prediction is used to determine towards action plans, In order to mitigate operational risk before it causes the financial and or non financial loss. KRI policy is stipulated through BRI Circular Letter No. S.24-DIR/DMR/08/2007.

BRI has identified key risk indicators for all risks type, and determined the threshold or risks limit which portrays the acceptable condition and risk appetite of the management. It is established by using the best judgement, considered BRI risk exposures and risk appetite, that involved Internal Auditor, risk owner and other business units, BRI's KRI are reflected on its Bank Wide Risk Profile and Regional Risk Profile Report which are monitored and reported monthly to the management.

4. Risk Management Forum

Risk Management Forum is a risk management tool to documents the result of meeting/forum among The Head of BRI's business units with the lower level employees and staffs in order to discuss inherent risks in the daily business or operational activities that might be the constraint in achieving the business target or business performance. Risk management forum are held in each business unit and its expected to support the enlargement of BRI's risk culture awareness. Risk Management Forum is stipulated through BRI Circular LetterNo. S.25-DIR/DMR/08/2007.

5. Maturity

Maturity is a self assessment process on the establishment level of risk management implementation in each of BRI working unit. Maturity assessment is performed at every year end by each of working unit head by using certain parameters. By performing maturity assessment, it is expected that each working unit will be able to evaluate the risk management implementation performed, in order to compose future improvement plan. Maturity policy is stipulated through BRI Circular Letter No. S.12-DIR/DMR/04/2009.

These consolidated financial statements are originally issued in the Indonesian language.

38. RISK MANAGEMENT (continued)

Operational Risk Management (continued)

6. Business Continuity Management (BCM)

The possibility of disaster caused by nature, human or technology might be threat for BRI business continuity, whereas the business units are spread over Indonesia. Therefore, the Board of Directors concern to develop and implement Business Continuity Management (BCM) in order to ensure the employees, customers and others third parties safety and security who were around BRI business unit environment (Emergency Response Plan), and maintain the continuity of critical businesses and operational activities, protect BRI's assets and provide sufficient respond while disruption or disaster condition are declared (Business Continuity Plan). BCM is stipulated through BRI Circular Letter No. S.02-DIR/DMR/01/2009.

BCM implementation covers all business units, among others through Crisis Management Team, Call Tree arrangement and alternate sites determination. In order to deal with the disruption/disaster in each of business units, BRI business units have already estimated the Disaster Risk and Threat Assessment to list and inventory required resources. BCM pilot project is prioritized to the business units in prone areas and its done annually, including BRI 1 Head Office, IT Building and Ragunan BRI Training Centre.

In order to ensure the execution of BCM procedures, the readiness of BRI organization has been tested well during disasters condition in several business units, while in 2013 there were disasters such as earthquake in Aceh, and floods in Ambon, Jakarta and Kendari. Availability of E-Buzz car and Mobile Terrace Bank (Teras Keliling) which are located throughout all of BRI business are utilized as an alternate site, and operated to service the customers sooner after the disasters condition. Therefore, the availability of these vehicles are very important to support the continuance of business and operational activities after the disasters condition.

7. New Product and or Activity Launching

In order to launch every BRI's new product and or activity, it involves risk management process that covers risk and control assessment which is done by product owner in every launch of new product and or activity, including control determination to mitigate the risks that might appear. Risk Management Unit are responsible to asses the risk mitigation adequacy and recommend the assessment result to the Risk Management Director. New Product and or Activity Launching is stipulated through BRI Circular Letter No. 03-DIR/DMR/08/2013.

8. Anti-Fraud Strategy Policy

Anti-Fraud Strategy has been implemented in accordance with BRI internal policy and procedure which concern on fraud cases handling in order to show the Management intolerance in fraud (zero fraud tolerance). Anti fraud strategy establishment and implementation is a part of risk management implementation, in order to prevent and manage fraud incident in BRI. Anti-Fraud Strategy covers 4 (four) pillars based on requirements from Bank Indonesia which are: prevention pillar, detection pillar, investigation, report, and sanction pillar, and evaluation, monitoring, and follow-up/action plan pillar. Statement of anti fraud commitment are signed by Board of the Board of Commissioners and Directors, management and all of BRI employees as a part of risk awareness and fraud prevention. Anti-Fraud Strategy Policy is stipulated through BRI Circular Letter No. S.106-DIR/DMR/05/2012.

These consolidated financial statements are originally issued in the Indonesian language.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

39. FAIR VALUE OF FINANCIAL ASSETS AND LIABILITIES (continued)

Methods and assumptions used to estimate fair value are as follows:

- a) The fair values of certain financial assets and liabilities, except for securities and Government Recapitalization Bonds classified as held to maturity, loans, derivatives receivable and payable, fund borrowings, subordinated loans and marketable securities issued approximate their carrying values due to their short-term maturities.

The estimated fair values of certain financial assets are determined based on discounted cash flows using money market interest rates for instruments with similar credit risk and remaining maturities.

The estimated fair values of certain financial obligations which are not quoted in an active market are determined based on discounted cash flows using interest rates of instruments with similar remaining maturities.

- b) Securities and Government Recapitalization Bonds

The fair values of securities and Government Recapitalization Bonds classified as held to maturity are determined based on market prices or price quotations of intermediary (broker) securities dealers. If the information is not available, fair values are estimated by using quoted market price of securities with credit characteristics, maturity and yield.

- c) Loans

BRI's loan portfolio generally consists of loans with floating rates and fixed rates. Loans are stated at carrying amount. The fair value of loans is derived based on discounted future cash flows expected to be received by BRI using current market rates.

Carrying value of loans with floating rate and short term fixed rate is a reasonable estimate of its fair value.

- d) Derivatives receivable and payable

The fair values of derivatives instrument valued by valuation techniques using components which can be observed in the market, primarily are interest rate swaps, currency swaps and currency exchange contracts. Most widely used valuation techniques include forward and swap valuation models which use the present value calculation. The models incorporate various components which include the credit quality of the counterparty, spot value and future contracts and interest rate curve.

- e) Fund borrowings, marketable securities issued and subordinated loans

Fair value is calculated based on discounted cash flow models by using market rates for the remaining maturity period.

These consolidated financial statements are originally issued in the Indonesian language.

(Expressed in millions of Rupiah, unless otherwise stated)

39. FAIR VALUE OF FINANCIAL ASSETS AND LIABILITIES (continued)

The following table presents financial instruments measured at fair value based on the hierarchy used by BRI to determine and disclose the fair value of financial instruments :

- a. Level 1: quoted from active market price for identical financial asset or liability;
- b. Level 2: involves input other than quoted active market price classified in level 1 which are observable for asset and liability, directly (price) or indirectly (derivative of price);
- c. Level 3: input for asset and liability which are not based on observable market data (unobservable input).

41. EMPLOYEES PROGRAM

a. Defined Benefit Pension Plan

Effective January 1, 2007, all newly appointed permanent employees are not included in the PPMP program. Under this program, the right to pension benefits is given based on the established conditions which are stated in the regulations of BRI with consideration to the yearly gratuity factor over the working period and income on the Pension Fund. BRI's pension plan is managed by Dana Pensiun BRI (DPBRI). According to the regulation in BRI's Directors' Decision Letter, the employee's contribution for pension contribution amounted to 7% of the employee's pension-based salary and any remaining amount required to fund DPBRI represents the contribution by BRI, amounted to 24.96% (previously 22.58%) since May 1, 2013.

The actuarial calculation of BRI's pension costs as of December 31, 2013 and 2012, was prepared by PT Bestama Aktuarial, an independent actuary, in its reports dated January 3, 2014 and January 4, 2013, respectively, which were prepared in accordance with SFAS No. 24 (Revised 2010), by using the "Projected Unit Credit Method" and considering the following assumptions:

	2013	2012
Annual discount rate	8.7%	5.67%
Annual pension-based salary growth rate	7.5	7.5
Annual pension benefit growth rate	4.0	4.0
Mortality rate	CSO 1958	CSO 1958
Disability rate	10.0% of CSO 1958	10.0% of CSO 1958
Normal retirement age	56 years old	56 years old

These consolidated financial statements are originally issued in the Indonesian language.

41. EMPLOYEES PROGRAM (continued)

a. Defined Benefit Pension Plan (continued)

Defined benefit pension expense for the years ended December 31, 2013 and 2012 based on the actuarial calculation is as follows:

	2013	2012
Current service cost	234,443	389,239
Defined contribution plan	(68,023)	(62,621)
Interest cost	814,185	737,427
Expected return on plan assets	(1,234,378)	(1,125,415)
Recognized actuarial gain-net	110,474	(17,464)
Immediate recognition of past service cost (non vested)	10,792	7,206
Immediate recognition of past service cost (vested)	179,298	569,480
Defined benefit pension expense (Note 34)	46,791	497,852

b. Old-Age Benefits Plan

BRI's employees are also given old-age benefits (THT) based on the regulation as stated in the Decision Letter of the Directors of BRI. BRI's old-age benefits plan is managed by Yayasan Kesejahteraan Pegawai BRI.

Old-age benefit contributions consist of payments from the employees and BRI's contributions in accordance with the requirements of the Decision Letter of Directors of BRI.

Based on the actuarial calculation of BRI's old-age benefits as of December 31, 2013 and 2012, which was prepared by PT Bestama Aktuarial, an independent actuary in its reports dated January 4, 2014 and January 4, 2013, respectively, which were prepared in accordance with SFAS No. 24 (Revised 2010), by using the "Projected Unit Credit Method" with the following assumptions:

	2013	2012
Discount rate	9.0%	5.8%
Salary's growth rate	7.5	7.5
Mortality rate	CSO 1958	CSO 1958
Disability rate	10.0% of CSO 1958	10.0% of CSO 1958

The status of the old-age benefits as of December 31, 2013 and 2012 based on the actuarial calculation is as follows:

	2013	2012
Assets at fair value	2,635,837	3,031,998
Present value of old-age benefits liability	(902,821)	(986,681)
Funded status	1,733,016	2,045,317

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

41. EMPLOYEES PROGRAM (continued)

b. Old-Age Benefits Plan (continued)

Old-age benefits expense for the years ended December 31, 2013 and 2012 based on the actuarial calculation is as follows:

	2013	2012
Current service cost	16,002	31,910
Interest cost	57,228	58,490
Expected return on plan assets	(303,806)	(228,582)
Recognized actuarial losses	297,193	194,907
Old-age benefits expense	66,617	56,725

For the years ended December 31, 2013 and 2012, BRI did not recognize the prepaid old-age benefits and the income of old-age benefits as BRI management has no benefits on those assets and has no plans to reduce its contributions in the future.

c. Defined Contribution Pension Plan

The employees of BRI are also included in the defined contribution pension plan in accordance with BRI Directors' decision which was effective October 2000. BRI's contributions to the plan which are reported in the consolidated statements of comprehensive income amounted to Rp124,322 and Rp104,385 for the years ended December 31, 2013 and 2012 (Note 34), respectively. This pension plan is managed by Dana Pensiun Lembaga Keuangan BRI.

d. Work Separation Scheme

(i) BRI (Parent Entity)

The calculation performed by the management of BRI of liabilities related to allowance for cost settlement of separation which include severance, gratuity and compensation benefits were based on actuarial valuation assumption in compliance with Labor Law No. 13/2003 dated March 25, 2003 as of December 31, 2013 and 2012. The actuarial calculations were performed by PT Bestama Aktuarial, an independent actuary, in its reports dated January 3 2014 and January 4, 2013, respectively, by using the "Projected Unit Credit Method" with the following assumptions:

	2013	2012
Discount rate	9.0%	5.8%
Future salary's growth rate	7.5	7.5
Mortality rate	CSO 1958	CSO 1958
Disability rate	10.0% of CSO 1958	10.0% of CSO 1958

The status of the work separation scheme as of December 31, 2013 and 2012 based on the actuarial calculation is as follows:

	2013	2012
Present value of work separation liability	(831,234)	(833,035)
Unrecognized actuarial (gain) loss	68,376	192,270
Work separation scheme liability	(762,858)	(640,765)

These consolidated financial statements are originally issued in the Indonesian language.

(Expressed in millions of Rupiah, unless otherwise stated)

41. EMPLOYEES PROGRAM (continued)

d. Work Separation Scheme (continued)

(i) BRI (Parent Entity) (continued)

Movements in the work separation scheme liability as of December 31, 2013 and 2012 are as follows:

	2013	2012
Beginning balance	640,765	533,471
Work separation scheme expense - net (Note 34)	160,472	138,314
Actual benefit payments by BRI	(38,379)	(31,020)
Ending balance (Note 27)	762,858	640,765

The calculation of work separation scheme expense for the years ended December 31, 2013 and 2012 based on the actuarial calculation is as follows:

	2013	2012
Current service cost	78,949	85,832
Interest cost	74,974	52,482
Recognition of current year losses	6,549	-
Work separation scheme expense (Note 34)	160,472	138,314

(ii) BRISyariah (Subsidiary)

The Subsidiary provides the work separation scheme based on the provisions of Labor Law No. 13/2003 dated March 25, 2003.

The following tables summarize the components of the work separation scheme expense recognized in the consolidated statements of comprehensive income and recognized in the consolidated statements of financial position for the work separation scheme liability as of December 31, 2013 and 2012, as determined by PT Katsir Imam Sapto Sejahtera Aktuarial, an independent actuary, in its reports dated January 2, 2014 and January 4, 2013, respectively, by using the "Projected Unit Credit Method" with the following assumptions:

	2013	2012
Annual discount rate	9.0%	6.0%
Annual salary's growth rate	5.0	5.0
Mortality rate	TMI-III 2011	TMI-III 2011

As of December 31, 2013 and 2012, the status of the work separation scheme based on the actuarial calculation is as follows:

	2013	2012
Present value of work separation liability	(28,080)	(27,423)
Accumulation of unrecognized actuarial gain	(11,622)	(2,501)
Work separation scheme liability	(39,702)	(29,924)

These consolidated financial statements are originally issued in the Indonesian language.

As of December 31, 2013 and 2012, BRI (Parent Entity) insured certain premises and equipment to PT Asuransi Bringin Sejahtera Artha Makmur (related party) (Note 17).

44. SIGNIFICANT AGREEMENTS, COMMITMENTS AND CONTINGENCIES

a. Communication Services Agreements

On December 16, 2013, BRI entered into an agreement with PT Telekomunikasi Indonesia Tbk in connection with the procurement of VSAT communication services in 1,250 (one thousand two hundred fifty) locations of offsite ATM for 3 (three) years with the contract value of Rp45,500.

On November 11, 2013, BRI entered into an agreement with PT Prima Vista Solusi in connection with the procurement of 2,567 (two thousand five hundred sixty seven) unit EDC LAN for UKO, 4,788 (four thousand seven hundred eighty eight) unit EDC GPRS for UKO and 10,074 (ten thousand seventy four) unit EDC *Triple Connection* ATM for 3 (three) years with the contract value of Rp53,542.

On November 8, 2013, BRI entered into an agreement with PT Pasifik Satelit Nusantara Mitrakom in connection with the procurement of VSAT communication services in 1,250 (one thousand two hundred fifty) locations of offsite ATM for 3 (three) years with the contract value of Rp45,500.

On September 12, 2013, BRI entered into an agreement with PT Tangara Mitrakom in connection with the procurement of VSAT communication services in 1,250 (one thousand two hundred fifty) locations of offsite ATM for 3 (three) years with the contract value of Rp43,550.

On September 5, 2013, BRI entered into an agreement with PT Satkomindo Mediyasa in connection with the procurement of VSAT communication services in 1,250 (one thousand two hundred fifty) locations of offsite ATM for 3 (three) years with the contract value of Rp45,125.

On August 13, 2012, BRI entered into an agreement with PT Satkomindo Mediyasa in connection with the procurement of VSAT communication services in 1,950 (one thousand nine hundred fifty) locations of offsite ATM for 3 (three) years with the contract value of Rp57,798.

These consolidated financial statements are originally issued in the Indonesian language.

(Expressed in millions of Rupiah, unless otherwise stated)

44. SIGNIFICANT AGREEMENTS, COMMITMENTS AND CONTINGENCIES (continued)

a. Communication Services Agreements (continued)

On March 19, 2012, BRI entered into an agreement with PT Telekomunikasi Indonesia in connection with the procurement of MPLS communication services in 1,200 (one thousand two hundred) locations of BRI VSAT offsite ATM for 3 (three) years with the contract value of Rp35,652.

b. Contingent Liabilities

In conducting its business, BRI is a defendant with various litigation proceedings and legal claims mainly with respect to matters of contractual compliance. Although there is no clear assurance yet, BRI believes that based on information currently available, the ultimate resolution of these legal proceedings and legal claims will not likely have a material effect on the operations, financial position or liquidity level of BRI.

As of December 31, 2013 and 2012, BRI has established an allowance (included in "Other Liabilities") for several pending lawsuits filed against BRI amounted to Rp328,630 and Rp826,661, respectively (Note 28). Management believes that the allowance is adequate to cover possible losses arising from pending litigations or legal claims that are currently in progress.

45. GOVERNMENT GUARANTEE ON OBLIGATIONS OF COMMERCIAL BANKS

Based on Presidential Decision No. 26 of 1998 as implemented by the Ministry of Finance Decision dated January 28, 1998 and the Joint Decrees No. 30/270/KEP/DIR and No. 1/BPPN/1998 dated March 6, 1998, of the Director of Bank Indonesia and Head of IBRA, the Government provided a guarantee on certain obligations of all locally incorporated commercial banks. Based on the latest amendment under the Decree of the Ministry of Finance Decision No. 179/KMK.017/2000 dated May 26, 2000, this guarantee is valid from January 26, 1998 up to January 31, 2001 and with automatic extension of the guarantee period continuously every 6 (six) months, unless within 6 (six) months before the maturity of the guarantee period or its extension period, the Ministry of Finance announces to the public the expiry and/or change in the guarantee program. For this guarantee, the Government charges premium which is computed based on a certain percentage in accordance with the prevailing regulations.

In accordance with Regulation No. 17/PMK.05/2005 dated March 3, 2005 of the Ministry of Finance, starting April 18, 2005, commercial bank obligations guaranteed by the Government Guarantee Program include demand deposits, saving deposits, time deposits and borrowings from other banks in the form of inter-bank money market transactions.

The Government Guarantee Program through UP3 ended on September 22, 2005 based on Regulation No. 68/PMK.05/2005 dated August 10, 2005 of the Ministry of Finance regarding the "Calculation and Payment of Premium on Government Guarantee Program on the Payment of Obligations of Commercial Banks" for the period of July 1 up to September 21, 2005. The Government established the Indonesia Deposit Insurance Corporation (LPS), an independent agency, to replace UP3 based on Law No. 24 of 2004 dated September 22, 2004 regarding "Deposit Insurance Corporation", in order to provide guarantees on public funds including funds from other banks in the form of demand deposits, time deposits, certificates of deposits, saving deposits and/or other similar forms.

Based on LPS regulation No. 1/PLPS/2006 dated March 9, 2006 regarding "Government Guarantee Program on Saving Account", the balance of saving accounts guaranteed for each customer has a maximum of Rp100 million.

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

45. GOVERNMENT GUARANTEE ON OBLIGATIONS OF COMMERCIAL BANKS (continued)

In accordance with Government Regulation No. 66 of 2008, dated October 13, 2008 regarding "The Amount of Public Savings Guaranteed by the Indonesia Deposit Insurance Corporation", the total amount of customers' saving accounts in banks which is guaranteed by the Government has increased to Rp2 billion, from the previous Rp100 million, effective on the date stated above.

LPS interest rates guarantee as of December 31, 2013 and 2012 were 7.25% and 5.5%, respectively, for deposits in Rupiah and 1.5% and 1.0% for deposits in foreign currencies, respectively.

46. STATEMENT OF FINANCIAL ACCOUNTING STANDARDS (SFAS) AND INTERPRETATION OF FINANCIAL ACCOUNTING STANDARDS (IFAS) ISSUED AND REVISED

The following summarizes the SFAS and Interpretation of Financial Accounting Standards (IFAS) which were issued by the Indonesian Financial Accounting Standards Board (FASB) and are relevant to BRI and Subsidiaries but not yet effective for consolidated financial statements as of December 31, 2013:

Effective on or after January 1, 2014:

- a. IFAS No. 28 "Extinguishing Financial Liabilities with Equity Instruments". This IFAS regulates when an entity as a debtor wants to resolve its financial liabilities through the issuance of equity instruments mechanism (debt for equity swaps).
- b. SFAS No. 102 (Revised 2013), "*Murabahah*", which is refinement of SFAS No. 102, published in 2008. This SFAS regulates the criteria of *murabahah* transactions related to recognition, measurement, presentation and disclosure.

Effective on or after January 1, 2015:

- a. SFAS No. 1 (Revised 2013), "Presentation of Financial Statements", adopted from IAS 1. This SFAS changes the grouping of items presented in Other Comprehensive Income. Items that could be reclassified to profit or loss would be presented separately from items that will never be reclassified.
- b. SFAS No. 4 (Revised 2013), "Separate Financial Statements", adopted from IAS 4. This SFAS prescribes only the accounting requirements when a parent entity prepares separate financial statements as additional information. Accounting for consolidated financial statements is determined in SFAS No.65.
- c. SFAS No. 15 (Revised 2013), "Investments in Associates and Joint Ventures", adopted from IAS 28. This SFAS describes the application of the equity method to investments in joint ventures in addition to associates.
- d. SFAS No. 24 (Revised 2013), "Employee Benefits", adopted from IAS 19. This SFAS, among other, removes the corridor mechanism and contingent liability disclosures to simple clarifications and disclosures.
- e. SFAS No. 65, "Consolidated Financial Statements", adopted from IFRS 10. This SFAS replaces the portion of SFAS No. 4 (Revised 2009) that addresses the accounting for consolidated financial statements, establishes principles for the presentation and preparation of consolidated financial statements when an entity controls one or more other entities.

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

46. STATEMENT OF FINANCIAL ACCOUNTING STANDARDS (SFAS) AND INTERPRETATION OF FINANCIAL ACCOUNTING STANDARDS (IFAS) ISSUED AND REVISED (continued)

Effective on or after January 1, 2015 (continued):

- f. SFAS No. 66, "Joint Arrangements", adopted from IFRS 11. This SFAS replaces SFAS No. 12 (Revised 2009) and IFAS No. 12. This SFAS removes the option to account for jointly controlled entities using proportionate consolidation.
- g. SFAS No. 67, "Disclosure of Interests in Other Entities", adopted from IFRS 12. This SFAS includes all of the disclosures that were previously in SFAS No. 4 (Revised 2009), SFAS No. 12 (Revised 2009) and SFAS No. 15 (Revised 2009). This disclosures relate to an entity's interests in other entities.
- h. SFAS No. 68, "Fair Value Measurements", adopted from IFRS 13. This SFAS provides guidance on how to measures fair value when fair value is required or permitted.

Currently BRI and Subsidiaries are in the process of evaluating and have not yet determined the impact of these issued and revised SFAS and IFAS on the consolidated financial statements.

47. OTHER DISCLOSURES

a. Capital Adequacy Ratio (CAR)

BRI actively manages its capital in accordance with the regulatory requirements. The primary objective of which is to ensure that BRI, at all times, maintains adequate capital to cover risks inherent to its banking activities without prejudice to optimizing shareholder's value.

CAR is the ratio of capital to Risk Weighted Assets (RWA), the computation is based on Bank Indonesia Regulation No. 10/15/PBI/2008 dated September 24, 2008, whereby the total capital for credit risk consists of core capital and supplementary capital. Banks which meet certain criteria have to consider market and operational risk in the computation of CAR by including additional supplementary capital component.

On December 31, 2012 BRI has implemented PBI No.14/18/PBI/2012 dated November 28, 2012 on Minimum Capital Reserve for General Bank based on Risk Profile Rating, which is the amendment to PBI No.10/15/2008 dated September 24, 2008, as the aforementioned regulation is initially effective March 2013 reporting position by using December 2012 risk profile. Based on the BRI's risk profile as of June 30, 2013, which is satisfactory, the minimum CAR per December 31, 2013 is set at 9% to less than 10%.

The determination of BRI's compliance with regulatory requirements and ratios is based on the regulatory accounting practices which differ from Indonesian Financial Accounting Standards in some respects. During the year ended December 31, 2013 and 2012, BRI has complied with the BI required capital adequacy ratio.

CAR of BRI (Parent Entity) as of December 31, 2013 amounted to 17.09% for the CAR credit risk and operational risk and 16.99% for credit risk, market risk and operational risk, meanwhile as at December 31, 2012 amounted to 17.03% for the CAR credit risk and operational risk and 16.95% for credit risk, market risk and operational risk are calculated as follows:

These consolidated financial statements are originally issued in the Indonesian language.

b. Non-Performing Loans (NPL) Ratio

As of December 31, 2013 and 2012, BRI's non-performing loans ratio including Sharia receivables and financing are as follows:

(i) Consolidated

	2013	2012
Gross NPL ratio	1.63%	1.83%
Net NPL ratio	0.36	0.38

(ii) BRI (Parent Entity)

	2013	2012
Gross NPL ratio	1.55%	1.78%
Net NPL ratio	0.31	0.34

Net NPL ratio is calculated based on NPL after deducting the minimum allowance for possible losses divided by the total loans amount in accordance with Bank Indonesia regulations.

These consolidated financial statements are originally issued in the Indonesian language.

(Expressed in millions of Rupiah, unless otherwise stated)

47. OTHER DISCLOSURES (continued)

c. Custodian Operations and Selling Agent

BRI rendered custodian services since 1996 based on its operating license through Bapepam Chairman Decision Letter No. 91/PM/1996 dated April 11, 1996 and was also selected as the Sub-Registry in conducting of Government bonds transactions and administration of Scriptless Certificates of Bank Indonesia by Bank Indonesia.

The custodian services business is a part of the Treasury Division, which provides services such as:

- Safekeeping, administration services and portfolio valuation;
- Transaction settlement (settlement/transaction handling) services;
- Income collection services, including the related tax payments;
- Corporate actions and proxy services;
- Information and reporting services, including information through website;
- Custodian Unit Link services, DPLK, KIK EBA; and
- On-line Brokerage services of BRI's shares.

BRI has (unaudited) 90 (ninety) and 91 (ninety one) customers as of December 31, 2013 and 2012, respectively, which mainly consist of pension funds, financial institutions, securities companies, insurance companies, mutual funds and other companies.

The custodian fees earned (unaudited) for the years ended December 31, 2013 and 2012 amounted to Rp25,550 and Rp18,015, respectively.

In order to improve services to customers, BRI Custodian currently provides information system accessible through the "Customer Information E-access" website, in order to provide more convenience to customers in obtaining information on their portfolio value.

BRI, who acts as a custodian Bank, coordinates with PT Asuransi Jiwa Bringin Jiwa Sejahtera, in developing "Unit Link" products which will be marketed through BRI Branch Offices, that appointed as the selling agents.

d. Trustee Agent Operations

BRI rendered trust services since 1990. The operating license of BRI for trust services was granted by the Ministry of Finance based on its Decision Letter No. 1554/KMK.013/1990 dated December 6, 1990 and registered in Bapepam in conformity with its Operating License as Trust Services No. 08/STTD-WA/PM/1996 dated June 11, 1996.

The trust services business is a part of the Treasury Division which provides services such as:

- Trust services
- Security agent
- Payment agent
- Sinking fund agent
- Selling agent of mutual funds and investment products.

BRI has (unaudited) 17 (seventeen) customers as of December 31, 2013 and 2012, respectively. The total value of bonds issuance on behalf of bonds issuers managed by BRI as part of its trust services (including security agents) (unaudited) amounted to Rp47,006,889 and Rp42,656,506 as of December 31, 2013 and 2012, respectively.

These consolidated financial statements are originally issued in the Indonesian language.

PT BANK RAKYAT INDONESIA (PERSERO) Tbk AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2013 and 2012
(Expressed in millions of Rupiah, unless otherwise stated)

47. OTHER DISCLOSURES (continued)

d. Trustee Agent Operations (continued)

The fees and commissions on trust services and other related services (payment agent) (unaudited) earned for the years ended December 31, 2013 and 2012 amounted to Rp5,590 and Rp5,142, respectively.

To comply with Bapepam-LK Regulation No. Kep-11/BL/2006 dated August 30, 2006 on "Mutual Funds Selling Agent Behavior", the selling agent services function previously performed by the custodian has been transferred to the Trustee Agent.

The total income from services as mutual funds and government retail bonds agent (unaudited) amounted to Rp4,583 and Rp2,957 for the years ended December 31, 2013 and 2012, respectively.

48. EARNINGS PER SHARE

The following presents the reconciliation of factors in the computation of basic earnings per share (EPS) attributable to the owners of Parent Entity:

	2013		
	Income for the year attributable to the owners of Parent Entity	Weighted average number of outstanding common shares (full amount)	Income for the year attributable to the owners of Parent Entity per share (Full Rupiah)
Income for the year attributable to the owners of Parent Entity	21,344,130	24,669,162,000	865.22
	2012		
	Income for the year attributable to the owners of Parent Entity	Weighted average number of outstanding common shares (full amount)	Income for the year attributable to the owners of Parent Entity per share (Full Rupiah)
